INSTITUT

calling all industries!

Increase profits
now—by knowing
accurately at
any time of the
day the exact
tally of production on any and
every machine

Metro High precision Counters enable you to control production by accurately counting both work done and wasted production at every stage of production. They help you co-ordinate production on various machines and save time, labour and raw materials by eliminating guesswork and manual counting.

Two types of METRO high Precision COUNTERS are available.

- Mechanical—for fixing on to working units
- 2. Electro Magnetic for remote panels.

Counters upto 8 digits with or without reset and with totaliser are available.

metro counters are available for anything that needs counting.

One year guarantee with each counter. Service before and after sales assured.

YOU CAN'T SEE THE DIFFERENCE

BALLPEN

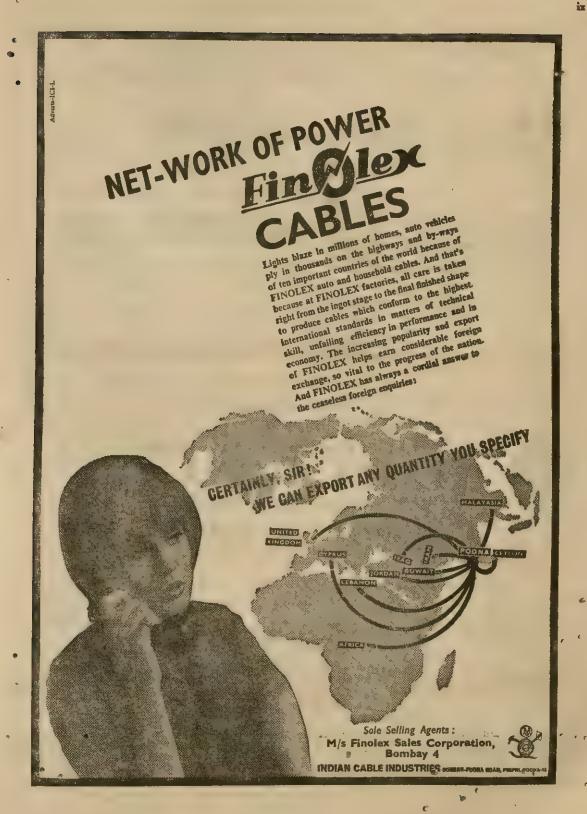

THE MOST DEPENDABLE NAME IN WRITING

Compare WILSON with other ballpens. You realize the difference only after the pen goes into action. To-day many ballpens look elegant, sophisticated and refined, yet they fall hopelessly in performance. But WILSON BALLPENS possess BEAUTY and 'unfailing' GOOD PERFORMANCE.

The ball-point is Inlaid for strength, putting speed, spontaneity, facility into every stroke of penmanship. The Ink flows instantly, evenly and smoothly, because it is alcohol based. WILSON'S Unique Refill can be fitted in similar imported Ballpens.

The heart of a refrigerator, water cooler or air conditioner is the compressor.

Versatile Range !

AE and CAJ Models for refrigerators, deep freezers, water/bottle coolers...and many other-applications.

AJ Models for air conditioners.

Be sure it's a strong heart.

To ensure your appliance keeps going, ask for the unique KIRLOSKAR HERMETIC COMPRESSOR (made in collaboration with TECUMSEH PRODUCTS COMPANY, U.S.A.—the world's largest manufacturers of hermetic compressors).

4 UNIQUE FEATURES:

- BETTER COOLING CAPACITY. Greater cooling power for faster, more efficient retrigerating performance.
- LOWER POWER CONSUMPTION. Special design features enable lower consumption of power, compared to other units of equal capacity.
- MOST COMPACT. Lightest, smallest compressor in the market. Easy to handle. Allows more storage space in refrigerators and coolers.
- QUIETEST. No other compressor can match. It for smooth, noiseless running.

Every compressor carries a one-year warranty, Efficient after-sales-service in all principal towns in India.

WERSATILITY

Kirloskar pumps have got it!

For over half a century we are manufacturing pumps with a wide range of applications. The tradition for quality and the experience of pioneers blended with the latest know-how go in every part of Kirloskar pump.

Pumps with a wide range of applications

- Irrigation * Sprinkler Schemes * Water works
- Booster Service
 Sewage
 Drainage
- Sandy water
 Storm water
 Fire Fighting
- Mines * Processing plants * Chemical Industry
- Sugar Industry * Viscous liquids * Paper stock
- Refineries * Dairies * Distilleries
- · Fertilizer Industry.

STARIT

While the role of water in industry is less important than its role in the lives of human beings, where it is indispensable, it is both ironic and fortunate that industry, not the biologic man, requires the chemically purer water. Virtually every industry, in some way, requires or could benefit from properly treated water to serve as a solvent, cleaning medium, heat exchange agent, ingredient or catalyst.

Hard water or water suffering from any one of a host of defects can affect industrial survival.

STARIT plays a big role in the purification of water the chemical way. STARIT water treatment plants are treating about 5 MGD water for almost every industry.

KIRLOSKAR VERTICAL TURRET LATHES

DYNACUT 915 mm. (36") & 1170 mm. (46")

Designed by world-famous BULLARD, U.S.A. and built by KIRLOSKAR, these lathes are widely used by the Railways, Foundries and other heavy industries.

Rigid construction ensures maximum stability during operation — for the highest degree

- of accuracy !
- * Hydraulic clutch and brake
- * Hydraulic speed control
- · Powerful chuck
- Table supported on radial taper roller and thrust bearings
- * Completely automatic lubrication system

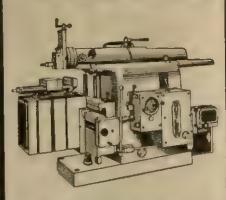

Machines can be equipped with POWER CHUCKING and POWER INDEXING.

Maximum turning dia.: 990 mm. and 1245 mm.

Table speed:

8-300 rpm and 6.83-250 rpm

26" SUPER SHAPERS

Manufactured under licence from BUTLER MACHINE TOOL CO. LTD., U.K. Designed for semi-heavy and medium industries, these modern shapers have advanced features that ensure akceptional afficiency and economy.

- Smooth running at all speeds
 - Greatly increased bearing surface
 - Mex. length of stroke: 660 mm. (26")
 - Power traverse to table
 - Power vertical down feed in tool box
 - * Feed rate can be changed in motion or rest
 - Patented link motion design features 2 steel rods
 - Rem can be adjusted in motion or rest
 - Automatic tool lifting

Andhra Pradesh (Hyderabad), Assam@ (Shillong), Bihar (Patna), Gujarat (Ahmedabad*), Haryana (Chandigarh‡), Kerala (Trivandrum), Madhya Pradesh (Bhopal), Tamil Nadu (Madras), Maharashtra (Bombay), Mysore (Bangalore), Nagaland (Kohima), Orissa (Bhubaneshwar), Punjab (Chandigarh‡), Rajasthan (Jaipur), Uttar Pradesh (Lucknow), West Bengal (Calcutta), Jammu and Kashmir (Srinagar).

The 10 Territories (with capital towns in brackets) are:

The Andaman and Nicobar Islands (Port Blair), the Laccadive, Minicoy and Amindivi Islands (temporary headquarters at Kozhikode, Kerala), Delhi (Delhi), Himachal Pradesh (Simla), Manipur (Imphal), Tripura (Agartala), Dadra and Nagar Haveli (Sylvasa), Goa, Diu and Daman (Panaji), Pondicherry (Pondicherry) and Chandigarh; (Chandigarh).

In addition, there is one territorial unit: The North-East Frontier Agency, administered by the Governor of Assam as Agent of the Central Government.

GEOGRAPHY

Bounded by the Himalayas in the north, the country stretches southwards and, at the Tropic of Cancer, tapers off into the Indian Ocean between the Bay of Bengal on the east and the Arabian Sea on the west. Lying entirely in the northern hemisphere, the mainland extends between latitudes 8°4′ and 37°6′ north and longitudes 68°7′ and 97°25′ east, measures about 3,219 km. from north to south and about 2,977 km. from east to west and covers an area of 32,76,141 sq. km.† It has a land frontier 15,168 km. long and a coastline of 5,689 km.

According to the 1961 Census the total population was 439,234,771.

The population grows roughly at the rate of $2\cdot 3$ per cent (i.e. about 13 million a year). The population of India in 1969-70 (estimate) was about 540 million.

Physical Features: The mainland comprises three well-defined regions 1) the great mountain zone of the Himalayas, 2) the Indo-Gangetic Plain and 3) the southern Peninsula.

The Himalayas comprise three almost parallel ranges interspersed with large plateaus and valleys some of which, like the Kashmir and Kulu valleys, are fertile, extensive and of great scenic beauty. In these ranges, some of the highest peaks in the world are situated. The high altitudes limit travel only to a few passes, notably the Jelep La and Nathu La on the main Indo-Tibet trade route-through the Chumbi valley, north-east of Darjeeling. The mountain wall extends over a distance of about 2.414 km. with a varying depth of 240 to 320 km. In the east between India and Burma and India and Pakistan, the hill ranges are much lower. The Garo, Khasi, Jamtia and Naga hills running almost east-west join the chain of the Lushai and Arakan hills running north-south.

The Indo-Gangetic Plain, 2,414 km. long and 241 to 321 km. broad, is formed by the basins of three distinct river systems the Indus, the Ganga and the Brahmaputra. Between the Yamuna river at Delhi and the Bay of Bengal,

nearly 1,609 km. away, there is a drop of only 214 metres in elevation.

The Peninsular plateau is marked off from the Indo-Gangetic Plain by a mass of mountain and hill ranges varying from 458 to 1,220 metres in height. The more prominent among these are the Aravali, Vindhya, Satpura, Mukala and Ajanta. The Peninsula is flanked on one side by the Eastern Ghats, where the average elevation is about 614 metres, and on the other by the Western Ghats where it is generally from 915 to 1,220 metres, rising in places to over 2,440 metres. Between the Western Ghats and the Arabian Sea lies a narrow coastal strip, while between the Eastern Ghats and the Bay of Bengal there is a broader coastal ares. The southern point of the plateau is formed by the Nilgiri Hills where the Eastern and Western Ghats meet. The Cardamom Hills lying below may be regarded as a continuation of the Western Ghats.

Geologically also, India consists of the same three distinct units, namely, the ancient block of the Peninsula, the Himalayas and their associated group of young fold-mountains and the Indo-Gangetic Plain.

India is so vast and diversified that expressions like 'average rainfall,' 'average temperature' have no meaning. The average annual rainfall in the Thar desert is 4 inches, while that in Cherrapunji is 425.

Similarly places in Kashmir have a minimum temperature of 49°F, while places in Rajasthan have recorded a maximum temperature of 120°F. So one can only speak of local averages rather than of national averages.

Compared with the size of the country, the coast-line is short, as there are few bays or inlets. Hence there are also very few harbours. The fact is the west coast is rocky and the sea is deep near the coast, while in the east the sea is extremely shallow so that big ocean-going ships have to weigh anchor at some distance from the shore.

The only so-called natural harbours are Bombay and Goa, while Madras, Vishakapatnam and Port Okha are examples of purely artificial harbours built by human enterprise.

The principal ports in India are (going from west to east along the coast), Kandla, Bedi Bunder, Port Okha, Porbandar, Surat, Bombay, Mormugao, Mangalore, Kozhikode (Calicut), Cochin, Alleppey, Quilon, Tuticorin, Dhanushkodi, Nagapattinam, Karikal, Cuddalore, Pondicherry, Madrae, Masulipatnam, Kakinada, Vishakapatnam and Calcutta.

The main cultivated plants include rice, wheat, pulses and grains. Among the important seeds grown are easter, seemum and ground-nut.

The chief fruit trees include mange, occount, arecanut and certain citrus fruit. Apples, peaches, pears, apricots and walnuts are confined chiefly to the Himslayan valleys.

There are tea plantations over large areas on the mountains in the north-cast and south, while coffee, cardamom, pepper and rubber are extensively grown in the south. In some of the damper regions the cinchona is successfully cultivated.

Among the wild animals are the tiger, the elephant, leopard, panther, the cheetah, the marbled and jungle cat, the wolf, jackal, wild dog, the black and the Himalayan bear, the rhinoceros, crocodile, wild hog, wild ass, antelope, gazelle, sambhar, spotted dear, bison, wild buffalo, many kinds of reptile (cobra, Russel's viper).

^{*}Actually a new capital is under construction outside the city. † Including Sikkim (7,107 sq. Km.). ‡ The Union Government announced on January 29 its decision to transfer the capital project area of Chandigarh to Punjab within the next five years. Pending the construction of a new capital for Haryana, Chandigarh will remain a Union Territory. @ An autonomous Hill State within Assam called the Meghalaya State comprising the Khasi, Garo and Jaintia hill districts of Assam came into being on April 2, 1970.

Among the domestic animals are cattle, buffaloes, sheep, goats, horses and ponies, mules and donkeys, camels, and fowl.

Birds include the parrot, peacock, mains, different kinds of vulture and eagle, kingfisher, pigeons, ducks, partridges, plover, quail and snipe.

Among the more useful insects are the bee, silk worm, coccus laca (the one that gives lac). Mesquitoes abound everywhere. Locust invasions are not frequent.

Edible fish include the carp family, cat fishes the hilsa and mahsoer.

River Systems. The rivers in India may be classified as follows: (a) the Himalayan rivers, (b) the Decean rivers, (c) the coastal rivers, and (d) the rivers of the inland drainage basin. The Himalayan rivers are generally snow-fed and have, therefore, continuous flow throughout the year. The Decean rivers are generally rain fed and, therefore, fluctuate very much in volume. The coastal streams specially of the West Coast, are short in length and have limited catchinent areas. The streams of the inland drainage basin of Western Rajasthan are few and far between. They drain towards the individual basins or

salt lakes like the Sambhar or are lost in the sands, having no outlet to the sea. The Luni is the only river that drains into the Rann of Kutch. The Ganga is joined by a number of Himalayan rivers including the Yamuna. Ghaghara and the Kosi. The western most river of the Ganga system is the Yamuna which joins the Ganga at Allahabad. Of the rivers flowing north from Central India into the Yamuna or the Ganga, mention may be made of the Chambal, the Betwa and the Sone.

The river basin of the Godavari is the second largest in India. It comprises about 10 per cent of the total area of the country. The basins of the Brahmaputra in the east and the Indias in the west are of about the same size. The Krishna basin is the second largest in Peninsular India. The other rivers are the Mahanadi, the Narmada in the uplands of the Deccan and the Kaveri in the far south. The Tapti in the north and the Pennar in the south are agriculturally very important.

Climate: The India Moteorological Department recognises four seasons: (1) the cold weather season (December March). (2) the hot weather season (April-May), (3) the rainy season (June-September) and (4) the season of the retreating south-west monsoon (October-November).

A TOURIST'S GUIDE

For all information and assistance, visitors are advised to contact the Government of India tourist offices in India. The representatives of the Tourist Department are stationed on duty at the airport and in the case of Bombay a representative of the Tourist Office always meets all important passenger liners.

THE following hints meant for foreign tourists may be useful:

1. Every foreign tourist entering India should be in possession of a valid passport issued by his Government.

He should also obtain before leaving his country a tourist visa from the Indian representative abroad (or the British representative in countries where there are no Indian representatives). Commonwealth citizens (except those of Pakistan, Ceylon, persons employed in the Defence Services of Pakistan), British subjects, British protected persons, British citizenship passport holders ordinarily residents of Kenya, nationals of Norway, Swed en, Denmark and Finland are exempt from the visa requirement, provided their passports are valid for travel to India. Persons of non-Indian origin domested in South Africa are, however, required to obtain visas for India.

Transit visas are not required for through air'ship passengers in direct transit by the same flight or by the next regularly scheduled flight irrespective of whether the flight is of the same or a different Airline, provided the period does not exceed 7 days. No landing permits will be issued to Pakistanis, South Africans of European extract, Portuguese of European extract, and citizens of People's Republic of China. However, in the case of Pakistanis, landing permits are issued for 24 hours' duration only. No direct transit facilities are, however, granted to the Chinese.

The normal period of stay cannot be stated. It depends upon the stay period granted by the visa issuing authority.

For short visits not exceeding 2 weeks to Pakistan, Nepal, Ceylon and Burma tourists may obtain return visas from the Deputy Commissioner of Police, Special Branch II. C.I.D., Head Police Office, Annexe-2, Mahatma Phule Market, Bombay or from State Government. For visits exceeding 2 weeks, they may apply for 'no objection' to return to India endorsements to the Deputy Commissioner of Police, Special Branch II, C.I.D., Bombay or State Government. However in such cases they will have to obtain visas from the Indian authorities abroad before entering India.

2. No registration is required for foreigners staying in India for 90 days or less provided they have come on visas of 3 months or less. If they land in India with visas for more than 3 months' stay, then they must report for registration within 7 days to the Registration Officer of their destination and present the "B" Form (temporary registration certificate) issued to them at the place of entry.

Commonwealth citizens are exempt from registration formalities, except British Passport holders whose national status is described as British Subject and missionaries, British protected persons and Australian protected persons.

Return viae or double/triple entry vise holders would be required to get themselves registered after 90 days of their actual stay in India and not after 90 days of their first entry into India.

Departures: Tourists, if they are registered, are exempted from reporting their movements and also from taking departure endorsements from the Registration Officer with whom they are registered.

It should be brought to the notice of tourists to surrender their registration papers at the time of their departure, as it is found that tourists or others who get themselves registered before the expiry of 90 days and leave India also before completion of 90 days, carry registration papers with them.

For holders of Entry Visas: Visitors holding registration certificates have to obtain before departure exit endorsements from the Registration Offices of the District in which they are initially registered.

3. The Government of India have placed no health restrictions on persons entering India by sea or air, except in regard to yellow fever.

Tourist visas are generally valid for a single journey only, but visitors who wish to proceed on short trips to other countries and return to India within the period of validity of the Indian visa, should apply for double or triple entry visas or entry-cum-transit/transit-cum-entry visas. If a visitor coming on short term visas wishes to extend his stay in India, he can, after arrival in India, apply for further extension of stay.

Foreigners who come on visits not exceeding three months for recreational or sightseeing purposes or for attending meetings convened by the Government of India or international bodies should, in their own interest, apply for tourist visas and not entry visas. Holders of tourist visas are entitled to the grant of Tourist Introduction Cards and All-India liquor permits, reservation of accommodation in Government-owned Rest Houses and Retiring Rooms at railway stations, etc.

4. All baggage is subject to customs examination. Articles of high value e.g. radios, cameras, binoculars, type-writers, transistors, etc. are exempted from duty provided they are entered in the re-export declaration form and re-exported within 6 months.

5. Tourists are allowed to bring into India foreign currency notes of any amount subject to declaration on the Currency Declaration Form issued by the customs at the air/sea port or checkpost on the land border.

There is no limit on the amount of Travellers' Cheques. Import and export of Indian currency are banned.

The official rates of exchange are as follows: £1 equal to Rs. 18:00; U.S. \$1 equal to Rs. 7:50. The actual buying and selling rates, however, differ slightly from these rates.

Additional concessions for tourists:

Liquor Permits: Bona fide tourists having Tourist Visas/Tourist Introduction Cards can obtain All-India liquor permits valid for three months from Indian Missions abroad or from the Tourist Offices of the Government of India at Delhi, Bombay, Madras and Calcutta if they have not already an All-India Liquor Permit from Indian Missions abroad. The Government of India Tourist Office at Bombay is at 123, Maharshi Karve Road, Bombay-20.

Sporting Fire-arms: Not more than three sporting firearms brought in by a tourist are allowed free of duty. These must, however, be re-exported within a period of six months.

Cartridges: 200 cartridges are allowed duty-free under the normal rules. Each tourist is allowed to bring in 200 cartridges, on payment of customs duty, but without an Import Trade Control Licence.

Film: A tourist is allowed to import 25 rolls of film or 48 plates for still cameras and 8 reels of substandard movie films duty free under the normal rules. Besides, he can import any number of rolls of films that could be adopted for the cameras imported without limit in quantity for still cameras after paying full customs duty without a licence. The quantity in excess of the duty free limit is subject to being entered on the Re-Export Form.

On production of a certificate from an authorised officer of the Tourist Department of the Government of India, foreign tourists are allowed a concession of 15 per cent on the basic air-conditioned first class fares and

'Travel As You Like' ticket on the Indian Railways, available for 30 days in an air-conditioned class of accommodation and in first class where air-conditioned accommodation is not available at a lump sum rate of Rs. 723,

TRAVEL AGENCIES

List of some Travel Agencies Approved by the Government of India with their telegraphic addresses within inverted commas:

Agra: Messrs. Travel Corporation of India Pvt. Ltd., Hotel Clarks Shiraz, Agra: "LEMUIR".

Ahmedabad: Lee & Muirhead (India) Pvt. Ltd., Kothari Mansion, Relief Road, Ahmedabad (Branch).

Bangalore: Bharat Travel Service (P) Ltd., D.9, 5th Main Road, Ghandhinagar, Bangalore.9 (Branch): "EXCURSION"; Messrs. Ram Mohan & Company Ltd., Chamber of Commerce Building, Kempe Gowda Road, Bangalore.9 (Branch): "GACANPAC"; Thos. Cook & Son Ltd., 200, Mahatma Gandhi Road, Bangalore (Branch): "COUPON"; Trade Wings (P) Ltd., 15, St. Mark's Road, Bangalore (Branch): "TRAVEL".

Bombay: American Express International, Oriental Building, 364, Dr. Dadabhai Nawroji Road, P.B. No. 507, Bombay-1 (Head Qrts.): "AMEXCO"; Asiatic Travel Service, Post Box No. 1569, 12, Murzban Road, Fort, Bombay-1 (Head Qrts.): "AIRASIA"; Balmer Lawrie & Co. Ltd., 5, Graham Road, Ballard Estate, Bombay-1 (Branch): "BALMER"; Cox & Kings (Agents) Ltd., Lloyds Bank Building, Dr. Dadabhai Nawroji Road, P.B. No. 398, Bombay-1 (Head Qrts.): "COXSHIP"; Everett Travel Service, 221, Dr. Dadabhai Nawroji Road, Post Box 523, Bombay-1 (Branch): "TRAVERETT"; Sita World Travel (India), 316, Nataraj Hotel, Bombay 1: "SITATRAVELL"; Jeena & Company, Post Box No. 849, 10, Veer Nariman Road, Fort, Bombay-1; "JUSTIFIA"; Lee & Muirhead (India) Pvt. Ltd., 12, Rampart Row, Fort, Bombay-1 (Head Qrts.): "LEMUIR"; Moroury Travels (India) Pvt. Ltd., 70, Forbes Street, Fort, Bombay-1. (Branch): "MERCTRAVEL"; Thos. Cook & Son (Continental Overseas) Ltd., P.B. No. 46, Cooks Building, Dr. D. Nawroji Road, Bombay-1. (Head Qrts.): "COUPON"; Trade-Wings (Private) Ltd., 30/32, Rampart Row, Fort, Bombay-1 (Head Qrts.): "TRAVEL"; Orient Express Co. Pvt. Ltd., UCO Bank Bildg., 359, Dr. Dadabhai Nawroji Road, Bombay 1.

Calcutta: American Express Co. Inc., P.B. No. 2311, 21, Old Court House Street, Calcutta (Branch): "AMEXCO"; Balmer Lawrie & Co. Ltd., 21, Netaji Subhash Road, P.B. No. 4, Calcutta-1 (Head Qrts.): "BALMER"; Everett Travel Service, 1, Old Court House Street, Calcutta-1. (Head Qrts.): "TRAVERETT"; Jeena & Company, 25, Notaji Subhash Road, Calcutta-1 (Branch): "TRAVELJENA"; Mercury Travels (India) Pvt. Ltd., Oberoi Grand Hotel, Calcutta (Head Qrts.): "MERCTRAVEL"; Sita World Travel (India) Private Ltd., 24-B, Theatre Road, Calcutta (Branch): "SITATRAVEL"; Trade Wings (Calcutta) Pvt. Ltd., 15, Old Court House Street, Calcutta-1. (Head Qrts.): "TRAVELLING"; Travel Corporation (India) Pvt. Ltd., Great Eastern Hotel, Calcutta (Branch): "TRAVELAIDS"; Speedways International. 3, Chowringhee Square, Calcutta-13 (Head Qrts.): "SKYINT"; Orient Express Co. Pvt. Ltd., National Tobacco Bldg., 1 & 2, Old Court House Corner, Calcutta.

Cochin: Harrison & Crossfields Ltd., Post Box No. 4, Cochin-1 (Head Qrts.): "CROSFIELD".

Coimbatore: Mossrs. Ashok Travels, Pvt. Ltd., R. B. No. 1484, India House, Trichy Road, Coimbatore-18.

Dehra Dun: A. S. Chugh & Co., 6, Astley Hall, Dehra Dun (U.P.) (Head Qrts.): "CHUGH",

Delhi: American Express Co., Inc., Hamilton House, A. Block. Connaught Place, New Delhi-1 (Branch): "AMEXCO"; Asiatic Travel Service, 1/90, Connaught Place, New Delhi-1 (Branch): "AIRASIA"; Cox & Kings (Agents) Ltd., Indra Place, Connaught Circus, P.B. No. 134, New Delhi-1 (Branch): "COXSHIP"; Everett Travel Service, Prom House, C-Block, Connaught Place, New Delhi-1 (Branch): "TRAVERETT"; Jeena & Co., Jeena House, 50, Hanuman Road, Connaught Place, New Delhi-1. (Branch): "TRAVELJENA"; Mercury Travels (India) Pvt. Ltd., Hotel Imperial, Janpath, New Delhi (Branch): "MERCTRAVEL"; Sita World Travels (India) Pvt. Ltd., 1st Floor, F12-13, Connaught Place, New Delhi (Head Qrta): "SITA-TRAVEL"; Trade-Wings (P) Ltd., 60, Janpath, New Delhi (Branch): "TRAVIT"; Travel Corporation (India) Pvt. Ltd., C-35, Connaught Place, New Delhi-1 (Branch): "TRAVELAIDS"; Orient Express Co. Pvt. Ltd., 70, Janpath, Now Delhi 1.

Hyderabad: Trade Wings (P) Ltd., Post Box 475, Abid Road, Hyderabad (Branch): "TRAVEL".

Madras: Asian Travel (India) Pvt. Ltd., 1, Patullos Road, Mount Road, Madras-2 (Head Qrts.): "WORL-TRAVEL"; Mercury Travels (India) Pvt. Ltd., Co Hotel Savoy, 39, Mount Road, Madras-6 (Branch): "MERCTRAVEL"; Ram Mohan & Co. Private Ltd., 362, Netaji Subhash Road, P.B. No. 1723, Madras (Head Qrts.): "GACANFAC"; Thos. Cook & Son (Continental & Overseas), 45, First Line Beach, Madras-1: "COUPON"; Trade-Wings (P) Ltd., Purushottam Buildings, 193, Mount Road, Madras (Branch): "TRAVELAGES"; Orient Express Co. Private Ltd., 35, Mount Road, Madras (Branch): "OFEXPRESCO".

Poona: Trade-Wings (P) Ltd., 321, Mahatma Gandhi Road, Poona (Branch): "TRADEWINGS".

Trivandrum: Kerala Travels, Mascot Hotel, Trivandrum-1 (Head Qrts.): "WELCOME".

SHIKAR OUTFITTERS

The following is a list of recognised shikar outfitters. The telegraphic address is given within brackets:

Allwyn Cooper (P) Ltd., Wardha Road, Nagpur: (QUALITY, NAGPUR); Indian Shikar & Tours (P) Ltd., Jumas Bhavan, 3/14A, Asaf Ali Road, New Delhi: (BIGGAME, NEW DELHI); Rao Naidu Shikars, Tara Villa, Benzonbagh, Nagpur: (BULLET, NAGPUR); Tigerland Shikars, 49-Denning Road, Jabalpur (M.P.): (FRANKLYWOOD, JABALPUR); Big & Small Game Hunting, Raghunathpur, Dist. Morena (M.P.): (TIGER, MORENA); Hunters & Hunters, 212-Olympua Apartments, Altamount Road, Bombay: (TIGERHUNT, BOMBAY); Shikar Adventures, 5-B-960 1, Faish Jung Lane, Jawaharlal Nehru Road, Hyderabad: (HUNTS, HYDERABAD); Wild Sports of India, 'The Grove', P.O. Hazaribagh, Bihar: (THE GROVE, HAZARIBAGH): Professional Flaunters, Sajjan Singh Bldg., Mount Road Extension Sadar, Nagpur; Carlton Tiger Hunters, Carlton Hotel, Shahnajaf Road, Lucknow: (CARLTON, LUCK-NOW): Kumaon Hunters (P) Ltd., Taipur Estate Farms, P. O. Afzalgarh, Dist. Bijnor (U.P.): (HUNTERS, AFZALGARH); Allwyn Mercury (N.I.) (P) Ltd., Hotel Oberoi Intercontinental, New Delhi: (INHOTELCOR, NEW DELHI); Dewas Tiger Hunters, Dewas (M.P.),

(Khas, Kothi, Bombay-Agra Road); Super Safaris, P.B. No. 365, Ghat Road, Nagpur: (RAJLAKS, NAGPUR); Shikar India, Talcher, Dhenkanal, Orissa: (SURESHOOT, TALCHER); Tiger Trophies, 430 Napier Town, Jahalpur; (TROPHIES, JABALPUR); Safaris India, 102, Simrole Road, Mhow (M.P.): (SAFARINDIA, MHOW); Jungleways, Pachmarhi (M.P.): (JUNGLEWAYS, PACHMARHI); Royal Safari, the Palace, Amod, Distt. Baroda, Gujarat; Tiger Sports (P) Ltd., The Garh, P.O. Bhadri (U.P.); Tigers & Tigers, M. I. Road, Jaipur; (TIGERS, JAIPUR); Maharaja Tiger Shikars, Brijraj Bhawan, Kota (Rajasthan); Spots & Strips Shikar Company, Tikra House, 25, Cantonment Road, Lucknow-l.

TOURIST OFFICES

The following is a list of Government of India tourist offices in India and abroad:

Director, Govt. of India Tourist Office, 123, Maharshi Karve Road, Bombay-20.

Director, Govt. of India Tourist Office, 88, Janpath, New Delhi.

Director, Govt. of India Tourist Office, 13. Old Court House Street, Calcutts.

Director, Govt. of India Tourist Office, 35, Mount Road, Madras.

Managor, Govt. of India Tourist Office, Krishna Vilas, Station Road, Aurangabad.

Manager, Govt. of India Tourist Office, The Mall, Agra. Manager, Govt. of India Tourist Office, 15-B, The Mall, Banaras.

Manager, Govt. of India Tourist Office, Willingdon Island, Cochin-3.

Manager, Govt. of India Tourist Office, Rajasthan State Hotel, Jaipur.

Director, Govt. of India Tourist Office, 19 East 49th Street, New York 17, N.Y.

Director, Govt. of India Tourist Office, 685, Market

Street, San Francisco 5, California.

Director, Govt. of India Tourist Office, Indisches
Verkehrsbure, Kaiser Strasse 77, Frankfurt/Main, W.

Verzohrsburo, Kaiser Strasse 77, Frankfurt/Main, W. Germany.

Director, Govt. of India Tourist Office, Carlton Centre,

Elizabeth Street, Sydney, N.S.W. (Australia).
 Director, Govt. of India Tourist Office. 8, Boulevard,

de la Madeleine, Paris-9.
Information Assistant, Govt. of India Tourist Office,

Railway Station, Jalgaon.

Manager, Government of India Tourist Office, Gulab Bhavan, Jammu.

Director, Govt. of India Tourist Office, 177-79, King Street (West), at University, Toronto, Canada.

Govt. of India Tourist Office, No. 1, Ginza, 7 Chome, Chuo-Ku, Tokyo (Japan).

Govt. of India Tourist Office, 201, North Michigan Avenue, Chicago (U.S.A.).

Note: Most of the State Governments have Tourist Offices at the important centres.

PLACES OF TOURIST INTEREST*

Mount Abu (hill station): Pop. 8,076 in Rajasthan, about 4,000 feet above sea-level. Places worth a visit: 1, the Dilwara Jain temples (11th-13th century, A.D.) containing the finest marble carvings in India, 2. Achalgarh temples (15th-16th century, A.D.) and Mandakini Kund, 3. Ruins of an ancient town called Chandravati, 4. Nakki Talao (lake), 5. Arbuda Devi, a shrine cut in rock, 6. Guru Shikhar (5,646 ft.), highest point in Abu, 7. Sunset point, 8. Palanpur point, 9. Gaumukh Temple and Agni Kund, 10, the Municipal Park. Mount Abu is reached by railway and road.

[•] When the population of a town is not given it may be generally assumed that it is less than 20,000.

Agra: Pop. 5,08,680, a city in U.P., stands on the Jamuna. It was the capital of the Moghul Empire. Places worth a visit: 1. the Taj Mahal, regarded by many as the most beautiful building in the world, 2. the Fort, 3. the Juma Masjid, 4. Moti Masjid, 5. the tomb of Itmad-ud-Daula, 6. Akbar's tomb at Sikandra about five miles from Agra, 7. Dayal Bagh, 8. Twenty-three miles from Agra is the deserted city of Fatehpur Sikri founded by Akbar.

Ahmedabad†: Capital of Gujarat; is the second largest textile centre in India. It contains numerous monuments of the fifteenth and sixteenth centuries. Pop. 11,49,918.

Places worth visiting are: 1. Jumma Musjid (1423); 2. Shah Alum's Mausoleum (1475); 3. Rani Sipri's Mosque (1540); 4. Mosque of Sidi Sayyad (1572) for traceried windows with palm and paradise design; 5. Shaking Minarets; 6. Shahi Baug where Gurudeo Tagore stayed during his youth and which supplied him with material for his Hungry Stones (story); 7. Teen Darwaza (three Gates); 8. Mahatma Gandhi's Sabarmati Ashram; 9. Kankaria Tank; 10. Gujarat University & Gujarat Vidyapitha; 11. ATIRA, Textile Research Institute.

Ajanta Caves: are 66 miles north of Aurangabad in Maharashtra. The rock-cut caves are 29 (5 chaityas or shrines and 24 viharas or monasteries, all Buddhist) and present a record of a unique combination of painting, sculpture and architecture of a period extending over nine centuries from about the 2nd Century B.O. to about 7th Century A.D. The caves can be reached from Aurangabad where there is a good railway hotel.

Allahabad: (also called Prayag); city in U.P. situated at the confluence of the Ganga and the Jamuna. It has an old fort and an Asoka pillar. Sixty-five miles from Allahabad is Kosambi, where the ruins of an ancient capital are being excavated. Pop. 4,11,055.

The confluence is the holiest bathing place for Hindus. Prayag is the holiest bathing place for Hindus in India. Every 12 years, Kumbha Mela (religious fair) is held attracting over 40 lakhs of pilgrims during the four weeks; a smaller fair occurs every six years—Adha Kumbhi.

The old Mughal Fort contains an underground temple where well carved images are seen and the pilgrims worship at a small tree taking it to be the Eternal Banyan Tree (Akshaya Vata).

Almora: headquarters of the district of the same name, in U.P. 83 miles from Kathgodam Railway Station, it is the main town in Kumaon Hills (q.v.). Perched at an elevation of 5,600 ft., it is about two miles in length, like a saddle, and is said to have been founded four hundred years ago by Raja Kalyan Chand. Almora has moderate rainfall, temperate climate, the temperature seldom rising above 88°F., even during the summer days, and comparative freedom from fog. Within easy distance of Almora are many Himalayan peaks Sceheo Debi, Bandnee Debi and Binsar being the chief ones. Binsar Hilf also known as Jhandi Dhar is only 13 miles from Almora and the bridle path leading to it, passes through enchanting jungle scenery.

Pindari Glacier can be reached from Almora at a distance of 75 miles, in eight stages, attaining an altitude of 13,000 to 14,000 ft. The most suitable time for this trip is either May-June or September-October.

Two other places in the Kumaon Hills are: Ranikhet and Naini Tal.

Amritsar: city in the Punjab, sacred to the Sikhs. Pop. 3,76,295. Amritsar is the very centre of the Sikh

religion and has a big trade in grain and textiles. Places worth a visit: 1. the Golden Temple, 2. Baba Atal Tower, 3. Akal Takht, 4. Ram Bagh Gardens, 5. Fort Govind Garh, and 6. Jalianwalla Bagh Memorial.

Aurangabad: in Maharashtra. Places worth a visit are:
1. Bibi-ka-Muqbara—the tomb of Auragzeb's wife which is a replica of the famous Taj, 2. Panchakki (old water-mill),
3. The shrine of Shah Musafir, 4. Eight Buddhist caves near the town. Pop. 87,579.

Anand: town half-way between Baroda and Ahmedabad, is the headquarters of the Amul Cooperative Society producing milk, butter, cheese and baby food. Without keeping any cattle of its own it is an up-to-date and modern unit with 40,000 members spread over an area of 1,300 square miles around it.

Bangalore: Largest city in Mysore and a health resort, is about 3,000 feet above sea-level. Places worth a visit: 1. Cubbon Park, 2. Lal Bagh, 3. Band-stand, 4. Race Course, 5. Maharaja's Palace, 6. Tippu's Palace, 7. Venkataramanaswamy Temple, 8. Vidhan Soudha (new Secretariat). Pop. 9,05,134.

Banaras†: town in U.P. on the Ganges, very sacred to the Hindus and Buddhists slike. It is in fact the religious capital of Hindu India and contains about 1,500 temples besides countless minor shrines. It is the oldest city in the country. Pop. 4,71,258. Places worth a visit: 1. Vishwanath Temple, 2. Bharat Mata Temple, 3. Manmandir, with Jaisingh's Observatory, 4. Aurangzeb's Mosque, 5. Gyan Wapi, 6. Nandeswar Kothi, 7. Ramnagar Fort, 8. Banaras Hindu University, and 9. Sarnath, a great Buddhist centre with many architectural remains, is about six miles from Banaras. The Buddha preached his first sermon here.

Barauni: Oil refinery in Bihar for processing crude oil, App. cost Rs. 39 crores. Also a Thermal Power Station,

Batanagar: an industrial town near Calcutta of the Bata Shoe Factory.

Belur: in Mysore State, noted for its elaborately sculptured temples of the Hoysala period.

Bhadravati: in Mysore State. The Mysore Government's iron and steel plant is located here.

Bhakra-Nangal: twin-towns, round the huge Rs. 170 crore hydro-electric and irrigation project in which the waters of the Sutlej are controlled by dams, and diverted for irrigation and the generation of electric power. A modern fertilizer factory was commissioned on Feb. 22, 1961 at Naya Nangal. Heavy water for Atomic Energy is also produced here for export.

Bhilai: in Durg district of M.P., is the site of an integrated iron and steel plant, set up in the public sector with Russian help.

Bhubaneshwar: Orissa's new capital; city of temples once said to number 7,000. Pop. 38,211. Places worth a visit: 1. Lingaraj Temple, 2. Mukteshwar Temple, 3. Parasurameswar Temple, 4. Raj Rani Temple. Noarby are the Jain and Buddhist rock-cut caves of Khandagiri and Udayagiri and Asoka's Rock Edict at Dhauli. Bhubaneshwar is on the main S. E. R. line between Waltair and Howrah, about 20 miles from Cuttack and 38 miles from Puri.

Bijapur: town in Mysore State, capital of the old Adilshahi Sultans of Bijapur, is rich with the remains of palaces, mosques and tombs. Places worth a visit: 1. Jami Masjid (the greatest mosque in South India), 2. Gol Gumbaz (the tomb of Mahammad Adil Shah and the second largest dome in the world), also called the Whispering Gallery, 3. Mehtar Mahal, 4. Ashar Mahal, 5. Gagan

^{*}A new capital is under construction outside the city.

The official name is Varanasi.

Mahal, 6. Chini Mahal, 7. Mecca Masjid, 8. Tas-Bavry (water-tank), 9. Malik-I-Maidan (Great Gun), 10. Landi-Kasab Gun, 11. Haider Burj (tower), 12. Ibrahim Roza (the tomb and mosque of Ibrahim II), 13. Jala Mandir (reservoir), 14. Chand Bavri (old tank), 15. Granary, 16. Bara Kaman Masjid, and 17. Begum Tank. Bijapur is a railway station on the Gadag-Sholapur section of the Southern Railway. Pop. 78,854.

Bokaro: in Bihar, site of the Bokaro Steel (public sector) plant, (distinct from Bokaro thermal power station of the D.V.C.) being built with Soviet help.

Bombay: second city and port in India, is the Gateway to India, Pop.*: 4,152,056. Area (Greater Bombay) 174 sq. miles. Places worth a visit: 1. the Gateway of India, 2. Apollo Bunder, 3. Prince of Wales Museum, 4. the Town Hall, and Central Library, 5. Rajabai Tower and University Building, 6. Victoria Terminus of the Central Railway, 7. the General Post Office, 8. Mahatmaphule Market, 9. Brabourne Stadium, 10. Chowpatty sands, 11. Malabar Hill, Hanging Gardens and Kamala Nehru Park, 12. Central Station, Terminus of the Western Railway, 13. Race Course, 14. Bhandarwada Reservoir and Gardens, 15. Victoria Gardens and Albert Museum, 16. Bharatiya Vidya Bhavan. Places near Bombay: 1. Juhu (sea-side resort), 2. Versova (sea-side resort), 3. Vihar Lake, 4. Kanheri Caves (rock-cut caves of Buddhist origin), 5. Jogeshwari Caves, 6. Vajreshwari (temple and hot springs), 7. Mandapeshwar (cave temple), 8. Nirmal (temple and lake), 9. Ambarnath (temple), 10. Pawai Lake and the Technical Institute, 11. Pali (hot springs and small game shooting), 12. Elephanta Caves, 13. Vaitarna (water supply scheme), 14. Aarey Milk Colony, 15. The oil refineries at Trombay, 16. The Atomic Energy Establishment at Trombay, 17. Fertilizer unit at Trombay.

Budh Gaya: near Gaya, in Bihar, a Buddhist centre of pilgrimage. It contains the famous Buddhist temple near the Bodhi Tree under which the Budha attained Enlightenment. Pop. 6,299.

Burnpur and Kulti: twin towns in which the Indian Iron and Steel Co. Ltd. has its works. Situated near Asansol on the border of West Bengal and Bihar, on the Grand Trunk Road.

Calcutta: until March, 1912, the headquarters of the Indian Government, and now, as then, the commercial capital of India, It is the terminus of three great railways, and the port of an immense river traffic. Though it lies 84 miles from the Bay of Bengal on the River Hooghly, it has a larger foreign trade than any other Indian port. It is the centre of five great industries—jute, tea, hides , and skins, coal and lac. Population : Calcutta City (Corporation) 2,927,289. Places worth a visit: 1. Victoria Memorial (contains a picture-gallery and museum), 2. the Indian Museum, 3. Zoological Gardens, 4. Jain Temple, 5. Kalighat Temple, 6. Belvedere House (where the British Viceroya stayed when on visit to Calcutta), now the National Library, 7. Raj Bhavan (residence of the Governor of West Bengal), 8. Marble Palace (containing art treasures, property of the Mullik family), 9. Fort William, 10. Eden Gardens, 11. Town Hall, 12. Haig Market, 13. Dalhousie Square, 14. Race Course, 15. Dakuria Lake, 16. Hindu bathing ghats, 17. Dakshineshwar Temple. Places near about Calcutta are: 1. Bally (holy place), 2. Belur (home of the Ramakrishna Mission), 3. the Botanical Gardens (contains the biggest banyan tree in existence), 4. Diamond Harbour (fort and customs house), 5. Dum Dum (airport of Calcutta).

Cambay: a city of antiquity and an old port in Gujarat.

Today it has acquired importance as Lunej oil and natural

gas have been discovered. Drilling with Russian technical help is in progress. (See article on 'Petroleum').

Chandigarh; now a Union Territory and also capital of Punjab & Haryana; youngest of Indian Capital cities. Chandigarh is situated near Kalka railway station of the Northern Rly. Pop. 89,321.

Chittaranjan: near Asansol, on the border of Bihar and W. Bengal. The industrial colony came into being with the establishment of the broad gauge locomotive and boiler and electric locomotive factory.

Conjeevaram (Kanchipuram): the city of temples, the Banaras of the South, is about 45 miles to the southwest of Madras. The place is divided into three parts, Shiva Conjeevaram, Vishnu Conjeevaram and Pillayar Paliyam, a testimony to the part played by all the main Hindu religious sects in the history of the city. There are over a thousand temples in all. Places worth a visit: 1, Kailasnath Temple (over 1,000 years old), 2. Vaikunth Perumal Temple (over 1,000 years old), 3. Ekambareswar Temple (400 years old), 4. Vedaraja Perumal Temple. Pop. 92,714.

Conjeevaram is on the Renigunta-Chingleput section of the Southern Railway and is easily accessible from Madras via Chingleput.

Cooncor: hill station on the Nilgiri Hills in Tamil Nadu, is about 6,000 feet above sea-level. The climate is mild and genial neither too hot in the summer nor too cold in the winter. The mean day temperature is 64 degrees. Places worth a visit: 1. Sim's Park (contains collection of plants), 2. Low's Waterfall, 3. Tiger Rock (hill fort). There are innumerable places for excursion and picnic purposes, e.g. the Droog, the Dolfin Nose, the Lamb's Rock, Laz Falls, Lady Canning Seat, the Ralliah Dam and Catherine Falls.

Coonoor lies on the narrow-gauge Mettupalayam-Ootacamund line of the Southern Railway. It is also connected by road with Ootacamund, and Kotagiri, another hill station.

Dalmianagar: is situated on the west bank of the river Sone, 350 miles by rail from Calcutta. The Rohtas Industries Limited and Ashoka Cement Limited, manufacturers of cement, paper, sugar, vanaspati, asbestos, cement sheets, etc., are located here providing employment direct and indirect to 60,000 persons.

Darjeeling: hill station in West Bengal, lies on the lower slopes of the Himalayas about 370 miles to the north of Calcutta. It is 7,110 feet above sea-level. The maximum temperature in the summer is about 70°F and the minimum in the winter is about 35. The town commands picturesque views including that of great peak Kanchenjunga and on a clear day of Mount Everest. Various sports are available such as fishing, shooting and horse-riding. Darjeeling has also a first-class sanatorium known as Eden Sanatorium. Places worth a visit; 1. Government House, 2. Town Hall, 3. Museum, 4. Observatory Hill (from where a magnificent view of Kanchenjunga can be obtained), 5. the Mail, 6. Natural History Botanical Gardens. 7. Birch Hill Park, 8. Senchal Lakes, 9. Ghoom Monastery, 10. Tiger Hill (from where the sun-rise over Everest is generally viewed on clear October mornings).

Darjeeling is the terminus of the meter-gauge Darjeeling-Himalayan section of the N.E. Railway and is about 27 hours' journey from Calcutta. From Siliguri where the visitor has to change, Darjeeling can also be reached by car. Pop. 40,651.

^{*} Greater Bombay. Note: Population figures are for 1961. † The Union Government announced on January 29 its decision to transfer the capital project area of Chandigarh to Punjab within the next five years. Pending the construction of a new capital by Haryana, Chandigarh will remain a Union Territory.

Delhi (New): the capital of India and the seat of the Union Government. New Delhi houses the President's House (Rashtrapati Bhavan), the Parliament, and the Secretariat and many new official buildings for the respective ministries: Rail Bhavan (Railways), Krishi Bhavan (Agriculture), Udyog Bhavan (Industry), Yojana Bhavan (Planning), Rabindra Bhavan and Vigyan Bhavan are centres for cultural activities. Pop. 2,61,515.

Delhi (Old): also called Shahjahanabad, the ancient capital of India stands on the Jamuna and is enclosed by a stone wall with seven gates. No city in India contains as many historical remains as Old Delhi. Pop. 9,14,790 (1951). Places worth a visit: Red Fort, Jama Masjid, Rajghat (Mahatma Gandhi's Samadhi), Ashoka Pillars, Feroze Shah Kotla, Purana Quila, Humayun's Tomb, Isa Khan's Tomb, Lodi Park and Lodi Tombs, Safdar Jang's Tomb, Kutub Minar, Tughlaqabad, India Gate or War Memorial Arch, Shanti Ghat (Jawaharlal Nehru's Samadhi), Vijay Ghat (Lal Bahadur Shastri's Samadhi), Shri Lakshmi Narayan Temple, Jantar Mantar or the Observatory.

Delhi is directly connected by rail and air with Bombay, Calcutta and Madras. Delhi also lies on the direct East-West transworld air routes linking India with all the major cities of the world.

Durgapur: in West Bengal, 100 miles from Calcutta, is the site of an integrated iron and steel plant in the public sector, set up with British help. The Durgapur Coke Ovens plant run by the Government of West Bengal, the Durgapur Barrage, the canal system and thermal power house (of the D.V.C.) are also located here. An optical glass unit, Coal Mining Machinery Plant of Heavy Engineering Corpn. Ltd., a Technical Institution and Alloy Steel Plant are also working to full capacity.

Elephanta Caves: on an island of the same name, about 6 miles from Bombay harbour, are dedicated to Shiva and the sculpture shows that God in His many forms. These belong to the 7-8th century. The main cave, almost 125 sq. ft. is the only impressive structure, and the rest of the island is used more as a picnic spot by holiday makers. There is a launch service as well as a ferry steamer. An official of the Archaeological Department is available on the spot.

The main figure of three-heads, Mahesh Murti, is considered among the world's most impressive sculptures, for its size, beauty and execution.

Ellora Caves: are situated about 15 miles to the north-west of Aurangabad. The caves excavated in the face of a hill are 34 and run north to south for a mile and a quarter. The hill has the shape of a crescent having Buddhist, Hindu and Jain cave temples. There are 12 Buddhist, 17 Hindu and 5 Jain caves. The Hindu caves are more lavishly decorated than others and Kailash which is the most impressive is also the biggest cave temple in India. It stands in a court averaging 154 feet wide, 276 feet long with a scrap 107 feet high at the back. The Ellora Caves are about a thousand years old. They are reached from Aurangabad by bus or car. Ghrishneshwar temple near the caves is one of the 12 Jyotirlingas of India.

Fatehpur Sikri: city founded by Akbar in 1569 but abandoned soon after, is 23 miles from Agra. The place contains a number of palaces, shrines, mosques built of marble and red sandstone. Buland Darwaja, the Gateway of Victory, built to commemorate the conquest of Khandesh, is 176 feet high and is the highest gateway in India. It forms the southern gateway to the most imposing structure in Fatehpur Sikri, the Jami Masjid, said to be a copy of the mosque at Mecca or Medina, Panch Mahal,

Diwan-i-Khas (Hall of Private Audience), Mariam's House, Palace of Jodh Bai, House of Birbal, Elephant Tower and Khas Mahai are other notable buildings. Fatehpur Sikri has a railway station, and it can be reached by car.

Gandhigram: about 25 miles from Madurai (South India) is a new colony, a large training centre intended to put Gandhian principles into actual practice.

Gandhigram (Visakhapatnam); near Waltair in Andhra, is one of the major ports and the site of a shipbuilding yard.

Gaya: big town in Bihar, on the Phalgu river, sacred to Hindus and Buddhists alike. The Vishnupada temple, built by Ahilyabai Holkar of Maheshwar over the foot-print of Vishnu is the centre of the pilgrimage and the Akshaya Vata, the Eternal Banyan tree, is an object of veneration. See also Budha Gaya. Pop. 1,51,105.

Gersoppa Falls (see Jog Falls).

Gulmarg: an ideal hill station in Kashmir, about 29 miles from Srinagar, is a little less than 9,000 feet above sea-level. It boasts of all modern facilities and is particularly noted as a winter playground for skating, ski-ing, tobogganing, and golf. Round about are ideal places for walks, rides and excursions.

Hardwar: U. P. a great Hindu pilgrim centre, is situated at the foot of the Siwalik hills on the right bank of the Ganga where the river enters the plains. The bathing ghat is called Hari Ki Payri (step of Hari). Every twelfth year the Kumbh Mela is held, which has a special sanctity. Devout pilgrims proceed from here further up to Rishikesh, and to Badrinath. Pop. 58,513.

Hirakud: the site of the Rs. 30-crore multi-purpose project across the Mahanadi in Orissa. (See also under Irrigation'.)

Hyderabad-Secunderabad*: the twin city linked together by the Hussain-Sagar (lake), is the capital of Andhra Pradesh and is centrally situated for all-India communications. It is a railway junction as well as an important air-port, and stands on the banks of the river Musi. It has many attractions. Char Minar (four minarots) dominates the City with 80 ft. high minarets, built in 1591; Osmania University with its impressive building and Ajanta Pavilion; Town Hall; State Museum and Art Gallery; Salarjung Museum—one of the richest and most varied collections in Asia; Health Museum and Public gardens. Golconda Fort forms one of the suburbs of Hyderabad. Many new industries are coming around the city. Pop. 12,51,119.

Imphal: north-east frontier town and capital of Manipur. It is celebrated for its handloom products. Pop. 67,717.

Jaipur: capital of Rajasthan, is a well laid-out modern city. Jaipur pottery, brass ware, sculpture, ivory and sandalwood work and jewellery have enjoyed a great reputation from ancient times. Pop. 4.03,444. Places worth a visit: 1. Maharaja's Palace, 2. Jai Singh's Observatory, 3. Amber (ancient capital), 4. Hawa Mahal, 5. Palace Armoury, 6. Cenotaphs of the Queens, 7. Galta (place of pilgrimage) and Ghat, 8. School of Arts, 9. Public Library, 10. Transport Gardens, 11. Museum.

Jaipur is on the metre-gauge line of the Western Railway between Ahmedabad and Delhi.

Jetsar: near Suratgarh, in Rajasthan, site of another mechanised farm about 30,000 acres.

[•] Secunderabad is the headquarters of the South-Central Railway. Note: Pop. Figures are for 1961.

Jog Falls: also known as Gersoppa Falls in Mysore State, are one of the highest waterfalls in the world. The Sharavati takes a big leap down a steep rock from a height of 830 feet. The breadth of the stream here is 230 feet and in four separate cascades known as the Raja, Roarer, Rocket and the Lady, it takes a magnificent leap. The best time to see them is early December.

Junagadh: in Gujarat, is situated below the Girnar Hill and is one of the most ancient cities in India. The temples on the hill are noted for their architecture and delicate painting. On the way to Girnar is a rock with an Asoka edict. Pop. 74,298.

In Junagadh is the famous Gir Forest—the only place in Asia where lions are found.

Jwalamukhi: in the Kangra Hills where gas has been discovered. Drilling is in progress with Rumanian technical help. (See article on 'Petroleum'.)

Kangra Valley: famous for its picturesque land-scapes and historic temples, lies in Himachal Pradesh. Semi-urban hill stations are Kangra and Dharamsala. Places worth a visit in Dharamsala are: 1. Bhagsunath Water Springs; 2. State Quarries; 3. Himalayan Snow View. The chief means of conveyance are cars and buses. There is also a dak bungalow at Dharamsala. To get to the Kangra Valley a visitor has to change at Pathankot into the narrow-gauge railway which runs to Nagrota. Dharamsala can also be reached from Pathankot by car.

Kanheri: near Bombay, is known for its Buddhist caves dating back to the 1st century A.D. It is about twenty miles from Bombay.

Kanya Kumari: in Tamil Nadu, is the southern-most tip of India. Here the Arabian Sea and the Bay of Bengal meet the Indian Ocean. A view of sun-rise and sun-set is rewarding.

It is within easy reach of Trivandrum.

The spot is sacred to the Hindus and a place of pilgrimage. A memorial to Swami Vivekanand is being created on the rock in the sea.

Kashmir: unsurpassed for the beauty of its mountains. lakes and valleys Kashmir is the northern tip of India. Its capital Srinagar on the Jhelum is 5,000 ft. above sea-level and known for its shawls and carpets and beautiful wood-work, rich embroidery and papier-mache articles. Its fruits and vegetables are equally well-known. Well-furnished, luxurious house-boats moored along the winding Jhelum or in the Dal Lake provide all necessary comforts amidst charming natural surroundings. The normal recreations include Shikara rides on the lakes and canals, mountain-climbing, big and small game hunting, golf, fishing and swimming. Gulmarg, Sonamarg and Pahalgam are holiday resorts in the neighbouring mountains and can be reached by motorable road. The road to Srinagar is via Pathankot and Jammu. There is a regular air service from Delhi to Srinagar. Places worth a visit: 1. The Moghul Gardens: a. Shalimar, b. Chashmashahi, c. Acchabal, d. Nishat; 2. The lakes: a. Dal Lake, b. Wulur Lake, c. Anchar Lake, d. Manasbal Lake and so on; 3. Historical and religious places: a. Martand temple, b. Pandranathan temple, c. Bhaumazu caves, d. Avanti Pura, e. Pari Mahal and f. Sankaracharya Hill.

Khajuraho: in Chhattarpur in Madhya Pradesh, is famous for its group of highly ornate mediaeval Hindu temples. From the nearest railway station Harpalpur on the Jhansi-Manikpur line, it is about 60 miles by motorable road. It has dak bungalows and circuit house rooms.

Kiriburu: iron ore mines, in the Bonai range of Keonjhar and Singhbhum districts being developed with USA's ADF and Japanese help.

Kirloskarvadi: in Maharashtra, is an industrial colony established over 50 years ago, where agricultural implements and a variety of engineering goods have been manufactured.

Kodaikanal: famous hill station on the Palni Hills in Tamil Nadu. It is about 7,000 feet above sea-level and has a temperate climate. The place affords plenty of scope for such recreations as walking, hiking, boating, fishing, hill climbing and golf. For the more adventurous there is big game hunting. Kodaikanal is the delight of the gardener and flowers are in bloom all the year round. Places worth a visit: 1. the lake skirted by a three-mile road; 2. the water falls like a Fairy Falls, b. Silver Cascades, c. Bear Shola Falls, d. Glen Falls, c. Pamber Falls; 3. There are view points like a. Coaker's Walk, b. Pillar Rocks, c. Prospect Point, d. Vambadi Shela Peak, c. Dolphin's Nose; 4. the Solar Observatory.

Konarak or Konark: in Orissa, is a huge Temple of the Sun also called the Black Pagoda. It is remarkable both as an example of ancient Indian architecture and sculpture and of engineering skill. Konarak is about 50 miles from Puri, 40 miles from Bhubaneshwar. The road is open from November to May.

Korba: in Madhya Pradesh is the site of a new coal mine and a thermal station from which the Bhilai Steel Project gets most of its power supply. Coal from Korba will also be used in Bhilai.

Koynanagar: in Satara district, Maharashtra, is 30 miles from Karad station on the Southern Railway. Here the turbulent waters of the Koyna are controlled and diverted through an underground tunnel on the other side of the hill for generating electricity.

Kulu Valley: well-known for the variety of its scenery, fruit orchards and places of historical interest is situated in Himachal Pradesh, north of Simla. It is ideal for hiking and trout fishing. The road runs from Pathankot or Nagrota the rail-heads into the valley. The summer is never uncomfortably hot. The main centres of the Kulu Valley are: 1. Kulu or Sultanpur, the principal town, about 4,000 feet above sea-level. It is the main shopping centre and has a dak bungalow, many rest-houses; 2. Raison, 8 miles from Sultanpur and 4,700 feet above sea-level. The available sports are golf, tennis and swimming. Mayflower and the Shacks are two hotels; 3. Katrain, is in the widest part of the Valley, 12 miles from Sultanpur and 4,800 feet above sea-level; 4. Naggar, summer headquarters, is 5,800 feet above sea-level; 5. Manali, the head of the valley and terminus of the motor road, is 23 miles from Sultanpur and is situated amid typical Alpine scenery. Accommodation is available at Sunshine Orchards, Departmental rest houses and Mission Hospital. Pathankot is the rail-head for Kulu. From Pathankot, Kulu is reached by bus or car, or from Pathankot to Nagrota by metre gauge railway and from there by bus to Kulu.

Lonavla-Khandala: in Maharashtra, lie in the heart of the Western Ghats. Hill forts associated with Maratha rule are in the vicinity. The Karla, Bhedsa and Bhaja caves, 10 miles from Lonavla, are an added attraction (see also under Poona District).

Lucknow: the city of gardens is the capital of U.P. It is well-known for its pottery, copper and brass-ware, wood and ivery carvings and gold and silver embroidery on cloth, and rich perfumes. Pop. 595,440. Places worth a

visit: 1. Great Imambara, 2. Small Imambara, 3. Tombs of Wajid Ali Shah and his Begum, 4. Kaiser Bagh Palace, 5. Chattar Manzil, 6. Dilkhusha Palace, 7. Moti Mahal, 8. Machi Bhavan Palace, 9. Jumma Masjid, 10. Charbagh, 11. Alambagh, 12. Sikander Bagh, 13. Musa Bagh, 14. Wingfield Park, 15. Residency, 16. Havelock's Tomb, 17. Clock Tower, 18. Museum, 19. Observatory, 20. Iron Bridge. Lucknow is a big junction on the Northern Railway.

Madras: the third largest city in the subcontinent and the capital of Tamil Nadu. Pop. 17,29,141. Places worth a visit: 1. Fort St. George (contains the oldest Protestant church in the country where Clive was married), 2. High Court, 3. Light House, from the top of which one can get a panoramic view of the city, 4. Marina, is one of the most beautiful promenades in the world, 5. the Museum, 6. Connemara Library, 7. the Zoo, 8. the Observatory, 9. Moore Market, 10. Parthasarathy Temple, 11. Mylapore Tank and Kapaleshwar Temple, 12. St. George's Cathedral. 13. St. Thomas Mount, 14. Race Course, 15. the Integral Coach Factory at Perambur, 16. Adyar, the headquarters of the Theosophical Society.

The seven Pagodas of Mahabalipuram are 35 miles by road from Madras and can also be reached by road from Chingleput Railway Junction.

Madurai: the second biggest city in Tamil Nadu, is a great religious centre, a seat of Tamil literature and Hindu temple art. The silk-weaving and textile industries of Madurai are also noteworthy. Places worth a visit: 1. The Great Temple, actually two temples of Meenakshi and Shiva, 2. Tirumala Nayak's Palace, 3. Gandhi Museum and Gandhigram. Pop. 4,24,810.

Mahabaleshwar: a hill station in Maharashtra. Can be reached from Poona by road.

(See under Satara District.)

Matheran: the nearest hill station to Bombay is 2,650 feet above sea-level. In a walk round the eighteenmile circumference of the hill the visitor can reach 33 points of which the following deserve mention: 1. Garbut Point, 2. Panorama Point, 3. Poroupine Point, 4. Louisa Point, 5. Chowk Point, 6. Alexandra Point, 7. Belvedere Point, 8. Echo Point, 9. Monkey Point. At every one of these points the visitor will find comfortable seats, shady trees and fine views. Charlotte Lake, Paymaster Park, Band-stand, Castle Hill Tower, Race Course are other places of local interest.

Matheran is reached from Neral Station between Bombay and Poona. From Neral there is a light railway to Matheran. One can do the journey by rickshaw or pony.

Mathura-Brindavan: in U.P. is an important place of pilgrimage for Hindus, because of its associations with Shri Krishna. Near the railway station is Curzon Archaeological museum which houses unique relics of Kushan art. Six miles from Mathura is Brindavan. Places worth a visit: 1. Govind Dev Temple, 2. Gopinath Temple, 3. Ranganath Mandir.

There are travellers' bungalows. Brindavan is accessible by railway or road from Mathura. Pop. 125,258.

Mussoorie: A hill station in U.P. lies 18 miles from Dehra Dun. It is 6,580 feet above sea-level. The town has excellent water-supply, electric lighting system, hospitals, nursing homes and some of the best schools in India both for boys and girls. Places worth a visit: 1. The falls like a. Bhatta Falls, b. Kamptee Falls, c. Hearsay Falls, d. Mossy Falls, 2. Wimper's Tank, 3. Band-stand. Mussoorie is reached from Dehra Dun by car or bus and is about two hours' journey. Pop. 9,849.

Mysore (City): second city in the State. It attracts great crowds twice a year namely the Maharaja's birthday and the Dasarrah. Places worth a visit: 1. The palace of Maharaja and Jaganmohan Palace and so on, 2. Chamundi Hill, 3. Zoological Gardens, 4. Silk Factory, 5. Sandalwood Factory, 6. Krishnarajasagar Dam and the Brindavan Gardens, about 12 miles from Mysore. Pop. 2.53.865.

Nagarjunasagar: See under VIJAYAPURI.

Naini Tal: hill station in U.P. is about 6,350 feet above sea level. Among the principal recreations are hiking, boating and yachting on the lake around which the town stands, and fishing and riding. Places worth a visit: 1. Cheena Peak, 2. Land's End, 3. Lariya Kanta Peak, 4. Sher-ka-Danda Peak, 5. Tiffin Top or Dorothy Seat, 6. Camel's Peak or Deopatta Peak. Naini Tal is 22 miles from Kathgodam railway station which is connected with Bareilly and Mathura. From Kathgodam one goes by bus or car to Naini Tal which is 22 miles away. Pop. 14,995.

Nalanda: in Bihar, approachable from Patna by rail or motor, contains a group of ruined Buddhist temples and monasteries and a small local museum. It was the seat of an ancient university where Chinese and Korean Students had studied.

Nasik: in Maharashtra and 117 miles from Bombay on the Central Railway, is a place of pilgrimage for Hindus and is famous for Buddhist rock-cut temples of the first century B.C. and later. Pop. 1,31,103. The golf links at near-by Deolali are an added attraction.

Nepanagar: in M.P. is the site of the only newsprint factory in India. (See also 'Government Industrial Undertakings'.)

Neyveli: in South Arcot District, in Tamil Nadu, about 150 miles from Madras, is the site of lignite mines, a great thermal power house and centre of industrial development.

Ogalewadi: near Karad, near the confluence of the Krishna and the Koyna (Dist. Satara).

Ogalewadi is the glass-town founded by one of the pioneering industrialists, Mr. Ogale. The activities include enamelling, making of hurricane lanterns, safety stoves and electrical equipment.

Octacamund: hill station in Tamil Nadu, stands 7,500 feet above sea-level on the Nilgiris. Places worth a visit: 1. Botanical Gardens, 2. Race Course, 3. Assembly Room, 4. Dodda Betta, the highest peak in the Nilgiris, 5. Pykara Hydro-Electric Dam which is about 18 miles from Octacamund. Octacamund is the terminus of the Nilgiri mountain railway and 6. Kundah Hydro-electric Scheme which includes many lakes, dams and power houses. Pop. 50,140.

Pachmarhi: hill station, was summer capital of Madhya Pradesh, lies on the Mahadeo hills of the Satpura Range and is about 3,500 feet above sea-level. Places worth a visit: 1. Bee Dam, 2. Mahadeo Caves, 3. Dhupgarh, highest point in the Satpuras, 4. Dorothy Deep Falls, 5. Duchess Falls, 6. Lansdowne Hill, 7. Nilphur Springs, 8. Waters Meet, 9. Big Falls, 10. Pansy Pool, 11. Twipram Pool, 12. Saunder's Pool, 13. Pandava Caves. Pachmarhi is reached from Pipariya Station on the Central Railway between Bombay and Jabalpur. From Pipariya, Pachmarhi is 32 miles. There are facilities for swimming, trekking and riding. Pop. 653.

Pandharpur: town in Shelapur District in Maharashtra, It stands on the Bhima and is one of the most frequented places of pilgrimage in Maharashtra. The centre

of devotion is the temple dedicated to Vithoba, an incarnation of Vishnu. Fairs are held annually. Pop. 45,421.

Perambur: a suburb of Madras where an integral railway coach factory is situated.

Pimpri: near Poona, is the place where the Hindustan Antibiotics factory is located. It manufactures penicillin. (See also under 'Government Industrial Undertakings'.)

Pipri: in Mirzapur District in U.P. is the site of the Rs. 46-crore Rihand dam across the Rihand, for the generation of power and for irrigation.

Poona: in Maharashtra and 120 miles from Bombay, with historical buildings is the educational and cultural centre of Maharashtra. Places worth a visit are: Shanwar Wada, the National Chemical Laboratory, the Defence Academy and the Central Water and Power Research Station at Khadakvasia, Other show-places near Poona are: Sinhagad and Purandar, The Bhandarkar Oriental Research Institute and the Poona University, Gokhale Institute of Politics and Economics and many research institutes are worth a visit. Population 7,21,896. †

Porbandar: in Gujarat, is the birth-place of Mahatma Gandhi and an attractive summer resort. Pop. 75,081.

Prabhas Patan: in Gujarat, is the site of the famous Somnath Temple, which was destroyed and rebuilt several times.

Puri: (Jagannath Puri): Jagannath Puri is a temple town in Orissa. The Jagannath temple is a great Vaishnavite Centre of pilgrimage. Fifty miles from Puri is Konarak, the Sun Temple. Pop. 60,815.

Rameshwaram: this holy town in Tamil Nadu is built on an island in the Palk Straits. It contains one of India's most venerated temples, perhaps the finest example of South Indian architecture. It is in the form of a quadrangular enclosure 650 ft. by 1,000 ft. The temple is renowned for its vast pillared corridors nearly 4,000 ft. long. It is near the tip of the Indian peninsula. Pop. 6,801.

Ranchi: hill station and summer resort of Bihar, noted for its picturesque scenery and fine roads. It is the site of Heavy Machine Building Plants and headquarters of Hindustan Steel Ltd. Pop. 1,40,2531.

Rourkela: in Orissa about 250 miles from Calcutta on the main line to Nagpur, is the site of an Iron and Steel Plant in the public sector set up with German help. In addition, a special fertilizer plant has also been erected

Sanchi: small village near Bhopal in Madhya Pradesh, famous for the Buddhist stupa which is the largest and the best preserved in India.

Santiniketan: in West Bengal, is the home of the Visva Bharati, the international university founded by Rabindranath Tagore. Places worth a visit are: Rabindra Bhavan (the poet's residence) where his personal belongings, manuscripts, etc. are on display and the poet's mud hut where he wrote many of his books.

The place is 91 miles from Calcutta on the Eastern Railway and 2 miles from Bolpur Station.

Seringapatam: or Srirangapattana in Mysore State, 9 miles by road from Mysore city was the capital of Tipu Sultan. It is situated on an island on the Kaveri, It has the Sultan's fort, mosque and palaces. There are also many old temples. Pop. 11,423.

Sevagram: near Wardha in Maharashtra is the village where Mahatma Gandhi founded his ashram. It has been the home of many Gandhian institutions.

Shatrunjaya Hills: Shatrunjaya, near Palitana in Saurashtra, is also known to the Jains as Siddhagiri or

† Including Poons Cantt. & Kirkes Cantt. capital of Punjab. Including Derenda. Siddhachala or the Hill of the Perfected Ones. It is a sacred place (tirtha) of Shvetambara Jains. There are a great number of temples in groups on tonks or summits.

Shillong: is the capital of Assam. Thirty-six miles from here is Cherrapunji, the wettest place in the world. Pop.

Simla: the summer capital of British Government of India and the Government of the Punjab,* is situated on a spur of the Himalayas at a height of 7,200 feet. Places worth a visit: 1. President's House, 2 Race Course, 3. Jakko Hill, 4. Observatory Hill, 5. Prospect Hill, and 6. Mashobra-Mahasu, seven miles away. All through the scenery is superb, with mountain peaks or luxuriant foliage. Simla is now the capital of Himachal Pradesh. Pop. 42,597.

Sindri: the site of the big fertilizer plant in Bihar.

Somnath: see under Prabhas Patan.

Sravanabelgola: in Mysore State, is noted for its Jain temples and the colossal statue of Gomatesvara which is 65 ft. high, the tallest monolithic in the world. It was erected in 983 A.D.

Suratgarh: in Rajasthan is the largest single mechanised agricultural farm (30,000 acres) utilising complete set of machinery and equipment presented by U.S.S.R.

Tanjore: in the delta of the Cauvery river in Tamil Nadu is noted for its temples and palaces. It was the capital of the Cholas. Places worth a visit: 1. Brihadishvara temple built by Raja-Raja the great, 2. Naik's Court, 3. Maratha Court (the two together are often called the Palace in Tanjore). Pop. 1,11,099.

Udaipur: in Rajasthan, is a city of lakes with island palaces. Seventy miles from Udaipur is Chittorgarh, the abandoned capital of Mewar and its Tower of Victory. Pop. 1,11,139.

Ujjain: on the Sipra in Madhya Pradesh, is one of the seven cities sacred to the Hindus. Also known as Avanti. The Oriental Museum has many valuable manuscripts and pieces of sculpture. Is supposed to be the seat of King Vikrama. Mahakaleshwar temple is an attraction of pilgrimage, Pop. 1,44,161.

Vallabh Vidyanagar: near Anand (Dist. Kaira) is the seat of Sardar Vallabhbhai Patel University, with arts & science, engineering, agricultural, teachers' training colleges on the extensive campus. Some industrial units (prestressed concrete, electrical wire) are also working in the vicinity. The township is on an ideally laid out plan. A railway (Western) station with the same name is nearby; but Anand is more convenient for this University

Vijayapuri (East & West): on either side of the Nagarjunasagar dam across the Krishna, 90 miles from Hyderabad.

The great Buddhist sage and philosopher Nagarjunacharya lived and taught here. The University was known as Nagarjunkonda. Extensive excavations have brought to light important pieces of sculpture, housed in a big museum nearby.

Walchandnagar: In Poona district, is an industrial colony, with extensive cane cultivation on mechanised scale, sugar and alcohol production, huge workshop for manufacturing sugar making machinery, plastic buttons and dairy products.

HOTELS

List of some leading Western style hotels:

AGRA: Hotel Clarks Shiraz, 54, Taj Road; Lauries Hotel, Mahatma Gandhi Road, Agra Cantt.; Grand Hotel, 137, Station Road, Agra Cantt.

Note: Population figures are for 1961.

· Chandigrarh is now the

AHMEDABAD: Cama Hotel, Khanpur Road; Hotel Alankar, Opp. Rly. Station; Hotel Capital, Chandanwadi, Mirzapur.

ALLAHABAD: Barnetts Hotel, 14, Mahatma Gandhi Road.

AMRITSAR: Hotel Airlines, Cooper Road.

UDAIPUR: Lake Palace Hotel; Garden Hotel; Rajasthan State Hotel.

VARANASI: Clarks Hotel, The Mall.

WALTAIR (VISAKHAPATNAM): Sun-N-Sea, Beach Road, Vlsakhapatnam.

Besides the hotels in different places there are tourist bungalows in Bijapur, Bhubaneshwar, Gaya, Khajuraho, Konarak, Madurai, Mahabalipuram, Mandu, and Tanjore.

TOURIST TRAFFIC*

FOREIGN TOURIST ARRIVALS IN INDIA-1968

(These statistics relate to foreign tourists excluding nationals of Pakistan).

A total of 188,820 foreign tourists visited India during 1968 showing an increase of 5.2 per cent over the corresponding figure for 1967 (179,565), which recorded an increase of 12.5 per cent over 1966.

North America: Canada 3,575; U.S.A. 41,721.

South America: Mexico 688; Others 1,717.

Western Europe: Austria 1,143; Benelux 3,098; France 8,786; Germany 9,862; Italy 2,740; Scandinavia 3,792; Spain 629; Switzerland 3,251; U.K. 29,821; Others 882.

Eastern Europe: Czechoslovakia 854; U.S.S.R. 2,057; Others 2,321.

Africa: Kenya 2,254; Malawi 107; South Africa, R. of 1,554; Tanzania 1,733; Uganda 1,063; Others 1,891.

West Asia: Aden 248; Persian Gulf countries 3,067; Iran 1,175; Others 2,458.

East Asia: Afghanistan 3,112; Ceylon 19,899; Japan 6,024; Malaysia 8,032; Philippines 822; Thailand 1,384; Others 7,327.

Australia : Australia 8,322; New Zealand 1,234; Others 177.

DEVELOPMENT OF TOURISM

The Third Plan for development of tourism included an allocation of Rs. 8 crores—Rs. 3.5 crores in the Central Sector and Rs. 4.5 crores in the State Sector.

During 1969, a total of 2.45 lakh tourists arrived in India and India earned Rs. 38.11 crores from tourism as against Rs. 26.42 orores in 1968,

The Government of India has set up the India Tourism Development Corporation in the public sector for promoting tourism and providing facilities for tourist traffic in the country. For more details about the corporations see article on "All India Corporations".

Fourth Plan: A sum of Rs. 25 crores has been allocated for the development of tourism in the Fourth Plan. Of

this Rs. 10.77 crores have been set apart for India Tourism Hotel Corporation Schemes and Rs. 5 crores for Hotel Development Loan Fund,

The India Tourism Development Corporation has opened "Duty Free Shops" at Bombay, Delhi and Calcutta. A fourth shop is proposed to be opened at Madras. A duty-free shop is a tourist facility provided by many countries at international airports.

DEFENCE SERVICES

Chief of the Army Staff, General S. H. F. J. Manekshaw.

Chief of the Naval Staff, Admiral S. M. Nanda.

Chief of the Naval Staff, Air Chief Marshal P. C. Lal.

THE supreme command of all the Armed Forces of the Indian Republic is vested in the President. The Ministry of Defence has become the central agency for formulating and obtaining policy decisions of the Government of India on defence matters and for transmitting them to, and seeing to their implementation by the three Defence Services Headquarters.

The total defence outlay on revenue and capital account for 1969-70 is estimated at Rs. 1,183-20 crores as against the revised estimates of Rs. 1,051-38 crores during 1968-69.

DEFENCE ORGANISATION

Each Service has been placed under a separate and independent head, namely the Chief of the Army Staff, Chief of the Naval Staff and Chief of the Air Staff.

The task of co-ordination of the activities of the three Services has devolved on the Defence Ministry for which a net work of committees has been established at different levels.

At the top is the Defence Committee of the Cabinet. All important policy questions relating to defence are decided by this Committee, which is presided over by the Prime Minister.

The Defence Minister is responsible to Parliament for all matters relating to the Defence Services, including appropriation and allotment of funds, correlation of all civil and ministerial activities for purposes of defence and control and direction of research policy.

The Ministry of Defence is responsible for work connected with the three Services and Inter-Service Organisations, the Department of Defence Production, the Department of Defence Supplies, the Research and Development Organisation and the Border Roads Development Board.

There are a number of Inter-Services organisations, directly administered by the Defence Ministry, dealing with matters of common concern to the three Services. Some of them are the National Cadet Corps, the National Defence College, the Defence Services Staff College, the National Defence Academy, the School of Foreign Languages, the Directorate-General of Armed Forces Medical Services, the Resettlement Directorate, the Indian Soldiers', Sailors' and Airmen's Board, the Combined Inter-Services Historical Section, the Directorate of Military Lands and Cantonments, the Joint Cipher Bureau and the Directorate of Public Relations.

There is a separate Department of Defence Production in the Defence Ministry to direct, co-ordinate and strengthen the production base for building a sound defence system.

A Research and Development Council with the Defence Minister as Chairman, formulate defence science programmes. Apart from the Defence Minister, the other members of the Council are the Minister of State in the Ministry of Defence (Vice-Chairman), the Defence Secretary, the Secretary for Defence Production, the Scientific Advisor to the Defence Minister, the Director-General of C.S.I.R., the Chiefs of Staff of the Army, Navy and Air Force, the Director-General of Armed Forces Medical Services, the Financial Advisor (Defence), the

Chief Controller of Research and Development and the Director-General of Inspection. The Council has under it the Defence Research and Development Organisation, headed by the Scientific Adviser, who is assisted by the Chief Controller and the Chief Scientist.

The Defence Minister's Production Committee forms part of the higher defence control evolving a co-ordinated policy in regard to the manufacture of military stores and equipment. It has under it the Department of Defence Production, for the overall production effort for meeting the requirements of the Services by the maximum utilisation of the existing capacity and creating additional capacity in the Ordnance Factories. The Director-General of Ordnance Factories, the six public sector undertakings and two departmental undertakings come under the Department of Defence Production. The Directorate-General of Inspection is responsible for the inspection of

all stores for which orders are placed with the Ordnance Factories, other defence and public undertakings and private trade.

RESEARCH & DEVELOPMENT

The Research and Development Organisation which is closely associated with the Production Organisation includes technical establishments dealing with weapons, ammunition, military explosives, metallurgy, electronics and optical instruments. Whereas research is carried on in the laboratories, development work is concentrated at the various technical establishments scattered all over the country.

The Institute of Armament Technology provides facilities for a comprehensive scientific study and research in the performance of weapons and equipment.

There are at present about 30 establishments, major and minor, under the R. and D. Organisation, catering to the needs of the Armed Forces. Among the new research units are the Institute of Nuclear Medicine, the Institute of Physiology, the Food Research Laboratory, the Solid State Physics Laboratory, the Electronics Research Laboratory and the Institute of Work Study.

A Psychological Research Directorate of the Science Organisation conducts research in the assessment of human personality so that the right type of officers may be selected for the Armed Forces. There are two major electronic Development Establishments in the country dealing with communication equipment, tele-communication line equipment and radars. A beginning has been made on a third establishment for the development of missiles.

A Defence Science Service has been instituted to include all civilian scientists engaged in research, development, inspection or teaching in any of the three Services or in the Ministry of Defence.

Theoretical training for the engineering profession to those already receiving practical training, is now being given at defence installations in practically all parts of the country to prepare students for the Associate Membership examinations of the Institution of Engineers (India), the Institution of Tele-Communication Engineers and the Aeronautical Society of India.

The Defence Production Board has been set up to examine and recommend to Government plans for defence production, production of new items and stock-piling of raw materials.

ORDNANCE FACTORIES

The Production Organisation which has under it 26 Ordnance Factories, is so designed as to achieve self-sufficiency in respect of stores required by the three Services and has made continuous efforts to establish production of items hitherto imported.

The Ordnance Cable Factory for the manufacture of field cables for the Army started functioning in September 1963, the New Explosives Factory — in December 1964. The Heavy Vehicles (Tank) Factory has gone into production. The first Indian-made medium tank, 'Vijayanta' rolled out of the factory on Dec. 29, 1965. Regular production has been established in the factory. Of the five more Ordnance Factories to be set up, the Small Arms Ammunition Factory, went into production in Oct. 1964, with U.S. aid, much ahead of schedule. Another factory the Ordnance Factory, Tiruchirapalli was inaugurated by the Prime Minister on July 3, 1966. Two other new factories have been set up.

Apart from substantially augmenting the manufacture of established armaments and equipment, the Ordnance Factories took up the production of several new items during 1963-64. Significant amongst these are a 7-62 m.m. semi-automatic Ishapore rifle and its ammunition, a new heavy mortar with a longer range and its ammunition, new types of tank ammunition, new santi-tank ammunition, an anti-aircraft gun and its ammunition, improved carbines to replace sten-guns, and modified light machineguns and bolt-action rifles to take the new rimless 7-62 ammunition.

A light mountain gun, with a higher range, has been successfully developed and its production started. A new plant has been set up at the Cordite Factory for the manufacture of semi-solvent propellants for rockets and commissioned, and so also a plant at another Ordnance Factory for a new type of ammunition for the Air Force.

To ease the transport problems of the Army, about 9,500 three-ton Shaktiman trucks, with an indigenous content of about 76 per cent had been manufactured in the Ordnance Factories by the end of Feb. 1969. In addition, 19,667 one-ton Nissan carriers and 6,536 Nissan jeeps, with an indigenous content now of 45.46 and 33.2 per cent respectively, have rolled out of the assembly lines so far.

The production of conventional arms, snow and ski equipment, winter and cotton clothing supply-dropping

parachutes, line-gear and saddlery items has also been greatly stopped up.

Over the years, the value of production in the Ordnance Factories has jumped from about Rs. 5 crores in 1947-48 to an estimated Rs. 108 crores in 1968-69.

HINDUSTAN AERONAUTICS LIMITED

(See under article "Government Industrial Undertakings").

A.M.D. AND A.I.L.

The Aircraft Manufacturing Depot, set up at Kanpur in 1960 under the Air Force for the manufacture of the Avro-748—a medium twin-engined, turbo-prop, pressurised and air-conditioned transport aircraft, capable of short take-offs and landings, with ability to operate from unprepared surfaces—was in 1963 made a departmental undertaking under the direct control of the Department of Defence Production.

This factory has so far (Dec. 1969) delivered a number of aircraft to the I.A.F. and eight to I.A.C. against the orders of fourteen for its internal services.

The Aeronautics (India), Ltd., was registered in Delhi in August 1963 to undertake the manufacture, under a licence agreement with the Government of the U.S.S.R., of a modified, single-engined MIG-21 supersonic fighter aircraft, complete in all respects.

Substantial progress has been made in the establishment of the M.I.G. factories at Nasik, Koraput and Hyderabad. The production of M.I.Gs. is going on according to schedule. The last phase of production from raw material has started. The aircraft manufactured in the first two phases have been delivered.

To streamline aircraft manufacturing industry in the country, all the existing units have been brought under the unified control of Hindustan Aeronautics Ltd. (HAL).

BHARAT ELECTRONICS LTD.

(See under article "Government Industrial Undertakings").

SHIP-BUILDING AND REPAIRS

The Production Organisation has also under it the Mazagon Dock, Ltd., Bombay,† and the Garden Reach Workshop, Ltd., Calcutta.† While these shipyards continue to carry out refits and repairs of commercial ships, they also do so for naval ships.

The Hindustan Aeronautics Ltd., The Bharat Electronics Ltd., Bangalore, the Praga Tools Ltd., Secunderabad and the Bharat Earth Movers Ltd., Bangalore, are the other public sector undertakings under the Department of Defence Production in the Ministry of Defence. Crawler-Tractor assembled by BEML rolled out recently.

NATIONAL CADET CORPS

Aim: (1) to develop character, comradeship, ideal of service and capacity for leadership in young men and women, (2) to stimulate interest among youth in the defence of the country, and (3) to build up a reserve of manpower to enable the Armed Forces to expand rapidly in a national emergency. The organisation is, thus, mainly of an educational and nation-building character. Officers and cadets have no liability for active military services.

A certain percentage of the total intake of candidates for commissioned ranks in the Army, Navy and Air Force, on the basis of direct entry to the Armed Forces training institutions, has been reserved for N.C.C. cadets of the three Services.

[†] See under article "Government Industrial Undertakings" for more details.

The N.C.C. consists of three divisions: (1) Junior, (2) Senior and (3) Girls'.

TRAINING INSTITUTIONS

The important training institutions common to the three Services are given below:

National Defence College, New Delhi: Trains senior officers of the three Services on the pattern of the Imperial Defence College in the U.K. Its main purpose is to enable students to study the military, scientific, industrial, social, economic and political factors involved in war as also the higher direction and strategy of warfare.

Defence Services Staff College: The Defence Services Staff College is located in Wellington in the Nilgiri Hills in South India. One hundred officers drawn from all the three Services, including six officers from the U.S.A. and Commonwealth countries are trained every year. The aim of the course is to prepare officers to hold second-grade or equivalent staff appointments or higher staff or command appointments.

National Defence Academy, Khadakvasla: Army, Navy, and Air Force cadeta receive three years' combined basic training.

Rashtriya Indian Military College, Dehra Dun: Brings up future officers of the three Services by impurting preliminary pre-cadet training to such pupils as desired subsequently to choose a military career.

School of Foreign Languages, New Deihi; Meets the growing demand for qualified linguists. It also conducts examinations in various Indian languages for service personnel.

Armed Forces Medical College, Poona: Is designed to meet the requirements of the integrated medical services of the Army, Navy and Air Force.

Military Schools: Located at Bangalore, Ajmer, Chail, Belgaum and Dholpur. These Military Schools provide public-school education for the children of serving personnel. Children of civilians are also admitted now.

Sainik Schools: There are at present 15 Sainik Schools located in the States of Andhra Pradesh, Assam, Bihar, Gujarat, Kerala, Madhya Pradesh, Tamii Nadu, Maharashtra, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal, imparting middle and secondary school public education with a military bias.

ARMED FORCES MEDICAL SERVICES

The Directorate General of the Armed Forces Medical Services is the head of the integrated medical services of the Army, the Navy and the Air Force. The D.G.A. F.M.S. is the chairman of the Medical Services Advisory Committee with the Directors of Medical Services of the Army, the Navy and the Air Force as members. The committee makes recommendations to Government through the Chiefs of Staff Committee on matters of medical organisation or policy.

The Directorate has under it the Armed Forces Medical College and the Artificial Limb Centre, Poons.

RESETTLEMENT DIRECTORATE

The Directorate-General of Resettlement in the Defence Ministry deals with matters relating to the rehabilitation of ex-Servicemen in civil life.

In the matter of employment, the Government have accorded preference to ex-Servicemen in filling up appointments in police, excise, watch and ward and other departments for which military training is a qualification.

SOLDIERS', SAILORS' AND AIRMEN'S BOARD

The Indian Soldiers', Sailors' and Airmen's Board, New Delhi, is the most important official institution connected with the welfare of serving personnel of the Armed Forces and ex-Servicemen and their families.

GALLANTRY AWARDS

The Param Vir Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice whether on land, at sea or in the air. It ranks first among all awards.

The Maha Vir Chakra is awarded for conspicuous acts of gallantry whether on land, at sea or in the air.

The Vir Chakra is awarded for acts of gallantry whether on land, at sea or in the air.

Ashok Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice. Kirti Chakra is awarded for conspicuous gallantry and Shaurya Chakra for gallantry.

A system of Mention-in-Despatches was also instituted. A 'lotus leaf' emblem is worn by the awardees on the ribbon of the campaign/war medal concerned.

NEW SERVICE MEDALS

Param Vishisht Seva Medal, Ati Vishisht Seva Medal and Vishisht Seva Medal respectively are awarded to personnel of all the three Services in recognition of distinguished service of the "most exceptional", an "exceptional" and a "high" order respectively. Sainya Seva Medal to all Service personnel in recognition of non-operational duties under conditions of hardship and severe climate, and the Videsh Seva Medal to all ranks of the Armed Forces for duties outside India. The Army, Navy and Air Force medals are awarded in recognition of such individual acts of exceptional devotion to duty or courage as have special significance for the Service concerned.

Two new Medals are Samar Sova Star and Raksha Medal.

INDIAN ARMY

Army H.Q.: The Head of the organisation located in New Delhi, is the Chief of the Army Staff. He is assisted by the Vice-Chief of the Army Staff and four other Principal Staff Officers (the Deputy Chief of the Army Staff, the Adjutant General, the Quartermaster General, the Master General of the Ordnance) and two Heads of Branches (the Military Secretary and the Engineer-in-Chief).

Under the Army H.Q., the Indian Army is organised into four Commands—Eastern, Western, Southern and Central, each being under a General Officer Commanding-in-Chief of the rank of Lieutenant-General. The Commands are divided into Areas, each under the command of a G.O.C. of the rank of Major-General. The Areas, in their turn, are sub-divided into Sub-Areas each under the command of a Brigadier.

Mobile formations are the Corps, Divisions, Brigade group, Independent Brigade and Brigades. Two or more Divisions or a combination of Divisions, Brigade Groups and Independent Brigades are constituted into a Corps under a Corps Commander of the rank of Lt. General, who functions under the control of the Army Commander.

The Army consists of a number of arms and services. They are Infantry, Armoured Corps, Regiment of Artillery, Corps of Engineers, Corps of Signals, Army Service Corps, Army Ordnance Corps, Army Medical Corps, Army Dental Corps, Corps of Electrical and Mechanical Engineers, Army Education Corps, Remounts, Veterinary Corps, Corps of Military Police, Intelligence Corps and Defence Security Corps.

TERRITORIAL ARMY

The Territorial Army is an auxiliary force to the regular Army and is the second line of Defence. This force consists of citizens who follow their normal avocations and receive military training in their spare time, and undergo active military service when embodied.

Territorial Army officers have been made eligible for promotion to the acting rank of Brigadier, against a specific vacancy, on completion of 20 years of service.

The role of the Territorial Army is to

- (i) relieve the Regular Army of static duties and support civil power if required,
- (ii) provide coastal defence and anti-aircraft units,
- (iii) provide units for the Regular Army if and when required.

No officer or enrolled person is required to perform military service beyond the limits of India, save under a general or special order of the Central Government.

TRAINING INSTITUTIONS

Recruitment for the permanent cadre of commissioned ranks in the Army is done through the National Defence Academy, Khadakvasla, and the Indian Military Academy, Dehra Dun. After completion of their three-year course at the N.D.A., Army cadets have to spend another one year at the Military Academy before being commissioned. Direct admission to the Academy at higher age-levels also continues, though the number of cadete so taken is limited.

There is an Officers' Training School at Madras to train emergency commission candidates for the Army. The school is now designed to run courses for short service regular commissions.

The various ranks in the Army from the top downwards are: General, Lieutenant-General, Major-General, Brigadier, Colonel, Lieutenant-Colonel, Major, Captsin, Lieutenant, Second Lieutenant, Subedar-Major/Risaldar-Major, Subedar/Risaldar, Naik Subedar Dafadar, Havildar, Naik, Lance-Naik and Sepoy/Sowar.

INDIAN NAVY

The Indian Navy is controlled both administratively and operationally from Naval HQ in New Deihi through a chain of commands.

At the Naval HQ the Chief of the Naval Staff is assisted in his task by five Principal Staff Officers, namely the Vice-Chief of the Naval Staff, the Chief of Personnel, the Chief of Logistics, the Chief of Material and the Assistant Chief of the Naval Staff.

The Naval HQ exercises control over the Navy through the following commands:

1. Western Naval Command—under the Flag Officer, Commanding-in-Chief, Western Naval Command, Bombay; 2. Eastern Naval Command—under the Flag Officer, Commanding in Chief, Eastern Naval Command, Visakhapatnam; 3. Southern Naval Area—under the Commodore Commanding, Southern Naval Area, Cochin. The Flag Officer Commanding, Western Naval Fleet (previously called the Flag Officer Commanding, Indian Fleet is now operationally and administratively responsible to the Flag Officer, Commanding-in-Chief, West.

Today, the Indian Fleet consists of I.N.S. VIKRANT (Flagship of the Navy), an aircraft-carrier, I.N.S. MYSORE, a Colony-class cruiser, I.N.S. DELHI, a Leander-class cruiser, two Destroyer Squadrons (I.N.S. RANJIT, RAJPUT, RANA, GODAVARI, GOMATI and

GANGA) and a number of Frigate Squadrons, including some of the latest types of anti-submarine and anti-aircraft frigates, submarines, submarine depot ship and patrol boats. These new types of frigates, specially constructed for the Navy in the U.K. are I.N.S. BRAHMA-PUTRA, BEAS, BETWA, KHUKRI, KIRPAN, KUTHAR, TALWAR, and TRISHUL. The former frigates are I.N.S. CAUVERY, KISTNA, and TIR, which are now being used for cadets' training. The three Mine-sweeping Squadrons are formed by I.N.S. KONKAN, KARWAR, KAKINADA, CANNANORE, CUDDA-LORE, BASSEIN and BIMLIPATAM.

In addition, the Fleet has some survey ships, a tanker and some auxiliary craft. The survey unit of the Navy, which now comprises I.N.S. INVESTIGATOR, JUMNA, SUTLEJ and DARSHAK, carries out the necessary survey of India's coast and approaches to harbours. I.N.S. DARSHAK of 2,750 tons displacement is the first naval ship built in India.

A Resident Naval Officers' Organisation I.N.S. JARAWA has been set up at Port Blair with the necessary transport and communication facilities.

It is proposed to develop a naval base and dockyard at Visakhapatnam. It has also been decided to develop Mormugae as a naval base; it was formally commissioned in March 1964 as I.N.S. GOMANTAK. The base includes I.N.S. HANSA the Naval Air Station at Dabolim, where facilities for the operation of jet aircraft are being developed.

NAVAL AVIATION

The Naval Air Arm, which is one of the youngest branches of the Navy, came into being in 1948 for training aircrew, followed soon after by the setting up of a Naval Air Station at Cochin. Later, the formation of a Fleet Requirements Unit was approved, aircraft, equipment and spares acquired and officers and ratings deputed for training courses abroad.

A Naval Air Training School has been set up at Cochin to train ratings in the maintenance and repair of aircraft. At the same time, the Government are considering setting up a School for Naval Airmen for training non-technical personnel.

TRAINING ESTABLISHMENTS

The training of other naval personnel is carried out in the shore establishments of I.N.S. VENDURUTHY, Cochin, I.N.S. CIRCARS, Visakhapatnam, I.N.S. ANGRE, Bombay, I.N.S. KUNJALI, Bombay, I.N.S. SHIVAJI, Lonavla, I.N.S. VALSURA, Jamnagar, and I.N.S. HAMLA, Bombay, I.N.H.S. ASVINI at Bombay, I.N.H.S. SANJIVANI at Cochin, I.N.H.S. KALYANI at Visakhapatnam and the recently commissioned I.N.H.S. JEE-VANTI at Goa are the four naval hospitals.

The various ranks in the Navy from the top downwards are: Admiral, Vice-Admiral, Rear-Admiral, Commodore, Captain, Commander, Lieute-Commander, Lieutenant, Sub-Lieutenant, Midshipman, Master Chief Petty Officer Class I & II, Chief Petty Officer, Petty Officer, Leading Rate, Seaman I Rate and Seaman II Rate.

INDIAN AIR FORCE

The Air HQ is divided into three main branches — Air Branch, which deals with operations, training, policy and plans, signals, reserves and intelligence, Administration Branch and Maintenance Branch. Each is under a Branch P.S.O. who, in turn, has several Directorates under him.

There are three Operational Commands of the Air Force with headquarters at Palam, Allahabad and Shillong, respectively known as Western, Central and Eastern Air Commands. The Maintenance Command is at Nagpur, while the Training Command is located at Bangalore.

The Operational Commands control all flying units—fighter, bomber, reconnaissance and air-transport squadrons. The Training Command has under its control training schools and colleges for both officers and airmen for technical and non-technical ground training and for aircrew flying training. The Maintenance Command controls all technical and equipment units in the Air Force. All the five Commands are headed by Air Officers Commanding-in-Chief. The A.O.C.S.-in-C. of Western Air Command and Eastern Air Command hold the rank of Air Marshal. The other three are in the rank of Air Vice-Marshal.

The different types of aircraft used by the Air Force are: Training: HT-2, Harvard, Vampire and Dakota.

Fighter: Vampire, Mystere, Hunter, Gnat, MIG-21 and

HF 24.

Transport: Dakota, Devon, Fairchild-Packet, Otter, Ilyushin, 14, Caribou, AN-12 Super Constellations TU-124, HS-748 and M1-4, Bell and Alouette 3 Helicopters.

Bomber: Canberra.

Reconnaissance: Liberator and Canberra,

TRAINING ESTABLISHMENTS

The Air Force Flying College at Jodhpur is the nursery of pilots, navigators and air-signallers. Advance flying training to aircrew is provided at Hyderabad and Bangslore. The Jet Training Wing at Hakimpet provides training facilities for fighter pilots whilst the transport crew are trained at the Transport Training Wing at Yelahanka near Bangalore. On successful completion of their oneyear training at Jodhpur, pupil aircrew have to undergo a year's training at Hakimpet or Begumpet before being awarded their wings and commissioned.

The Air Force Administrative College at Coimbatore trains officers of the ground duty branches. The Air Force Technical College at Jalahalli, near Bangalore, imparts training to engineering officers and technical airmen of certain advanced signals trades. The No. 1 Ground Training School at Jalahalli trains non-technical airmen. The No. 2 Ground Training School at Tambaram (Madras) trains technical tradesmen (airmen). The No. 3 Ground Training School at Jalahalli is intended for airmen trainees of higher signals trades.

An Institute of Land/Air Warfare has been set up at Secunderabad to train Army and Air Force officers in the doctrine and planning of joint operations by air and ground forces, namely close air support, air transport support and air defence.

The School of Aviation Medicine, in Bangalore runs courses for the training of medical officers and airmen in the science of aviation medicine.

The I.A.F. Paratroopers' Training School at Agra, continues to train paratroopers for the Army personnel for the I.A.F. Para-Medical Flights and instructors for the School itself.

The various ranks in the Air Force from the top downwards are: Air Chief Marshal, Air Marshal, Air Vice-Marshal, Air Commodore, Group Captain, Wing Commander, Squadron Leader, Flight Lieutenant, Flying Officer, Pilot Officer, Master Warrant Officer, Warrant Officer, Warrant Officer, Flight Sergeant, Sergeant, Corporal, Leading Aircraftsman, Aircraftsman Class I. All the squadrons have now been number plated.

INSURANCE

PUBLIC AND PRIVATE INSURANCE SECTORS

CINCE Sept. 1, 1956, when the L.I.C. of India was Destablished, life insurance business in India is transacted by this Corporation and, in a restricted sphere, by the Posts & Telegraphs Department of the Govt. of India and by the State Governments of Andhra Pradesh, Jammu & Kashmir, Kerala, Madhya Pradesh, Mysore, Rajasthan and Uttar Pradesh who carry on compulsory life insurance of their employees only. Fire, Marine & Miscellaneous classes of insurance business are transacted both by the Indian insurance companies and by foreign insurance companies operating in India. In addition, the L.I.C. and certain State Governments are also transacting such business. The Government of Gujarat and Maharashtra insure all types of their property in their commeroial and industrial undertakings. Kerala State is transacting fire and motor insurance business and Mysore State motor insurance business only.

In addition to the L.I.C. the Central Government has established two other Corporations in the insurance Sphere—Employees' State Insurance Corporation and Export Credit and Guarantee Corporation. The former conducts compulsory health insurance of workers and their families in specified industrial concerns. The latter covers marine and commercial risks for exporters in India, other than those risks normally covered by private insurers in India.

LIFE INSURANCE

The Life Insurance Corporation of India did a new

total business* of about Rs. 929 crores sum assured under 14.54 lakh policies during the 12 months ended 31st March, 1969. Of this, foreign business was Rs. 8.70 crores. During the previous period of 12 months ended 31st March 1968, the total business secured was about Rs. 844 crores under 14.28 lakh policies, of which foreign business was Rs. 9.07 crores.

The Corporation has a network of offices all over the country to procure new business and for servicing the existing business. There are 5 Zonal Offices, one each in Bombay, Madras, Kanpur, Calcutta, Delhi and the Central Office at Bombay. There are 36 Divisional Offices, and 679 Branches, Sub-offices and Development Centres i.e., 721 offices in all.

The Corporation also transacts business in the following foreign countries with 2 Divisional Offices and 11 Branch Offices: Aden, Fiji, Hong Kong, Malaysia, Singapore, Kenya, Mauritius, Uganda and the United Kingdom.

1968-69 REPORT

At the end of the 12 months accounting period ended 31st March, 1969, the total business other than in Pakistan in the books of the Corporation including bonuses, stood at Rs. 5,725 crores under 134.53 lakh policies. Of this, Rs. 5,606 crores under 133.45 lakh policies represented life insurance business in India. In addition, there were 11,438 life annuity policies under which annuities of Rs. 3.88 crores were payable each year.

The total business completed by the Corporation, including foreign business, during the first seven months of 1969-70 amounted to Rs. 369-69 crores, involving 5,45,041 policies against Rs. 341-71 crores involving 5,65,042 policies during the same period in 1968-69. The total new business completed by L.I.C. during the period April 1969 to January 1970 was of the order of Rs. 663-50 crores involving 9,65,405 policies against Rs. 630-58 crores involving 10,34,046 policies during April 1968 to March 1969.

The following table gives the life assurance business in force at the end of each of the last four accounting periods:-

		I	n India	Outsi	de India	Total	
Business in force as at		No. of policies (lakhs)	Sum assured and bonuses (Rs. crores)	No. of policies (lakhs)	Sum assured and bonuses (Rs. erores)	No. of policies (lakhs)	Sum assured and bonuses (Rs. erores)
31-3-1966 31-3-1967 31-3-1968 31-3-1969	** ** **	114·10 119·98 126·43 133·45	4,282 4,593 5,116 5,606	1·79 1·24 1·16 1·08	112 131 124 119	115·89 121·22 127·59 134·53	4,394 4,724 5,240 5,725

During the accounting period the Corporation completed a new business of Rs. 929.35 crores sum assured under 14,54,298 policies. Business completed in the previous accounting period amounted to Rs. 844.47 crores under 14,28,043 policies.

About 32.9 per cent of the total number of policies in India assuring about 25.5 per cent of the total new sums assured in India, were issued in rural areas as defined in the 1961 Censua. About 45.8 per cent of the policies or 22.6 per cent of the new sums assured in India were issued under the non-medical schemes. In addition to the total new business stated above, the Corporation issued 952 Deferred Annuities and 72 Immediate Annuities with a total annual payment of Rs. 21.71 lakhs and Rs. 2.79 lakhs respectively. Further, under Group and Superannuation Schemes, it granted Annuities of Rs. 62.65 lakhs per annum.

New Business:

				In I	ndia	Outside India		
Y	8 8. T		-	No. of policies	Sum Assured Crores of Rs.	No. of policies	Sum Assured Crores of Rs.	
965-66 966-67 967-68 968-69	4 0	11 0 11 1 11 1	= + q ii d ii	15,54,758 14,06,033 14,23,380 14,50,095	789·29 757·94 835·40 920·65	6,445 5,887 4,663 4,203	8·50 12·33 9·07 8·70	

A marked variation is noticeable in the size of the average policy sold in the different Zones by the Corporation. The figures are given below (Rs.):

Northern Zone (Delhi): 7,600; Central Zone (Kanpur): 6,520; Western Zone (Bombay): 7,295; Eastern Zone (Calcutta): 5,927; Southern Zone (Madras): 5,335; In India: 6,349; Foreign: 20,700; All business: 6,390 as against 5,913 in the period 1-4-1967 to 31-3-1968.

ACCOUNTS

The Life Fund stood at Rs. 1,434.47 crores on 31st March, 1969, registering an increase of about Rs. 174.41 crores over the life fund of Rs. 1,260.06 crores as on 31st March 1968. During this period, the Corporation's income from all sources totalled about Rs. 316 crores, made up of Rs. 235 crores from premiums and about Rs. 81 crores from returns on its invested funds and from miscellaneous

The interest income of Rs. 71.5 crores represents earnings of 5.31% on the mean life fund after deducting income-tax. The rate per cent of interest from 1965.66 is given below;

1965-66: 4-76; 1966-67: 5-29; 1967-68: 5-18; 1968-69: 5-31. The gross rate of interest earned on the mean life fund during the year was 5-94 per cent per annum as against 5-88 per cent per annum for the previous year.

On the outgo side Rs. 78 erores represented claims and other benefits to the policy-holders, Rs. 65 crores expenses of management, Rs. 9 crores income-tax, Rs. 2 crores miscellaneous expenses, the balance of nearly Rs. 173 crores addition to the Life Fund. On the claims side, nearly Rs. 17 crores represented claims by death and nearly

Rs. 52 orores by maturity, annuities, surrender and bonuses in cash etc., accounting for the balance.

Overall expenses ratio: 1965-66: 27.6%; 1966-67: 27.7%; 1967-68: 27.5%; 1968-69: 27.5%.

The renewal expense ratio in terms of Rule 25(b) of Insurance Rules 1939 was 15.91% as against 15.90% for the previous year ended 31st March, 1968, once again exceeding the statutory limit of 15%.

INVESTMENTS

The total investments pertaining to life business as at 31st March 1969 amounted to Rs. 1,348.87 crores of which Rs. 24.71 crores were out of India. The break-up of Indian investments is as follows:

nvestments is as ionows:	
Indian and State Government and other approved securities	Rs. 740 · 23 crores
Debentures and shares of Joint stock	Rs. 210·39 ,,
Loans to Housing Schemes—State Governments and Cooperative	70. 154.00
Finance	Rs. 154·20
House Property Due from State Governments for	Rs. 36.53 ,,
controlled business taken over Other Loans etc.	Rs. 3·22 ,, Rs. 149·23 ,,
Share in Initial Capital of Unit Trust of India	Rs. 0.75 ,,
Ra	1 322 93 crores

In addition, investments pertaining to the General Insurance Business (including Capital Redemption and Annuity Certain) was Rs. 10.08 crores.

On 31st March 1969, the Corporation held stock exchange securities aggregating nearly Rs. 974 crores, of which about Rs. 951 crores were in India and the balance outside India.

A broad classification of investments in India shows that 73.6% was invested in the public sector, and 17.8% in the private sector and 8.6% in the co-operative sector. Besides the loans issued by the Central and State Governments, investments in the public sector include loans, bonds, shares or debentures of municipalities, Improvement Trusts, Port Trusts, Land Mortgage Banks, State Financial Corporations and Statutory Corporations. Investments in the private sector take the form of debentures, preference shares and ordinary shares of industrial and commercial undertakings.

Debentures, preference and ordinary shares of joint stock companies held by the Corporation may be classified as under according to the character of the industries (Rs. lakhs):

Aluminium: 755·12; Banks: 731·41; Cement: 1075·04; Coal: 381·99; Cotton Textiles: 2374·10; Dyes, Chemicals and Pharmaceuticals: 701·74; Electricity: 1540·45; Electrical Goods: 1056·63; Engineering: 3974·42; Food, Drinks and Tobacco: 187·12; Insurance: 244·51; Investment Trusts: 257·34; Iron and Steel: 1735·30; Jute: 566·98; Managing Agents: 140·83; Matches: 84·91; Mining: 80·76; Mineral Oil: 809·29; Paper and Board 786·78; Plantations: 285·19; Railways: 70·65; Rubber Products: 486·76; Shipping and Transport: 83·76; Sugar and Breweries: 728·77; Textiles (other than Cotton): 633·58; Vegetable Oils: 197·86; Cooperative Housing Societies: 23·54; Miscellaneous: 1043·73. Total: Rs. 21,038·56 lakhs.

Underwriting New Capital Issues

During the accounting year ended 31st March, 1969, the L.I.C. underwrote 95 new issues to the extent of Rs. 3,483·80 lakhs, comprising Debentures of Rs. 3,267·80 lakhs, Preference Shares Rs. 109·00 lakhs and Ordinary Shares Rs. 107·00 lakhs. Of these, 76 issues were placed in the market during the period, in addition to 27 issues placed in the previous year with allotments of Rs. 2981·80 lakhs against Rs. 3225·74 lakhs underwritten and Rs. 3220·74 lakhs applied for.

PERSONNEL

On 31st March, 1969, there were 51,667 employees of whom 2,978 were officers, 8,134 Development Officers, 33,602 supervisory and clerical staff and 6,953 subordinate staff. The total monthly salary bill in March, 1969 was Rs. 255.85 lakhs.

Out of over 1.54 lakh agents on the books on 31st March 1969, about 1.37 lakhs were active.

The average production per active agent during the accounting period was Rs. 67,115 as against Rs. 57,883 during the previous year.

VALUATION & BONUS

Six biennial valuations were made till March 1967. The seventh valuation was made as at 31st March 1969, covering the biennium 1st April 1967 to 31st March 1969. The total distributable surplus shown was Rs. 95-05 crores. Out of this Rs. 90-30 crores were allocated to the participating policies and Rs. 4-75 crores to the Central Government as its share. In respect of the policies issued by the L.I.C. itself, the rate of reversionary bonus allotted was Rs. 22-00 per thousand sum assured per annum for

whole life policies and Rs. 17.60 for endowment assurance policies. The corresponding rates of bonus at the previous valuation were Rs. 20.00 per thousand sum assured per annum and Rs. 16.00 per thousand sum assured per annum respectively. The policies issued by the erstwhile insurers were allotted bonuses at different rates as per the scheme of differential bonuses approved by the Government.

GENERAL INSURANCE

As on 31st December 1968 there were 129 (as against 132 in 1967) companies registered under the Insurance Act, 1938 to transact one or more classes of general insurance business of which 72 were Indian and 57 non-Indian. One Indian and two non-Indian insurers ceased to operate in 1968. The number of Indian insurers excludes the Life Insurance Corporation of India (which is registered for Life and Miscellaneous insurance business) but includes its three (since amalgamated into one on 1st January 1961) subsidiaries which conduct general insurance business. It (marine) insurance business only with 6 non-tariff offices and three doing only reinsurance business, one of which is a subsidiary of the L.I.C.

Of the 57 non-Indian offices, 34 have their head-offices in the U.K.

During the year ended 31st March 1969, the L.I.C. secured a gross direct premium of Rs. 16·19 crores as against Rs. 12·62 crores in the previous year. The breakdown thereof is Rs. 3·89 crores under Fire, Rs. 6·84 crores under Marine and Rs. 5·47 crores under Miscellaneous insurance classes. The total net premium amounted to Rs. 5·71 crores. The net claims were Rs. 99·00 lakhs, Rs. 150·91 lakhs and Rs. 96·94 lakhs in Fire, Marine and Miscellaneous insurance respectively. The net underwriting profits were Rs. 135·30 lakhs.

The total income and outgo in respect of the general insurance business of Indian insurers (excluding the Life Insurance Corporation of India) during 1967 is analysed below:

Partic	Rs. lakhs				
Income		_			
Premiums less reins	urance	98:			
	-	n India. utside I	ndia	**	50,17 31,27

Note: Unexpired risk reserves have been taken at 40% of the premium income for Fire and Miscellaneous and 50% of the premium income for Marine insurance business.

REINSURANCE

To minimise the drain on account of reinsurance transactions abroad, the Insurance Act, 1938 was amended, early in 1961, by inserting Part IVA Reinsurance, Sections 101A and 101B. Section 101A provides that every insurance company operating in India must reinsure a certain percentage of its business (not exceeding 30%) with Indian reinsurance companies approved in this behalf by the Central Government namely, India Reinsurance Corporation Ltd., and Indian Guarantee and General Insurance Co. Ltd., both having their registered offices in Bombay and the latter being a subsidiary of the LIC of India.

Mainly due to heavy Marine claims recovered from abroad, insurers have been gaining on account of reinsurances placed abroad since last three years.

Social Control on General Insurance

Government of India has passed a Bill, in the November 1968 session of the Parliament, amending the existing laws governing general insurance to bring them in line with the scheme for social control. The Bill has been signed by the President and has come into force as Insurance (Amendment) Act, 1968, on 1st June 1969.

FOOD

ROM the point of view of food generally the position is roughly as follows: Surplus areas: Madhya Pradesh, Punjab, Haryana, Orissa, Andhra. Self-sufficient areas: U.P., Rajasthan, Tamil Nadu, Mysore, Assam. Deficit areas: Maharashtra, Gujarat, Himachal Pradesh, Bihar, West Bengal, Kerala, Kashmir, Tripura. Manipur is marginal.

Total Internal Procurement and Issue of Foodgrains.

The areas covered by the Punjab, Haryana and Madhya Pradesh (former Vindhya Pradesh) are generally surplus in wheat

The areas covered by the following States are generally surplus in rice: Orissa, Madhya Pradesh, Andhra, Punjab.

At the end of 1968, the number of fair-price shops and ration shops in the country stood at 136,000 as against 142,000 functioning at the end of 1967. The total population covered under statutory rationing at the end of 1968

was about 25.4 mill. and under informal rationing 233.2 mill. making a total of 258.6 million as against 277 million at the end of 1967.

During 1967-68 procurement of rice and paddy (both on Central and State Govt. accounts) amounted to 32.59 lakh tons as against 24.69 lakh tons in 1966-67. The purchase of wheat by Central and State Govts. during 1968-69 amounted to 17.77 lakh tons which was 14.90 lakh tons more than of 1967-68. In addition over 45,000 tons of coarse grains (millets, maize and barley) and pulses were purchased in 1967-68 as against over 9 lakh tons in 1966-67.

IMPORTS (1966-68)

The imports over the years were as follows:

Figures in million tons and value in Rs. Crores respectively are: 1966: 10.358, 523.13; 1967: 8.67, 460.00. In 1968 the imports amounted to 5.6936 (consisting of 0.4463 m. tonnes of rice, 4.7654 m. tonnes of wheat and wheat products and 0.4819 m. tonnes of mile valued at about Rs. 361 crores.

The imports of individual grains were as follows:

(in million metric tonnes)

		1966	1967	1968
Rice	* *	0-7866	0.4527	0.4463
(including flour)		7-833	6.4001	4.7654

SEED

The Govt. of India has set up in 1963 a Central/National Seed Corporation to promote the production of improved seeds in the country by financial aid, technical guidance, organising marketing agencies and sponsoring training programmes in collaboration with Central and State Governments and other interests. The Seed Act of 1966 was enforced from 1969 and roles of different agencies in seed production and distribution are defined therein. Production and supply of registered/certified seeds would be the responsibility of State Governments who would get it done through registered seed growers. National Seed Corporation would be responsible for the supply of national foundation seeds, while State Governments would be responsible for local/regional varieties. The World Bank has now agreed to finance the Terai Seed Development Project (for multiplication of high yielding varieties) in 16,200 hactares and producing 56,000 tonnes of seeds per annum. (See under All-India Corporations for more details).

FERTILIZERS & MANURES

India's requirement of nitrogen fertilizer is placed at between 2 and 2.5 million tons. Minimum requirement would probably be estimated at 1.5 million tons on the basis of 30 lbs. per acre.

It is estimated that the use of one ton of fertilizer on an area of 75 acres results in an extra 10-ton production of foodgrain.

Consumption of Fertilizers

(million tonnes)

1966-67 1967-68 1968-69 (Operational target)

Plant Food	Consu	mption		
Nitrogen	0.738	1.035	1.4	2.0
Phosphoric Acid	0.250	0.335	0.4	0.65
Potash	0-114	0.170	0.18	0.30

The night soil compost scheme, which has now been introduced in Tamil Nadu, Rajasthan, Punjab, Orissa and Mysore, will cover 500 bigger panchayats, for which Central assistance has been given at the rate of Rs. 2,000 per panchayat.

A total number of 2,250 urban centres was also engaged in night soil compost production in the States.

Urban and Rural Compost

Quantity (mill. tonnes)

Year				Urban	Rural
1966-67	4.1	F 1		 3.70	122.00
1967-68	* *		4.4	 3.9	122.63
1968-69 (Expect	ed)		 4.0	143.68

Distribution of green manure seeds in parcels is encouraged in most States. A subsidy of Rs. 2 per maund is given to the State for multiplying green manuring seed. The coverage under green manuring during 1967–68 was estimated at 7·23 million hectares, while the anticipated coverage in 1968–69 is 8·46 million hectares. As against 54,000 tractors in use in 1965-66 the numbers went up during 1967–68 to 80,000 and were expected to be 90,000 in 1968–69. Power tillers have also become popular during recent times. The Government are therefore importing 15,000 tractors and 4,000 power tillers; also 75 combined harvestors and 50 reapers.

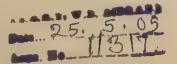

Mechanisation and Mechanised Farms

With a view to increasing mechanisation in agriculture the production of wheel type tractors has been stepped up. Wheeled tractors between 20 and 50 H.P. range are being manufactured by 5 manufacturing units with an installed capacity of 30,000 units per year.

There are already two Central Mechanised farms at Surat and Jelsar. Fifteen more such farms are going to be set up with the help of U.S.S.R., one in each State. The farm in Orissa was started at Hirakud in 1967 and in Haryana (Hissar) and Punjab (Jullundur) in 1968. Mysore farm is getting operated soon, while in Kerala site has been selected. It is proposed to set up a State Farm Corporation to manage these farms with an authorised capital of Rs. 7 crores and a paid up capital of Rs. 3 crores (inclusive of present assets of the farm).

THE FOOD PROBLEM

The per capita consumption in India of all food items it terms of calories compares as follows:—Canada: 3,140

U.S.A.: 3,150; U.K.: 3,270; Japan: 2,110; and India: 1.880.

The problem can be summed up in some such way as follows:---

The consumption of food grains and pulses in India has been increasing over the last three years faster than production.

The increase in population of about 12 million persons per year in itself will require one million tons of additional food grains each year. With an increase of the per capita intake of 100 calories per day, India would require an additional five million tons foodgrains per year.

Following are the Agreements signed for the import of foodgrains during 1968-69.

(Quantity in million tonnes)

				,

Buffer Stock

In view of the bright prospect of foodgrains production it is proposed to build a buffer stock of three million tonnes of foodgrains. The Central and State reserves of foodgrains at the end of 1968 stood at 3.8 m. tonnes of which 2.8 m. tonnes were treated as buffer stock. The stock was augmented in subsequent months standing at 4.5 m. tonnes and will be further increased in later months. Five million tonnes of buffer stock is proposed to be built up in the Fourth Five Year Pian.

Distribution of foodgrains from Government stocks channelled through 136,000 fair price/ration shops.

The total population covered under statutory rationing at the end of 1968 was about 25.4 million and under informal rationing 233.2 million making a total of 258.6 million.

Rationing: The principle of statutory rationing has been accepted by all States. It was decided in Aug. 1965 that in cities of one million population, later modified into one lakh and above, rationing should be introduced. In Kerala informal rationing was introduced from Nov. 1, 1964; Greater Calcutta throughout 1965 (extended to Asansol, Durgapur, Siliguri industrial complex from Feb. 1966), Madras and Coimbatore (Oct. 1965), Delhi (Dec. 8, 1965), Hyderabad, Secunderabad & Vishakapatnam (Feb. 1966) and Kanpur Feb. 16, 1966.

With the improvement of supplies statutory rationing was discontinued in Siliguri (from 1st Jan. 1968) and Kanpur (mid Jan. 1968). In Delhi also movement of rice and wheat from the rural areas and their sale in the open market in the rationed areas have been permitted with effect from Feb. 21, 1968. Statutory rationing has been discontinued in Madras and Coimbatore from Jan. 14, 1970.

Distribution (1966-68)

(million tonnes)

Year		Rice	Wheat	Other grains	Total
1966	* *	1.514	8-275	1.692	11-481
1967		. 1-131	6-993	1-944	10-075
1968		1.269	5.666	0-690	7-625

WAREHOUSES

The Central Warehousing Corporation has set up 77 Central Warehouses (upto the end of 1967) with a capacity of 2,71,397 tonnes in 16 States. The State Warehouses during the time were 615 with a total capacity of 8,72,070. In addition special warehouses (on guarantee basis) were set up in Maharashtra with a total capacity of over 50,000 tonnes and by Food Corporation (in Andhra and Tamil Nadu for over 4,80,000 tonnes capacity).

As many as 80 types of commodities are now stored in the warehouses including foodgrains, oilseeds, cattle fodder, raw cotton, cotton seed, raw jute, turmeric, gur, ginger, pepper, cardamom, coffee seeds, chicory, fertilizers and food products.

Food Corporation

The Food Corporation was set up as a statutory body in Jan. 1965 to function in the long term comprehensive strategy for solving the food problem. The Corporation is now functioning in all the States except Maharashtra, Jammu and Kashmir and Nagaland. During 1967-68 it purchased 4·1 million tonnes of food grains besides 23,000 tonnes of groundnut oil. It purchased up to 1969 end about 1·03 million tonnes of rice, 88,600 tonnes of maize and 26,900 tonnes of Jowar. It is going to instal 24 modern rice mills, (two of which were already working

FOOD 23

in 1968) for better extraction of rice from paddy. It will also set up a maize drier at Khanna in Punjab. The storage capacity at the end of 1968 was about 1.7 million tonnes In addition, it hired accommodation for 1.44 million tonnes besides space for 0.95 million tonnes from Central and State warehousing corporations. The quantity of foodgrains handled by it rose from 3.908 million tonnes costing Rs. 241.87 crores during 1966.67 to 5.858 million tonnes costing Rs. 438 crores during 1967-68. During 1968 the Corporation produced 17,400 tonnes of Balahar and distributed as midday meal for school children under CARE. (See under "All India Corporations" for more details).

Subsidiary Foods

The Food and Nutrition Board has initiated investigations for the development of cotton-seed protein for human consumption, fortification of common salt with calcium and development of food from green vegetation and further work on parboiled rice and vegetable milk

powder.

Demonstration-cum-community canning and food preservation centres have been established one each at Delhi, Bombay, Madras and Calcutta. Four mobile food and nutrition extension units for the systematic campaign for promotion and popularisation of food preservation technique, suitable dietary habits, cost balanced diet and ceientific technique of cookery, proper utilisation of food etc. with Headquarters at Delhi, Bombay, Calcutta and Madras, have also started functioning. The three Institutes of Catering Technology and Applied Nutrition at Calcutta, Bombay & Madras and the Institute of Hotel Management, Catering and Nutrition (Delhi) imparted training for diploma and Craftsman course. Food Craft Centres, one each in Kalamassery (Kerala), Ahmedabad (Gujarat), Bangalore (Mysore), and Panaji (Goa) in addition to one at Lucknow (U.P.) were established to help in dissemination of food grains to various industries.

Pilot plants for the production of edible groundnut flour for the manufacture of multi-purpose food, enriched atta, maida etc. have been set up in Coimbatore and Bombay. One unit each of one ton multipurpose food per day production capacity was set up in Calcutta and in

Sitapur and Kotdwara (U.P.).

Balahar: This protein rich food for infants containing 25 per cent ground-nut flour, 10 per cent gram and 5 per cent whole meal atta fortified with minerals and vitamins has been developed and produced on a large scale in cooperation with a Bombay Mill.

A project for setting up edible tapices flour of 10 tons daily capacity for Kerala has been taken up by the Food Corporation. Weaning Food — A precooked processed food prepared from blend of pulses, groundnut flour, cereals and skimmed milk powder is being manufactured through Kaira Co-opr. Union with the assistance of UNICEF.

Modern Bakeries Private Limited has been set up in the public sector for the production and distribution of nutritious bread cheaply. Six of these have already been set up at Cochin, Delhi, Ahmedabad, Bombay and Calcutta as a gift from Australian Government. Three more bakery plants are given as gift under Colombo Plan by Canadian Government and are b ing set up at Bangalore, Hyderabad and Kanpur.

Roller mills wheat products price control order was amended to permit surichment of atta with 5-10 per cent edible groundnut flour.

A 3 months' (short term) training course for engineers in rice technology and processing has been started at the Indian Institute of Technology at Kharagpur, Pilot

studies have also been initiated in the production of edible rice bran oil in collaboration with the modern rice mill at Tanjavore. Technical assistance is extended to Tamil Nadu for the production of dehydrated occonuts of very high quality and protein rich deciled occonut meal for human consumption.

PACKAGE PROGRAMME

The above programme which was initially introduced in 7 districts and subsequently extended to cover 9 other selected districts has completed its five-year operation. It is now in operation in 17th district (Karnal in Haryana).

The Package Programme is now invigorated through three other Programmes,

- (a) The IADP—Intensive Agricultural District Programme—under this programme about 13 lakhs of cultivating families belonging to 25,639 villages in 15 selected districts were covered by the end of 1967–68 involving 32 lakh hectares. This programme got the benefit of help from various foreign agencies.
- (b) The HYVP—High Yielding Varieties Programme—This programme was launched in 1966-67. During 1967-68 it covered 6.04 million hectares. The average yield as a result of this programme showed phenomenal increase in wheat ranging from 2.24 to 5.04 tonnes, maize: 2.24 to 4.12, Jowar: 1.6 to 4.5 and bajra 1.6 to 3.9. The target for the coverage of programme for 1968-69 was 8.5 million hectares.
- (c) Multiple Cropping Programme—This programme was started in 1967-68. The achievement during the year was estimated at 3.64 million hectares and the target for 1968-69 was fixed at 6.07 million hectares.

EXPORT PROMOTIONS

Efforts made by the Department of Agriculture in the promotion of exports of agricultural commodities consist mainly of taking measures for giving a boost to the production of important export commodities so as to make available larger quantities for export. With this objective, special centrally sponsored programmes have been undertaken and increased outlays provided in State Plans to achieve higher production targets for commercial crops.

The export policies on various agricultural commodities are constantly being reviewed with a view to locating items which could be liberalised for export.

Efforts are being made for increasing production of export oriented agricultural products through centrally sponsored package programmes (taken up during 1967-68) in cotton, jute, groundnut and tapioca. As a result the export availability being larger the Government has relaxed export restrictions in ground-nut kernel, cake and cotton seed cake.

AGRICULTURAL PRICES COMMISSION

The Government of India considered recommendations of the Commission and announced for 1968-69 season minimum support prices for paddy, wheat, jowar, bajra, maize and gram among food grains and for cotton, jute and sugarcane which were generally higher than those of the previous season. The statutory ceiling on the prices of raw cotton was also removed from 1967-68 season. Procurement prices which are higher than minimum prices were fixed for kharif and rabi foodgrains for 1968-69; these were fixed at higher levels than those of previous season to give incentive to producers. The actual levels of procurement prices for 1968-69 (marketing season) are given below along with those for 1967-68.

Procurement Prices

(Rs. lakhs)

Crop		ta .	1967-68	1968-69
Paddy			45 56 - 25	45 56-25
Rice			$72 \cdot 8 - 95 \cdot 25$	72.69 - 99.00
Wheat		4.5	65 95	76-00 81-00
Maize		0.0	47 55	47.00 - 55.00
Jowar		1.1	47 — 56(a)	47.00 56.00
Bajra		0.0	47 55	47.00 - 55.00
Ragi	0.0		47.00 - 55.00	47.00 55.00

(a) The price of jowar of inferior quality has been fixed at Rs. 43 in Maharashtra.

FOODGRAIN POLICY

A Conference of Chief Ministers was held on 26th & 27th September 1967, to discuss the food policy for the year 1967-68. The following important conclusions were reached in the Conference:—

- (i) In view of the paramount importance of maximisation of procurement for meeting public distribution needs within the States, export to deficit States and to build a buffer stock of 2 to 3 million tonnes, the consensus at the conference was in favour of continuing the zonal restriction for the movement of foodgrains for the year 1967-68.
- (ii) A vigorous procurement drive should be undertaken during the year 1967-68. The procurement target of 7 million tonnes of kharif cereals as recommended by the Agricultural Prices Commission with a State-wise breakup was also discussed. Despite the general awareness of the need to maximise internal procurement, some States felt that the procurement targets recommended by the Agri-cultural Prices Commission may not be reached. The surplus States of Andhra Pradesh, Orisea, Madhya Pradesh, Punjab, Tamil Nadu and Haryana assured that 4.1, 2.0, 4.0, 1.5, 1.25, and 0.5 lakh tonnes respectively of rice will be available for export. It was emphasised on surplus and deficit States that, in view of the necessity to maximise internal procurement, it is necessary to increase procurement targets. The deficit States should also make a more realistic assessment of their requirements exercising greatest economy and vigilance in public distribution.
- (iii) Methods of procurement should be left to each State Government to decide keeping in view the local condition and the procurement target suggested by the Agricultural Prices Commission.
- (iv) It was recognised that, on the one hand, the procurement prices offered to the producers should take into account the higher cost of production and the element of price incentive necessary for inducing more production, on the other hand the impact of procurement price on

market prices of foodgrains, cost of living and the general price level cannot be lost sight of. There was a consensus on the need of balancing the interests of the producers and consumers and narrowing inter-state price disparities. It was decided that the procurement prices of respective States will be discussed at the official level immediately after the conference.

- (v) The Food Corporation of India should play an increasing role as the largest single wholesale public agency in the country, especially for inter-state trade. It was pointed out that the Food Corporation of India can work effectively only with the fullest cooperation of the State Governments. Wherever necessary, State Board of Management would be appointed to establish effective liaison between the State Government and the Food Corporation of India.
- (vi) The incentive bonus given for the supply of rice and wheat to the Centre may be continued with some modifications. Incentive bonus should be given only if supplies exceed a certain minimum level.
- (vii) There was some divergence of opinion on the question of subsidy on imported foodgrains. One view, especially in the deficit States, was that the subsidy should be continued to give relief to the vulnerable sections of the society. The other view was that subsidy on imported foodgrains may be withdrawn and that the savings may be utilised for increasing agricultural productions. It was decided that these views would be taken into account while examining the question of withdrawal of subsidy.

FOOD SITUATION, 1968-69

The food situation in the country remained generally comfortable during 1968. After two continuous years of low production due to widespread droughts, a record foodgrain crop of 95.6 million tonnes was harvested in 1967-68, which was 21.4 million tonnes higher than that of 1966-67 and 6.6 million tonnes higher than 1964-65. The increase in foodgrain production, mainly due to better management and farm technique led to all round improvement in food situation. Market availability increased and prices also fell significantly. Offtake from public distribution system declined from 13.2 million tonnes (in 1967) to 10.3 million tonnes (in 1968), while Govt. procurement rose to 6.7 million tonnes (in 1968) being over two million tonnes procured during the previous year. The central and state reserve of food grains stood at 3.8 million tonnes at the beginning of 1969 despite the fall in imports from 8.7 million tonnes (in 1967) to 5.7 million tonnes (in 1968).

Weather conditions during 1968-69 had not been as good as those of 1967-68, yet, due to better farm technology under high yielding varieties the overall production of foodgrains during 1968-69 was expected to be as good as in the previous year.

FORESTS

TOTAL forests: 302,688 sq. miles. Percentage of forests to land: 21.8. Per capita forest area will be about half an acre.

Financial return per acre of forest: Rs. 2-60.

The forests are unevenly distributed and the production is also proportionately low, being only 2.5 c.ft. per acre per year as compared to 56.8 c.ft. in France, 37.3 c.ft. in Japan and 18.1 c.ft. in U.S.A.

Private forests: In Assam 400 sq. miles (in Khasi and Jaintia Hills), Orissa 600 sq. miles mostly in zamindari

agencies, Punjab 340 sq. miles in scattered units, and Himachal Pradesh 29 sq. miles in Jabbal Division.

About 16 per cent of the total forest area is inaccessible and 45 per cent of these could yield timber and other forest produce.

'Foresta' are a State subject.

The Government of India, however, are responsible for forest research and forest education. The Ministry of Food and Agriculture in the Government of India coordinates forest activities in the country, but no forests

FORESTS 25

are directly worked by it except the Andaman forests.

The Inspector-General of Forests is their technical adviser in forest matters.

EDUCATION AND RESEARCH

Forest research and education are centralised in the Forest Research Institute and Colleges located at Dehra Dun. The Institute is recognised by the F.A.O. as a Centre for training in Forestry for South-East Asia.

The Forest Research Institute and Colleges are under the administrative control of the Ministry of Food and Agriculture, Community Development and Co-operation of the Government of India. Its administrative Head is designated the President. It has under its control two Regional Forest Research Centres, one at Bangalore and the other at Coimbatore to deal with the special problems pertaining to the area.

The institute was reorganised into four directorates working under the President, viz., 1) The Directorate of Forest Education with 3 forestry colleges under it, two at Dohra Dun and one at Coimbatore, 2) The Directorate of Forestry Research having two branches the Silviculture Branch and the Logging Branch, 3) the Directorate of Biological Research having six branches, the Minor Forests Produce Branch, the Botany Branch, the Forest Pathology Branch, the Entomology Branch, the Wood Anatomy Branch and the Wood Preservation Branch and 4) the Directorate of Forest Products Research having six branches, the Wood Seasoning Branch, the Composite Wood Branch, the Cellulose and Paper Branch, the Timber Mechanics Branch, the Timber Engineering Branch and the Chemistry of Forest Products Branch.

Statistical Branch — This branch deals with the appropriate methods of collecting, analysing and then interpreting the numerical data in various fields of foresty and forest product research.

Service Branch — Engineering Services like the designing of pilot plants, erection of heavy plant and equipment, advice in the selection of equipment, servicing and repair of machinery and apparatus, etc. are rendered by this Branch.

Southern Research Centres — The problems which are specific to the Southern Region are studied at the research centres at Bangalore and Coimbatore.

Publicity & Liaison Branch—The results of researches are publicised and liaison with State Forest Departments, Forest Based Industries and the General Public is maintained by this Branch.

U. N. AID

The U.N. is expected to help India's Rs. 1,440-lakh project of scientific survey of forest resources from its special fund.

The U.N. is expected to contribute, mainly in the form of technical experts and equipment, including helicopters and aerial survey apparatus, to the tune of Rs. 40 lakhs.

Two of the U.N. aided projects are "Pre-investment Survey of the Forest Resources" and Establishment of Logging and Training centres. The first project costing Rs. 131 lakhs is assisted by Rs. 42·15 lakhs from U.N. special Fund to investigate the availability of forest raw materials for industrial development in three selected zones i.e. Northern, Central and Southern covering 11,500 sq. miles, assess the raw material requirements of wood based industries and to determine suitable areas for industrial plantations. Field work for ground sampling in all the three zones were completed during 1967-68.

Training courses in basic logging have been started in the Northern Zone (Dehra Dun), Central Zone (Chandrapur) and in the Southern Zone (Coimbatore). Training courses in the operation and maintenance of logging equipment, studies in planning and efficiency of logging operations and land milling and operation in cable ways are run at Dehra Dun, Chandrapur and Kula respectively. During the year 1968-69, 252 students received training and in all 827 students have been trained so far since the inception of the project. Sixteen demonstrations on the application of improved logging technique were also organised during the year for the benefit of forest officers from States and Territories.

FOREST PRODUCE

Forest produce is divided into two main heads—(1) Major produce, i.e., timber and firewood, and (2) Minor produce, comprising all other products, such as bamboos, canes, leaves, fruits, fibres, grasses, gums, resins, essential oils, medicinal and poisonous plants, fatty oils and fats, dyes, tans, animal and mineral products.

The annual output of timber is 274 million c.ft. and of firewood 700 million c.ft. At present annual import of wood and wood products is of the order of 40 million c.ft.

The bulk of the timber supply is used for railway sleepers, constructional requirements, furniture, plywood (especially for tea chests), matches, etc.; but the country imports timber for specialized uses such as jute and textile mill accessories.

Exports from India are limited to selected rosewood logs for high grade furniture to Europe, teak poles for the Middle East and a few other items.

A. N. Islands: From April to Dec. 1968, about 65,013 tonnes of timber were extracted of which about 38,000 tonnes were shipped to mainland. About 465 hectares have also been brought under teak and matchwood plantations under the scheme for raising industrial plantations and 445 hectares were also brought under natural regeneration.

Imports are regulated by protective or revenue duties and are restricted to such specialized items as are not really obtainable from local production.

PLANTATION SCHEMES

In order to meet this deficiency three important schemes, namely:

- (i) Plantation of quick growing species;
- (ii) Plantation of economic species (teak, sissoo, semal, etc.); and
- (iii) Plantations to be raised under the scheme of rehabilitation of degraded forests

will be taken up in the Fourth Plan. In addition, it is proposed to raise extensive wood plantations including the farm forestry and afforestation schemes for the soil conservation programmes.

The forests which would have to be cleared to raise the plantations proposed in the Fourth Plan are expected to make available approximately 4.8 million cubic metres.

TRAINING

After the constitution of the Indian Forest Service, the first batch of I.F.S. Probationers underwent training. The strength of trainees for 1968-70 is 11 in the Indian Forest College, Dehra Dun, 110 in Northern Forest Rangers College, Dehra Dun and 146 in Southern Forest College, Coimbatore. 144 students from Southern Forest College passed out during the year.

The development programmes for forests proposed in the Fourth Plan cannot be implemented without adequate technical staff. The Indian Forest College at Dehra Dun, which is the only college in the country for training forest officers could, with great difficulty cope with the training of officers in the Third Plan. Provision to strengthen both the officers' and the rangers' colleges at Dehra Dun has been made in the Fourth Plan. A new ranger's college is also proposed to be started in central India, in addition to the existing colleges at Dehra Dun and Coimbatore.

CONSERVATION

The Meeting of the Xth General Assembly of the International Union for Conservation of Nature and Natural Resources, with its headquarters in Morges, Switzerland, which was held in New Delhi from 24th November to 1st Docember 1969 has drawn attention again to the urgent need for conserving our flora, fauna, soil and water resources for the future well being of this country. India has become a State Member of the IUCN.

The following are some of the more important societies concerned with conservation in India: (1) Bombay

Natural History Society, Hornbill House, Shahid Bhagat Singh Road, Bombay 1; (2) Wild Life Preservation Society of India, 7, Astley Hall, Dehra Dun, U.P.; (3) World Wildlife Fund Indian National Appeal, Hornbill House, Shahid Bhagat Singh Road, Bombay 1; (4) Peermade Wild Life Preservation Society, Stagbrook Estate, Peermade P.O., Kerala; (5) Nilgiri Wild Life Association, Ootacamund, Nilgiris, S.I.; (6) Gujarat Natural History Society, 57, Pritamnagar, Ellis Bridge, Ahmedabad 6; (7) Birdwatchers' Field Club of India, 32-A, Juhu Lane, Andheri, Bombay 56; (8) High Range Game Association, Munnar P.O., Kerala; (9) Delhi Birdwatching Society, A Block, Dalhousie Road, New Delhi 11.

At Government level the Indian Board for Wild Life as well as the State Wild Life Advisory Boards in several states have been playing an important part in pressing upon the authorities the need to preserve habitats and wild life species.

AREA UNDER FORESTS

(See under each State)

AGRICULTURE

S OME major facts about Indian agriculture (1966-67): Total geographical area according to village papers (reporting area): 305.9 million hectares; area not available for cultivation (including forests, 60.5 million hectares, land for non-agricultural uses and barren lands, 15.6 and 35.0 million hectares respectively); other uncultivable lands like permanent pastures and grazing lands, land under free crops and cultivable wastes; 35.2 million hectares; fallow land: 22.6 million hectares: net area sown: 137.03 million hectares; area sown more than once: 19.6 million hectares; gross area sown: 156.6 million hectares; net area irrigated: 27.5 million hectares & gross area irrigated: 32.7 million hectares.

Average rainfall 45"; deficiency of 25 per cent is classed dry; deficiency of 40 per cent severe drought; usually one year in five is a dry year, one in ten, a year of severe drought, one in 20 to 25 years widespread severe drought.

AREA AND PRODUCTION

The names of crops, area in '000 hectares and production in '000 tonnes respectively during 1968-69 are given below: Rice 36,966; 39,761; Wheat 15,958; 18,652; Barley 2,758; 2,424; Maize 5,716; 5,701; Jowar 18,731; 9,804; Bajra 12,052; 3,802; Ragi 2,238; 1,648; Small millets 4,748; 1,803; Total cereals 99,166; 83,595; Gram 7,105; 4,309; Red grams 2,529; 1,816; Other pulses 11,630; 4,292; Total pulses 21,264; 10,418; Total foodgrains 120,430; 94,012; Sesamum 2,410; 414; Groundnut 7,091; 4,476; Rape and Mustard 2,992; 1,572; Linseed 1,707; 352; Castor seed 384; 111; Total ciseeds 14,584; 6,926; Tobacco 412; 347; Cotton 7,685; 5,270 (bales of 1000 kg.); Jute 529; 3,052; Mests 277; 921; Sanhemp 173; 66; Turmeric 529; 3,052; Potato 537; 4,773; Guar 426; 595.

Coconut 894¹; 5,192¹; Arecanut 143¹; 126¹; Cashewnut 202¹; 160¹; Cardamom 80¹; 4·0¹; Sugarcane 2,307¹; 9,959²; Pepper 102²; 23²; Ginger 22²; 20²; Chillies 760²; 487²; Tea 348²; 383²; Bananas 210¹; 3,732¹.

¹ Figures for 1966-67.

INDEX OF PRODUCTION—ALL COMMODITIES

(Base 1949-50 = 100)

	INDEX NU	MBERS OF P	RODUCTION
Year	Foodgrains	Non- foodgrains	All commodities
1966-67	123-8	147-4	131.6
1967-68 1968-69	159·0 157·5	165-1 161-0	161·0 158·7

FOODGRAINS

Foodgrains production in 1968-69 reached 94.012 millien tonnes. This is less than 1.04 millien tonnes from the record production of 95.0 million tonnes in 1967-68.

RICE

Rice crop occupies the largest area in the Indian Union, about 35 million hectares. During 1968-69 the area under rice cultivation was 36.97 million hectares and the production was about 39.76 million tonnes.

Tamil Nadu, Bihar, Bengal, Orissa, Madhya Pradesh, Uttar Pradesh, Assam, Andhra, Maharashtra, Mysore, Kerala and Gujarat are the main rice growing States and they together claim about 95 per cent of the total rice area in India.

WHEAT

The area under wheat is about 12.6 million Rectares. During 1968-69, the area under wheat was 15.9 mill. hectares and production 18.6 mill. tonnes. Wheat is grown widely throughout the north as a winter crop. U.P., M.P. and Punjab supplying over 72 per cent of the total outturn in the country. This crop occupies, on an average, about 10 per cent of the total cultivated area.

More than one-third of the crop is irrigated.

MILLETS *

Jowar:—About 17 million hectares are grown under this to yield about seven million tonnes of grain. Maharashtra, Andhra, Mysore, M.P. and Gujarat contribute

^{*} Figures for 1967-68.

over \$\frac{1}{2}\$ of the natural acreage. The jowar area and production respectively during 1968-69 were 18.7 mill. hectares and 9.8 mill. tonnes.

Bajra:—Occupies about 11 million hectares to yield about 3.6 million tonnes of grains. U.P., Rajasthan, Punjab, Gujarat and Maharashtra are the chief growing tracts. The duration of the crop varies from about 2½ to 5 months. During 1968-69 bajra was cultivated in 12-0 mill. hectares and produced about 5·1 mill. tonnes.

Ragi:—Ragi occupies about 2.2 million hectares to produce about 1.6 million tonnes of grain. More than half the area is in Mysore, Tamil Nadu and Andhra. The area and yield during 1967-68 were 2.3 mill. hectares and 2.0 mill. tonnes respectively.

Other Millets:—The others grouped under lesser or minor millets form about $\frac{1}{3}$ of the total area under millets and are grown in about 4.4 mill. hectares and yield about 1.6 million tonnes of grain. The area and yield during 1968-69 were 4.7 mill. hectares and 1.8 mill. tonnes respectively. The most important among them are Kora or Kangri, Kodon, Cheena or Varagu, Oodalu, and Sawan.

Maize:—Maize is cultivated in India in about 4.7 mill. hectares to produce about 4.7 mill. tonnes of grain. The major growing areas, U.P., Bihar, Rajasthan, Punjab and M.P. which between themselves account for about three-fourth of the maize area. The area and production during 1968-69 were 5.7 mill. hectares and 5.7 mill. tonnes respectively. The average yield is only about 10 mds. per acre. Seven hybrids (Ganga 2 and 3, Ganga Saffed, Ganga high Starch, Ranjit, Deccan and Himalaya) giving 56-70 per cent more than local varieties have been produced.

Barley: During 1968-69 barley was cultivated in an area of 2.8 mill. hectares and the production estimate was 2.4 million tonnes.

Pulses: —Pulses are grown in over two million hectares producing over ten million tonnes of grains.

COTTON

The area under cotton during 1968-69 was 7.685 mill. hectares producing 5.270 (thousand bales/180 kg. Cotton lint) or 2.843 thousand tonnes of kapas.

FRUIT

The total area under all fruits at the end of the Third Five Year Plan was 3.45 million acres as against 3.08 mill. acres at the end of the Second Plan.

Fruit and vegetable products amounting to over 89,920 tonnes are now manufactured in the country. Upto Sept. 1968, 1,073 firms were granted licences for the manufacture of fruit and vegetable products. The I.C.A.R. has set up in 1967 a Central Horticultural Research Institute at Hessarghatta in Mysore for overall researches on the major tropical fruits viz. mango, banana, papaya, grapes, citrus and also on ornamental plants of commercial importance.

REGULATED MARKETS

One of the visible benefits of regulated markets, which work on democratic principles, has been the reduction in the market charges to extents varying between 29 to 50 per cent. The saving to the producer on this account is estimated to be Rs. 3 for every Rs. 100 worth of goods sold by him. Open auction system which yields better price to the producer has also been introduced in a majority of the markets. New market yards with modern amenities are also being provided.

The number of regulated markets was 1,880 and grading units 504 during 1968-69.

Marketing, Processing: The main features of the programme are:— (1) Linking credit with marketing in the form of marketing societies; (2) Developing, processing and distribution of farming requisites on co-operative lines, and (3) Promotion of storage and warehousing.

COLD STORAGE

The present capacity of cold storage in the country is about 2.5 million maunds provided by over 200 cold storages mostly run by private traders. Permission has also been granted for the expansion of 99 cold storages and for setting up 223 new cold storages. Upto Sept. 1968, 934 cold storages were licensed in the country.

SOIL CONSERVATION

The co-ordination of soil conservation work between the States and Territories is achieved through the agency of the Central Soil Conservation Board in the Ministry of Food and Agriculture. Similar boards are also set up in most of the States and Territories.

During 1968-69, soil conservation programmes benefited an area of 14-4 lakh hectares of agricultural and forest land.

Altogether 10 research-cum-training centres under the jurisdiction of I.C.A.R. have been established at the following places:—

1. Ootacamund (Tamil Nadu) for erosion control in the Nilgiri and other hills; 2. Bellary (Mysore) for soil conservation studies in black soils; 3. Kotah (Rajasthan) with sub-centre at Agra for erosion control in the Chambal and Jumna ravines; 4. Jodhpur (Rajasthan) for afforestation in the Rajasthan desert; 5. Dehra Dun (U.P.) for studying problems of afforestation in the Sivalik hills with the sub-station at Chandigarh (Punjab)* for training chos (hill torrents); 6. Vasad (in the Gujarat tract) for crosion control in the ravines along rivers in Gujarat; 7. Chandigarh (outer Sivaliks); 8. Chatra (water shed management); 9. Agra (Yamuna ravines); 10. Ibrahimpatnam (Andhra) for tackling red soil problems.

Centrally sponsored soil conservation schemes were in operation in the catchments of 13 river valley projects in 14 States to reduce silt in dams and reservoirs. An area of 0.86 lakh hectares has been estimated to be covered by the scheme at a cost of Rs. 3.10 crores in various States.

An Integrated All-India Soil and Land Use Survey Scheme has been executed by the Central Soil Conservation Board with four Zonal Centres at Delhi, Nagpur, Bangalore, and Haringhata, with effect from 1st March 1959. Under this scheme 4-86 lakh hectares were expected to be surveyed during 1968-69.

AGRICULTURAL EDUCATION

Ten agricultural universities of the pattern of Land Grant Collegest have already been established in Bengal (Kalyani), in Orissa (Bhubaneshwar), Punjab (Ludhiana), Rajasthan (Udaipur), U.P. (Pantnagar), Andhra (Rajendranagar), Madhya Pradesh (Jabalpur), Maharashtra, Assam and in Mysore (Hebbal). The Indian Agricultural Research Institute, New Delhi, now declared as the only National institute for agricultural research in India also gives coaching and examination and tests for post graduate degree courses in agricultural diplomas. A total grant of Rs. 2.5 crores was released as grant for the development of agricultural universities during 1968-59. In addition Rs. 10 lakhs have been sanctioned for the

[•] Composite State. † Other campuses at Hissar (Haryana) and Palampur (Himachal Pradesh).

development of the agricultural colleges of two central Universities, Banaras Hindu University and Viswabharati, Santiniketan.

There are 70 agricultural colleges in India.

LAND POLICY

The agrarian reforms undertaken by the various State Governments during the past few years fall generally into four broad classes:—

ABOLITION OF INTERMEDIARIES

The programme for the abolition of intermediary tenures has been almost entirely completed.

TENANCY REFORMS

The principal features of tenancy reforms are (a) security of tenure for tenants, (b) regulation of rent and (c) conversion of tenants into owners.

With the abolition of intermediaries, the tenures come under two broad categories, i.e. (i) owners who hold land directly from the State; (ii) and the tenants who hold land from owners. Their rights and obligations are regulated under tenancy laws enacted in the States. Thus the multiplicity of tenancy has been considerably reduced, and in most parts, tenants who hold land under intermediaries have now become owners of land.

Regulation of rent—Land revenue assessment: Legislation has been adopted in all States for the regulation of rent. The Plan recommendation is that it should not exceed one-fourth or one-fifth of the gross produce. But the rent fixed, however, varies with the State. Legislation has been enacted in all the States for regulating maximum rents which a landlord may receive.

Security of Tenure: Legislation providing security of tenure has been enacted in all the States.

Resumption: Legislation has been put through in most of the States prescribing a basis for the resumption of the land by the landlords,

Ownership Right for Tenants: Tenants were declared owners on payment of compensation to owners in almost all States.

Compensation to Landiords: Compensation payable by tenants for the acquisition or ownership varied from State to State except in the Punjab (where it is fixed at \$\frac{1}{2}\$ of the average market value). Compensation is generally a multiple of rent or land revenue. In Andhra (Hyderabad 6-15); Madhya Pradesh (Madhya Bharat: 2-8 of the net income of landlord); Ajmer: 12; former Vindhya Pradesh: 15; former Madhya Pradesh (7-10); Rajasthan (for unirrigated lands); 10 and Uttar Pradesh 10.

In the Travancore part of Kerala it is fixed at eight and a half times the net annual income.

The compensation is fixed as a multiple of the assessment in five States:—Gujarat and Maharashtra: 20-200 times of the assessment; Delhi: 20-40; Himachal Pradesh: 48 and Punjab (PEPSU): 90 times of the assessment. This compensation is generally payable in instalments (except in former Madhya Pradesh) spread over a period of 5-15 years.

FIXATION OF CEILING

Ceiling on Holding: Legislation placing ceiling on agricultural holdings has been enacted in all States and

* Composite State. † As originally conceived.

Territories except Punjab*. Though there is no outright ceiling on ownership in Punjab*, the Government is empowered to settle ejected tenants on lands under personal authorities of owners in excess of the prescribed limits.

State-wise existing and future agricultural holdings in brackets respectively in acres, allowed by any individual, are as follows:—Andhra Pradesh 27—324 (12—200); Assam 50 (50); Bihar 20—60 (20—60); Gujarat 19—132 (19—132); Jammu & Kashmir 22; (22½); Kerala 15—37½ (15—37½); Madhya Pradesh 25—75 (25—75); Tamil Nadu 24—120 (24—120); Maharashtra 18—126 (12—126); Mysore 27—216 (18—144); Orissa 25—100 (25—100); Punjab* 30 Standard (30 Standard); Rajasthan 30 Standard (30 Standard); Uttar Pradesh 40 (12½); West Bengal 30 Standard (30 Standard); Delhi 30 Standard (30 Standard); Manipur 25 (25); Tripura 25—75 (25—75).

SURPLUS LAND

As a result of implementation of legislation for ceilings on holdings considerable acreage has become surplus and allotted to tenants etc.

In Assam, Bihar, Delhi, Gujarat, Madhya Pradesh, Maharashtra and parts of Tripura provisions of the Bill have been enforced and implementation is progressing.

CONSOLIDATION

(a) Size of Holding: The average size of a holding for the whole of India is 7.5 acres, but this varies from State to State: Assam 5.3 acres, Bihar 4.1 acres, M.P. 13.9 acres, Tamil Nadu 9.7 acres, Orissa 5.6 acres, Punjab 11.8 acres, U.P. 5.3 acres, W. Bengal 4.7 acres.

Kashmir $3\cdot 8$ acres, Kerala $2\cdot 4$ acres, Mysore $7\cdot 2$ acres, Rajasthan $16\cdot 9$ acres.

The majority of the holdings will be less than 5 acres, a great majority indeed less than 2.

The proportion of households that held either no land or less than five acres was about three fourths, and the total share was about one-sixth of the whole area of cultivated land.

Legislation has been enacted in most of the States and in the Delhi and Himachal Pradesh Territories for prevention of holdings and consolidation of fragmented holdings. Consolidation was completed over 162 lakh hectares upto 1968 at a cost of Rs. 32 crores. During 1968-69 a further area of 17 lakh hectares was expected to be consolidated.

In the Fourth Five Year Plant it is proposed to spend Rs. 100 million for subsidy and loans to new settlers and Rs. 320 million for consolidation of holdings to extend the programme to another 56 million acres.

CO-OPERATIVE FARMING

The main purpose of such type of farming is to secure economy in the use of machinery, and the advantages of large-scale farming.

STATEWISE AREA AND PRODUCTION

For classification, area and production of foodgrains, and area and production of oilseeds, spices, fibre crops and cash crops, statewise see under each State.

LIVESTOCK

THE total livestock population in India (excluding poultry) is placed at 343.7 million, according to the 1966 livestock census as against the 1961 census figure of 336.4 million, an increase of 2.2 per cent. About half of this is cattle amounting to 175.99 million, sheep 40.0 million, goats 64.5 million, Buffaloes 52.9 million and poultry 115.0 million, horses and ponies 1.1 million, pigs 4.9 million, camels 1.0 million and other livestock 1.1 million. The net contribution of livestock to the national income at present is estimated to be over Rs. 30,000 million excluding Rs. 4,000 million contribution in terms of bullock/draught power. Their foreign exchange earnings were as much as Rs. 880 million in 1966-67 amounting to 8 per cent of the total foreign exchange earnings of the country and about 29 per cent of such earnings from important agricultural commodities and products.

Meat from livestock is a valuable source of protein; about 0.9 per cent of the total cattle population is slaughtered for meat, and 36 and 32.5 per cent of the goat and sheep population respectively. The annual production of meat from goat is about 0.15 million tons and that of mutton 0.11 million tons. Production of beef, buffalo flesh and pork amounts to 0.12, 0.09 and 0.02 million tons respectively. The total annual production of meat from all species is estimated to be over 0.46 million tons valued at Rs. 1,000 million.

CATTLE

Among the well-defined breeds of cattle (25 and 8 of buffaloes), three broad divisions are: dairy or milch and draught cattle and those that serve a dual purpose.

Dairy Milch:—The Sahiwal, the best milch breed, are responsive to environment, have an yield of 4,000 lbs. a year. The Sindhi are also responsive to environment, the Gir in Saurashtra and Rajasthan have an yield of 3,700 lbs. a year. In the order of the productivity of milk the cattle may be arranged as follows: the Sahiwal, the Kankrej, the Ongole.

Draught:—The Amritmahal Hallikar (Mysore) are good for draught purposes but are poor milkers.

Dual:—The Galo in Madhya Pradesh are draught animals but also good milkers, 3,000 lbs. The Kangayam in the south and south-east of the country are powerful draught animals of average milk yield. The Kankrej, are essentially draught but have milk potentialities (3,000 lbs.); they belong to Gujarat. The best known in this group are the Haryana (Punjab, 3,000 lbs.), Tharparkar (Gujarat and Rajasthan, 3,000 lbs.), and Ongole (Andhra).

The best known breeds of buffaloes (26 in all) are the Murrah, Nili and Ravi of the Punjab, the Jufferbadi of Kathiawad, Mehsana of Gujarat, Nagpuri of Vidarbha and the Surti and Pandharpuri (a type of Nagpuri buffaloes) of Maharashtra. All except the Nagpuri are noted dairy breeds. Murrah is adapted to all climates. They also yield on an average about 3,000 lbs. of milk for over 300 days in a year.

The average annual milk yield of a buffalo is 1,100 lbs. against 413 lbs. of the Indian cow. Buffalo milk being one and a half times as rich in fat content as cow milk, is more valued for butter and ghee production. Buffaloes

are also better utilisers of coarse fodder and are less expensive to keep.

It is estimated that contribution of draught power in terms of rupees is about four hundred crores. The area cultivated by a pair of working animals is about 8.16 acres.

Livestock Development is stepped up through special schemes such as key village blocks with cattle breeding farms and arrangements for bull rearing, artificial insemination, subsidised calf rearing and also Goshalas and Gosadans.

Cattle Development Programmes; Achievement during 1967-68 and 1968-69 respectively: Key Village Blocks (Nos.): (a) Established (17; 3); (b) Expanded (12; 0); (c) Subsidised rearing of calves (Nos.) (1,150; 1,200); Cattle breeding farms (Nos.); Established (3; 3); Gosadans (Nos.) (62; 0); Feed and Fodder (a) Pasture demonstration plots (No. established) (0; 12170); (b) Distribution of forage seed (0; 1816 qtls. seed and 45.56 lakh rootslips); (c) Forage production (Regional) stations (—; 3).

Intensive Cattle Development Programme

Intensive cattle development projects: Andhra 2, Bengal 2, Bihar 2, Gujarat 4, Jammu and Kashmir (Srinagar) 1, M.P. 2, Maharashtra 4, Tamil Nadu 3, Mysore 3, Orissa 1 and U.P. 3. The I.C.D. Projects in the country has risen to 32, covering the breedable female bovine population of 27 lakh cows and buffeloes. This area development has been introduced also for sheep, poultry and piggery.

Service Training Centres:—For the development of livestock seven service training centres were established. The services of F.A.O. experts have been obtained to conduct four practical training courses of two months' duration each in artificial insemination and physiology of reproduction.

Feed and Fodder:—During 1968-69 the programme of feed and fodder resources operated in all the States except Nagaland and four Union Territories.

Salvaging:—Under the scheme for the salvage of superior calves from milk colonies, 1,150 calves of six months age and above were bought from Aarey and Haringhata milk colonies during 1967-68 and distributed freely to bona fide breeders.

Gosadans:—The Gosadan Scheme aims at the removal and segregation of old, unproductive and uneconomic cattle. 62 Gosadans were functioning in the country apart from 18 District Gosadans in U.P.

Gaushala Development: The object is to convert them into efficient milk production centres and to breed better cattle. Total number of gaushalas taken up for development since the initiation in the 2nd Five-Year Plan upto 1967-68 was 397.

SHEEP

India produces over 35 million kg. of wool annually accounting for 1·3 per cent of world's production, Rajasthan accounting for about 40 per cent of the production. Though annually an average 11 million kg. valued over Rs. 68 million are exported about 11 million kg. were imported in 1966-67.

Sheep also supply meat worth about Rs. 120 million every year in addition to pelts and manure. 15.3 million sheep skins are used in leather industry. An individual sheep contributes 0.5 to 0.7 tons of manure annually.

Research in sheep breeding is promoted in three major sheep rearing tracts, viz. Temperate Himalayan, North Indian Plains and in the Deccan Plateaux, to evolve strains of sheep which will yield wool for apparel and also for superior types of carpets.

73 sheep breeding farms were set up during the 3rd Five Year Plan for producing quality stud rams and 459 sheep and Wool Extension Centres under rural flocks improvement programme. Under the special development programme (t'rash programme) ten new sheep farms have been established, 20 of the existing ones expanded and 67,300 sheep were distributed amongst the farming committees of various States.

GOATS

Goats besides being the principal source of meat supply, also provide manure, skin, hair (Mohair) and milk.

Important breeds of Indian goats:—Himalayan Goats are found in the hills of Kashmir, Punjab* and Uttar Pradesh. These are mostly reared for mohair production and also for meat. The Pashmani goat of Kashmir produces an undercoat of very fine variety of hair which goes into the manufacture of shawls. The plain goats comprise some of the best mutton and mileh animals. Some of the better known breeds are Marwari, Konor and Jamnapari. The last yields 600 lbs. in a lactation of 250 days. Decean plateaux goats yield small quantities of milk and are mostly reared for mutton.

Results from the Punjab* and U.P. have shown that selected goats yield (6 to 8 lbs. milk per day going upto even 12 lbs. in U.P.) on an average about 400 lbs. of milk per lactation of 150 days while a few went up to 700 lbs. and even higher.

POULTRY

There were about 115 million poultries in India in 1966. The annual contribution of Indian poultry to the country's economy is not less than Rs. 100 million. The per capita consumption of eggs in India is only four per annum as compared with 400 in U.K., U.S.A. or Denmark.

Poultry Development:—Achievements at the end of the Third Five Year Plan are: State Poultry Farms 100; District Poultry Farms 47; Intensive Poultry Development Blocks 79; Marketing Centres 12; Duck Extension Centres 20; Feed Manufacturing Centres 60; Training persons in poultry keeping 21,724.

Poultry development programmes have been intensified by taking up co-ordinated poultry breeding at selected State poultry farms, Regional poultry farms at Bangalore, Bombay and Bhubaneswar have been expanded. By 1967-68, 92 Egg and Poultry Production-cum-Marketing Centres have been set on the lines of Package programme. During 1968-69 eight more such centres have been set up bringing the total 100.

Two Poultry Dressing Plants have also been set up at Poona and Chandigarh.

Fifteen poultry dressing plants with capacity of 2,000 birds each per day have also been procured from Australia and supplied to Assam, Andhra Pradesh, Bengal, Bihar, Gujarat, Haryana, Jammu and Kashmir, Kerala, Madhya Pradesh, Maharashtra, Mysore, Orissa, Rajasthan, Tamil Nadu and U.P. The country is now not

Piggery:—So far seven bacon factories, 27 pig breeding farms and 105 piggery development blocks have been set up in various States. The combined strength of seven main pig breeding stations is about 3,800 pure-bred pigs from which 1,813 pigs were distributed to farms in intensive piggery development areas.

Out of the seven bacon factories which are situated in Andhra Pradesh, Bengal, Bihar, Kerala, Maharashtra, Rajasthan and U.P., the factories in Andhra Pradesh and Bengal sold products worth Rs. 2·38 lakhs and Rs. 1·61 lakhs respectively in 1968-69. Kerala and Maharashtra factories are being completed; Bihar, Rajasthan and U.P. factories are nearing completion. A similar project was being set up at Chandigarh also during 1968-69.

DAIRYING

Milk and milk products contribute not less than Rs. 6.200 million to the national income.

Of 200 million cattle and buffaloes, 72 million or 36 per cent are milch animals (females over 3 years). Milk yield is, however, low: Cow 413 lb. per year, buffalo 1,100 lb.

Gross production of milk is 20.65 mln. tons, of which 13.2 mln. tons are marketed, the rest being used for home consumption or for feeding the calves. Per capita daily consumption of milk and milk products varies from 16.89 oz. in the Punjab* to 26.4 oz. in Orissa; average 5.5 oz. The per capita availability of milk during 1965-66 was 5.75 oz.

Total number of dairy plants in operation in 1967-68 increased to 84 comprising 43 liquid milk plants, 34 pilot milk schemes, four milk powder factories and three creameries. The average daily output of milk of all plants was about 16 lakh litres as against 15.50 lakh litres in 1966-67.

In the milk powder factories at Anand, Amritsar, Mehsana and Rajkot, the average daily production of milk powder including infant milk food amounted to about 18 tonnes. The three creameries, at Aligarh, Barauni and Junagadh and the plants at Anand, Amritsar, Calcutta and Delhi manufacture on an average 22 tonnes butter per day. A milk products plant is being established at Miraj, milk powder factory at Vijayawada and an infant milk food plant in the co-operative sector at Moradabad. Two milk powder plants in Punjab and one in Haryana are being established under Yugoslav credit programme.

Training in dairying was imparted at six centres viz. Karnal, Bangalore, Aarey, Allahabad, Anand and Harringhata.

· Composite State.

† Manufactures also infant milk food.

‡ Manufactures also milk products and infant milk food.

The total number of dairy plants in operation during 1968-69 was 91 comprising 47 liquid milk plants, 37 field schemes, 4 milk broduct factories and 3 creameries. During the year the average daily output of milk was about 18 lakh litres as against 16 lakh litres in the previous year.

ANIMAL DISEASES

The chief diseases are glauders and surra in equines, foot and mouth disease, haemorrhagic septicaemia, black quarter and anthrax in ruminants and tuberculosis, Johne's disease and contagious abortion. Glanders is incurable but surra can now be successfully treated with Naganol or Antrypol. This disease (surra) also affects camels, cattle and dogs.

Rinderpest causes a mortality of about 60 per cent resulting in an annual loss of 0.4 million heads of cattle, valued at about 300 million rupees. Because of the eradication campaign of the past, Kerala, Mysore and Tamil, Nadu are now free from the disease. But, further north, in Andhra Pradesh, Gujarat and Maharashtra States the disease is prevalent and a pilot scheme to vaccinate and brand about 12 million cattle and buffaloes has been in operation since October 1954.

Nearly 24.83 million animals were vaccinated raising the total number of animals covered under the Mass Vaccination Campaign to 150 million and under various follow up measures to 90 million. As a result the disease incidence which was originally responsible for about 8,000 annual outbreaks taking toll of nearly 0.2 million animals was brought down in 1965 to only about 300 outbreaks with about 3,000 deaths.

Research and Educational Institutions

The Indian Veterinary Research Institute having centres at Uttar Pradesh, Izatnagar, and at Mukteswar near Bareilly, supplies the veterinary demands of India for sera and vaccines. Problems of sheep and wool are investigated at the Central Sheep and Wool Research Institute, Malpura (in Rajasthan).

Research in dairying is done at the National Dairy Research Institute, Karnal (Haryana) and at its southern regional station at Bangalore (Mysore). Other Institutes are the Agricultural Institute, Allahabad, The Indian Veterinary Research Institute, Izatnagar, National Dairy Research Institute, Karnal and the Central Sheep and Wry Research Institute, Malpura. The eight agricultural universities already established invariably contain animal husbandry wings.

There are 21 Veterinary Colleges in India, one each at Hyderabad, Tirupathi (Andhra Pradesh); Gauhati (Assam); Patna and Ranchi (Bihar); Anand (Gujarat); Trichur (Kerala); Jabalpur and Mhow (Madhya Pradesh); Madras (Tamil Nadu); Bombay, Nagpur (Maharashtra); Hobbal (Mysore); Cuttack (Orissa); Hissar (Haryana); Bikaner (Rajasthan); Mathura, Nainital and Izatnagar (Uttar Pradesh); Kalyani and Calcutta (West Bengal).

Animal Husbandry Research

Coordinated scheme on cross breeding of cattle in hilly and heavy rainfall areas of the country with Jersey semen has been in operation at 8 centres in different parts of the country, while the scheme for development of hill cattle by cross breeding with Jersey was in operation in 11 States.

Research in Animal Sciences hereafter will be promoted through coordinated projects.

Nine new comprehensive All India Coordinated projects with multi-disciplinary approach have been prepared for cattle, buffalces, sheep and geats, pigs and poultry to be included in the Fourth Five Year Plan.

LIVESTOCK STATISTICS

¹⁹⁶⁶ figures are tentative and subject to revision (and do not contain census data for Gos, Daman & Diu and NEFA). @ Below 500.

Figures given in the bracket (for 1966 items) are percentage increase/decrease over 1961 census figures. Census of Nagaland was carried out for the first time only in 1966.

IRRIGATION

THE net area under irrigation in India during 1965-66 and 1966-67 was 26.691 and 27.514 million hectares and the gross area 31.171 and 32.693 million hectares respectively. Net sown area in 1965-66 and 1966-67 was 136.135 and 137.03 million hectares respectively. The irrigation potential has gone up from 56 million acres in 1947 to 88 million acres in 1967-68.

About 500 major and medium Irrigation Projects were taken up during the three Plans, which on completion, were expected to irrigate 17.81 million hectares. The benefits from these projects by the end of the Third Plan were expected, however, to be limited to about 7.3 million hectares of additional irrigated area. During 1966-67 a sum of Rs. 114 crores had been spent on irrigation.

Rainfall in the country is unequal and in many areas uncertain necessitating recourse to artificial irrigation. The distribution is as follows:

Range	(in million acres)	Percentage
Area between 0-30 inches . Area between 30-50 inches . Area between 50-75 inches . 75 inches and above .	. 339·2 . 143·9	29·6 42·0 17·8 10·6
Total area	806-3	100-0

The total capacity of India's canals is over 220,000 cusecs, and the canals are over 67,500 miles in length. The total amount of annual flow of water in the Indian Union is 1,360 million acre feet, distributed as follows:—

1. Rivers (excluding the Indus system) falling into the Arabian Sea, 261.5; 2. Rivers (excluding Ganga and Brahmaputra systems) falling into the Bay of Bengal, 334.0; 3. Indus basin in India, 64.4; 4. Ganga System, 397.1; 5. Brahmaputra System, 309.0.

Out of the water resources of 1,360 million acre feet owing to physiographical conditions only about a third, about 450 million acre feet are utilisable.

UTILISATION OF IRRIGATION POTENTIAL

The outlay on major and medium irrigation projects, the potential and utilisation respectively are as follows:—

Gross area in million hectares

At the end	of		Outlay in Rs. (Crores)	Poten- tial	Utilisa- tion
1st Five Year Plan 2nd Five Year Plan 3rd Five Year Plan 1966-67. 1967-68.	**	4 9 9 0 4 9 0 1	300 380 580 130 133 143	2·6 4·6 6·9 7·4 8·2 9·0	1·3 3·4 5·5 6·1 6·8 7·4
Total		* *	1,666	38-7	30.5

Names of major irrigation projects taken up in the Third Plan, estimated cost in Rs. million and ultimate irrigation in million acre respectively: ANDHRA PRADESH: Pochampad (406-1); (0.57); BIHAR: Chandan Reservoir (59-0); (0.14); MADHYA PRADESH: Gasdeo (90.0); (Water supply scheme); MYSORE: Malaprabha (200.0);

(0·30); Upper Krishna (611·0); (0·60); PUNJAB: Beas Project Unit—I (Sutlej Beas Link) (108·0); (0·80); Beas Project Unit—II (Pong Dam) (297·0); (0·79); RAJASTHAN: Beas Project Unit (Sutlej Beas Link) (18·0); (Under Rajasthan Canal); Beas Project Unit—II (Pong Dam) (631·0); (Under Rajasthan Canal); TAMIL NADU: Chitter Pattanamkal (77·6); (0·05); UTTAR PRADESH; Western Gandak Canal (363·9); (0·60).

Drought

Adverse weather particularly in recent years has affected long areas in the country to severe drought. Eastern U.P. and South Bihar are among the worst affected areas. Measures for drought prevention and mitigation viz. irrigation projects are being examined to be taken up in the Fourth Plan. A number of pumped canal schemes have also been prepared and are under examination.

MINOR IRRIGATION

Minor irrigation works are works that can be conceived and handled to a large extent by the local people themselves, and individually cost Rs. 10 lakhs or less.

Minor irrigation schemes include construction of open wells, tanks and minor drainage schemes; embankments which are important from the point of view of food production and checking intrusion of salt water in coastal areas; restoration of old tanks, stream diversion schemes; and installation of pumping appliances and improvement of water supply from wells and storage dams. There are also such works as construction of kuhis in hilly areas, filter points in coastal alluvium and installation of improved lift appliances, Persian wheels and pumping sets on wells. Tubewells also form part of minor irrigation works.

TANKS AND WELLS

Tankirrigation'is very important in Andhra, Tamil Nadu, Orissa and Uttar Pardesh where over 3·1, 2·0, 1·2 and 1·0 million acres respectively, are irrigated by tanks. Bengal, Mysore, Bihar, Gujarat and Maharashtra have over half a million acres under tank irrigation.

Wells: Wells are mainly of two types, i.e. surface or sub-surface. Unlike tanks, they can be constructed irrespective of topographical and geological limitations, provided sub-soil water is in reach.

Well irrigation commands over 5.9 million acres in Uttar Pradesh and 2.3 million in Punjab,* Rajasthan, Gujarat and Maharashtra. It is also of considerable importance in Tamil Nadu, Andhra, Madhya Pradesh and Bihar where over 1 million acres are irrigated by wells.

Pumping sets of high efficiency have come into common use for water lifting and also for draining.

Tubewalls

A tube well irrigates about 400 acres while a surface well barely 5 acres.

A centrally sponsored scheme for ground water surveys and investigation has been initiated.

During 1968-69 Exploratory Tubewell Organisation (ETO) planned to carry out ground water exploration in Andhra Pradesh, Bihar, Gujarat, Jammu and Kashmir, M.P. and Tamil Nadu to construct 90 different wells (18 in Gujarat and 72 in Bihar) and to sink 72 exploratory bores and 45 observation bores. By the end of June 1969 E.T.O.

^{*} Composite State.

completed 12 exploratory bores and 51 deposit and observation bores. A number of schemes for utilisation of ground water for integrated agricultural development are being considered by the Agricultural Refinance Corporation (A.R.C.) in very many states.

RESEARCH

There are now nineteen stations in India, dealing with irrigation research problems :--

Andhra Pradesh Engineering Research Laboratories, Hyderabad, Andhra Pradesh; Bhakra Dam Project Laboratory, Nangal, Punjab; Bihar Institute of Hydraulic and Allied Research, Khagaul, Patna, Bihar; Central Soil Mechanics & Concrete Research Station, Now Delhi; Concrete & Soil Research Laboratories, Madras; Central Water & Power Research Station, Poona, Maharashtra; Damodar Valley Corporation, Maithon, Dhanabad, Bihar; Gujarat Engineering Research Institute, Baroda, Gujarat; Hirakud Research Station, Hirakud, Orissa; 'Indian Institute of Science, Bangalore, Mysore; Irrigation Research Station, Poondi, Tamil Nadu; Korala Engineering Research Institute, Poechi, Kerala; Koyna Project Research Laboratory, Koyna Nagar, Maharashtra; Land Reclamation, Irrigation & Power Research Institute, Nasik, Maharashtra; Mysore Engineering Research Station, Krishnarajasagar, Mysore; River Research Institute, Calcutta, West Bengal; River Research Station, Chandmari, Gauhati, Assam; UP Irrigation Research Institute, Roorkee, U.P.

FLOOD CONTROL AND SOIL CONSERVATION

Since 1954 when the flood control programme was inaugurated on a coordinated basis, 6.4 million hectares would have been covered by flood protection measures by March 1969.

The outlay on flood control, drainage and anti-water legging schemes so far is as fellows: (in Rs. Creres) First Five Year Plan: 13; Second Five Year Plan: 48; Third Five Year Plan: 82; 1968-67: 14; 1967-68: 13; 1968-69 (anticipated) 14; 1969-70 (contemplated): 14.

The total damage due to the floods during the 1968 senson according to the assessment made so far was about Rs. 170 crores. Nearly half of this was accounted for by West Bengal alone. A total of 73 lakh hectares including a cropped area of 23 lakh hectares was affected. 3,436 human lives and about 1.39 lakh cattle heads were lost.

The 1968-69 flood damage was very high in Assam, Bongal, Bihar, Gujarat, Kerala, Orissa and Rajasthan resulting in damages amounting to Rs. 166 crores,

Steps are being taken to set up flood forecasting units in different parts of the country under a central programme.

Soil Erosion: The sea erosion problem received due attention and a Beach Erosion Board was set up to tackle the problem on a coordinated and scientific basis. Up to the end of the three Five Year Plans Rs. 63 million were spent on anti-erosion schemes in Kerals and a length of 58 km. was covered by the protective works. About 11 km. more of sea coast are likely to be protected at a cost of Rs. 19 million.

RIVER VALLEY PROJECTS

The major river valley projects are as follows:-

(1) Beas Project, (2) Bhakra-Nangal Project, (3) Hirakud Project, (4) Damodar Valley Project, (5) Tungabhadra Project, (6) Kosi Project, (7) Chambal Project, (8) Nagarjunasagar Project, (9) Koyna Project, (10) Rihand Project, (11) Bhadra Reservoir Project, (12) Kakrapara Project, (13) Machkund Project, and (14) Mayurakshi Project. Irrigation Committee: This Committee is being constituted to review development of irrigation in the country to report on the future integrated development of surface and ground water resources for maximising agricultural production.

Below we give notes on some individual projects.

Beas Project: Is a joint venture of the States of Punjab, Haryana and Rajasthan and is being executed by the Beas Construction Board under the control of the Central Government. Estimated cost Rs. 309·77 crores. Object: To harness the waters and power potential of the River Beas. On completion the project will facilitate the irrigation of 6·5 million acres of land in Punjab and Rajasthan and generate 13,50,000 K.W. of power besides augmenting the capacity of the Bhakra Power Generation System by 1,48,000 K.W. The irrigation and power facilities to be provided will give an agricultural output worth Rs. 20 crores annually.

The project comprises two units Beas Sutlej Link Project and Beas Dam.

Beas Sutlej Link Project: Estimated cost Rs. 146.87 crores, Consists of 62 metres (200°) High Rockfill Diversion Dam at Pandoh, about 21 kms. from Mandi in Himachal Pradesh. Expenditure incurred till end of 1968-69: Rs. 59.16 crores. Entire system is designed for diverting 7,500 cusces of water from River Beas. The Power Plant at Dehar will have six units of 165 M.W. capacity each and will generate 990,000 K.W. of electric energy.

Beas Dam at Pong: Envisages a 440 ft. high earth core, gravel shell dam near Pong village and a power house. Estimated cost: Rs. 162-90 erores. The reservoir created at Pong will impound 6.60 million acre feet of water out of which 5.60 million acre feet will be live storage capacity for irrigating the areas in Punjab, Haryana and Rajasthan. The power plant will have six units each capable of generating 60,000 K.W. of electric energy. Approximately Rs. 68-84 crores have been spent till the end of 1968-69. The dam is planned for completion in 1973.

Bhadra Project (Mysore): Bhadra Reservoir is one of the major irrigation projects in the Krishna Basin. The dam is situated in Lakkavalli village in Chickmagalur district. The reservoir has two canals the left bank canal and the right bank canal. The two canals will irrigate a total area of 2,44,663 acres in Chickmagalur, Shimoga, Chitradurga and Bellary districts. The total command area of the project is 3,33,300 acres.

The anticipated expenditure by the end of March 1970 is Rs. 2,995 lakhs. Potential created as of June 1969 is 2,52,000 acres. The work is almost complete.

Bhakra Nangal Project: (Bhakra Dam is located in H.P., and Nangal Dam and Canal in Punjab). The Bhakra Nangal Project is the biggest multipurpose river valley project in Asia and has the following main components:—(1) 740 feet high straight gravity concrete Dam at Bhakra, eight miles from Nangal, with two Power Houses at its base, one on each bank of the River. (2) A diversion Dam at Nangal, 62 miles North of Chandigarh. (3) Forty mile long Hydel Channel from Nangal to Rupar with two low head power houses—Ganguwal and Kotla. (4) A wide-spread notwork of transmission lines with series of Grid Sub-stations. (5) 108 miles of Bhakra Main Canal and 2,790 miles long canal branches and distributaries spread over in three States—Punjab, Haryana and Rajasthan.

With the commissioning on 17—1969 of the Right Bank Power House comprising 5 units of 1,20,000 K.W. each the work on the entire project is completed.

An ultimate power potential of 12,04,000 K.W. is expected by 1972 when Beas water will come into Gobind Sagar through Beas Sutlej Link. The States that will benefit are the Punjab, Haryana, Rajasthan, Himachal Pradesh, Jammu and Kashmir and Delhi.

The project commands 6-5 million acres of new land for irrigation and will improve 3-5 million acres of land already under irrigation.

The total expenditure incurred till the end of March, 1969 was Rs. 175·82 crores against the sanctioned estimate of Rs. 175·14 crores excluding the cost of Right Bank Power House which is estimated to be Rs. 59·70 crores which includes the cost of transmission lines.

The Nangal Dam, the Hydel Channel and the Bhakra Canal have already been completed.

The commitments from this project are Nangal Fertilizers 1,75,000 K.W.; Delhi 80,000 K.W.; Rajasthan 66,880 K.W.; Kashmir 10,000 K.W.; Punjab 203.350 K.W.; Haryana 147,380 K.W.; Chandigarh 13,060 K.W. and Himachal Pradesh 14,330 K.W.

The increase in foodgrains as a result of the irrigation from the project is expected to be 8,50,000 tons a year. Other additional yields that will accrue from the project are: Sugarcane 15,00,000 tons, cotton 6,00,000 bales and pulses and oilseeds 36,000 tons. All this is worth Rs. 200 crores.

Damodar Valley Project (Bihar and West Bengal): The Damodar Valley Project which is to benefit the States of Bihar and West Bengal, has as its main features the construction of (a) multi-purpose storage dams with hydroelectricity plants, (b) an irrigation project with a network of irrigation canals and distributaries measuring 1,550 miles including an 85 mile long irrigation-cum-navigation canal, (c) thermal power stations and the associated transmission and distribution facilities.

The ultimate benefits include (a) effective fixed control of the Damodar River, (b) irrigation of 9.73 lakh acres including 2.20 lakh acres of old irrigated area in the kharif season and 0.55 lakh acres in the rabi season resulting in an additional yield of rice, rabi crop and jute, (c) the installation of 1,061.5 M.W. of electric power (Projects taken up to Third Plan), (d) cheap transport facilities through the navigation canal carrying an annual traffic through the canal of coal, sand, chemicals, food-grains etc. to the extent of nearly 2 million tons, (e) efficient drainage of about 700 square miles of water-logged area in the lower valley in West Bengal, (f) prevention of soil erosion by afforestation, (g) land reclamation and improvement, (h) anti-malarial measures and public health promotion works and (i) development of fishery, tourism etc.

The first phase of the D.V.C. Project comprises (1) a thermal power station of 172.5 M.W. capacity at Bokaro, Bihar; (2) Tilaiya dam with a power station of 4 M.W. in Hazaribagh district, Bihar; (3) Konar Dam 24 miles from Hazaribagh; (4) Maithon Dam with a power station of 60 M.W. in Dhanbad District (Bihar); (5) Panchet Hill Dam with a power station of 40 M.W. (Initial) in Dhanbad District (Bihar); (6) the Durgapur Barrage and Canals in the districts of Burdwan, Bankura, Hooghly and Howrah (West Bengal) and (7) the transmission and distribution system.

The Bokaro Thermal Power Station has now an installed capacity of 247.5 M.W.

The Maithon, the Panchet and the Tilaiya Power Stations have now an aggregate installed generating capacity of 104 M.W.

Irrigation projects comprising Durgapur Barrage, two main canals and distributaries totalling 1,550 miles of canals have been completed.

The Durgapur Thermal Power Station has now an installed capacity of 290 M.W. (2 × 75 M.W. + 1 × 140 M.W.) and the Chandrapura Thermal Power Station has now an installed capacity of 420 M.W. (3 × 140 M.W.) out of 1061 M.W. of electric power generating capacity, the thermal stations contribute 957 M.W. and hydel stations 104 M.W. Besides the throe units, the work for two more units of 120 M.W. each at Chandrapura has been taken up and the work is in progress.

The D.V.C. power system supplied electrical energy through an expanded network of transmission lines right up to Calcutta in the east and up to Mogalsarai in the west, 3,717 million units in 1966–67, 3,725 million units in 1967–68 and 3,839 million units in 1968–69.

The annual gross revenue from power during 1966-67, 1967-68 and 1968-69 was Rs. 21.00 crores, Rs. 22.65 crores and Rs. 23.70 crores respectively.

The four dams in the D.V.C. system would provide irrigation for 9.73 lakh acres of kharif and 0.55 lakh acres of rabi lands and also supply water for industrial and domestic uses. During kharif seasons of 1967-68, and 1968-69 water from Durgapur Barrage was supplied to irrigate an area of 7.01 and 7.15 lakh acres respectively. During 1968-69, an irrigational potential of 7.85 lakh acres was created.

The annual gross revenue from irrigation for the years 1966-67, 1967-68 and 1968-69 is Rs. 0.94 crore, Rs. 1.04 crores and Rs. 1.14 crores respectively.

The Panchet and the Maithon dams have controlled several major floods in the lower valley.

The estimated cost of the project (including Fourth Plan) is about Rs. 263-56 crores. The aggregate capital expenditure on the various projects upto the end of March 1969 is about Rs. 225-81 crores.

The total receipts of D.V.C. during 1969-70 have been estimated at Rs. 24·28 erores and the total estimated revenue expenditure, including provisions for the development rebate reserve and the general reserve on the power side only during 1969-70 works out to Rs. 26·18 crores.

Hirakud Dam Project (Orissa):—This project is the biggest multipurpose River Valley Project on river Mahanadi in Orissa State and is situated near Sambalpur. The main functions of the project are flood control, irrigation and power. The project comprises the Hirakud Dam, Hirakud Canal System, Burla Power House and the Chiplima Power House.

The total culturable commandable area under Hirakud Irrigation in Sambalpur and Bolangir Districts is 3.8 lakhs of acres and the total annual irrigation potential is 6.00 lakh acres. The Hirakud Dam Project also provides regulated supply for perennial irrigation of about 9 lakhs of acres in Mahanad Delta in the districts of Cuttack and Puri.

The Burla Power House has got 6 power units of total installed capacity of 198 M.W. and Chiplima Power House has 3 power units of total installed capacity of 72 M.W., the total installed capacity being 270 M.W. The project provides power to many industries and the rural areas of Orissa.

Mahi Scheme: The revised estimated cost of the project has been worked out to be Rs. 495 lakhs. The scheme when completed is likely to irrigate 30.8 thousand hectares of land.

Tungabhadra Project (Andhra and Mysore): The project is now being executed by the Tungabhadra Board and the Governments of Andhra Pradesh and Mysore.

The Tungabhadra Dam across the river Tungabhadra at Mallapuram in Bellary District (Mysore State) is 8,006 feet long and 162 feet high at the deepest foundation and 116 feet high on an average above the river bed. The reservoir extends to an area of 146 square miles and has a capacity of nearly 3-1 million acre feet at the full reservoir level of 1,633.

The Tungabhadra Project has three main canals, one on the left bank side and two on the right bank side. They have together an irrigation potential of 12,72,910 acres (5,15,121-21 hectares).

Left Bank Side: There are two canals on the left side viz., High Level Canal and the Main Canal. The Left Bank Main Canal is 141 miles in length and has a capacity of 7,000 cusecs at head for power development, of which 3,100 cusecs are for irrigation of 5,80,000 acros (2,34,714-4 hectares) of land in Raichur District of Mysore State.

Right Bank Side: There are two main canals on the right bank side of the river viz., the High Level Canal and the Power Canal.

The Power Canal carrying 2,500 cusecs feeds the Power House at Hampi about 20 kilometers below for generation of power. The Low Level Canal which begins from this point is 217 miles long and has a capacity of 1,800 cusecs at head and irrigates 92,345 acres (37,370,17 hectares) of land in Mysore State and 1,48,725 acres (60,186 hectares) in Andhra Pradesh, the total being 2,41,070 acres (97,556·17 hectares).

The High Level Canal which is targeted to be completed by June 1970, is 122 miles (196-33 kilemeters) in length and has a capacity of 4,000 cusecs at head on completion. The canal will irrigate 1,00,000 acres (40,468 hectares) in Mysore State and 1,19,115 acres (48,203-45 hectares) in Andhra Pradesh in the first stage and additional 1,00,000 acres (40,468 hectares) in Mysore State and 1,32,725 acres (53,711-25 hectares) in Andhra Pradesh after completion of Second Stage. The total irrigable area will be 2,00,000 acres (80,936 hectares) in Mysore State and 2,51,840 acres (1,01,914-70 hectares) in Andhra Pradesh.

Hydro Electric Scheme: The Hydro Electric Scheme on the southern side consists of two Power Houses with four generators in each power house, each of 9,000 K.W. capacity making an aggregate of 72,000 K.W. The total installed capacity of the Scheme is at present 72 M.W.

On the northern side, there is one power house near the Dam with 3 units of 9,000 K.W. capacity each. It is proposed to have one more unit of 9,000 K.W. capacity at the Dam Power House and three more power houses on the canal. All the power houses taken together will generate 1,00,500 K.W. of power.

A 220/132 K.V. sub-station at Hampi Power House and a single circuit 220 K.V. line from Lingapur (Munirabad) to Hampi Power House are under construction to interconnect the Andhra, Mysore, and Tungabhadra systems.

Kosi Project (Bihar): Total expenditure on the project (old scheme) up to the end of March 1969 was Rs. 73.25 crores. The Kosi canal systems on the eastern and western sides of the river have been designed to provide annual irrigation to an area of about 26 lakh acres in the districts of Saharsa, Purnea, Darbhanga and Monghyr of Bihar and Saptari of Nepal.

Chatra Canal System: As part of India's Aid to Nepal the Chatra Canal Project has been taken up. The canal

will take off at 30 miles upstream of Kosi Barrage and will irrigate annually 2.12 lakh acres in the Morang and Saptari districts of Nepal. This scheme will cost about Rs. 8.91 crores (revised estimate). This scheme, when completed, would yield an additional produce of 39 lakh maunds per year valued at Rs. 4.75 crores.

Schemes to extend irrigation facilities to an area of 3.97 lakh acree between the Kosi river and the original command of Eastern Canal system has been taken up at an estimated cost of Rs. 972.28 lakhs (revised estimate) including the cost of village channels. 82.30 per cent of the work had been completed up to March 1969.

The final solution of Kosi lies in the construction of dams in the hilly region of the river across the Kosi in Nepal.

Rajasthan Canal

(For details see under Rajasthan State.)

Nagarjunasagar Project (Andhra Pradesh).—The project is situated near Nandikonda village in Miryalguda Taluk of Nalgonda district. The project comprises the construction of a gravity type masonry dam — the tallest and largest masonry dam in the world — two irrigation canals on either side of the river and a power house with 8 generating units each with 50,000 kW. installed capacity. The main dam, when completed, will be 409 ft. high (ultimate stage), 360 ft. wido at the base and about a mile long. It will be flanked on either side by compacted earth dams. Each flanking dam will also be about a mile long. A 28-ft. roadway will run on the top of the dam linking the flanks over the central spillway. Eight penstocks, 16 ft. in diameter will be installed in the dam.

First phase: The first phase (now in execution) of the project is expected to irrigate 20.54 lakh acres, partly for paddy and sugarcane and partly for cotton, chillies, groundaut, maize, jowar and other millets. The quantity of foodgrains production anticipated is eight lakh tons per annum under the first phase of the scheme and 12 lakh tons in the ultimate phase.

Nagarjunasagar Dam: The dam, when completed, will impound the waters of the Krishna in a 110 sq. mile manmade lake, the biggest in India and the third largest in the world. The ultimate storage capacity of the reservoir is estimated at about 9.37 million acre feet of water, thus dwarfing the Bhakra reservoir of 7.4 million acre feet of capacity.

Nagarjunasagar right canal: Under the first phase of the project (now in execution) the right canal will run to a length of 126 miles. The right canal will irrigate about 11.74 lakh acres, benefiting large tracts of land in Guntur, Nellore and Kurnool. In the ultimate phase, the canal will extend to a length of 247 miles.

Nagarjunaeagar left canal: Under the first phase of the project (now in execution) the Left Main Canal will run to a length of 111 miles. The canal will irrigate about 8.80 lakh acres. In the ultimate stage it will extend to a length of 140 miles in Nalgonda and Khammam districts strong the needs of Miryalguda and Huzurnagar taluk of Khammam district and Nandigama, Tiruvur, Nuzvid and Gannavaram taluks of Krishna district.

GANDAK PROJECT

It is one of the major projects in which India and Nepal are collaborating as neighbours. Within India, it is an inter-State project in which Bihar and Uttar Pradesh are joining hands. It was expected to be ready by June 1968. The project was expected to yield benefits to seven lakh acres during 1966-67, which would go up to three million acres by 1970-71.

OVERSEAS COMMUNICATIONS SERVICE

INDIA'S Overseas Telecommunications networks of telegraph, telephone, radio-photo and telex services are managed by the Overseas Communications Service. The administrative Head of the department is the Director-General with headquarters at Bombay.

The Service has 4 gate-way Centres for handling international communications at Bombay, Calcutta, New Delhi and Madras. The network consists of submarine telegraph cable systems from Bombay and Madras and wireless telegraph, phototelegraphs and radio-telephone systems from all the 4 Centres. The submarine telegraph cables as such are owned and maintained by Cable & Wireless Limited, London.

As on 1st November 1969, the Overseas Tele-communications network of India consisted of :—

Direct Wireless Telegraph Services:—With Afghanistan, Australia, United Kingdom (4 independent circuits), Burma, China (2 links: Peking & Shanghai), U.A.R., France, Foderal Republic of Germany, Indonesia, Iran, Iraq, Italy, Japan, Kuwait, Nigeria, Peland, Philippines, Roumanis, Singapore, Switzerland, Thailand, U.S.A. (2 independent circuits), U.S.S.R., Viet Nam (North), Viet Nam (South), Yugoslavia and Czechoslovakia.

Direct Radio-Telephone Services:—With Aden, Afghanistan, Australia (2 independent circuits), Bahrain, United Kingdom (4 independent circuits), Burma (2 independent circuits), China, Kenya, U.A.R., Ethiopia, France, Federal Republic of Germany, Hong Kong, Indonesis, Iran, Iraq, Italy, Japan (2 independent circuits), Nigeria, Singapore, Poland, Saudi Arabia, Switzerland, Thailand, Kuwait, Uganda, U.S.S.R. and Viet Nam (South).

Direct Radio-photo Services:—With United Kingdom, France, Federal Republic of Germany, Italy, Japan, Poland and U.S.S.R. All these services, with the exception of those with Poland, are operated directly from Bombay, Calcutta as well as New Delhi. The above services, with the exception of those with Japan and Poland are also operated directly from Madras. The services with Poland are operated from New Delhi only. Through these direct connections with international trunk routes, telegraph services are available with practically all the countries of the world. Similarly telephone service is available with a large number of countries in the world as given below.

Services :- Abu-Dhabi, Radio-Telephone Switched Alaska, Algeria, Argentina, Austria, Balearic Islands, Barbados, Belgium, Bermuda, Brazil, British Guinea, Bulgaria, Burundi, Canada, Canary Islands, Central Africa Republic, Ceuta, Chad Republic, Chile, Congo, Cuba, Costa Rica, Cyprus, Czechoslovakia, Denmark, Doha, Dubai, Faroe Islands, Federal Republic of Germany, Fiji, Finland, France, French Sahara, Forbisher Bay (Canada), Gabon Republic, German Democratic Republic, Ghana, Gibraltar, Goosbay Labrador (Canada), Greece, Guatemala, Hawaii, Honduras, Hungary, Iceland, Irish Republic (Eire), Israel, Italy, Jamaica, Jebel Dhana, Jordan, Kenya, Kuwait, Lebanon, Leeward Islands, Libya, Luxembourg, Malawi, Malaysia, Malta, Mauritius, Mongolian Peoples' Republic, Manila, Mexico, Morocco, Muscat, Netherland Antilles, Netherlands, Newfoundland, New Hebrides, New Zealand, Nicaragua, Nigeria, Norway, Panama, Philippines, Poland, Puerto Rico, Qatar, Ras-Al-Khaimah, Rhodesia, Roumania, Ruanda, Ryukyu Islands, Sarawak, Senegal Sierra, Leone, Solomon Islands, Spain, Spanish North Africa, South Africa, South West

Africa, Sudan, Sweden, Switzerland, Tanzania, Tangier, Tariff, Tortola (British Virgin Island), Trinidad, Tunisia, Uganda, U.A.R., United States of America, Vatican City, Virgin Islands, West Irian, Windward Islands, and Yugoslavia, Zambia, Liberia, Seychelles, Rwanda, Turkey, Bahamas, Aden, S. Kores, New Zealand, Cambodia, Laos and Brunei, Venezuela, Pemba, Peru, Uruguay, Colombia, Fujairah, Somalia, Sharajah, Kinshasa (Congo Republic) and Ocean Liners which are equipped with the necessary equipment.

Radio-photo service is available with 24 other countries as shown below:

Switched Radio-photo Services:—Australia, Belgium, Canada, Czechoslovakia, Cyprus, Denmark, U.A.R., Finland, France, Germany, Nigeria, Norway, Portugal, Roumania, Sweden, South Africa, Switzerland, Yugoslavia and U.S.A.

Multi-Address Press Broadcast (Telegraph) Services:— The Overseas Communications Service provides news transmissions by radio-telegraph on behalf of the Ministry of External Affairs simultaneously to about 43 Indian Consular posts around the world.

Reception of Foreign Press Broadcast (Telegraph) Services:—The Overseas Communications Service provides Indian News Agencies with facilities for reception of Telegraph Press Broadcasts by Foreign News Agencies.

Programme Transmissions Service:—Facilities are offered for "programme transmissions" i.e. spoken despatches by representatives and correspondents of foreign Broadcast Organisations, for broadcast by their respective principals.

Leased Telegraph Channels Service:—Leased teleprinter channels for private customers on rental basis were introduced as a new facility by O.C.S. in the year 1967. This Service has since then expanded rapidly and 39 such channels are in use, as on 26th November 1969, by business concerns, etc. This facility provides means of communication by teleprinters directly between the parties.

International Telex Services:—The international telex service is the most modern form of facility available to the public and, as with other countries in the world, there is a very large and phenomenally growing demand for the provision of such service.

International telex service was introduced for the first time in India in June, 1960 linking the Bombay/ Ahmedabad group of subscribers with London, and via London with a number of countries in the world.

Direct Telex Services:—United Kingdom (3 independent circuits—one each from Bombay, Calcutta and New Delhi), Japan, Federal Republic of Germany, Philippines, Australia, Ceylon and Hong Kong. Through these direct connections with International network, telex service is available with 92 other countries as shown below.

Switched Telex Services:—Aden, Algeria, Argentina, Austria, Bahrain, Belgium, Bermuda, Brazil, Bulgaria, Canada, Chile, Czechoslovakia, Denmark, Doha, Dubai, Ethiopia, Faroe Islands, Fiji, Finland, France, German Democratic Republic, Ghana, Greece, Hungary, Iceland, Irish Republic, Israel, Italy, Jamaica, Kenya-Uganda-Tanzania, Lebanon, Luxembourg, Malaysia, Malta, Mexico, Muscat, Netherlands, New Zealand, Nigeria, Norway Peru, Poland, Republic of Sudan, Roumania, Singapore Spain, Sweden, Switzerland, Turkey, Uruguay, U.S.A.

USSR, Thailand, Yugoslavia, Kuwait, Panama, South Korea, Zambia, Barbados, Trinidad, Antigua, Dominica, Grenada, Monteserrat, St. Kilts, St. Lucia, St. Vincent, Tortola, Bolivia, St. Croix, Porto Rico, St. Thomas, Guyana, Papua, New Guinea, Taiwan, Venezuela, Colombia, Saudi Arabia, Indonesia, U.A.R., Viet Nam (South), British Honduras, Iran, Congo-Kinshasa, Hawai, Guam, Burundi, Mauritius, Cayman Islands and Seychelles.

All International Telex services are integrated with the internal telex system, which the Indian P. & T. has made available to the Indian public in 25 cities viz. Calcutta, Bombay, New Delhi, Madras, Ahmedabad, Secunderabad-Hyderabad, Bangalore, Kanpur, Coimbatore, Nagpur, Patna, Madurai, Poona, Gauhati, Tiruchirapalli, Jaipur, Vijayawada, Cochin, Amritsar, Baroda, Jamshedpur, Lucknow, Ranchi, Srinagar and Surat.

PORTS

THERE are eight major ports in India, 21 intermediate ports and 144 working minor ports. Mangalore and Tuticorin are being developed as major ports.

Technically a major port is one which is capable of taking in ocean-going steamers with a registered tonnage of 4,000 or more and berth them along wharves.

The eight major ports are Bombay, Calcutta, Cochin, Kandla, Madras, Mormugao, Paradeep and Visakhapatnam.

State-wise distribution of intermediate ports and the number of minor ports respectively are:

MYSORE: Karwar & Mangalore & 19 minor ports. Tamil Nadu: Cuddalore, Nagapattinam & Tuticorin & seven minor ports. Maharabutha: Ratnagiri and Redi, and 47 minor ports. Gujarat: Okha, Porbander, Blavnagar, Navadakhi, Bedi, Veraval, Broach, Mandvi, Sikka and Surat, and 40 minor ports. Kerala: Alleppey and Kozhikode, and nine minor ports. Orissa: There is one minor port. Andhea Pradesh: Masulipatam and Kakinada, and five minor ports. Pondicherry: There is one minor port of Pondicherry only. Andaman & Nicobar Islands: There are 15 minor ports.

All the major ports are administered by Port Trusts, which are statutory bodies.

The intermediate and minor ports are administered by State Governments.

The National Harbour Board: The Board advises the Central Government on matters of general policy relating to port management and development including their effects on industry, commerce, shipping, railways etc. so as to ensure integrated consideration of all important port matters.

LIGHTHOUSES

Lighthouses are divided into general and local according to the utility of a particular lighthouse to navigation. The superintendence and management of general lighthouses are vested in the Union Government while local lighthouses are managed by the local lighthouses authorities such as State Governments, Port Trusts, etc.

The Department of Lighthouses and Lightships is a self-supporting Dept., its revenue being derived from the light dues levied on shipping under the provision of the Indian Lighthouse Act, 1927.

A statutory body — the Central Advisory Committee for Lighthouses, appointed under the Indian Lighthouses Act, advises the Union Government on matters connected with the erection, additions, alterations, improvements, etc. of lighthouses.

There are 272 lighthouses, 8 lightvessels, 156 lightbuoys, 236 unlighted buoys, 233 beacons, 10 fog signals, 7 M. F. radio beacons, 2 harbour radars, 2 Decca navigator chains, 299 land marks, 716 other marks, making a total of 1,941 aids to navigation atrewn over the coastline of approximately 4,340 miles including Andaman, Nicobar, Laccadive and Minicoy Islands.

Programme for the year 1969-70.—An expenditure of Rs. 68-00 lakhs for the provision of navigational aids has been approved for the year 1969-70.

Progress of work during the year 1968-69:—New lights have been established at Sir Hugh Rose and East Island (Andamans) and the lights at Piram Island and Diu Head (Gujarat) have been improved. A new Fog Signal has also been established at Piram Island lighthouse.

Construction of lighthouses, towers etc. at Mangalore, Car Nicobar and False Devi Point etc. was in progress.

MAJOR PORTS (1968-69)

	Ports			Receipts	Expenditure	No. of passengers embarked	No. of passengers disembarked	Imports in tonnes	Exports in tonnes

@ Figures are for 1967-6d.

Bombay: The Port of Bombay owns landed estates extending over 1,880 acres from Pilot Bunder to Wadala and the docks cover an area of 700 acres. Sassoon Dock has a water area of 3½ acres and limited facilities for five ships of 1,000 tons.

Besides the docks there are a number of "Bunders" or open wharves along the harbour front with a total

quayage of about 12 kilometres. These bunders handle approximately 9.08 million tonnes.

Repair facilities for shipping are provided at two dry-

docks - Hughes and Merewether.

The Port maintains its own railway system which serves the docks, ten local stations and a large number of sidings on the Port Trust estates. It also connects the main line railways. PORTS 41

The working of the Bombay Port Trust during 1968-69 has revealed a net surplus of Rs. 75·30 lakhs against Rs. 4·83 lakhs envisaged in the revised budget estimates. It had earned Rs. 2,292·88 lakhs during this period against Rs. 2,548·83 last year. The total expenditure during 1968-69 was Rs. 1,876·07 lakhs as against Rs. 1,974·48 lakhs last year. The Bombay port handled 164 lakh tonnes of cargo during 1968-69.

Chairman: L. M. Nadkarni, L.c.s.; General Manager: Govind H. Seth; Secretary: S. D. Chittar.

Calcutta: There are two docks, Kidderpore Docks and King George's Docks. The third and subsidiary deep water dock at Haldia meant for handling bulk carriers and bigger vessels is under construction. There are five dry docks two in King George's Docks and three in Kidderpore Docks.

There are nine jetties at the Strand Bank with a total length of 4,735 feet of which only five namely Nos. 2, 3, 7, 8 and 9 are available for ocean-going steamers.

There are petroleum wharves at Buj Buj about 14 miles from Calcutts.

Anchorages are available at Saugor Roads, Haldia, Kalpi, Diamond Harbour, Royapur, Ulubaria, Buj Buj and Garden Reach of which Royapur, Ulubaria, Buj Buj and Garden Reach are available only for deep-laden vessels outward bound or in emergency. The other anchorages are used by ships on passage to and from the Port.

There are two tea warehouses, a grain and seeds depot at Kantapukur, two sheds at Jhinjerapul, A and B sheds at Kidderpore, the Fairlie, Clive, Canning and Strand Warehouses situated close to the Calcutta jetties.

Kidderpore Dock No. 2 has six coal berths.

The port can handle over 14 million tonnes of traffic a year without congestion or delay.

The chief exports from Calcutta are coal, tea, sugar, gunnies, bone and bone-meal, bunker oil, iron and steel manufactures, lac, scrap, ores and mica. The principal imports are salt, food-grains and flour, sulphur, tinplate, machinery, petroleum, iron and steel, metals other than iron and steel, lubricating oil, coment, soda, timber, fertilisers, bricks, chemicals, oils, railway material.

Communication between the various points in the Docks and jetties is maintained by the Commissioners' Railway. About 75 ships can be given working accommodation in jetties, docks and river moorings in the Port.

The Port which extends from Budge Budge to Konnagar is administered by a Port Commission composed of representatives of various Chambers of Commerce, trade, shipping, the City Corporation and the Muncipality, the Govt. of West Bengal, Customs, Labour, Zonal Rlys., and the Defence Ministry.

Chairman: N. C. Sen Gupta; Dy. Chairman: S. K. Ghosh; Secretary: T. R. Raghupathi.

Cocilin: The Port of Cochin is open for deep water traffic in the worst monsoons and provides a splendid anchorage at all times of the year. Any ship drawing upto 30 ft. draft can enter the port even in the roughest weather.

The Cochin Harbour Railway is connected with the Broad Gauge and Metre Gauge systems of the Southern Railway. Inside the Harbour there are 12 stream berths, 2 coal berths, 8 wharf berths, 1 Boat Train Pier Jetty with facilities for discharging and loading bunker oil and two tanker berths. One of the twelve stream berths is a swinging berth capable of accommodating vessels upto 565

ft. overall in length and 28 ft. draft. The tanker berths in the Ernakulam Channel provide facilities to discharge oil direct to the shore installations. The length of each of the wharves is 2,000 ft. and vessels of the above length can be accommodated at some of the berths.

The principal imports are foodgrains, mineral oils (crude), cashewnuts, hardware, chemicals and manure. The principal exports are coir and coir products, tea, rubber, cashew kernels, seafoods, coconuts, spices, ores and mineral oil products.

Chairman: K. P. K. Menon, I.A.S.

Kandla: The major port of Kandla has now the following main facilities:—

A Cargo Jetty with (a) 823 m. of quayage and designed depth of 9.8 m. of water alongside at L.W.O.S.T. to accommodate four large size ships or five liberty type ocean-going vessels; (b) Three single storeyed transit sheds, each 137 m. long and 43 m. wide, with a total storage capacity of about 15,000 tons of cargo; (c) Broad Wharves served with three dual gauge (BG & MG) railway lines and roads; (d) 21 electric quay cranes, the most modern type of 3 tone, 6 tone and 10 tone capacities with 25 m. each; (e) Spacious open stacking grounds served with railway and road sidings; (f) Four double storeyed Warehouses, each 152 m. long and 37 m. wide, with storage capacity of 60,000 tons, with overbridge connections to the roofs of the transit sheds, and provided with modern cargo lifts, chutes and loading platforms; (g) 'Grinnel' automatic sprinkler and fire alarm system has been provided in one wharehouse as a measure for protection against fire, for the storage of cotton cargo in the warehouse; (h) The construction of an additional 342 m. of quay. designed for a depth of 9.45 m, of water at L.W.O.S.T. has been completed except for the work of dredging alongside.

The port is equipped with the latest version of a harbour radar having a range of 32 k.m. with V. H. F. radio telephones and a coastal wireless station with about 805 k.m. range.

The port is connected to its hinterland by broad gauge rail connection via Jhund-Ahmedabad and metre gauge rail connection via Dessa-Palanpur. Also a national highway connects Kandla to Ahmedabad.

A Free Trade Zone has been established at Kandla.

The chief imports are mineral oil, foodgrains, fertilizers, rock phosphates, sulphur, and machinery whereas the principal items of export are salt, cotton, bones, naphtha, soapstone and iron and steel materials.

261 ships and tankers had called during 1968-69. Chairman: Commodore S. K. Chatterjee.

Secretary : Dr. R. P. Bhargava.

Madras: There is accommodation for 21 vessels inside the harbour, 3 at Moorings and 18 at Quays besides the dangerous Petrol mooring outside the North Groyne. The depth at moorings and quay berths ranges from 7.0 metres to 11.00 metres.

The chief imports are coal, foodgrains, mineral oils, metals, timber, textiles, machinery, hardware, paper including old newspapers, dyeing and tanning substances, chemical manures, asphalt, chemicals, cotton, building materials, iron and steel, sulphur etc.

Ores, piecegoods, hides and skins (raw and tanned), onions, raw tobacco, twist and yarn, mica, vegetables and provisions, textiles, turmeric, groundnut oil, oil cakes, scrap etc. form the principal exports.

The affairs of the Port are administered by a Board of Trustees.

Chairman: V. Karthikeyan, I.A.S. Secretary: N. S. Krishna Pillai.

Mormugao: See Late Particulars.

Vishakapatnam: Ships drawing upto 33 ft. and having a length up to 640 ft. can enter the harbour

The harbour now provides the following facilities:

The inner harbour consists of a turning basin, six quay berths, three jetty berths etc. The first four quay berths were equipped with portal electric cranes, transit sheds, and railway lines, both behind and on the quay-side. The quay berths Nos.1 and2 are specially equipped and reserved for the expeditious handling of manganese and iron ore, ferro-manganese and pig iron. On an average, approximately 3,000 tons are loaded in a day. Quay berth No. 3 is used exclusively by ships discharging foodgrains and No. 4 is usually allotted to vessels discharging fertilizers and for loading and unloading heavy lifts. Quay berths Nos. 5 and 6 were commissioned with effect from 5-3-68

and 6-11-68. These two berths are allotted for general cargo vessels.

A Dry Dock of 450 ft. length and 60 ft. width with a depth of 181 ft. below low-water, which can take in ships of 360 ft. in length and 16 ft. draft, has been in use for the docking of vessels.

The port has floating cranes capable of dealing with heavy lifts upto 60 tons capacity.

The Union Cabinet has decided to complete the construction of the Outer Harbour by 1974. The estimated cost of this harbour is Rs. 36-97 crores. This harbour will be designed to receive ore carriers of 100,000 to 150,000 dwt.

The Port Trust is administered by a Chairman appointed by the Government of India.

Chairman: H. Sambamurti. Secretary: T. S. Narasimhan.

Chief Ports Officer, Maharashtra State, Head Quarters, Bomhay-1: Capt. V. V. Javadekar.

Total receipt and expenditure of minor ports of Maharashtra for 1968-69 were Rs. 6,61,900 and Rs. 24,85,730 respectively.

GUJARAT PORTS

There are 48 ports in Gujarat State. Out of these Kandla Port is a major port. Two other ports Diu and Daman are still centrally administered. The remaining 45 ports contain 11 intermediate ports and 34 minor ports. These Gujarat porte have carned a foreign exchange of nearly Rs. 45 orones during the year 1968-69 as compared to the previous year's earning of Rs. 33 crores.

The cargo handled during the year ending 31st March 1969 was 36,98,424 tonnes in comparison to the previous year's traffic of 36,31,387 tonnes. This shows an increase

of 67,037 tonnes in traffic during the year 1968-69. The imports traffic was 13,82,215 tonnes i.e. 37.37 per cent of total traffic and exports traffic amounted to 23,16,209 tonnes i.e. 62.63 per cent of total traffic.

The overall position of traffic in tonnes at Gujarat State Ports classified into various groups during 1968-69 remained as under:—Mandvi 1,49,719; Bedi 11,37,608; Okha 8,17,008; Porbandar 3,40,256; Veraval 2,45,323; Mahuva 1,72,208; Bhavnagar 7,62,688; Broach 73,614; Total: 36,98,424.

PUBLIC HEALTH

MATTERS connected with health fall largely in the State field.

The Centre is, however, directly responsible even for State subjects in the Union Territories of Delhi, Andaman and Nicobar Islands and Minicoy and Amindivi Islands.

The Central Health Service covers all medical and public health posts under the Central Government and the Union Territories other than those under the Ministries of Railways and Defence, and is governed by the Central Health Service (Amendment) Rules, 1966 which came into force from 9th September, 1966.

CENSUS (Dec. 31, 1966). (Latest available)

Hospitals and Dispensaries 14,600*; Beds 2,400,100*; Primary Health Centres 4,919 (a); Medical Colleges 94(c); Annual admissions 10,580; Dental Colleges 14(b); Annual admissions 544(b); Registered Doctors 1,05,310; Registered Dentits 4,192(d); Nurses† 57,621; Auxiliary Nurse Midwives 15,988; Midwives 62,537; Health Visitors 5,382; Pharmacists 56,970§; Vaids 1,600,000@; Malaria Units 395·25(a); Sanitary Inspectors 18,000; Filaria Control Units 72(e); T.B. NATIONAL INSTITUTE OF COMMUNICABLE DISEASES

Objectives and functions: To undertake research into all basic facts underlying the prevalence and spread of communicable diseases and their prevention and study of actiological agents, vectors, mechanism of infection, including endemic and epidemic phenomena, and any zoonotic reservoirs. Clinical investigations in communicable diseases, including treatment and study of early diagnostic technique, relapse problems and effects of new drugs.

Undertakes training of professional personnel in (1) Epidemiology and control of communicable diseases, (2) Ecology and Control of vector-borne diseases and (3) Epidemiology and control of specific communicable diseases under national programmes, particularly Malaria and Filariasis. The participants at those courses included Medical Officers sponsored by the W.H.O. & SEARO from countries mainly in the South East Asia region.

The institute has four branches at Cooncor, Calicut, Rajahmundry and Varanasi (the latter three for research and training on Filariasis), a project for control of B. Malayi Filariasis in Thuravoor in Kerala State and a field station for plague at Kolar (Mysore State).

The Institute has been recognised by several universities for the purpose of post-graduate research degrees of Ph.D. & D.Sc. (PH). The Institute assists the National Smallpox Eradication Programmes in the country.

Venereal Diseases Control Programme

The main principles followed in the V.D. programme were:—(i) Treatment of detected cases; (ii) Epidemiological measures to detect cases; (iii) Educational measures.

During the Second and Third Five Year Plans 142 clinics were established in the different States. It is proposed to establish 10 V.D. Clinics during 1969-70.

A programme for periodical Inter-Laboratory Evaluation and of Serological tests for Syphilis, is being carried out with a view to keeping up a high and uniform standard. A central V.D. Advisory Committee has been constituted.

The country is self-sufficient for the diagnostic V.D.R.L. Antigen which is produced in the country.

Yaws: Yaws is prevalent in some areas of Andhra Pradesh, Maharashtra, Madhya Pradesh and Orissa. While the work in Andhra Pradesh has been completed, it is expected that these teams would cover the entire area in Madhya Pradesh and Orissa shortly.

Cancer: The number of persons who die of cancer annually is believed to be in the neighbourhood of 2 lakhs.

There are 50 general hospitals in the country where facilities for cancer treatment are available in the form of surgery, radium etc. They are two in Andhra Pradesh, 4 in Assam, 1 in Bihar, 2 in Delhi, 3 in Gujarat, 3 in Kerala, 8 in Tamil Nadu, 3 in Maharashtra, 4 in Mysore, 2 in Orissa, 5 in Punjab, 4 in Rajasthan, 4 in U.P. and 4 in Calcutta.

Research is conducted at the Indian Cancer Research Centre, Bombay, Tata Memorial Hospital, Bombay, Chittaranjan Cancer Hospital, Calcutta, Chittaranjan National Cancer Research Centre, Calcutta, and Ruplal Nandi Cancer Research Centre, Chandarnagore.

Cobalt '60' Unit

The Govt. of Canada have donated through the Colombo Plan Capital Aid Programme 19 Cobalt '60' Therapy

Units. The following are the names of the recipient institutions: Tata Memorial Hospital, Bombay (two units); Chittaranjan Cancer Hospital, Calcutta; Christian Medical College and Hospital, Vellore; Christian Medical College and Hospital, Ludhiana; Cancer Institute, Madras; Medical College, Trivandrum; Medical College, Patna; Radium Institute and Cancer Hospital, Hyderabad; S.C.B. Medical College and Hospital, Cuttack; J.K. Institute of Radiology and Cancer Research, Kanpur; Medical College Hospital, Calcutta; Swami Man Singh Hospital, Jaipur; Safdarjang Hospital and All India Institute of Medical Science, New Delhi; P.B.S. Medical Hospital, Bikaner; Viotoria Hospital Medical College, Dibrugarh; Shri M. P. Shah Cancer Hospital, Ahmedabad; Miraj Medical Centre, Miraj; Medical College, Pondicherry.

Medical Radiology

The following medical institutions impart training in medical radiology.

Institute of Medical Sciences, Osmania Medical College, Hyderabad; Darbhanga Medical College, Laherissarai; Medical College, Baroda; B.J. Medical College, Ahmedbad; Medical College, Trivandrum; G.R. Medical College, Gwalior; Barnard Institute of Radiology, Madras; Christian Medical College, Vellore; Madras Medical College, Madras; Madurai Medical College, Madras; Stanley Medical College, Madras; Grant Medical College, Bombay; Topiwala National Medical College, Bombay; Armed Forces Medical College, Poona; S.C.B. Medical College, Cuttack; Institute of Post-graduato Medical Education and Research, Chandigarh; S.M.S. Medical College, Jaipur; King Goorge Medical College, Lucknow; Sarojini Naidu Medical College, Agra; Ganesh Shankar Vidyarthi Memorial Medical College, Kanpur; Maulana Azad Medical College, New Delhi; Lady Hardinge Medical College, New Delhi; All India Institute of Medical Sciences, New Delhi; Safdarjang Hospital, New Delhi.

PUBLIC HEALTH AGENCIES

A Central Council of Health exists with the Union Minister for Health, Family Planning and Urban Development as chairman and State Health Ministers as members.

The body in charge of research is the Indian Council of Medical Research.

List of Medical Research Institutes/Laboratories in India: Indian Council of Medical Research, Medical Enclave, New Delhi; Indian Cancer Research Centre, Bombay; Central Research Institute, Kasauli (Himachal Pradesh); All India Institute of Hygiene and Public Health, Calcutta; School of Tropical Medicine, Calcutta; Malaria Institute of India (Central Institute for Communicable Diseases), Delhi; Central Drugs Laboratory, Government of India, 3, Kyd Street, Calcutta; Haffkine Institute, Bombay; Nutrition Research Laboratories, Tarnaka, Hyderabad. 7 (Dn.); Pasteur Institute of Southern India, Coonoor; K. E. VII Memorial Pasteur Institute, Shillong; Government Vaccine Institute, Namkum (Ranchi); Regional Research Laboratory, Jammu, Tawi; B. C. G. Laboratory, Guindy, Madras-15; Vaccine Institute, Public Health Institute, Mysore, Bangalore; Leprosy Research Centre, Madras; King Institute, Guindy, Madras; Virus Research Centre (B. J. Medical College, Old Building), Poona; Vallabbbhai Patel Chest Institute, University of Delhi; Pasteur Institute, School of Tropical Medicine, Calcutta-12; Cancer Institute, Madras; All India Institute of Mental Health, Bangalore; Central Drug Research Institute, Lucknow; Chittaranjan Cancer Research

Centre, Calcutta; Radium Research and Cancer Hospital, Hyderabad (Andhra Pradesh); Institute of Post Graduate Medical Education and Research, Calcutta; Central Leprosy Teaching and Research Institute, Tirumani; National Chemical Laboratory, Poona; All India Institute of Medical Sciences, New Delhi; National Institute of Experimental Medicine and Biochemistry, Calcutta-13; Central Food Technological Research Institute, Mysore-2; Institute of Child Health, Calcutta; National Medical Institute, Calcutta; Institute of Ophthalmology, Aligarh; Pasteur Institute, Patna; Bose Institute, Calcutta; Institute of Venereology, Madras; Institute of Obstetries and Gynaecology, Madras; Barnard Institute, Madras.

CONTROL OF DISEASES

Steps are being taken to control a number of diseases that are rampant.

MALARIA

Under the National Malaria Eradication Programme with 393.25 units functioning all over the country a population of 502 million is protected. The actual position of the units during 1968.69 was as follows:

Phase		Units	Popula- tion in million	Percentage
Attack Consolidation Maintenance	**	112·985* 70·385 209·88	141 91 270	28 18 5

• Including total of 71-38 unit areas (i.e. 91 million population) revert d to Attack phase from Consolidation (51-7a) and Maintenance (19-60).

The estimated expenditure on National Malaria Eradication Programme during 1968-69 is estimated to be Rs. 16.66 crores.

The WHO and the U.S.A.I.D. are assisting the programme in India.

FILARIA

An outlay of Rs. 5.50 crores has been suggested for the National Filaria Control Programme during the Fourth Five Year Plan.

Three Filariasis Training Centres, one each at Calicut, Rajahmundry and Varanasi, have been established for training personnel, conducting research, carrying out surveys in limited areas and evaluation of the activities of the control units of the States on a regional basis.

Under the programme, 67 Control Units are functioning in 15 States and Union Territories giving protection to about 7 million persons. Besidee, 5 Headquarters Units, four Research-cum-Training Centres, 23 Filaria Clinics and 39 Co-ordination Committees for vector control are functioning in various towns and cities.

LEPROSY

It is estimated that there are about 2.5 million leprosy patients in India, the incidence in some places being as high as 40 per thousand. About 20 per cent of the estimated cases are of the infective type.

In India the problem of leprosy is massive in two States and is high in six States. The estimation of cases in these States has been done on the basis of available epidemiological data. In between Andhra Pradesh and Tamil Nadu thas been estimated that there are nearly half the total number of cases of leprosy in India.

The names of the States with population in millions and estimated number of cases in lakhs respectively are as follows:—

Tamil Nadu 33·6-6·4; Andhra Pradesh 36·0-5·2; Bihar 46·5-2·8; Maharashtra 39·6-2·2; Mysore 17·2 (Population of endemic zones only)—1·4; Orissa 17·5—1·9; U. P. 29·2 (Population of endemic zones only)—1·4; West Bengal 35·0-2·4; Remaining States N.A.—1·3; Total estimated no. of cases in lakhs 25·0.

As of June 1969, there were 182 leprosy control units, 1,130 S.E.T. Centres (Survey, Education and Treatment Centres) attached to Hospitals, Primary Health Centres, Dispensaries, etc. functioning in the country. Besides, 42 voluntary organisations (37 National, 5 International) participated in this programme.

Upto June 1969 the achievements under the National Leprosy Control Programme are as follows:—

Population covered 77.6 million; persons examined 41.5 million; cases detected 372,680; cases recorded 797,113; cases registered for treatment 728,596; healthy contacts registered for observation 21,01,172.

The Central Leprosy Teaching and Research Institute, Chingleput undertakes research in the various problems concerning leprosy and promotes field studies for the application of the results of the research to control the spread of leprosy. It also functions as a centre for offering technical advice and guidance for the promotion of anti-leprosy work on sound lines. This institute makes available its services for the investigation of special problems in all parts of the country. Training Courses for medical officers, para-medical workers, physiotherapy technicians, laboratory technicians etc. are conducted in this institution.

13 Leprosy Training Centres have been established one each in Kerala, Madhya Pradesh, Mysore, Bihar, Orissa, Uttar Pradesh; two each in Andhra Pradesh, Tamil Nadu, Maharashtra and West Bengal, for the training of Para-Medical workers.

The WHO and the UNICEF assist the Government of India and the State Governments in the National Leprosy Control Programme in the shape of personnel, fellowships, transport, equipment, drugs, teaching aids and stipends for trainees.

Private bodies like the Leprosy Mission Hind Kusht Nivaran Sangh (Indian Leprosy Association) and Gandhi Memorial Leprosy Foundation have been taking active part in controlling leprosy.

TRACHOMA

Trachoma infection is highly endemic in the States of Punjab including Haryana (79·1%), Rajasthan (74·3%), Uttar Pradesh (68·1%), and Gujarat (66·0%). Amongst the group of moderately endemic areas where the prevalence was noted to be less than 50 per cent but more than 20 per cent were the States of Madhya Pradesh (41·3%), Bihar (35·0%), Assam (25·2%), and Mysore (22·6%). In low endemic areas where the prevalence was noted to be under 20 per cent were the States of Jammu & Kashmir (16·8%), Maharashtra (11·3%), Kerala (8·7%), Tamil Nadu (4·6%), Orissa (2·7%), West Bengal (0·5%), Andhra Pradesh (5·3%).

About 4.5 million are estimated to be blind in India in comparison to the total world estimates of about 15 million. About 60 to 80 per cent of the blindness is preventable

National Trackoma Control Programme: The programme is being implemented in Punjab, Haryana, Rajasthan, Uttar Pradesh and Gujarat and on a limited scale in the States of Bihar, Jammu & Kashmir, Madhya Pradesh and Mysore.

But by the end of the 3rd Plan population coverage of 6.8 million was achieved against a target of 5.54 million

During the Fourth Plan it is proposed to bring an additional population of about 26.98 million under the Control Operations, the proposed additional coverage for the period 1969-70 being 2.14 million.

The headquarters of the programme are located at Aligarh with the object of: (1) Planning; (2) Technical supervision and guidance to the States; (3) Training of the national and international workers; and (4) continuing concurrent field research in control methodologies.

The programme is associated with two international agencies — World Health Organisation and UNICEF.

TUBERCULOSIS

Up to the end of 1969 a total of about 249.2 million persons were BCG vaccinated from the inception of the campaign in 1949. So far 25 million people of which 9.93 lakhs are newborns have been BCG vaccinated without a tuberculin test. During 1968-69, 63.09 lakh persons were BCG vaccinated from Jan. to Sept. 1968 (9 months). The total number of BCG teams in the country now comes to 221. Research of great value in tuberculosis is being carried out at specialised institutions in Bangalore, Madras and Madanapally.

T.B. Demonstration and Training Centres: Fifteen Training and Demonstration Centres are functioning in 14 States and Union Territories. Effort is being made to equip them with mobile X-ray units and culture laboratory equipment.

National Tuberculosis Institute, Bangalore: This institute runs two training courses of 13 weeks' duration each every year for the training of medical officers and other para-medical staff required to man the District Tuberculosis Centres. The Institute has also been recognised for training at the international level and the WHO fellows from various foreign countries participating in the Prague International courses on epidemiology and control of tuberculosis have been visiting the Institute every year for about 4 weeks' training since 1996. The various field research activities under the National TB control programme are also being undertaken at the Institute.

T. B. Clinics: There are 507 T.B. Clinics in the country, out of which 199 are equipped with miniature X-ray and laboratory facilities. The international bodies like WHO & UNICEF are actively assisting the development of these District T.B. Centres.

GOITRE

Endemic goitre associated with criticism, deaf-mutism and various other grades of physical and mental deterioration is prevalent in the northern parts of Kashmir, Punjab, Himachal Pradesh, Bihar, Uttar Pradesh, West Bengal, Assam, N.E.F.A., Nagaland and Manipur. According to the latest available data, about 40 to 45 million people inhabit this goitrous belt of the country and about 9 to 10 million of them suffer from goitre.

During the Fourth Five Year Plan nine more spray type of iodisation plants with a total capacity of two lakh tonnes of iodised salt per annum are proposed to be installed to cater to the needs of 45 million people. Resurveys carried out in many areas of the goitre belt, where iodised salt is being used for 4-5 years, show a significant reduction in the incidence of goitre.

SMALL-POX

Under the National Small-pox Eradication Programme, out of a total population of 537 million (mid-year estimated population of 1969) 124.74 million primary vaccinations and 594.88 million revaccinations have been performed up to 1st November 1969. As against 31,402 cases and 6,984 deaths in 1968 (up to October) 14,512 cases and 3,091 deaths have been reported in the corresponding period in 1969 indicating a reduction of 53.8 per cent in morbidity and 55.7 per cent in mortality.

To meet the requirements of the vaccine, the Government of the USSR have gifted 850 million doses of vaccine, besides 19·09 million doses obtained from Netherlands, Switzerland, U.K., Madagascar, German Protestant Organisation and the USAID as free gift.

In order to make India self-sufficient UNICEF have further agreed to give additional equipment worth \$380,000 besides 8 Shelf driers, 4 Centrifugal driers and other ancillary equipment already supplied by them. Preliminary action for the installation of the additional equipment at Patwadangar and Belgaum Institute is being taken. So far about 171 million doses of Freeze Dried Smallpox Vaccine have been produced at the four Vaccine producing Institutes located at Patwadangar (U.P.), Belgaum (Mysore), Guindy (Tamil Nadu) and Hydorabad (Andhra Pradesh).

With the installation of the additional equipment the production capacity of the four Institutes will be raised from 60 million doses to 156 million doses annually.

CHOLERA

During the year 1969 (up to end of December), 14,272 cases and 2,364 deaths due to cholers were reported in the country as against 20,749 cases and 3,353 deaths during the previous year.

The Central Cholera Organisation undertook the task of delineation of endemic fooi. For the 58 selected endemic districts, data were collected in respect of amaller administrative units in order to analyse and pinpoint the endemic foci in these districts.

MATERNITY

Maternity and Child Welfare are very important components of health service. 15 States and two Union Territories have established posts of Assistant Directors of Health Services to direct Maternity & Child Welfare Services.

Non-official bodies engaged in welfare work are the Indian Council for Child Welfare, New Delhi; The Kasturba Gandhi Memorial Trust; The Central Social Welfare Board; and the Indian Red Cross Society.

In the rural areas maternity and child welfare services are incorporated as a function of the primary health centres. Upto March 31, 1967, 5,683 primary health centres and 17,521 sub-centres—attached to the Primary Health Centres—have been established.

In Urban area M.C.W. services are available at M.C.H. Centres established by voluntary organisations, local bedies and State Governments.

DEFECTIVES

It is estimated that the total number of blind is about 4.39 million and the deaf between 10 and 15 lakhs.

There are in all 131 institutions for the blind and 71 for the deaf and 51 for the mentally handicapped, 23 institutions cater for the orthopsedically handicapped children.

The Government of India give scholarships to blind and deaf persons between the age of 16 and 30 in order to help them to undertake higher academic education, or, professional, vocational or technical training in normal institutions of learning. Scholarships are also awarded to orthopaedically handicapped children and adults who fall in the age-group of 12-30.

The Training Centre for the Adult Blind at Dehra Dun imparts training in engineering and non-engineering trades.

The Central Braille Press at Dehra Dun has already published several Braille books in English, Hindi and other regional languages.

The National Library for the Blind in Dehra Dun has 590 members on the roll which circulates about 1,200 volumes of braille literature every month.

There are special employment exchanges for the physically handicapped at Bombay, Delhi, Madras, Hyderabad, Bangalore, Calcutta, Ahmedabad, Chandigarh and Kanpur and the total number of placements made by these exchanges since their inception upto 31st Dec. 1965 is 2.189.

There are also Centres at Bombay, Delhi and Narendrapur (W. Bengal) for the Training of Teachers of the Blind on regional basis. During 1966-67 about 30 teachers completed their training.

MENTAL DISEASES

The number of mentally ill persons in India who need institutional treatment is estimated at 1.5 million, and of psycho-neurotics about 3 million. The number of hospital beds is a little less than 25,000. Qualified psychiatrists number about 250, and those practising but formally unqualified about 1,000.

There are at present 51 institutions (25 Government and 26 private) for mentally retarded and handicapped.

Major centres are in: Chandigarh (1), Uttar Pradesh (5), Mysore (2), Maharashtra (19), Tamil Nadu (1), Madhya Pradesh (1), Kerala (1), Gujarat (3), Delhi (7), Bihar (2) and Andhra Pradesh (2).

At present there are 41 mental hospitals with accommodation for about 25,000 patients.

The following is a list of mental hospitals in India:

Government Mental Hospital, Waltair; Hospital for Mental Diseases, Hyderabad; Mental Hospital, Tezpur; Hospital for Mental Diseases, Ranchi; Ranchi Manasika Arogya Shala, Ranchi; Mental Hospital, Ahmedabad; Mental Hospital, Baroda; Mental Hospital, Bhavnagar; Mental Hospital, Bhuj; Mental Hospital, Jamnagar; Mental Hospital, Srinagar; Mental Hospital, Trivandrum; Mental Hospital, Trichur; Mental Hospital, Calicut; Government Mental Hospital, Madras; Mental Hospital, Indore; Mental Hospital, Gwalior; Government Mental Hospital, Bangalore; Government Mental Hospital, Dharwar; Mental Hospital, Thana; Mental Hospital, Ratnagiri; Central Mental Hospital, Miraj; Mental Hospital, Nagpur; Private Hospital, Miraj; Mental Hospital, Jodhpur; Orissa Red Cross Mental Health Institute, Cuttack; Mental Hospital, Varanasi; Mental Hospital, Agra; Mental Hospital, Bareilly; Nur Manzil Psychiatric Centre, Lucknow; Mental Observation Ward, Calcutta; Lumbinipark Mental Hospital, 24 Parganas; Bangiaunmad Ashram, Calcutta; Mental Hospital, Calcutta; Mental Hospital, Mankundu, Hooghly; Mental Hospital, Delhi; Mental Hospital, Mankundu, Hooghly; Mental Hospital, Delhi; Mental Hospital, Masood Bazar.

The All-India Institute of Mental Health, Bangalore, conducts various Post-Graduate Courses in: (i) M.D. in Psychological Medicine; (ii) Diploma in Psychological Medicine (DPM); (iii) Diploma in Medical & Social Psychology; (iv) Ph.D. in Clinical Psychology; (v) Diploma in Psychiatric Social Work (DPSW). In addition to these, M.S. Course in Neurosurgery has been sanctioned. The M.D. course in Neurology is to commence soon. The Institute is affiliated to the Bangalore University for Post-Graduate courses. Post-oertificate course in Psychiatric Nursing (D.P.N.) is also conducted at the Institute. This Diploma is recognised by the Government of India and the Indian Nursing Council.

PUBLIC HEALTH MEASURES

There were up to September 30, 1968, 4,840 primary health centres and 21,752 sub-centres had been established in 4,997 C.D. blocks.

Total number of primary health centres functioning on Sept. 30, 1968 (Statewise): Andhra Pradesh 409; Assam 99; Bihar 587; Gujarat 250; Haryana 89; Jammu & Kashmir 69; Kerala 163; Madhya Pradesh 428; Tamil Nadu 293; Maharashtra 377; Mysore 243; Nagaland Nil; Orissa 282; Punjab 120; Rajasthan 161; Uttar Pradesh Nil; West Bengal 12; Union Territories: Delhi 2; Himachal Pradesh 60; Manipur 12; Tripura 15; N.E.F.A. 68; Pondicherry 12; A. & N. Islands 1; L. M. & A. Islands 3; Goa: Nil; Dadra and Nagar Haveli 1; Chandigarh: Nil.

Water Supply and Sanitation

National Water Supply and Sanitation Programme: Forty-four urban schemes at a total estimated cost of Rs. 633.61 lakhs were approved by the Central Public Health Engineering Organisation during 1968-69. Six hundred rural water supply schemes at a total estimated cost of Rs. 159.4 lakhs were approved by the State Governments.

DRUGS

The control over imported drugs is exercised by the Central Government through its offices at the ports of Bombay, Calcutta, Cochin and Madras.

Manufacture by units having fixed assets (investment in plant and machinery exceeding Rs. 7.5 lakhs is regulated by the Directorate-General of Technical Development, Central Government. Manufacture by units with fixed assets less than Rs. 7.5 lakhs is regulated by the respective State Directorates of Industries. Control over 'new drugs', imported or indigenously manufactured is exercised by the Central Drugs Control Organisation.

The Drugs and Cosmetics Act has been amended empowering the Central Government to assist State Governments in exercising control over the quality of drugs and cosmetics manufactured in the country. Ayurvedic and Unani medicines have been brought under the purview of the Drugs and Cosmetics Act. Rules for the control of Homogopathic medicines under the Drugs and Cosmetics Rules have been published and have been brought into force.

NURSING

At the end of the year 1967, there were 59,914 registered nurses, 65,589 registered midwives, 3,307 registered health visitors and 17,592 auxiliary nurse-midwives. The total number of qualified health visitors in India on 31st December, 1967, was about 5,884.

The number of training institutions for nursing personnel and of students under training at the end of 1968 were as follows (The figures within brackets indicate the number of students): Nurses 255 (20,186); Midwives

219 (3,737); Auxiliary Nurse-Midwives 337 (11,088); Health Visitors 19 (1,426).

Of these 218 schools give a 6 to 9 months course to qualified nurses and the remaining one school gives a 12 to 18 months course in midwifery to candidates who are not qualified nurses.

The Countess of Dufferin's Fund

The Fund which is now a Govt. of India body grants scholarships to Lady Post-graduate and Under-graduate Medical students and B.Sc. (Nursing) and Public Health Nursing students studying in Medical and Nursing Colleges respectively in India.

MEDICAL EDUCATION

There are 94 medical colleges in the country with an annual admission of about 11,700 as compared to only 30 medical colleges with 2,500 admissions in 1950-51. Only nine more medical colleges are proposed to be opened during the Fourth Plan. The doctor: population ratio which at present is 1: 5,112 will improve to 1: 4,300 by 1974.

List of medical colleges university-wise in India during

Agra University, Agra: S. N. Medical College, Agra. Allahabad University, Allahabad: M.L.N. Medical College, Allahabad. Andhra University, Waltair: Andhra Medical College, Visakhapatnam; Guntur Medical College, Guntur; Rangaraya Medical College, Kakinada. All India Instituta of Medical Sciences, New Delhi. DENTAL EDUCATION

There are now fifteen Dental Institutions all affiliated to Universities, training students for the degree of Bachelor of Dental Surgery (B.D.S.) having facilities for about 580 admissions in all the following Dental Colleges:—

Punjab Govt. Dental College and Hospital, Amritsar; Nair Hospital Dental College, Bombay; Govt. Dental College & Hospital, Bombay; Dr. R. Ahmed Dental College & Hospital, Calcutta; Dental Wing, K. G. Medical College, Lucknow; Dental Wing, Medical College, Madras; Dental College and Hospital, Bangalore; Dental College, Trivandrum; Dental Wing, Osmania Medical College, Hyderabad; Dental College & Hospital, Patna; College of Dentistry, Indore; Govt. Dental College and Hospital, Ahmedabad; College of Dental Surgery, Kasturba Medical College, Manipal (S. Kanara); Govt. Dental College & Hospital, Nagpur; and Dental Wing, Govt. Medical College, Patiala.

The eight specialities for Post-graduate education in Dentistry as prescribed by the Dental Council of India are:—Prosthetic Dentistry, Oral Surgery, Operative Dentistry, Orthodontia, Periodontia, Oral Diagnosis and Dental Radiology, Dental Pathology and Bacteriology, and Pedodontia and Preventive Dentistry.

Thirty-four Post-graduate Departments in the various specialities of dentistry have been established at the following centres:—

Govt. Dental College and Hospital, Bombay:—Prosthetic Dentistry, Periodontia, Orthodontia, Dental Pathology & Bacteriology, Oral Surgery, Operative Dentistry and Dental Radiology.

Nair Hospital Dental College, Bombay: Prosthetic Dentistry, Periodontia, Operative Dentistry, Orthodontia, Dental Pathology & Bacteriology, Dental Radiology and Oral Surgery.

Dental Wing, K. G. Medical College, Lucknow: Prosthodontics, Periodontics, Orthodontics, Oral Surgery & Preventive Dentistry.

Dental College, Trivandrum: Operative Dentistry & Prosthetic Dentistry.

Dental College, Bangalore: Orthodontia, Oral Surgery and Periodontia.

Punjab Govt. Dental College, Amritsar: Dental Prosthetics, Crown & Bridge Work and Pedodontia & Preventive Dentistry.

Dental Wing, Madras Medical College, Madras: Oral Surgery and Periodontology.

Armed Forces Medical College, Poona:—Prosthetic Dentistry.

Government Dental College & Hospital, Ahmedabad: Operative Dentistry, Prosthetic Dentistry, Periodontia, Oral Pathology & Bacteriology and Oral Diagnosis & Radiology.

The Dental Mechanics course extends over a period of two academic years and that for Dental Hygienists lasts for one year.

Facilities for the training of Dental Mechanics are available at: Govt. Dental College & Hospital, Bombay, Dental Wing, K.G. Medical College, Lucknow, Dental College, Trivandrum, Dental Wing, Madras Medical College, Madras, Dental College, Bangalore & various centres of the Armed Forces for Army personnel only.

Facilities for the training of Dental Hygienists are available at: Govt. Dental College & Hospital, Bombay; Dental College, Trivandrum; Dental Wing, Madras Medical College, Madras and Armed Forces Medical College, Poona for Army personnel only.

Dental Faculties:—The following three Universities have separate Dental Faculties:—(i) Bombay University, Bombay, (ii) University of Calcutta, Calcutta and (iii) Gujarat University, Ahmedabad.

Progress in Dental Research: The Indian Council of Medical Research and the Government of India have canctioned at Lucknow Dental College & Hospital a Research Project under PL 480 Grant in (i) Prophilaxis Procedure on the Control of Periodontal Diseases for Rs. 7,62,377 for three years, and (ii) another Research Project under PL 480 Grant for Rs. 6,54,580 for five years on Sodium Fluoride Intake and Dental Caries. There is already a permanent Research Unit in Periodontology at Lucknow sanctioned by the Indian Council of Medical Research for five years for about Rs. 5,00,000. The Dental College at Ahmedabad has also been sanctioned a Research Project in 'Oral Cancer' by the Indian Council of Medical Research under PL 480 Grant for Rs. 10,74,799 for six years. A PL 480 Grant Research Project on 'Oral Cancer' is already in operation at Madras for Rs. 4,02,290 for five years. During 1967 the Indian Council of Medical Research has approved Research Grants for Rs. 3,05,165 for 20 old and new research schemes. One important work is at Lucknow on "Sodium Fluoride Tooth Pastes and Fluoride Phosphate Solution" to arrest Dental Caries in children.

There are roughly 350 Dental Clinics, mostly at District Hospitals and during the next five years more such clinics are expected to be opened at District and Tehsil Hospitals. A sizeable number of School Dental Clinics are expected to be opened in various parts of the country. Each School Dental Clinic shall be designed to look after 3,000 school-going children between the age of 5-10 years.

PHARMACY

The Pharmacy Council of India (Central Council), constituted under the Pharmacy Act of 1948 and situated at Temple Lane, Kotla Road, Post Box No. 337, New Delhi-1, prescribes and regulates the minimum educational standards of pharmacy namely, the educational regulation; approves courses and examinations in pharmacy which are in conformity with the education regulations and qualifications in pharmacy granted outside the extent of the Act for the purpose of qualifying for registration as pharmacist; encourages the development of pharmacoutical courses; educates the public about the profession and prospects in pharmacy; has also recommended a code of pharmaceutical ethics for the members of the profession; maintains a books library and films library on various aspects of pharmacy.

Enforcement of the Pharmacy Act, 1948:

With a view that the practice of pharmacy is restricted to properly qualified and competent persons, the State Governments constitute a Registration Tribunal which prepare the first Register of all persons who have been in the profession up to a particular date. This leads to the constitution of the State Pharmacy Council which maintains the register thus formed and effect subsequent registration.

Then after 3 years, only those persons who have passed an approved examination in conformity with the Éducation Regulations are considered eligible for fresh registration. The State Governments can restrict the practice of pharmacy by unregistered pharmacists by enforcing section 42 of the Act. Now the Education Regulations have taken effect in almost all the States.

Pharmaceutical courses:

The names of 45 institutions which impart the pharmaceutical courses are given below :-

Department of Pharmacy, Andhra University Colleges, Waltair (Andhra Pradesh; B. Pharm); Government Polytechnic for Women, Kakinada (Andhra Pradesh; *D. Pharm); Kamala Nehru Girls Polytechnic, Mukram Jahi Market, Hyderabad (Andhra Pradesh; *D. Pharm); Government Polytechnic, Hyderabad (Andhra Pradesh; D. Pharm); Government Polytechnic, Visakhapatnam D. Pharm); Government Polytechnic, Visakhapatnam (Andhra Pradesh; *D. Pharm); Government Polytechnic, Tirupati (Andhra Pradesh; D. Pharm); Assam Medical College, Dibrugarh (Assam; *D. Pharm); Pharmacy School, Patna (Bihar; *D. Pharm); L.M. College of Pharmacy, Navrangpura, Ahmedabad (Gujarat, *D. Pharm, Inter Pharm, *B. Pharm); Calicut Medical College, Calicut (Kerala, D. Pharm); Maharaja's College, Ernakulam (Kerala, M.So. Pharmacoutical Chemistry); Pharmacoutical Chemistry); Pharmacy Department, University of Saugar, Sagar (Madhya Pradesh; *B. Pharm); S. V. Government Polytechnic, Bhopal (Madhya Pradesh; *D. Pharm); Madras Medical College, Park Town, Madras (Madras; *D. Pharm, *B. *B. Pharm); Madurai Medical College, Madurai (Madras, *D. Pharm, *B. Pharm); Christian Medical College, Vellore (Madras, *D. Pharm); Bombay College of Pharmacy, Kalina, Bombay (Maharashtra, *D. Pharm); Government Polytechnic, Karad (Maharashtra; *D. Pharm); College of Engineering, Karad (Maharashtra; *B. Pharm); Government Polytechnic, Jalgaon (Maharashtra; *D. Pharm); Government Polytechnic, Amravati (Maharashtra, *D. Pharm); Department of Chemical Technology, Bondbay-19 (Maharashtra; B. Pharm); Nagpur University, Nagpur (Maharashtra, B. Pharm); Poona College of Pharmacy, Poona (Maharashtra, *D. Pharm); Caramant, Callege of Pharmacy, Rangelore Pharm); Government College of Pharmacy, Bangalore

(Mysore, *D. Pharm, *B. Pharm); National Education Society's Institute of Pharmacy, Shimoga (Mysore, *D. Pharm); The Kasturba Medical College, Manipal (Mysore, *D. Pharm, *B. Pharm); V.L. College of Pharmacy, *D. Pharm, *B. Pharm); V.L. College of Pharmacy, *D. Pharm, *B. Pharm); V.L. College of Pharmacy, *E. Pharm, *B. Pharm); V.L. College of Pharmacy, *E. P (Mysore, *D. Pharm, *B. Pharm); V.L. College of Pharmacy, Raichur (Mysore, *D. Pharm); S.C.B. Medical College, Cuttack (Orissa, *D. Pharm); School of Pharmacy, Beigaum (Mysore, D. Pharm); Medical College, Burla, Sambalpur (Orissa, *D. Pharm); Government Medical College, Patiala (Punjab; *D. Pharm, and Dressers' Course); Medical College, Amritaar (Punjab, *D. Pharm and Dressers' Course); Rohtak Medical College, Rohtak (Haryana, *D. Pharm); Birla Institute of Technology, and Science, Pilani (Rajasthan, *B. Pharm (Hons.), B. Pharm (Tech.); College of Technology, Banaras Hindu University, Varanasi (U.P., *B. Pharm); Government Polytechnic for Women, Ambala (Haryana; D. Pharm); S.M.S. Medical College, Jaipur (Rajasthan, M. Pharm Pharma oology); G.S.V.M. Medical College, Kanpur (U.P., *D. Pharm); Pharmacy Training Centre, Jalpaiguri (West Bengal, *D. Pharm); Jadavpur University, Calcutta (West Bengal; B. Pharm); Government Polytechnic for Women, Chandigarh (Union Territory; *D. Pharm); Deptt. of Pharmacy, Punjab University, Chandigarh (Union Ter-ritory; *B. Pharm); Goa College of Pharmacy, Panaji (Goa; *D. Pharm, B. Pharm); Pusa Polytechnic, Pusa, New Delhi (Union Territory, *D. Pharm).

Qualifications granted outside the extent of Pharmacy Act: The Central Council have approved the following qualifications for the purpose of qualifying for registration as a pharmacist in respect of the Indian Nationals: Degree in Pharmacy granted by any accredited college of pharmacy of the U.S.A.; Degree in Pharmacy of B.Sc. (Pharm) of a British University; Diploma of Chemist and Druggist and Pharmaceutical Chemist of the Pharmacy Society of Great Britain; Diploma in Pharmacy of the University of Adelaide, South Australia; Doctorate in Science (Pharmaceutical Chemistry) granted by the University of Frankfurt a/m, West Germany; Diploma in Pharmacy granted by the Universities of Switzerland before December, 1973; Certificate of Proficiency granted by Ceylon Medical College Council, Ceylon; "Qualification as Pharmacist" granted by Maximillian University, Wurzburg (West Germany); "Qualifying Examination for Pharmaceutical Chemist" granted by Pharmacy Board of New Zealand; Pharmaceutical Diploma granted by the Government of Goa (Pre-independence)†; Com-pounder's Diploma in Pharmacy granted by the Govern-ment of Burma†; Diploma granted by the Ceylon Authorities to those who have practised Pharmacy for a period of five years; Diploma for Pharmacist granted by East Bengal Government; and Dresser's Diploma Grade I, II and III granted by the Federated Malaya Statest.

Practical Training:

The student pharmacists have to undergo a practical training in an approved institution -hospital/dispensary for a period of not less than 750 hours covered in not less than three months. The Central Council has approved 255 institutions having a training capacity of 1,233 student pharmacists. State-wise number of institutions and available seats respectively are as under :-

Assam: 7; 27; Andhra: 19; 109; Bihar: 14; 91; Gujarat: 24; 21; Haryana: 7; 28; Tamil Nadu: 25; 287; Maharashtra: 55; 189; Mysore: 39; 117; Punjab: 22; 88; U. P.: 3; 29; West Bengal: 21; 110; Delhi: 9; 82; Chandigarh: 1; 4; Kerala; 2; 25; Orissa: 6; 26.

Registration of Pharmacists:

There were 75,120 pharmacists registered by the end of December 1967 in India.

Approved by the Pharmacy Council of India for qualifying for registration as a pharmacist under The Pharmacy Act, 1948.

[†] These courses are recognised for registration in First Register only.

RESEARCH

RESEARCH in pure science is carried out mainly in the universities, scientific surveys of the Government, and in some research institutes such as the Tata Institute of Fundamental Research. The Council of Scientific & Industrial Research (C.S.I.R.) and the Department of Atomic Energy provide facilities for fundamental or basic research in their laboratories and institutes, and also sponsor such research in universities and research institutions all over the country.

Research in applied science and for industrial development is done mainly under the auspices of the C.S.I.R., the Co-operative Industrial Research Associations, institutes functioning under various Ministries and the laboratories attached to a few industrial concerns.

The Shri Ram Institute for Industrial Research, Delhi, undertakes, on a 'non-profit' basis, researches on projects sponsored by industrial concerns, groups of companies, individuals and Government agencies.

Research in engineering subjects is undertaken in some of the C.S.I.R. laboratories and institutes, the Indian Institute of Science, Bangalore, Central and State Hydraulic Engineering Research Stations, higher technological institutions, like the Indian Institute of Technology, Kharagpur, and in a few engineering colleges, such as the College of Engineering and Technology, Jadavpur.

The Council of Scientific & Industrial Research, also sponsors engineering research in various institutions through its research committees.

Agricultural research is looked after by the Indian Council of Agricultural Research, New Delhi, The Indian Agricultural Research Institute, New Delhi, and the various Central Committees for agricultural commodities like the Indian Central Cotton Committee, Indian Central Jute Committee, etc. and the research institutes functioning under the Ministry of Food and Agriculture. (See article on Agriculture.)

The Indian Veterinary Research Institute, Izatnagar (U.P.) is concorned with veterinary diseases. The National Dairy Research Institute at Karnal in the Punjab works on dairy research.

Research in forestry and forest products is undertaken by the Forest Research Institute and Colleges at Dehra Dun.

Medical research is carried out under the auspices of the Indian Council of Medical Research, institutes functioning under the Ministry of Health, and the Council of Scientific and Industrial Research.

Research in the humanities—literature, language, the arts, etc.—is done at individual institutions scattered throughout the country.

Research in social problems such as social tensions, social welfare and labour welfare is conducted as part of their work at many universities.

About 275 research journals (English) are published in India. These cover a wide range of subjects, grouped as follows: General science, 31; Engineering, including civil, electrical, telecommunication and aeronautical, 31; Chemistry, including biochemistry, chemical technology, plastics, paint, oils and fats, soap, and food, 21; Agriculture, including forestry, 35; and Medical sciences, 64.

SCIENTIFIC SOCIETIES

Role of Scientific Societies: (i) Bringing together of scientists specialized in the same area of knowledge;

(ii) Affording them an opportunity for inter-communication of ideas within a discipline or between various disciplines through conferences, special discussions and publication of journals; (iii) Serving as a platform for discussing general problems of science, such as organization, education, problems of manpower; (iv) Acting as a forum for crystallization of ideas regarding the relation of science to society and as a centre for disseminating and popularizing science; (v) Recognizing contributions to science of its members and conferring distinctions on them.

PHYSICAL SCIENCE SOCIETIES

Indian Mathematical Society: Hansraj College, Delhi-6: Indian Geographical Society: University Centenary Buildings, Madras-5; Institution of Chemists (India): Chemical Department, Medical College, Calcutta-12; The Indian Physical Society: 2 and 3, Raja Subbod Mallik Road, Jadavpur, Calcutta-32; Calcutta Statistical Association: Calcutta University, Asutosh Building, Calcutta-12; National Geographical Society of India: Department of Geography, B.H.U., Varanasi-5; Hyderabad Science Society: 12-2-460, Malkapur, Asifnagar, Hyderabad-6 (A.P.); Deccan Section of the Royal Institute of Chemistry : Indian Institute of Science, Bangalore; Indian Society of Agricultural Statistics: Library Avenue, P.B. No. 310, New Delhi-12; Bharat Ganita Parisad: Department of Mathematics, Lucknow University, Lucknow; Geogra-Phical Society of India: C/o Geography Department, Calcutta University, 35, Ballyganj, Circular Road, Calcutta-19; The Electrochemical Society of India: Department of Inorganic & Physical Chemistry, Indian Institute of Science, Bangalore-12; The Indian Society of Theoretical and Applied Mechanics: Indian Institute of Technology, Kharagpur; Indian Meteorological Society: Meteorological Office, Lodi Road, New Delhi-3; Geological Society of India: Race Course Road, Bangalore-1; Indian Interplanetary Society: 9, Hastings Street, Calcutta-1; Institute of Himalayan Geology: Delhi University, Delhi.

MEDICAL SCIENCE SOCIETIES

Ahmedabad Medical Society: (Branch of Indian Medical Association), Opp. H. K. Arts College, Ashram Road, Ahmedabad-9; Bombay Sanitary Association: Public Health Department, Municipal Offices Building, Bombay-1; Association of Medical Women in India: New Hospital for Women, New Queen's Road, Bombay-4; Mysore Medical Association: Fort, Bangalore-2; No. of Branches: 26; All India Ophthalmological Society: Bombay Mutual Building, Sir P. Mehta Road, Bombay-1; Gujarat Research Society: Samsodhan Sadan, South Avenue, Khar, Bembay-52; Indian Psychoanalytical Society: 14, Parsibagan Lane, Calcutta-9; Association of Surgeons of India: Madras; Madras Psychology Society: Department of Psychology, Madras-5; All India Dental Association: India House, Cumballa Hill, Bombay-26; Society for the Study of Industrial Medicine: 243, Khetwadi Main Road, Bombay-4; Indian Society of Anaesthetists: K. E. M. Corner, Indore (GPO), M.P.; Cardiological Society of India: 67, Dharamtolla Street, Calcutta-13; Federation of Obstetric & Gynaecological Societies of India: Purandare Griha, Chowpatty Sea Face, Bombay-7; The National Society of India for Malaria & Other Mosquito Borne Diseases: 22, Alipore Road, Delhi-6; Neurological Society of India: (Temporary address) C/o Dr. Anil D. Desai, 534, Sandhurst Bridge, Bombay 7; Indian Cancer Society: Hospital Avenue, Parel, Bombay-12;

The Indian Association of Physio-Therapists: Patel Chambers, 5th Floor, French Bridge, Bombay-7; Indian Public Health Association: 110, Chittaranjan Avenue, Calcutta-12; Indian Association of Leprologists: Govt. Leprosy Subsidiary Centre, Attur (Salem District), Tamil Nadu; Indian Society of Haematology: Secretary's Office, 28, Lady Hardinge Road, New Delhi; The Indian Association of the Chest Diseases: C/o The Patel Chest Institute, University Campus, Delhi-6; Indian Academy of Dentistry: Govt. Dental College Hospital, Bombay-1; The Anatomical Society of India: Department of Anatomy, B. J. Medical College, Poona; Indian Academy of Medical Sciences: I.C.M.R. Building, Ansari Nagar, New Delhi-16; Indian Association of Dermatologists and Venereologists: (Western India Branch), Queen's Road, Bombay-4.

BIOLOGICAL SCIENCE SOCIETIES

The Royal Agri-Horticultural Society of India: 1, Alipore Road, Alipore, Calcutta-27; Indian Botanical Society: School of Plant Morphology, Meerut College, Meerut; The Indian Veterinary Association: 7, First Street, Vidyodaya East, T. Nagar, Madras-17; The Bengal Natural History Society: Natural History Museum, Darjeeling; Bombay Natural History Society: Horn Bill House, Shahid Bhagat Singh Road, Bombay-1 BR; Indian Society of Soil Science: Indian Agricultural Research Institute, New Delhi-12; Botanical Society of Bengal: 35, Ballygunge Circular Road, Calcutta-19; The Physiological Society of India: 50/2, Dharamtolla Street, Calcutta-13; The Entomological Society of India: Indian Agricultural Research Institute, New Delhi-12; The Palaeobotanical Society: Lucknow; The Birbal Sahni Institute of Palaeobotany: 53, University Road, Lucknow; Maharashtra Association for the Cultivation of Science: Law College Road, Poona 4; Ethnographic and Folk Culture Society*: Department of Anthropology, University of Lucknow, Lucknow; Indian Phytopathological Society: Indian Agricultural Research Institute, New Delhi-12; Palaeontological Society of India: Lucknow; The Bombay Aquarium Society: Taraporewala Aquarium, Bombay-2; International Society of Plant Morphologists: Department of Botany, University of Delhi, Delhi-6; The Bombay Biological Association: 92, Waterfield Cross Road, Bandra, Bombay-50; Mycological Society: Department of Botany, University College of Science, 35, Ballygunge Circular Road, Calcutta-19; International Society of Tropical Ecology: Department of Botany, B.H.U., Varanasi-5; Society of Biological Chemists, India: Indian Institute of Science, Bangalore-12; Indian Society for Plant Physiology: Division of Botany, Indian Agricultural Research Institute, New Delhi-12; Association of Microbiologists of India: P-27, Prinsep Street, Calcutta-13; Marine Biological Association of India: Mandapam Camp, Tamil Nadu; The Zoological Society: 35, Ballygungs Circular Road, Calcutta-19; Society of Indian Foresters: F. R. I., Dehra Dun, U.P.; Zootomical Society of India: G/14, Beyond Ladies Colony, Bunaras Hindy, University, Varanai, 5, Ribes, Academy. Bonaras Hindu University, Varanasi-5; Bihar Academy of Agricultural Science: P. O. Sabour, Bhagalpur; Indian Society of Genetics & Plant Breeding: Division of Botany. Indian Agricultural Research Institute, New Delhi-12; Oil Technological Research Institute: Anantapur, Andhra Pradesh; Himalayan Zoological Park Society: Darjeeling.

ENGINEERING AND TECHNOLOGICAL SOCIETIES

Indian Engineering Association: 6, Notaji Subhash Road, Calcutta-1; The Bombay Textile & Engineering Association: 343, Satar Building, Grant Road, Bombay-7; Mining, Geological & Metallurgical Institute of India: 29, Chowringhee Road, Calcutta-16; The Mechanical Engineers' Association (India): Janmabhoomi Chambers,

29, Fort Stadet, Ballard Estate, Fort, Bombay-1; The Institution of Engineers (India): 8, Colcade Road, Calcutta-20; The Association of Engineers: 24, Netaji Subhash Road Calcutta-1; Pitetrial Engineering Society: Indian Institute of Science, Bangas rell2; The Sugar Technologist Association of India? P.O. Kalyanpur, Kanpur; Indian Seramic Society of Banaras Hindu University. Valuation Seramic Society of Banaras Hindu University. Valuation Musing a Metallurgical Society of India: Geology Department, Presidency College Calcutta-12; The Oil Technologists' Association of India: Nawabganj, Kanpur; Indian Society of Engineers: 12-B Netaji Subhash Road, Calcutta-1; The Indian Institute of Metals: 31, Chowringhee Road, Calcutta-16; The Textile Association: "Santosh", 72-A, Shivaji Park, Bombay-28; Gujarat Institute of Civil Engineers & Architects: Law College Road, Ahmedabad-6; The Aeronautical Society of India: 13/B, Indraprastha Estate, New Delhi-1; Institution of Surveyors: Kashmir House, King George's Avenue, New Delhi; Quality Control Association: 4, Richmond Road, Bangalore-25; Indian Institute of Chemical Engineers: Jadavpur University Campus, Calcutta-32; The Institution of Telecommunication Engineers: F/12, South Extension Part II, Ring Road, New Delhi; Indian Society of Rayon Technologists' Association: Mercantile Buildings, Lal Bazar, Calcutta-1; Essential Oil Association of India: H. B. Technological Institute, Kanpur; Institute of Consulting Engineers: Contral Office, 9, Hastings Street, Calcutta-1; International Commission on Irrigation and Drainage: Golf Links, New Delhi-3; The Chemical Engineering Association: Indian Institute of Science, Bangalore-12; Indian Society of Theoretical and Applied Mechanics: Kharagpur.

SE OF EDUCATION

GENERAL SOCIETIES

Asiatic Society: 1, Park Street, Calcutta-16; Indian Association for the Cultivation of Science: Jadavpur, Calcutta-32; Bose Institute: 93/1, Acharya Prafulla Chandra Road, Calcutta-9; Indian Science Congress Association: 14, Dr. Birish Guha Street, Calcutta-17; Vijnana Parishad: Muir College, Compounds, Thornhill Road, Allahabad-2; The National Academy of Sciences: 5, Lajpatrai Road, Allahabad-2; National Institute of Sciences of India: Bahadur Shah Zafar Marg, New Delhi.

Indian Science Newn Association: 92, Acharya Prafulla Chandra Road, Calcutta-9; The Current Science Association: Bangalore; Science Club: 1110, S. N. Banerjee Road, Calcutta-13; Bangiya Bijnan Parishad: 294/2/1, Acharya Prafulla Chandra Road, Calcutta-9; Assam Science Society: Department of Mathematics & Statistics, Gauhati University, Assam; Kamarupa Anusandhan Samiti: Assam Research Society, Gauhati; The Institute of Information Scientists: C.S.I.R. Building, Rafi Murg, New Delhi-1; All India Science Teachers' Association: 33, Probyn Road, Delhi-6; The Rajasthan Academy of Sciences: Pilani (Rajasthan); Indian Chemical Society: 92, Acharya Prafulla Chandra Road, Calcutta-9; Geological Mining and Metallurgical Society of India: Geology Department, Presidency College, Calcutta.

RESEARCH IN HUMANITIES

Research in the humanities—literature, language, arts, etc.—is engaging the attention of individual institutions scattered throughout the country.

Anjuman-Islam Urdu Research Institute, D. Naoroji Road, Bombay 1; Anthropological Society of Bombay, C/o K. R. Cama Oriental Research Institute, 136, Apollo

[.] This has been included in this group for want of a separate grouping for this discipline.

Street, Bombay; Bangiya Sahitya Prashad, 243-1, Upper Circular Road, Calcutta; Bhandarkar Oriental Research Institute, Poona; Bharatiya Itihasa Samshodhaka Mandal, Sadashiv Peth, Poona; Bharatiya Vidya Bhawan, Chowpatty, Bombay; B. J. Institute of Learning and Research, Bhadra, Ahmedabad; B. M. Institute of Child Development, Pharmacy College, Navrangpura, Ahmedabad; Bureau of Psychology, Allahabad; D. A. Memorial Institute, C/o Bharatiya Itihasa Samshodhaka Mandal, Poona; Deccan College of Post-Graduate and Research Institute, Poons; Department of Anthropology, Indian Museum, 27, Chowringhee Road, Calcutta; Department of Archaeology, Ministry of Education, New Delhi; Department of Historical and Antiquarian Studies, Gauhati; Dharmakosha Mandal (Vedic Research Institute), C/o Prajna Pathshala, Wai, District Satara; Ganganath C/o Frajna Pathanaia, wai, District Satara; Ganganain Jha Research Institute, Allahabad; Gokhale Institute of Politics and Economics, Poona; Gujarat Research Society, Bombay; Hindi Vidya Pith, Deoghar, Bihar; Indian Institute of Education, 11, Horniman Circle, Bombay; Indian Institute of Philosophy, Amalner, Dt. Jalgaon, Maharashtra; Kannada Research Institute. Dharwar; Karnatak Research Society, Dharwar; K. F. Jayaswal Research Institute, Patna; K. R. Cama Oriental Institute, 136, Apollo Street, Bombay; Kuppuswami Sastri Research Institute, Mylapore, Madras; Mandir Vidya Pith, Bhagalpur, Bihar; Marathi Sanshodhan Mandal, Mumbai Marathi Granth-songrahalaya, Thakurdwar, Bombay; Mithila Institute of Post-Graduate Studies and Research in Sanskrit Learning, Darbhanga, Bihar; Nalanda Pali Institute, P.O. Nalanda, Patna; National Archives of India, Ministry of Education, New Delhi; Oriental Research Institute, Mysore; Rajasthan Vishva Vidya Peeth, Udaipur; Rajwade Samshodhan Mandal. Dhulia, Maharashtra ; Scindia Research Institute, Ujjain; Shri G. K. Institute of Rural Education, Gargeti, Kelhapur District; Sheth Bholabhai Jeshingbhai Institute of Learning and Rosearch, Bhadra, Ahmedabad; Shri Farbes Gujarati Sabha, Bombay; Tata Institute of Social Sciences, Chembur, Bombay; The Asiatic Society, I, Park Street, Calcutta; Vachan Mantapa (Kannada Research Institute), Belgaum; Venkateswara Research Institute Tirupati; Vaidika Samshodana Mandal, Tilak Memo-rial, Poona; Vaishali Prakrit Institute, Muzaffarpur; Vishveshwaranand Vedic Research Institute, Hoshiarpur, Punjab.

OTHER RESEARCH SOCIETIES

Physical Science: Association of Applied Physicists, 92, Acharya P. C. Ray Road, Calcutta-9; Calcutta Mathematical Society, 92, Acharya P. C. Ray Road, Calcutts-9; Indian Chemical Society, 92, Acharya P. C. Ray Road, Calcutta-9; Bombay Geographical Association, Parle College Mablon, Bombay-57; Association of Indian Geographers, P.B. No. 644, New Delhi.

Medical Science 1 Association of Podiatricians of India, Back-Bay View, New Queen's Road, Bombay-4; Association of Physicians of India, "Dream Lands", New Queen's Road, Bombay-4; Helminthological Society of India, School of Tropical Medicine, Calcutta-12; Indian Medical Association, Shri Niwas, S. V. Patel Road, Bombay-4; Society of Experimental Medical Science (India), P-27, Prinsep Street, Calcutta-13; Tropical Diet Research Society, I/6, Fakir Chakravarti Lane, Calcutta-6; Indian Society of Gastroenterology, D/3, Ansari Nagar, New Delhi-16; Association of Otolaryngologists of India, Lampert's Hospital, Marshal's Road, Egmore, Madras-8; The Indian Radiological Association, 148, Big Street, Madras; Madras Medical Association, Madras Medical College, Madras; Bombay Veterinary Medical Association, Rani Nagar, H. No. A-7/I, Nagpur.

Biological Science: Horticultural Society of India, Indian Agricultural Research Institute, Pusa Road, New Delhi-12; Indian Dairy Science Association, Hosur Road, Bangalore-1; Indian Ecological Society, I.A.R.I., Pusa Road, New Delhi-12; Indian Society of Agronomy, I.A.R.I., Pusa Road, New Delhi-12; South Indian Horticultural Association, Lawley Road, P.O. Coimbatore; Zoological Society of India, Zoological Survey of India, Calcutta.

Engineering & Technological: Engineering Association of Northern India, G.T. Road, Batala (Gurdaspur), Punjab; Indian Metallurgical Association, 20, Strand Road, Calcutta-1; Indian Pharmaceutical Association, Bharati Bhavan, 3rd Floor, 213-219, Frere Road, Fort, Bombay-1; Institute of Industrial Engineers, Hindustan Lever Ltd., Bombay; Society for Corrosion and Coating Technology, Govt. Test House, Alipore, Calcutta; Society of Electronics Engineers, Electronics Research and Development Establishment, P.O. Box No. 108, Bangalore-1; Institution of Electrical Engineers, 1, Forbes Street, Fort, Bombay-1; Technological Association, Dept. of Chemical Technology, Matunga Road, Bombay-19; Indian Roads Congress, Jannagar House, Mansingh Road, New Delhi; Minerological Society of India, A.C. College Building, Guindy, Madras-25; Indian National Society of Soil Mechanics and Foundation Engineers, New Delhi.

General: Indian Academy of Sciences, Hebbal P.O., Bangalore.

COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH

Scientific research under state auspices in India is carried out mainly through the Council of Scientific and Industrial Research and the various National Laboratories/Institutes set up under its control and in the universities and research institutes aided by the Council.

The promotion, guidance and coordination of industrial research in India and the utilization of the results of the researches towards the development of industries in the country are the main aims of this Council. During the past 20 years, the laboratories of the Council have carried out pioneering work in the development of technological knowledge for utilising the vast resources of the country. The services rendered by them in investigation and research on indigenous raw materials and adaptation of processes to Indian conditions have helped in the establishment of major industries in the country.

The research projects are selected on the priority basis by a Board of Scientific and Industrial Research consisting of scientists, technologists and industrialists. Greater emphasis is now being laid on applied research. The research programmes of the Council are currently being recriented to the needs of the country and to put to maximum advantage the available resources. The Council's laboratories have released about 270 processes to the industry, out of which about 135 processes are in actual production. Besides there are about 250 processes which are now ready for exploitation.

The Council has a liberal system of grants-in-aid through which scientists in other technical institutions, industrial laboratories and universities are supported to pursue fundamental and applied research and develop their own specialised fields of research. It also grants fellowships to qualified persons who wish to pursue science as career.

National Research Development Corporation (See under All India Corporations).

NATIONAL LABORATORIES

There are 37 National Laboratories/Institutes/Units and three museums functioning under the Council of Scientific and Industrial Research. There are a number of regional foundry stations, drug farms and factories and other regional centres functioning under the various laboratories and institutes.

The names of the Laboratories/Institutes and Units with their locations (in Italics), at various centres in the country and the functions entrusted to them are as follows:—

National Physical Laboratory, New Delhi:—Research in problems relating to Physics, both fundamental and applied. Maintenance of Standards Testing facilities are also available.

National Chemical Laboratory, Poona: —Fundamental and applied research covering the whole field of chemistry for which other specialised institutes have not been set up. The National Collection of Type Cultures is housed in the Laboratory.

Central Fuel Research Institute, Jealgora (Bihar):— Fundamental and applied research on fuels—solid, liquid and gaseous. Physical and chemical surveys of Indian coals are conducted through seven coal survey stations under the Institute. It maintains seven coal survey stations.

Central Glass and Ceramic Research Institute, Calcutta-32:
—Applied research on different aspects of glass, pottery, refractories, vitreous enamels and mica; evaluation and utilization of indigenous raw materials, import substitution, development of new processes and products, improvement in quality of industrial products, standardisation, etc.; Undertakes investigations and projects sponsored by industry and operates pilot plants for the production of optical glass and radiation shielding windows.

Central Food Technological Research Institute, Mysore:— Food processing and conservation of food, food engineering and all aspects of fruit technology. Regional Fruit and Vegetable Preservation Stations at Trichur, Nagpur, Bombay, Lucknow, Mangalore, Simla, Jummu-Tawi and Cuddapah have been recently established.

National Metallurgical Laboratory, Jamshedpur:— Fundamental & applied metallurgical research. It maintains four regional foundry research stations; located in Punjab, Tamil Nadu and West Bengal.

Central Drug Research Institute, Lucknow:—All aspects of drug research including evaluation & standardisation of crude drugs, discovery of substitutes for pharmacopoeial drugs and plants, pharmaceutical and synthetic chemicals, biochemistry and biophysics, infection, immunisation, pharmacology, chemotherapy & experimental medicine.

Central Road Research Institute, New Delhi:—Research on road materials, testing of road materials and road surfaces.

Contral Electro-Chemical Research Institute, Karaikudi (Tamil Nadu):—Research on different aspects of electro-chemistry, including electro-metallurgy, electro-deposition and allied problems. The institute has two testing centres at Madras and Ramanathapuram.

Central Leather Research Institute, Madrae:—Fundamental and applied aspects of leather technology. The institute has five extension centres at Calcutta, Rajkot, Juliundur, Kanpus and Bombay.

Central Building Research Institute, Roorkee:—Engineering and structural aspects of building and human comforts in relation to buildings.

Central Electronics Engineering Research Institute, Pilani (Rajasthan):—Design and construction of electronic equipment and components and test equipment.

National Botanic Gardens, Lucknow:—Collection & large-scale cultivation of economic and medicinal plants of industrial importance.

Central Salt & Marine Chemical Research Institute, Bhavnagar:—Investigation of production of pure salts, reduction in cost of production; economic utilisation of by-products of salt manufactures, development of new methods and technique for the recovery, production & utilization of various marine & allied chemicals.

Central Mining Research Station, Dhanbad:—Research in methods of mining, safety in mines and mine machinery.

Regional Research Laboratory, Hyderabad:—Research in problems relating to the industries and raw materials of the region.

Indian Institute of Experimental Medicine, Calcutta:—Research in various aspects of biochemistry as applied to medicine, bacteriology, etc.

Birla Industrial & Technological Museum, Calcutta:—A museum to depict scientific and technological advancement.

Regional Research Laboratory, Jammu-Tawi (Jammu & Kashmir):—Research in problems relating to the industries and raw materials of the region & research specially directed to medicinal plants of the Himalayas (Kashmir Ragion).

Central Mechanical Engineering Research Institute, Durgapur (W. Bengal):—Research in Mechanical Engineering in all its aspects. It maintains mechanical Engineering Research and Development Centres at Ludhiana, Poona and Madras.

Central Public Health Engineering Research Institute, Nagpur:—Research in all aspects of public health engineering and co-ordination of work of all interested agencies in this field in the country. A number of Field Centres and Units at various places have also been established by the Institute. The field centres are located at Sewage Farm Road, Ahmedabad and Dr. Annie Besant Road, Worli, Bombay.

National Aeronautical Laboratory, Bangalore:—Scientific investigations of the problems of flight with a view to their practical application to the design, construction and operation of aircraft in India.

Regional Research Laboratory, Jorhat:—Research problems relating to more efficient utilisation and better conservation of important national resources of Assam and surrounding areas with a view to aiding the industrial development of the region.

Regional Research Laboratory, Bhubaneswar:—Identification and exploration of problems of the region, bringing projects of potential local application to the attention of local industries and providing assistance to associated local industries in the testing of their products and quality control.

Central Indian Medicinal Plants Organisation, 4, Sapru Marg, Lucknow:—Co-ordination of activities in the development of cultivation and utilisation of medicinal plants and to develop the vegetable drug resources of the country. It has two zonal centres located at Bangalore and Haldwani (U.P.), and maintains four drug farms and factories in Jammu and Kashmir.

Central Scientific Instruments Organisation, Chandigarh:—Promotion and development of indigenous manufacture of scientific instruments for teaching, research and industry. Its service centres are located in New Delhi and Madras.

Indian Institute of Petroleum, Dehra Dun:—Research in petroleum refining and processing of natural gas, petro-chemicals, etc., and providing facilities for the training of personnel for oil and petroleum industries.

National Geophysical Research Institute, Hyderabad:—Gravitational, magnetic, electrical and seismic surveys for understanding the crustal structure of India and also study and improvement of methods and techniques of exploration.

National Institute of Oceanography, Miramar, Panaji, Goa;—Research on various aspects of physical biological, geological and chemical oceanography including prospecting for petreleum and minerals in sea bed. The Institute maintains Indian Biological Centre, Indian Ocean Physical Oceanographic Centre at Ernakulam. The International Biological Programme also functions at I.O.P.O. Centre, Ernakulam.

National Biological Laboratory (in planning), Palampur (Kangra Valley), Himachal Pradesh:—Both fundamental and applied research in modern aspects of biological sciences,

Structural Engineering Research Centre, Roorkee:

Research in specialised design and development work in structural problems connected with buildings, bridges and other structures.

Industrial Tozicological Research Centre, Lucknow:— To study the harmful effects of industrial toxins on skin, blood, gastro-intestinal tract, central nervous system, bones, etc.

Visvesvaraya Industrial & Technological Museum, Bangatore:—A museum to depict scientific & technological advancement.

Scientific and Technical Personnel:—The National Register maintained by the Division of Scientific and Technical Personnel, CSIR, is a clearing house of information regarding availability and utilisation of our scientists, engineers, technologists, medical personnel and social scientists in India and abroad. Based on the data in the Register and on independent surveys, the Division carries out man-power research on the general and special characteristics of scientific and technical personnel, and their utilisation or wastage. Research reports are published periodically in the Technical Manpower Bulletin. These studies help formulation of scientific personnel policies, recruitment, and man-power planning.

The Council operates a Scientists' Pool. It provides temporary placement and employment assistance to highly qualified scientific and technical personnel, particularly those returning from abroad. Special studies on the characteristics of Indians with recent foreign training, and their subsequent utilisation are being made.

Publications and Information Directorate: A major publication of the Directorate is the Dictionary of Indian Raw Materials and Industrial Produce published under the "Wealth of India".

The Directorate also brings out periodicals: Journal of Scientific and Industrial Research, Indian Journal of Chemistry, Indian Journal of Pure and Applied Physics, Indian Journal of Technology (Monthlies), Indian Journal of Experimental Biology, Indian Journal of Biochemistry, and Research and Industry (Quarterlies). Monographs on botanical and zoological topics and proceedings of symposia are among the other major publications.

A monthly journal entitled "Science Reporter" is brought out from 1964. A monthly journal in Hindi Vigyan Pragati is also published.

Documentation: The Indian National Scientific Documentation Centre (INSDOC), New Delhi established with technical assistance from UNESCO, provides a complete range of documentation services to individuals and institutions all over the country. Publications: Indian Science Abstracts (monthly) 1965 and Annals of Library Science and Documentation (Quarterly) 1954.

Sponsored Research: Through a liberal system of grants-in-aid, scientists in other technical institutes, industrial laboratories and universities are enabled to pursue fundamental and applied research and develop their own special fields. There are, at present, more than 720 such schemes in progress at more than 100 centres. Apart from the practical results achieved, the schemes provide opportunities of training of young research workers and develop centres of independent research. Junior and senior fellowships tenable in the universities as well as in national laboratories are also being awarded to talented young persons, besides financial aid to retired scientists. At present more than 1,220 such fellowships are tenable at universities, laboratories, and other research organisations.

Co-operative Research Associations: Co-operative research associations in different Industrial fields are being assisted in their capital and recurring expenditure and by way of technical advice, preparation of plans and procurement of experts and materials. Ten such associations now functioning are catering to the textiles, rubber, sitk, art silk and paint, plywood, wool, tea and cement industries. Similar associations are in the process of being formed for foundry, automobile, radio and electronic industries.

Liaison & Extension Services: Active Industrial Liaison & Information Units have been set up in most of the National Laboratories to make direct contact with the industry, trade associations and usors of research to identify the problems of industry and formulate them into research projects for the laboratories.

NUCLEAR RESEARCH AND ATOMIC ENERGY

. The Tata Institute of Fundamental Research is the National Centro for advanced study and fundamental research in nuclear physics and mathematics and consists of a school of physics and a school of mathematics.

The Institute is the largest centre for cosmic ray research in India. Its nuclear emulsion group for the study of elementary particles is one of the largest in the world. The Institute also houses, as a national facility, an advanced and modern computer CDC 3600-160A. It also has a IMeV Cascade Generator. A high resolution radiotelescope for solar studies has been installed, at Kalyan, near Bombay.

A large cylindrical radiotelescope being constructed at Ootacamund will be used for lunar occuitation studies of radio sources.

Two other important institutions conducting research in nuclear physics are the Saha Institute of Nuclear Physics, Calcutta and the Physical Research Laboratory, Ahmedabad.

A high altitude research laboratory is functioning at an altitude of 9,000 ft. at Gulmarg in Kashmir. A similar laboratory is being established at Kodaikanal. Two other units under the administrative control of the Department are the Radiation Medicine Centre and the Tata Memorial Centre in Bombay.

Considerable fundamental research in nuclear science and cosmic rays is also being conducted at various universities and research institutions all over India with financial assistance from the Department of Atomic Energy.

The development and control of atomic energy in India is regulated by the Atomic Energy Act (Act No. 33 of 1962) and the Department of Atomic Energy handles all business of the Government of India relating to atomic energy and functions of the Central Government under the Act.

The Atomic Energy Commission is responsible for (a) formulating the policy of the Department of Atomic Energy, (b) preparing the budget of the Department for each financial year and getting it approved by the Government, and (c) implementing Government's policy in all matters concerning atomic energy.

The scientific and technical work of the Department is carried out by the Atomic Minerals Division and the Bhabha Atomic Research Centre at Trombay near Bombay.

Some of the more important functions of the Atomic Minerals Division are: (a) geological survey for and development of atomic minerals, (b) geographical survey, (c) geochemical survey, (d) mineral technology, (e) drilling, (f) mining, (g) stockpiling, (h) conservation of minerals and (i) technical assistance and training.

Bhabha Atomic Research Centre, Trombay

The Bhaba Atomic Research Centre (BARC), is India's principal centre for research in and development of atomic energy for peaceful purposes.

The work of BARC is organised under six major groups, viz. Physics, Engineering, Electronics, Metallurgy, Biomedical and Administration. Each group is under the charge of a Director and comprises three or more divisions. There is also a Directorate of Radiation Protection.

Every year about 150 science graduates and engineers are recruited and given intensive training for one year prior to being absorbed in the various projects of the Atomic Energy Department.

Research Facilities: Besides the reactors, the following principal facilities exist: (1) A 5.5 MeV Van de Graaff accelerator, (2) Mass spectrometers, (3) A 200 kv electron diffraction camera fabricated in the Establishment, (4) A slow chopper built in the Establishment, (5) A mechanical monochrometer built in the Establishment, (6) Crystal spectrometers and a double crystal spectrometer, (7) Spectrometers including double beam and vacuum grating ones, (8) Plasma torch built at Trombay, (9) Cloud chambers, (10) Magnetomoters, (11) Varfous types of electronic instruments, (12) A multi-arm spectrometer built at Trombay, (13) Electro-magnetic isotope separator, (14) Experimental Electroliser to produce very pure hydrogen, (15) Various instruments used in chemical analysis such as fluorimeters, polarometers, spectro-photometers, calorimeters etc., (16) Freeze drying units storing blood plasma etc.

A 400-channel nuclear data processor has been built. There are a Seismic Station at Gauribidanur near Bangalore to detect underground nuclear explosions and a Gamma Garden at Trombay for carrying out investigations and studies on induction of mutations in plants.

The Radiation Medicine Centre is now adopting most of the recognized methods for the diagnosis and treatment of diseases with the aid of radioisotopes.

Production Facilities: (1) Uranium Metal Plant & Thorium Plant, (2) Fuel Element Fabrication Plant, (3) Radioisotope Production Facilities, (4) Heavy Water Pilot Plant, (5) Heavy Water Reconcentration Plant, (6) Plutonium Plant, (7) Electronic Instruments, (8) Vacuum equipment, mass spectrometers etc., etc. The Electronics Corporation of India Ltd. has been set up at Hydersbad for the commercial production of electronic equipment developed at Trombay.

INDUSTRIAL OPERATIONS

Electronics Corporations of India Ltd., Hyderabad: It took over the activities of the Electronics Production Unit of the Bhabha Atomic Research Centre with a view to producing on a commercial scale a variety of nuclear instruments, control panels, etc. developed at B.A.R.C.

Rare Earths Plant, Alwaye and Thorium Plant, Trombay: See under "Government Industrial Undertakings".

Uranium Ore Mill: A uranium mill with a capacity to treat 1,000 tonnes of uranium ore per day is in operation at Jaduguda in Bihar. The process employed was developed in the B.A.R.C. at Trombay.

Uranium Corporation of India Ltd.: This company's registered office is in Jaduguda, Bihar. It is responsible for developing the uranium mine and for the operation of the Uranium Mill at Jaduguda.

Mineral Sand Industry: Indian Rare Earths Ltd. is currently operating two plants in Manavalakurichi (on the West Coast of Tamil Nadu) for the separation of ilmenite, monazite, rutile and zircon.

Uranium Metal Plant: This plant has an annual capacity of about 30 tonnes of nuclear grade uranium. A process for the production of ceramic grade uranium dioxide has been successfully developed on the basis of which design of a 250-tonne uranium oxide plant has been completed.

Heavy Water Reconcentration Plant: The plant is designed for the reconcentration of down-graded heavy water.

A small-scale electrolyser assembly for reconcentration of down-graded heavy water has also gone into operation.

A pilot plant for producing enriched Boron-10 used in neutron counters has been designed, fabricated and installed at Trombay.

Heavy Water Plant: The first Heavy Water Plant in Asia designed to produce 15 tonnes of heavy water annually in conjunction with the Fertilizer Corporation of India's Nangal Unit has been producing nuclear grade heavy water. It has been decided to set up at Kota a plant with a capacity of 100 tonnes of heavy water per year to meet the needs of the atomic power stations in Rajasthan and Tamil Nadu.

ATOMIC MINERALS

The Atomic Minerals Division of the Dopartment of Atomic Energy has been engaged in country-wide exploration, prospecting and development of atomic minerals, particularly those of uranium, thorium, beryllium, columbium-tantalum, lithium, etc.

As a result of the investigations carried out, several uranium occurrences of variable grade, size and importance have been located in different parts of the country,

the major deposits being those at Jaduguda, Narwaphar and Bhatin in the Singhbhum Copper Belt of Bihar. Favourable indications of uranium recently located in the Himalayan region in Kulu, Rampur-Bushahr and Garhwal, are currently under investigation.

The coastal tracts of India, together with several inland areas, particularly those of Ranchi (Bihar) and Purulia (West Bengal) are sources of large amounts of monazite and provide India with the largest thorium deposits in the world. Indian monazite contains 8 to 10 per cent ThO₂ and upto 0.3 per cent U₂O₃. Total reserves of monazite are estimated at some 5 million tons with ThO₃ content of 0.45 million tons and U₂O₃ content of 15,000 tons.

Ilmenite, which is associated with monazite, forms reserves of about 100-150 million tons, of which 65-32 million tons are measured reserves, the rest accounting for indicated and inferred reserves. Reserves of zircon, which is also found in association with monazite-bearing sands, are estimated at about 10 million tons, of which 3-34 million tons constitute measured reserves and the rest indicated and inferred reserves.

Intensive prospecting has also led to the location of several new occurrences of beryllium, columbium-tantalum and lithium minerals, in addition to those already known in the mica belts of Bihar, Rajasthan, Madhya Pradesh and Andhra Pradesh, besides smaller ones in Tamil Nadu and Mysore.

The Division also helps private parties including universities and institutions interested in prospecting and mining atomic minerals by providing technical advice, loan of G.M. counters, analysing samples free of charge and by extending such other help as would promote and widen the field of exploration.

NUCLEAR REACTORS

Apsara: The first nuclear research reactor in Asia, outside the USSR, attained criticality on August 4, 1956. It is an enriched uranium light water moderated and cooled pool type reactor. The reactor is designed for a maximum power level of 1 MW.

A number of experimental facilities have been provided in the reactor which has proved to be extremely useful for fundamental and applied research in basic sciences and engineering, radicisotope production and training of personnel.

The first fuel charge was removed from the reactor in December 1964 since it had attained its maximum burn-up. Maintenance of various reactor components as well as improvements in cooling and control systems, were carried out in the first quarter of 1965. The reactor was started up with the second charge of fuel elements—also hired from United Kingdom—in June 1965.

The standard element of second fuel charge contains 140 gms. of U-235 (80 per cent enriched uranium). For normal operation the reactor core contains about 25 fuel elements.

Cirus: (formerly known as CIR) is India's second research reactor, built as a joint Indo-Canadian project under the Colombo Plan. The reactor attained criticality on July 10, 1960. The total cost of the project is approximately Rs. 10 crores, being shared in roughly equal proportions by the two countries.

Cirus is a natural uranium heavy water moderated and light water cooled high flux research reactor with a terminal power of 40,000 KW. It is operated round the clock. The reactor is used for basic and applied research

in physics, chemistry, biology, metallurgy and reactor technology, for the production of large quantities of high activity radioisotopes as well as plutonium-239 and uranium-233 and for the training of personnel for future reactor programmes.

The standard fuel rod contains about 55 kg. of natural uranium. For normal operation the reactor core contains about 185 fuel rods and 20 tonnes of heavy water,

Zerlina: Is India's third research reactor. It is a zero energy reactor for lattice investigations and new assembly studies. The reactor attained criticality on January 14, 1961 with a natural uranium—heavy water loading. The reactor is operated on a two shift basis upto a maximum power of 100 W and is being extensively used for physics and studies of uranium—heavy water lattices.

The standard fuel rod contains about 45 kg. of natural uranium. The standard core contains 80 fuel rods and about 8 tonnes of heavy water.

The natural uranium fuel elements of CIRUS and ZERLINA are fabricated in Trombay.

Directorate of Radiation Protection

The Department of Atomic Energy is responsible for country-wide radiation safety.

A country-wide film badge service is being conducted by the Directorate for persons working with radiation sources. The Service now covers nearly 1,100 institutions monitoring some 13,500 radiation workers. It is expected that the film badge service, radiation protection surveys and prior approval of plans for radiation installations will be made compulsory in the near future.

The Directorate conducts (i) a one year postgraduate course in radiological physics; and (ii) four short-term courses every year on the industrial, medical and other applications of radiation and the associated safety aspects. It does research and development in fields such as hospital physics, radiation dosimetry and instrumentation, radiation applications and radiation bio-physics. It is also responsible for the formulation and promulgation, under the Atomic Energy Act, of various rules and regulations relating to radiation safety.

Fuel Element Fabrication Facility

It went into operation in June 1959. The entire charge of fuel elements used for CIRUS and ZERLINA was fabricated here. The present capacity of this plant is about 30 to 40 tonnes of fuel elements per year.

A plant is being set up at Hyderabad for the fabrication of fuel elements for power reactors. A good deal of development work has been carried out in the existing facility at Trombay for the fabrication of power reactor fuel elements, which consists of sintered uranium exide pellets clad in zircalov.

Central Workshops

A manufacturing facility for the production of specialised equipment and apparatus required for the country's nuclear research and development programme has been set up at Trombay at an approximate cost of Rs. 2.3 crores. The value of routine work-load on these shops is expected to be over Rs. 50 lakhs a year excluding work-load on major projects and large-scale fabrication of protetype equipment and experimental set ups. The workshops have already started fabrication equipment for the Rajasthan Atomic Power Project. Similar fabrication is being undertaken for other projects, resulting in savings in cost and foreign exchange. The workshops also undertake fabrication of Centaur two-stage rockets.

Graphite Shop

This is a facility set up for the purpose of machining graphite of grades of nuclear purity. This shop undertakes machining of graphite required for the three reactors viz., APSARA, CIRUS and ZERLINA besides numerous other works such as graphite moulds, crucibles and other components required by the various Divisions of the Trombay Establishment for their research and development work.

Radiochemistry Laboratory

This laboratory is equipped with the most modern facilities for handling plutonium and other higher radio-active elements. Research on various aspects of the fission of heavy elements is being carried out using radio-chemical techniques. Fission product isotopes are being supplied to various customers. A large number of scientists from the establishment as well as outside institutions including those from outside India have been trained in radiochemical techniques. The laboratory has now been shifted to its new permanent building, the Radiological Laboratories.

Isotope Laboratory

This Laboratory is responsible for the production and processing of radio-isotopes like iodine-131, phosphorus-32, chromium-51, iron-59 etc. The laboratory has also facilities for the production of radiopharmaceuticals required for diagnostic purposes in nuclear medicine, and for the production of organic compounds labelled with carbon-14 and tritium. Facilities have been provided for the fabrication of multicurie scaled radiation sources of cobalt-60 and irridium-192 required for industrial use and also for development work connected with the applications of radioisotopes to industrial problems such as gamma radiography, siltation studies, etc. The Laboratory is now being shifted to the Radiological Laboratories.

Plutonium Plant

The irradiated fuel contains a small amount of plutonium, a valuable nuclear material along with a large quantity of radioactive fission products. Investigations have been conducted on the separation of plutonium from the irradiated fuel. A plant has been built at Trombay for treating primarily the natural uranium fuel rods irradiated in CIRUS for recovering plutonium from them.

A bigger reprocessing plant being built at Tarapur is expected to be completed by the end of 1973.

Electronic Instruments and Components

The Electronics Division of Trombay Establishment has designed, developed and fabricated a variety of nuclear and industrial instruments which include Geiger Counters, Radiation Survey Meters, Contamination Monitors, High and Low Voltage Units, Scalers, Single Channel Analysers, Pulse Amplifiers, pH Meters, Electronic Multimeters, Oscilloscopes, Strain Gauge Amplifiers, Magnetic Amplifiers, Serve Amplifiers, Moisture Gauges, Density Gauges, Analeg computer. Medical Spectrometers and Counting Systems, for use in the Trombay Establishment, Universities and Colleges and Medical Institutions using radiation sources and also for use of the Tarapur Atomic Power Station. A digital computer TDC-12 and a helium-neon gas laser have also been fabricated.

The Division has also produced High Stability Film Resistors, A computer facility built around H.400 Honeywell system has also been set up.

Tarapur Atomic Power Station

The 380 MWE station at Tarapur has gone into operation. The station consists of two reactors of the boiling water type, and was built by the General Electric Company of the U.S.A. under a turn-key contract, on the basis of specifications provided by the Tarapur Atomic Power Project of the Department of Atomic Energy. The power station became critical at 8-37 a.m. on Feb. 1, 1969. Nuclear power began to flow from the station when it became operational at 8-15 p.m. on April 1, 1969.

Rajasthan Atomic Power Project

The first unit of the station is expected to be in commercial operation by early 1971. The second unit, also of 200 MW is expected to be commissioned by 1973.

Madras Atomic Power Project

Preliminary civil works of the station, which will consist of two reactors of 206 MW(c) each, is proceeding at Kalpakkam.

SPACE RESEARCH

The Thumba Equatorial Rocket Launching Station (TERLS) has been established near Trivandrum, Kerala, by the Indian National Committee for Space Research (INCOSPAR) of the Department of Atomic Energy. The rocket launching facility became operational on Nov. 21, 1963 when the first Nike-Apache Rocket carrying a Sodium Vapour Payload was fired.

The scientific programme at TERLS is conducted on the basis of bilateral collaborative agreements between India and France, the USA and the USSR. The objective of the programme is to provide better understanding of problems of Equatorial Aeronomy including metoorclogy, particularly in the region up to 170 km.

A second rocket launching station is being set up on the east coast of India—on Sriharikota Island in the Nellore District of Andhra Pradesh. This station will be useful for launching satellites.

There is a Satellite Telemetry Station in operation, since 1961, at the Physical Research Laboratory, Ahmedabad, Currently, it is monitoring X-ray data from NRL Solar Radiation Satellite. It is also participating in a world-wide programme of ionospheric studies with S-66 ionospheric beacon satellites.

Satellite Communication Station

The Government of India in the Department of Atomic Energy in collaboration with the United Nations has set up an Experimental Satellite Communication Earth Station at Ahmedabad in the area known as Jodhpur Tekra for the purpose of research and training in communications via satellites.

The Station went into operation in August 1967. There is a College of Satellite Communication Technology attached to the station.

The Department of Atomic Energy is building a Commercial Satellite Communications Earth Station at Arvi near Poons for the Overseas Communications Service.

OTHER RESEARCH BODIES

Mineral Research: I. Geological Survey of India, Calcutta maps out the mineral resources of the country.

2. The Indian Bureau of Mines and The Mineral Information Bureau at Delhi help in the prospecting and working of minerals. 3. The Oil and Natural Gas Commission is responsible for the prospecting and exploitation of mineral resources.

Animal and Plant Research: I. The Botanical and Zoological Surveys both in Calcutta conduct systematic surveys of the animal and plant resources of the country. 2. The Bose Research Institute in Calcutta conducts research in physics, chemistry, zoology and plant breeding. 3. The Birbal Sahani Institute of Palaeobotany at Lucknow carries on research in plant fossils.

Map Research: 1. The National Atlas Organisation in Calcutta does cartographic work. 2. The Survey of India with its headquarters at Dehra Dun is engaged in large-scale mapping of river basins and in the preparation of topographical maps.

Meteorological Research: The Meteorological Department of the Government of India at Delhi and Poona are concerned with meteorological, climatological, hydrometeorological and snow surveys.

Anthropological Research: The Department of Anthropology in Calcutta is concerned with ethnographic surveys and a variety of other studies in anthropology.

Physical and Chemical Research: The Indian Association for the Cultivation of Science in Calcutta is engaged in physical and chemical research, both in its theoretical and applied aspects.

Research in Radio Physics, Mathematics and Electronics: The Indian Institute of Radio Physics and Electronics in Calcutta conducts research in radio physics and electronics while research in cosmic rays and theoretical physics is carried out at the Physics Research Laboratory in Ahmedabad. The Institute of Mathematical Sciences at Madras carries on research in mathematics, applied mathematics and theoretical physics.

ENGINEERING RESEARCH

The Indian Standards Institution at New Delhi lays down specifications for materials, tools and products.

Among engineering institutions providing facilities for research the following may be mentioned:

All India Institute of Hygiene and Public Health, Calcutta: Sanitary engineering.

Central Building Research Institute, Roorkee (U.P.): Building engineering, prestressed concrete engineering,

Central Electronics Engineering Research Institute, Pilani (Rajasthan): Electronics and telecommunication engineering.

Central Mechanical Engineering Research Institute, Durgapur (W. Bengal): Mechanical engineering.

Central Public Health Engineering Research Institute, Nagpur: Public Health and sanitary engineering.

Contral Road Research Institute, New Delhi: Road engineering.

Concrete Research Laboratory, Chepauk, Madras: Structural engineering.

Indian Institute of Science, Bangalore: Aeronautical engineering, internal combustion engines, and power, hydraulic and electrical communication engineering.

National Aeronautical Laboratory, Bangalore: Aeronautical engineering.

Indian School of Mines and Applied Geology, Dhanbad : Mining engineering.

M. S. University, Baroda: Civil, mechanical and telecommunication engineering. P.S.G. & Sons, Charities College, Coimbatore: Civil, mechanical and electrical engineering.

Government College of Technology, Coimbatore: Heat engineering, hydraulic engineering, soil mechanics.

Indian Institute of Technology, Kharagpur: Mechanical engineering.

Madras Institute of Technology, Madras: Aeronautical and automobile engineering and soil mechanics.

University College of Science and Technology, University of Calcutta: Heat and Illumination engineering.

Indian Institute of Technology, Madras: Civil Engineering, Chemical Engineering.

Indian Institute of Technology, Bombay: Chemical Engineering, Civil Engineering, Electrical Engineering, Mechanical Engineering, Mctallurgical Engineering.

Indian Institute of Technology, Kanpur: Aeronautical Engineering, Chemical Engineering, Civil Engineering, Mechanical Engineering, Electrical Engineering, Metallurgical Engineering.

Indian Institute of Technology, Delhi: Mechanical Engineering, Chemical Engineering, Applied Mechanics, Civil Engineering, Electrical Engineering, Textile Technology.

A number of Ministries and Departments of the Government of India have development and research sections in engineering.

The Indian Agricultural Research Institute, New Delhi has a Division of Agricultural Engineering which is concerned with agricultural equipment.

The Ministry of Communications has a Research and Development Directorate which sees to the specifications, certification and manufacture of aircraft and aircraft material.

The Ministry has a Telecommunications Research Centre in Delhi.

The Technological Development Wing of the Ministry of Industries offers advice on engineering equipment in general and more especially on machine tools and internal combustion engines.

The Central Board of Irrigation and Power conducts eleven research stations the chief of which are in Poons, Amritaar and Poondi (Tamil Nadu State). The one at Khadakvasla near Poona is the most important. It conducts research in hydraulic engineering, soil mechanics, concrete materials and navigation.

The All India Radio has a research unit of its own in New Delhi.

The Railway Board has centres in Lucknow, Lonavla and Chittaranjan to investigate problems connected with railways.

Research projects connected with roads, bridges, ports, harbours are taken up for investigation by the Roads Organization under the Ministry of Transport.

Institute for Research in Reproduction, Opp. K.E.M. Hospital, Parel, Bombay 12.

Jawaharlal Institute of Postgraduate Medical Education and Research, Pondicherry.

It may be added that two Power Engineering Research Organizations in Bangalore and Bhopal, are being set up with the assistance of the U.N. Special Project Fund with UNESCO acting as the executive agency.

IRRIGATION RESEARCH

(See under article on Irrigation)

MEDICAL RESEARCH

Medical research is conducted chiefly under the auspices of the Indian Council of Medical Research, Medical Enclave (Ansari Nagar), Post Box No. 4508, New Delhi-16.

The control and management of the Council is vested in a Governing Body which, in scientific and technical matters, is assisted by a Scientific Advisory Board and its Expert Committees/Ad-hoc Expert Groups on specific subjects.

The Council publishes a Report on the research work carried out under its auspices and a monthly journal knewn as 'Indian Journal of Medical Research'. Special reports are also published from time to time.

The Council has established a Research Cadre and a Supernumerary Research Cadre to attract workers interested in biomedical research. A scheme for appointment of Emeritus Medical Scientists has been initiated to enable eminent retired scientists to pursue the research work in which they are specialised and to train younger workers.

The Council maintains the National Institute of Nutrition of Hyderabad, the Virus Research Centre, Poons (Virus-caused diseases), the Tuberculosis Chemotherapy Centre, Madras (Research on Tuberculosis), the Cholera Research Centre, Calcutta (to study various aspects of Cholera), the Indian Registry of Pathology, New Delhi (Reservoir of original case material and supply of teaching material for medical colleges in India) and an Occupational Health Institute, Ahmedabad (Research on problems relating to occupational health).

It has established a number of Units for important subjects. A Blood Group Reference Centre, a Reproductive Biology and a Contraceptive Testing Unit have been set up in Bombay. Besides, a large number of ad-hoc research schemes are sanctioned by the Council each year. In collaboration with the Central Council of Ayurvedic Research, the Council has set up a number of circuits for undertaking a comprehensive programme of research on indigenous drugs.

The Council also awards a number of research Fellowships. It also maintains a Library at Kasauli. Microfilm and Photocopy Service Unit has been set up at Kasauli.

Other prominent research institutions in medicine are:

School of Tropical Medicine, Calcutta: Diseases peculiar to tropical climata.

All India Institute of Hygiene and Public Health, Calcutta: Preventive and social medicine.

Indian Cancer Research Centre, Bombay: Cancer.

Vallabhbhai Patel Chest Institute, Delhi: Tuber-culosis and diseases of chest.

Central Leprosy Teaching and Research Institute, Tirumani (Chingleput): Leprosy.

Haffkine Institute, Bombay: Plague, malaria, virus diseases, nutrition. It also manufactures vaccines and

Central Research Institute, Kasauli: Microbiology, biochemistry, serology.

Pasteur Institute, Cooncor: Rabies, influenza, tropical cosinophilia, anti-venom serum, serological reactions.

King Institute of Preventive Medicine, Guindy, Madras: Vaccines, specially against smallpox and therapeutic sera.

Bengal Immunity Research Institute, Calcutta (Private): Prevention, control and cure of disease, and anti-malaria

Central Drug Research Laboratory, Calcutta: Biological and chemical assays of drugs. It also gives technical advice to drug manufacturing firms.

Drug Research Laboratory, Jammu: Research in medicinal plants. Has two farms. Promotes standardization of indigenous drugs.

Central Drug Research Institute, Lucknow: Work on drugs.

National Institute of Communicable Diseases, Dolhi: Malaria.

Nutrition Research Laboratories, Hyderabad: Nutrition and allied subjects.

SCHEDULED CASTES, TRIBES AND BACKWARD CLASSES

THE regional organisation of the Commissioner for Scheduled Castes and Scheduled Tribes, comprising 17 offices of the Deputy Commissioners for Scheduled Castes and Scheduled Tribes located in various States was wound up in June 1967, and the offices were transferred to the charge of the Directorate General, Backward Classes Welfare, a newly set up organisation in the Union Department of Social Welfare.

The total population of the Scheduled Castes and Scheduled Tribes according to the 1961 census, respectively were 64,417,366 and 29,837,266 as against 55,327,021 and 22,525,477 respectively in 1951 census, while the percentage to the total population being 14.67 and 6.80 respectively in 1961 against 15.32 and 6.23 respectively in 1961.

See article on 'Population' for State-wise figures.

SAFEGUARDS

The Constitution of India has laid down certain safeguards for Scheduled Castes, Scheduled Tribes and Back ward Classes, the weaker sections of the people. These include reservation of seats in the legislatures, recruitment of tribal candidates to services and posts in the Union and State Governments, appointment of a Commission to report on the administration of the Scheduled areas and the welfare of the tribes.

A high power official committee set up by the Union Government has suggested that the special safeguards to Scheduled Castes and Scheduled Tribes be terminated by 1975. The committee is also understood to have made several proposals in detail for the revision of the lists of Scheduled Castes and Scheduled Tribes for purposes of entitlement to political, educational and economic benefits provided by the constitution.

The Union Government has decided to extend the period of reservation of seats in Parliament and State Legislatures for Scheduled Castes and Scheduled Tribes for a further period of 10 year from 1970. The Government has also decided to maintain the status quo in respect of the present list of Scheduled Castes for purposes of education and other safeguards.

WELFARE SCHEMES Expenditure 1967-68

The estimated expenditure for 1967-68 under State and Central Welfare Schemes for Scheduled Castes and

Scheduled Tribes respectively (in Rs. Lakhs) was 473.18; 506.26 and 348.81; 605.32.

State-wise estimated expenditure on welfare schemes for Scheduled Castes and Scheduled Tribes respectively (Rs. lakhs) was as follows:—Andhra Pradesh 25·31; 45·76; Assam 28·27; 101·06; Bihar 51·05; 120·37; Gujarat 51·16, 107·38; Haryana 29·49; (a); Jammu & Kashmir 5·00; (a); Kerala 31·75; 7·02; Madhya Pradesh 36·57; 228·43; Maharashtra 143·81; 59·35; Mysore 20·00; 12·12; Nagaland (b); (b); Orissa 16·75; 133·00; Punjab 46·30; (a); Rajasthan 24·65; 39·01; Tamil Nadu 142·42; 13·97; Uttar Pradesh 173·20; (a); West Bengal 93·52; 50·73; Andaman & Nicobar Islands (c); 0·58*; Chandigarh (b); (a); Dadra & Nagar Haveli (c); (a); Delhi 4·94*; (a); Goa, Daman & Diu 0·99°; 1·54*; Himachal Pradesh 7·69°; 5·50°; Laccadive (c); 0·20°; Manipur 1·02°; (a); Pondicherry 3·19°; (a); Tripura 2·16; 27·99; All-India 989·44; 964·13.

Forty-five per cent of those who benefited as a result of distribution of about one crore acres of land during the last 16 years, belonged to the Scheduled Castes.

Allocation and expenditure on Scheduled Castes and Scheduled Tribes for 1967-68 under Central and State Sectors respectively (Rs. lakhs) were as follows:

Scheduled Castes (Central Sector) 230 · 55; 506 · 26; State Sector 475 · 61; 473 · 18.

Scheduled Tribes (Central Sector): 563.07; 605.32; State Sector 394.90; 348.81.

TRIBAL DEVELOPMENT

As of January 1968, only less than 50 per cent of the tribal population was covered by the 415 tribal development blocks and 43 special multi-purpose tribal blocks. Each tribal block covers about 513 sq. km. and 25,000 people of whom, at least 66.6 per cent are tribals. It is proposed to cover areas of 50 per cent tribal population.

State-wise allocation and expenditure under State & Central Sectors on welfare programmes of Scheduled Castes during 1967-68

In the States of Haryana, Jammu & Kashmir, Nagaland, Punjab, Uttar Pradesh, and the Territories of Chandigarh, Dadra & Nagar Havell Delhi and Pondisherry no allocations have been made for the welfare programmes of the Scheduled Tribes.

¹ The figure relates to Telengana Region only, ² For Plains only, ² Anticipated.

Voluntary Organisations

Voluntary Organisations have been rendering a useful service in the cause of the backward classes. The Government of India have been assisting some such organisations of all-India character to undertake welfare work.

Information as regards the name of the organisation, grants-in-aid paid and the amounts spent respectively for the welfare schemes of Scheduled Castes during 1967-68 were as follows:—All India Harijan Sevak Sangh, Delhi, Rs. 5,67,500; Rs. 5,07,038; Bharatiya Depressed Classos League, New Delhi, Rs. 1,14,583; Rs. 1,24,560; Ishwar Saran Ashram, Allahabad, Uttar Pradesh, Rs. 66,920; Rs. 62,113; Indian Red Cross Society, New Delhi, Rs. 2,03,655; Rs. 1,47,674; Hind Sweepers' Sevak Sangh, NewlDelhi, Rs. 52,412; Rs. 52,088; Thakkar Bapa Ashram, Nimakhandi, Orissa, Rs. 8,000; Rs. 8,000; Ramakrishna Mission Vidyapith, Deoghar, Bihar N.A.; Rs. 27,500; Total Rs. 10,13,070; Rs. 9,28,973.

Name of the organisation, grants-in-aid and expenditure incurred for the Scheduled Tribes respectively during 1967-68 were:

Bharatiya Adimjati Sevak Sangh, New Delhi, Rs. 1,18,001; Rs. 2,15,974; Indian Council for Child Welfare, New Delhi, Rs. 38,930; Rs. 38,930; Andhra Pradesh Adimjati Sevak Sangh, Hyderabad, Rs. 70,577; Rs. 67,828; Ramakrishna Mission, Shillong, Rs. 24,120; N.A.; Ramakrishna Mission, Cherrapunji, Rs. 2,67,240; Rs. 2,42,453; Ramakrishna Mission, Kaladi, Kerala, Rs. 79,310; Rs. 96,000; Ramakrishna Mission Sevashram, Silchar, Assam, Rs. 19,200; Rs. 19,200; Andhra Rashtra Adimjati Sevak Sangh, Nellore, Rs. 14,500; Rs. 14,500; Central Social Welfare Board, New Delhi, Rs. 55,955; Rs. 43,000; National Council of Educational Research

and Training, New Delhi, Rs. 1,31,563; Rs. 77,222; Total Rs. 8,19,396; 8,15,107.

REPRESENTATION IN LEGISLATURES

(Please see under lists of legislatures)

REPRESENTATION IN GOVERNMENT Services

The quota reserved for Scheduled Castes and Scheduled Tribes in the Government of India services is as follows:—

Direct Recruitment on all-India Basis:

12½ per cent of vacancies filled by open competition and 16‡ per cent of the vacancies filled otherwise have been reserved for Scheduled Castes, and five per cent of the vacancies in all cases for the Scheduled Tribes filled through open competition or otherwise.

In cases of promotion, the following orders have been issued:

For Non-Selection Posts:

- (a) if promotion is made subject to the passing of a qualifying departmental examination, the standard of qualification for Scheduled Castes and Scheduled Tribes need not be so high as prescribed for other candidates:
- (b) if promotion is made otherwise than by a qualifying examination, Scheduled Caste and Scheduled Tribe Candidates should be adjudged sympathetically without applying too rigid a standard and the candidates belonging to these castes and tribes should not be superseded without their cases being reviewed at high levels.

For Selection Posts:

(a) if promotions are to be made on the basis of a competitive examination, the communal orders will

apply and any Scheduled Caste and Scheduled Tribe candidates, who are above the minimum standard for necessary efficiency, may be selected for appointment against their reserved quota;

(b) if the promotion is made otherwise than through a competitive examination, no relaxed standards of merit are to be applied for Scheduled Caste or Scheduled Tribe candidates.

Employment Exchange Statistics (1967)

Scheduled Castes: Registrations during the year 421,272; Placements 47,621; No. on the live register at the end of the year 3,05,978; Number of vacancies notified as reserved for Scheduled Castes under Central Government 4,893; Vacancies notified under Union Territory 266; Vacancies notified under State Governments 3,444; Vacancies notified for Scheduled Castes by others 1,014; (Total notified vacancies as reserved 9,617).

Scheduled Tribes: Registrations during the year 69,695; Placement effected 9,024; No. of applicants remaining on live register at the end of the year 53,792; Total number of vacancies notified as reserved for Scheduled Tribe applicants 4,042 (Central Govt. 2,842; State Govts. 960; Union Territories 34; and Others 206).

Occupational Categories

The occupational classifications according to the live register, as on Dec. 31, 1967, of Scheduled Caste and Scheduled Tribe persons registered with the Employment Exchanges show the educational qualifications, viz. non-matric, matric and graduates* respectively in bracket.

Scheduled Castes: Doctors 7 (—; —; 7); Engineers 103 (—; —; 103); Typists 2,853 (43; 2,737; 73); Stenographers 116 (3; 98; 15); Assistants/Clerks 29,208 (907; 25,646; 2,655); Teachers 6,122 (1,525; 4,374; 223); Craftsmen & Production process workers 11,942 (9,327; 2,599; 16); Unskilled workers 68,266 (65,877; 2,389; —); Unskilled labourers other than office workers 88,361 (87,793; 568; —); Others 99,000 (87,391; 29,466; 2,143); Total 3,05,978 (2,32,866; 67,877; 5,235).

Scheduled Tribes: Doctors 1 (—; —; 1); Engineers 11 (—; —; 11); Typists 207 (4; 202; 1); Stenographers 19 (—; 19; —); Assistants/Clerks 3,834 (113; 3,583; 138); Teachers 794 (231; 502; 61); Crafteman & Production process workers 1,990 (1,522; 468; —;) Unskilled office workers 11,800 (11,071; 729; —); Unskilled labourers other than office workers 15,631 (15,326; 305; —); Others 21,681 (15,771; 5,587; 323); Total 55,968 (44,038; 11,395; 535).

LEGAL AID, EDUCATION

Legal aid is provided by some State Governments from their own funds or from grants made by the Central Government. Allocations for legal aid in the Third Plan under the State Sector for Scheduled Castes and Scheduled Tribes respectively were Rs. 4.00 lakes and Rs. 3.55 lakes.

Education

Provision is made for grants of pre-matric scholar-ships to the Scheduled Caste and the Scheduled Tribe students. Most of the State Govts, are incurring a large expenditure out of their own budget also for grant of scholarships and stipends to the deserving students. In almost all the States, hostels are being run to make it possible for Scheduled Caste and Scheduled Tribe students to continue their studies. A limited number of students belonging to other communities are also admitted to

these hostels to avoid segregation. In many States mid-day meals to Scheduled Caste and Scheduled Tribe students have been started.

Educational Concessions for Converts

The Government of India has decided to extend educational concessions at the College level to Scheduled Caste Converts to neo-Buddhism in Maharashtra and to Christianity in the south. There are about 360,000 neo-Buddhists in Maharashtra and 1,260,000 such converts to Christianity in the south. Special reservations in the Central Government Services are also considered for the Converts.

Girls' Hostels

The programme of setting up hostels for Scheduled Caste and Scheduled Tribe girls in the middle and secondary stages of education was continued during 1967-68. The hostels are put up in rural and semi-urban areas, where concentration of Scheduled Castes/Scheduled Tribes population and facilities for girls are inadequate. An amount of Rs. 9-00 lakhs and Rs. 11-25 lakhs was allocated, out of which Rs. 8-97 lakhs and Rs. 10-01 lakhs have been spent for Scheduled Castes and Scheduled Tribes respectively.

Ashrams & Sevashrams

Ashram schools are residential institutions where training in different trades or crafts like carpentry, weaving, smithy, tailoring and agriculture is given along with general education. All expenses are borne by the Government. Sevashrams are day schools where training in spinning and gardening is given along with general education. The students are supplied with clothing, books, spinning material, etc., free of charge.

Many of the States have established ashram schools for spreading education at the primary and middle stages amongst the Scheduled Tribes.

Post-matric Scholarships: The number of post-matric scholarships awarded during 1967-68 to Scheduled Castes and Scheduled Tribes was 103,760 and 21,721 and the expenditure was Rs. 5,14,46,660 and Rs. 1,10,91,202 respectively.

Overseas Scholarships: During 1966-67 and 1967-68, 10 Scheduled Caste and 5 Scheduled Tribe candidates were awarded overseas scholarships under the Govt. of India Overseas Scholarship Scheme.

COMPLAINTS

During 1967-68, 1,429 complaints were received at the headquarters and regional offices of the Commissioner's organisation. The nature of complaints and their number in each case are as follows:—Practice of untouchability and harassment 120; Land and housing problem 145; Service matters 801; Education 177; Housing 120; Miscellaneous matters 66.

BACKWARD CLASSES

The principal criterion for determining Backward classes is their low social position in the traditional caste hierarchy of the Hindu Society. As many as 930 communities have been included in the above category and their estimated population is 115 millions. The Government of India have no recognised list of backward classes; but the State Governments have been advised to have their own lists of such classes based on economic criteria.

The Government of India has decided not to draw up any all India lists of Backward Classes and has advised

^{*} Graduates include post-graduates also.

the State Governments to apply preferably economic tests than caste.

Following a judgement of the Supreme Court, the Central Govt. have accepted economic factors and not caste as the basis for determining the backwardness of people. Some of the State Governments have accepted this as the criterion for judging backwardness and other State Governments are being persuaded to fall in line.

Denotified, Nomadic and Semi-Nomadic Tribes

In the past, denotified communities, originally known as criminal tribes, were subjected to severe police controls and kept outside the fold of the society. Schemes have been undertaken for them like establishment of ashram schools, provision of houses and house-sites, settlement on land and grant of subsidy for the development of house-hold industries, etc.

Note. In calculation of excesses, defects and their percentages rainfall figures are taken 0-1 mm. The plus sign is omitted where the departures are above normal.

MONSOON RAINFALL SUMMARY

(June to September 1968)

The chief features were (1) Normal onset of monsoon over most parts of north India despite its late arrival over the rest of the country; (2) Serious floods and droughts in many states; and (3) Early withdrawal of the monsoon from north-west India at the end of August and its rapid withdrawal from the remaining parts of the country outside the south Peninsula in the second week of October.

Season as a whole: The monsoon set in over Kerala and Assam at the beginning of the second week of June, about a week later than the normal date. But it advanced into most parts of the north and Central India by about the normal dates and covered the entire country by 9th July. During June, July and August, spells of heavy rains led to flood in many states, notably in Kerala in July and in Gangetio West Bengal and Gujarat State in August causing serious havoc and loss of lives. There were prolonged spells of scanty rainfall in Andhra Pradesh and parts of Mysore and Maharashtra States in August and in Rajasthan, Gujarat State and Haryana in September.

The monsoon withdrew from northwest India at the end of August, about a fortnight earlier than the normal date. The further withdrawal was delayed till the second week of October, when it rapidly withdrew from the rest of the country and remained confined to the south Peninsula from 15th October. The noteworthy features of this year's monsoon was spells of heavy rains leading to devastating floods in some states and severe drought conditions in certain states including a few affected by floods.

The rainfall for the season was in defect over a large part of the country — in large defect in west Rajasthan, in moderate defect in Himachal Pradesh, east Rajasthan, Gujarat State, coastal Andhra Pradesh and Telangana and in slight defect in Orissa, Uttar Pradesh, east-Madhya Pradesh, Maharashtra State, Rayalaseema, Tamil Nadu and north interior Mysore. It was normal in the Bay Islands, Assam, Sub-Himalayan, West Bengal, Bihar State, Haryana, Punjab, Jammu & Kashmir, West Madhya Pradesh and coastal and south interior Mysore. Only over a small area, it was in excess — slightly so in Gangetic West Bengal and the Arabian Sea Islands and in moderate excess in Kerala.

FISHERIES

I NDIA produces about 0.89 million tons of marine fish out of a total fish production of 1.3 million tons, which is only a quarter of the country's requirements estimated at about 4 million tons annually. About 1.9 lakh fishing craft including 1.16 lakh powered craft are estimated to be employed. The average catch is about 2,500 lbs. per man per year. The annual per capita availability of fish in India is estimated to be 3.4 lbs. as against 16 lbs. in Ceylon, 70 lbs. in Burma and 90 lbs. in Japan. The fishing industry in India offers employment to about a million persons and contributes annually over Rs. 60 crores towards the national income. About 27,000 tons of fish products, consisting mostly of dry, dry-salted and wet-salted fish, are annually exported to neighbouring countries.

Some of the steps taken by Government to improve fish production are mechanisation of fishing craft, training centres for fishermen, cold storage facilities, formation of deep-sea fishing stations and research at the four main central stations, viz., Central Inland Fisheries Station, Calcutta, Central Marine Fisheries Research Station, Mandapam, Deep-sea Fishing Station, Bombay and the Central Fisheries Technological Research Station, Cochin.

Today more than 1-1 lakh mechanised boats are operating on Indian coastline. In Bombay the local types of boats are being mechanised. New designs have been evolved for boats in Tamil Nadu, Kerala and Andhra States. Experiment in improved types of fishing with small power craft is also in progress.

Cold storage facilities exist in Bombay, Mangalore, Calicut, Cochin, Quilon, Trivandrum, Madras and Calcutta. Additional plants are being installed in many other places. Some of these plants have been provided under T.C.M. and Norwegian aid programmes.

PRODUCTION

Production is shown in the table below. About twothirds of the catch are marine-fishes.

					'00	00 tonnes.
Year				Marine	Inland	Total
1965			-	824	507	1,331
1966			4.6	889-9	477.5	1,367.4
1967		4.1	4.5	863-4	536 · 8	1,400 · 2
1968	4.6	0.6	F 9	_	_	1,620

The following is a list of the names of fishes showing within brackets their production in metric tons in 1966 and 1967 respectively:

Elasmobranches (37,428; 29,564); Eels (2,425; 2,534); Cat Fish (22,564; 24,299); Chirocentrus (7,877; 9,015); Oil Sardine (2,52,700; 2,59,102); Other Sardine (59,075; 32,202); Hilsa Itisha (1,542; 1,106); Other Hilsa (8,432; 6,835); Anchoveilla (26,677; 29,237); Thrissocles (8,831; 9,222); Other Clupeids (23,260; 22,332); Harpodon Nehereus (77,362; 74,882); Saurus (2,205; 1,768); Hemi hamphus and Belone (1,831; 1,485); Flying Fish (3,699; 3,094); Perches (12,136; 8,422); Rod mullets (4,692; 1,358); Polynemids (4,589; 2,654); Sciaenids (25,999; 24,458); Ribbon Fish (45,110; 29,433); Caranx (10,680; 24,337); Chorinemus (3,473; 2,836); Coryphaenas (24,384; 43,769); Gazza (45; 54); Lactarius (5,872; 8,669); Pomfrets (17,832; 27,460); Mackerel (31,960; 29,194); Seer Fish (10,111; 9,917); Tunnies (3,063; 3,683); Sphyraena (1,069; 4,403); Mugil (1,488; 3,155); Bregmaceros (2,659; 2,107); Soles (7,431; 6,072); Penacid Prawns (55,487; 62,170); Non-penacid Prawns (35,432; 29,639); Other Crustaceans (3,716; 6,299); Cephalopods (997; 526); Miscellaneous (22,968; 24,732); Total marine (8,89,942; 8,63,443); Total Inland (4,77,458; 5,36,800); Grand Total (13,67,400; 14,00,243).

The total landing of marine fish by States for 1966 & 1967 is shown below:

			(in	tonnes)
			1966	1967
Bengal & Orissa			9,796	18,953
Andhra			80,071	76,054

Maharashtra		* 1	1,34,257	1,33,302
Gujarat	6.4		89,339	75,633
Goa		* *	24,600	12,460
Andaman (South)		0.1	330	410
Minicoy & Laccadive Isl	and	8	660	812
Total	4.6		8,89,942	8,63,443

RESEARCH

Research in Fisheries is carried out primarily under the aegis of the following main central stations.

Central Inland Fisheries Research Institute, Barrackpore; Central Marine Fisheries Research Institute, Mandapam, Tamil Nadu; Central Institution of Fisheries Technology, Ernakulam, Kerala State.

The fishery research institutions have been brought under the jurisdiction of the reorganised ICAR.

MARKETING

For the improvement of fish marketing, six refrigerated railway vans are running—two at Palasa (Orissa)-Calcutta route, two in Calicut-Madras and two in Vijayawada-Howrah. One broad gauge and two metre gauge vans were introduced in 1968-89. Construction of three more refrigerated vans is in progress and was expected to be completed in 1969-70. These vans have highlighted the need for more such vans not only on these routes but on others as well. Arrangements are, therefore, being made for the construction of six more refrigerated vans.

To meet the urgent requirements of refrigerated road transport, arrangements were made for importing 26 road vans. A few such trucks were also fabricated locally. Six ice and cold storages were established one each in Gujarat and M.P., two each in Kersla and Orissa. Work on four freezing plants with provision for frozen storage one each in Andhrs, Gos, Kerala and Orissa is being completed. During the year 1966, 25 ice plants, 19 cold storages, 6 walk in coolers and 4 freezing plants were established and 26 out of 50 ice plants, 50 cold storages, eight freezing plants and 11 storages were under construction. Four ice plants and 11 cold storages were completed during the year. Apart from the 41 ice plants, 46 cold storages, 11 freezing plants and 12 frozen storages were in various stages of erection during 1968-69.

The Central Fisheries Co-operatives (Marketing and Dovelopment) procured 1,108 tonnes of fish in 1967-68. During April 1968 to Dec. 1968, 897 tonnes of fish were procured against 680 tonnes in the corresponding period during the year 1967.

Exports: During 1966-67, 1967-68 and 1968-69 India exported fish and fish products valued at Rs. 111-0 million, Rs. 179-5 million and Rs. 230-0 million respectively.

TRAINING

The first two-year course for training District Fishery Officers in all aspects of fisheries, both marine and inland was imparted at the Central Institute of Fisheries Education at Versova.

For training fishermen there are centres at Satpati near Bombay, Veraval in Saurashtra, Cochin in Kerala and Tuticorin in Tamil Nadu. New training centres are being opened at Mangalore in Mysore State and at Kakinada in Andhra Pradesh. At these centres batches of 20 candidates are admitted for 6 months training.

The Central Deep-sea Fishing Station at Bombay gives training in modern fishing methods. During the seven years (since its starting in 1961) 136 candidates (including 17 from neighbouring countries) have completed this training in six batches and 47 candidates from 7th and 8th-batches are in training. Trainess have been absorbed in State/Central services. At the Central Institute of Fisheries Operatives, Ernakulam, the first batch of trainces for the Master Fisherman's Certificate Course and 34 for the Engine Drivers Course completed their training.

In order to meet the additional requirements of fishery operations in the Fourth Plan, three more training units are proposed in suitable centres. A training course for boat building foremen and gear technicians has commenced from July 1966. The Marine Products Training Centre, Mangalore (started with Japanese collaboration) provides training in canning, freezing, microbiology etc.

FOREIGN AID

The FAO, TCM and Indo-Norwegian Foundation continued to give valuable technical assistance. The term of the project for fisheries Training Institute, Bombay assisted by UNDF(SF) has been extended by another six months with no extra cost. In addition a new scheme for Pelagic Fisheries investigation on Goa-Cochin sector at a total cost of 2.6 million dollars has been sanctioned. Also one fellowship on fisheries for overseas training was offered by UNDF(SF). Under the Indo-Norvegian projects signed in March 1967, for five years practical training and demonstration on deep see exploratory fishing and modern technology are encouraged.

FISHING HARBOUR

The construction of the fishing harbours at Veraval (Gujarat), Nagapattinam and Cuddalore (Tamil Nadu), Baypore (Kerala), Bhatkal (Mysore) and Vishakapatnam is completed. Eight fishing harbours have been constructed at Jaffrabad and Navabundar (Gujarat), Kagalhimi (Mysore), Kakinada (Andhra) and Azhikode and Pennani (Kerala). Another eleven at Porbunder, Jaffrabad (2nd stage) and Umbergnon (Gujarat), Karwar, and Mangalore (Mysore), and Cannanore, Baliapatnam and Vizhinjam (Kerala) is in the process of completion. A similar one is proposed at the Tuticorin intermediate port (in Tamil Nadu). Two fishing harbours to accommodate mechanised beats and larger fishing vessels have been sanctioned for Bombay and Madras.

ANDHRA PRADESH

Andhra Pradesh has a coast-line of about 600 miles. The continental shelf extends to 20 miles on an average with a fishable area of 12,000 sq. miles. There are 350 fishing villages in seven marine districts of A.P. According to the 1961 census the total number of fishermen and related workers engaged in fishing industry was 99,521 of which 22,223 were in the production of marine fish and 78,298 in the production of fresh water fish. The total number of fishing craft and tackle employed by them are 23,135 and 2,31,672 respectively as per the 10th Quinquennial Livestock Census of 1966.

The fish production of the State is estimated at 1,47,264 metric tons of marine fish and 75,921 metric tons of inland fish during 1968.

Marketing: Fish is being exported to Orissa and West Bengal. Exports of fish to West Bengal during 1968 from railway stations Vijayawada, Eluru, Tadepalliqudem, Pithapuram, Samalkot, Kakinada, Tuni and Waltair stood at 18,168 qtls. 78 kgs.

Co-operatives: At the end of 1968-69 there were 557 fishermen cooperative societies with a membership of 53,467 and a share capital of Rs. 11.20 lakhs including 13 marketing and two apex central societies.

GUJARAT

Gujarat has a coast line of over 1,600 kilometres extending from Lakhpat in the north to Umbergaon in the south. It has a total fishable area of 120,000 sq. kilometres including the Gulf of Kutch and Gulf of Cambay.

R'

There are 46 important fishing ports and 130 other small roadsteads and fishing hamlets. No. of fishermen 2.5 lakhs; no. of active fishermen 30,000; no. of fishing vessels used in estuarine, coastal and offshore fishing: about 4,171 ranging from I to 15 tons. Total capital invested in fishing boats, engines, fishing gear and other accessories by fishermen and their co-operatives amounts to Rs. 2.5 crores.

Total landings in 1968-69: 1.27 lakh metric tonnes worth Rs. 6.17 crores. Local consumption in the State: 31,000 tons. Balance is exported to Bombay, Delhi, Calcutta, Ceylon, Burma, Singapore, Mauritius and U.S.A. Value of fish exported to foreign countries: Rs. 25 lakhs.

Inland fisheries are restricted to the districts of Baroda, Kaira, Panchmahals, Mehsana, Banaskantha, Kutch, Broach, Surat, Dangs and Bulsar. There are 2,300 fishermen engaged in inland fisheries. 41 lakhs of fish seed of major Carps and common Carps were supplied to the pisciculturists during 1968-69. Two fish farms and eight fish seed centres have been established.

Per capita earning of fishermen: Rs. 875 a year.

No. of ice factories 84; ice production 1,032 tonnes a day; no. of cold storages available 13; no. of mechanised boats: 1,179 (June, 1969). Quantity of fishing twine supplied: 40,000 kgs. Service stations 3; fishery schools: one each at Baroda, Bhadbhut, Umarsadi and Kolak; Cultural centres 27; Shark liver oil extraction centres 3; fish meal plant: one at Jaffrabad; Govt. of India institutions in the State: Marine Fisheries Research Station at Veraval; Survey Centre at Veraval; Offshore Fishing sub-station at Veraval; Central Institute of Fisheries Technology at Veraval.

The State has 69 co-operatives with about 15,388 members,

A research wing has been opened in the Directorate to conduct research on the offshore fisheries.

KERALA STATE

Kerala State has a coast line of 590 Km. spread over 264 marine fishing villages. In addition to nearly 13,800 indigenous fishing cances of various sizes and 8,500 catamarans, about 1,700 mechanised boats are also operating in Korala waters. The fishing gear in use consists of 4,500 shore-seines, 21,300 boat seines, 35,800 gill nets and thousands of hooks and lines.

In 1968-69, 3,56,183.5 tonnes of marine fish worth Rs. 3,71,62,391 was landed. 9,757.4 tonnes of inland fish valued at Rs. 1,63,49,201 was also landed during the year.

Oil Sardine, Prawns, Horse mackerel, Soles, Lactarius, and Shark are the most important marine fisheries whereas Prawns, Barbus, Clarius, Mullet, Etroplus, Murrels etc. form the major inland fishery.

Approximately 55 per cent of the marine catches are consumed as fresh fish and 15 per cent are canned, salted and sun-dried. 18 per cent is frozen mainly for export, 7 per cent is used for preparation of fish meal and oil extraction, and 5 per cent for manufacture of fish manure. It is estimated that 60 per cent of the total produce is consumed in the State, 22 per cent sent to other countries and 18 per cent exported to foreign countries.

With only 10 per cent of the country's coastline, the State accounts for 40 per cent of the marine fish production in India, and 85 per cent of the foreign exchange earning of the country from Marine products.

In order to train fishermen in the use of mechanised fishing boats and modern fishing equipments 5 Fishermen Training Centres are functioning at Vizhinjom, Neendakara, Ernakulam, Beypore and Cannanore. 1,989 fishermen have completed training in these training centres, till the end of 1968-69. Besides these, there is a Staff Training Centre and 3 Regional Fisheries Technical High Schools.

There were 823 Producers' Co-operative Societies, 194 Credit Societies, 15 Regional Marketing Societies and 2 Marketing Federations in the State as on 31-3-1969. The total membership in these Societies is 1,03,630 and the paid up share capital is Rs. 16,59,887. Mechanised boats, Nylon nets etc. are distributed to fishermen through the Co-operative Societies.

There are 6 Research Stations in the State engaged in the research of marine, estuarine and fresh water fisheries.

There are 4 brakish water fish farms, one fresh water fish farm and nine major reservoir fishery centres.

Mechanisation of fishing, construction of fishing harbours with necessary shore installation like Ice Plants and Cold Storages, Boat Building Yard and Repairing yards, Training Centres etc., construction of feeder roads and community amenities like construction of houses, wells, latrine, issue of thatching grant, development of Reservoir fisheries etc. form part of the developmental activities of the State. During 1969-70 it is expected that six indigenous Gingha Trawlers would be acquired and commence fishing operation by the Kerala Fisheries Corporation.

TAMIL NADU

Tamil Nadu has a coastline of 997.47 kilometres with 9,000 square miles of inshore waters and a continental shelf of about 30,000 square miles and about 19,52,280 acres of inland waters. There are about 3.75 lakins of fishermen spread over 415 inland and 308 marine fishing villages of the State. There are at present about 25,000 catamarans, 794 mechanised fishing boats, and about 103,455 fishing nets of different types and 2,18,000 hooks and lines.

The estimated landings of marine fish in 1967-68 were about 2,04,916 tonnes valued at Rs. 2,306-31 lakhs. The estimated landings of inland fish from various inland waters were about 1,15,935-66 M. Tons valued at Rs. 731-17 lakhs.

The four marine biological stations, Ennore, Krusadai Island, Tuticorin and Kanya Kumari, the three technological stations at Tuticorin, Nagapattinam and Kanya Kumari and the Fresh Water Biological Station at Bhavanisagar and Hydrological Station at Madras do research on fisheries problems.

The Pearl and Chank fisheries of Tamil Nadu are state monopolies and yield substantial revenue besides supporting a large population of skilled divers. About 2½ lakhs of chanks are fished every year in the departmentally operated Tirunelvoli Chank Fishery, yielding a revenue of about Rs. 2 lakhs.

A quantity of 461.69 lakhs of fingerlings was collected during the year 1968-69. 779.27 lakhs of hatchlings were produced by induced carp spawning methods.

For providing suitable landing and berthing facilities, fishing harbours have been constructed at Cuddalore and Nagapattinam. Major fishing harbours at Madras and Tuticorin are under construction.

As on 1-8-1968 five fish curing yards are maintained by the Government wherein good quality salt is supplied to fishermen at subsidised rates for curing fish hygienically under the technical supervision. A quantity of 1,954-234 tonnes cured fish was released from the yards during the year 1967-68.

One ice plant, fifteen ice plant-cum-cold storage plants, two cold storage plants and six walk-in coolers are provided at important fish landing centres and fish markets.

A fish canning factory and a fish meal plant are working at Tuticorin. One freezing plant is working at Ennore and two other freezing plants one at Mandapam under Indo-Norwegian Project and another at Tuticorin are under erection.

The Department provides insulated, refrigerated motor vehicles to Fishermen Co-operative Societies and Fishermen Marketing Unions on hire and on hire-purchase basis for quick transport of fish from landing contres to marketing and consuming centres.

The fisheries of major reservoirs formed by hydel and irrigation projects have been taken over by the Fisheries Department for development and exploitation.

There were 184 inland and 252 Marine Fishermen Cooperative Societies, S Fishermen Cooperative Federations and 9 Fishermen Cooperative Marketing Unions during 1968-69.

There are six Fisheries Training Centres at Tuticorin, Nagapattinam, Cuddalore, Mandapam, Colachel and Madras training 50 fishermen per batch. One training centre for inland fishermen is located at Mettur Dam for giving training to 20 fishermen per batch.

An aquarium is located at Madras.

MAHARASHTRA

Maharashtra State has a coast line of 700 km, extending from Reddi in the south and ending at Zai in the north and aligning the maritime districts of Thana, Kolaba, Ratnagiri and Greater Bombay.

Catch of fish from marine and inland resources during 1968-69 was estimated at 2,26,900 tonnes and at 13,250 tonnes respectively. Value of marine catch to producers was estimated at Rs. 13.83 crores during the year 1968-69.

Out of 2.6 lakhs of fisher community, 52,100 fishermen are actively engaged in the industry, 32,100 in marine fisheries and 20,000 in inland areas.

Fishing crafts: Total number of vessels: 10,617.

Fishery Survey: Four medium sized trawlers of the department have completed survey of 12,431 sq. km. of sea, between Ratnagiri, Kolaba & Thana which resulted in the gainful exploitation of fishing with trawl nets.

Travler Fishing: 150 mechanised vessels have successfully taken to trawling in the private sector, and four 36' trawlers for exploitation of deeper and farther seas.

Fish Farms: The four fish farms one each in Bhandara, Kolaba, Poona and Parbhani districts and 30 nursery units serve as a composite unit for demonstration of scientific methods of fish culture, biological studies of culturable varieties of fishes under controlled conditions and fish seed production centres.

Fisheries Technology: Technological work on fisheries is carried out at the Fisheries Technological Laboratory at Sassoon Docks.

In the year 1968-69, sale proceeds of Shark Liver Oil products and fish meal amounted to Rs. 21,33,710. The

production of neat shark liver oil with Vitamin 'A' potency 8000 I.U./g. was 33,677 litres.

The departmental fish canning plant, produced 78,895 fish cans in the year 1968-69.

The fish meal scheme recorded a sale of 673 metric tonnes of fish meal during 1968-69.

There are at present 66 ice factories and cold storages in the State with cold storage capacity of 1,834 tonnes.

Government continues to grant financial assistance to fishermen's Co-operative Societies for establishment of ice factories, cold storages and quick freezing plants.

Fishery education: The department has under its control eight fisheries vocational schools, one each at Satpati and Nawapur, District Thans, Karanja and Bagmandla in the Kolaba District, Ratnagiri, Sakrinate, Mithbao and Tarkarli in the Ratnagiri District. Total number of pupils in these schools is about 4,218. No fees are charged to pupils and text-books are provided to deserving pupils free of charge.

The Fisheries Department has also established a fisheries high school at Satpati, District Thana.

The departmental training centres are established at Versova, Ratnagiri, Alibag, Kolaba, and Bassein.

Mechanisation of fishing craft: Under this scheme financial assistance in the shape of lean and subsidy was so far being granted to groups of fishermen for purchase of engines and winches and construction of boats, decked boats and decking.

Government assistance to the fishing trade: Financial assistance: loan of Rs. 10.65 lakhs, subsidy of Re. 0.82 lakhs and Non-redeemable share capital of Rs. 13.35 lakhs were distributed to the Co-op. Societies for 67 engines, 29 winches, 63 boats, 6 decked boats and for decking of 21 boats under the mechanisation scheme. Loans of Rs. 4.24 lakhs were also disbursed to fishermen under other schemes.

Taraporevala Aquarium: During the year 1968-69, 7,20,909 persons including foreign dignitaries visited the aquarium.

Research & Investigation: The fisheries department has well equipped research stations at Bombay and Ratnagiri, where research is carried out on fisheries of regional importance and such aspects of marine biology as have a direct bearing on fisheries.

During 1968-69 as against the budget provision of Rs. 89,37,800 an expenditure of Rs. 59,15,400 was incurred on plant schemes.

Budget: Initial budget of the department for the year 1968-69: Rs. 2,72,98,500.

MYSORE

Inland Fisheries: There are about 30,000 minor tanks, 2,700 major tanks, 17 reservoirs and about 3,800 miles of rivers in the State.

Inland Fisheries development is extended to all over the State.

Artificial Fish Breeding Centres: Tungabhadra fish farm, Hessarghatta fish farm, Neerasagar fish farm, Vanivilas Sagar fish farm and Bhadra fish farm.

An Inland Fisheries Research Station has been started at Bangalore with field laboratories at important inland centres.

The estimated fish production at present from the inland resources is nearly 40,000 metric tons.

Acreage of inland waters in the state is 10,20,000 (approximate). Inland fishermen population is estimated at 6,00,000.

Marine Fisheries: Mysore State has 200 miles of coastline on the Arabian Sea. Along this sea coast, there are many fishing centres, the most important of them being Karwar, Ankola, Kumta, Honnawar, Bhatkal, Majali, Bingi Chendia, Gangolli, Malpe, Udiyawar, Bokapatnam and Mangalore.

More than 40 varieties of sea fishes are landed out of which the most important are Sardine, Mackerel, Seer and Sharks and Prawns. The total fish production on Mysore coast is over 20 per cent of India's marine fish production.

The total landings on the Mysore coast is 1.28 lakh metric tons. Nearly 400 tons of frozen and canned prawns valued at about Rs. 40 lakhs are exported.

Value of fish exploited :--

Quantity of fish in metric tons and the approximate value:—North Kanara; 73,358; Rs. 2-81 crores; South Kanara; 42,225; Rs. 2-21 crores.

There are about 20,000 fishermen actively engaged in fishing, about 6,500 boats and about 37,000 nets. The number dependent on the fishing industry is estimated at over 1,00,000.

Average catch per fisherman per annum on Mysore coast

Capital value of the industry together for North and South Kanara districts is estimated at Rs. 2-5 cross.

Two boat building yards, one each at Mangalors and Karwar have been set up.

No. of fish curing yards:—North Kanara: 15; South Kanara: 15; fish seed production: 2.20 crores.

Under Indo-Norwegian project, work on providing harbour facilities, training of fishermen, boat construction and setting up of processing facilities have been taken up. At the Marine Products Processing Training Centre, Mangalore, training of technicians in fish (food) processing technology has been taken up in collaboration with Japan. It is expected that the collaboration projects with Norway and Japan will continue in the Fourth Plan. An applied nutrition programme sponsored by the UNICEF has been introduced.

Feasibility reports prepared by Messrs. Invest-Import of Yugoslavia for the development of six fishing harbours are being considered by the Government. The reports envisage an investment of Rs. 90 crores over fifteen years.

ORISSA

Kinds of sea fish caught: White Baits, Silver bellies, Jew fish, Seer fish, Ribbon fish, Perches, Sardines, Mackerel, Flat fish, Silverbar, Glass fish, Pomfret, Bombay duck, Catfish, Threadfins, Sharks, Rays, Skates and Eels, many types of clupeids like Pelone, Megalops, Indian shed etc. besides crustaceans such as Prawns and Lobsters.

Kinds of estuarine fish caught: Hilsa, Megalops, Elopes, Perches, Mullets, Milk fish, Catfish, Threadfins, Pomfrets, Shrimp, Croackers, Sawfish, Sharks, Rays etc. besides crustaceans like Prawns and Crabs.

Kinds of Inland Fish caught: Major Indian Carps, such as Rohu, Mrigal, Catla and Calbasu, the minor carps, Mahaseer, Catfishes like Wallago (Boalfish), Silondia, Pangus, Mystus, Bagarius, Perches, Murrels, many types of mud fishes, minnows, feather backs etc.

Important Marine fishing centres: Pattisonapur, Markandi, Gopalpur, Prayagi, Aryapalli in Ganjam district, Arkhakuda, Puri and Konark in Puri district, Paradeep in Cuttack district, Chandnipal, Aruhabad, Eram, Chandipur and Kirtania in Balasore district.

Important Estuarine Fishing centres: Sonapur and Surala (Bahuda estuary in Ganjam Dist.). Damodarpur and Gajapatinagar (Rusikulya estuary in Ganjam). Rambha, Kashpur, Chilka, Balugaon, Gangadharpur, Kuhuri, Kaluparaghat, Bhusandapur and Satpara in Chilka area. Astaranga and Machagaon in Devi river estuary, Kujanga, Jatadhara and Hookitola in Mahanadi estuary, Satbhaya, Chandinipal, Karanjmal in Dhamra estuary and Kirtonia, in Subarnarekha estuary in Balasore district.

Important inland lake and reservoirs: Hirakud reservoir in Sambalpur district, Ansupa lake in Cuttack district, Bhanjanagar and Surada reservoir in Ganjam district. The reservoir at Chiplims (Sambalpur District) is being taken up as a carp breeding farm.

Processing Plants: Fish canning factory — Majhidiha; Fish freezing plant-cum-frozen storage — Majhidiha, Paradeep.

Preservation: In Orissa there are 8 ice plants-cum-cold storage in marine and inland fishing centres, 12 walk-in-coolers for preservation in smaller quantities and 2 mobile-flake ice plants.

Transportation: There are three refrigerated vans, besides a few insulated vans for special fish transport. During the year, these vans had transported four tonnes of prawns to Calcutta for export to U.S.A.

Marine fishermen cooperative societies (Districtwise): There are 99 co-operative societies. They are in Paschimbad, Adhuan, Archabad and Balasore in Balasore district; Sonapur, Pattisonapur, Gopalpur and Merkandy in Ganiam district; Puri and Balugaon in Puri District.

Important Inland Fish farms: Kausalyaganga, Brickfield (Puri), Pipli, Laxmisagar, Kiakani and Kanjia (Baranga) in Puri District; Chaudwar, Killa (Cuttack), Barimul and Jajpur in Cuttack District; Dighi (Balasore), Amarda, Kathapai (Mayurbhanj), Digdan (Keonjhar Dist.), Angul (Dhenkanal Dist.), Sambalpur, Barapalli and Bomlei (Sambalpur Dist.), Bolangir, Loisinga and Sonepur (Bolangir Dist.), Humari, Berhampur, Balguntha, Parlakhemedi in Ganjam Dist., Jeypore in Koraput Dist., Bhawanipatna and Kokasara in Kalahandi Dist., Phulabani in Phulabani Dist. and Sundergarh in Sundergarh District.

Aquarium: There is a small experimental aquarium attached to the Fisheries Department at Cuttack.

Fishing Harbours: Under a schome sponsored by Govt. of India, fishing harbours are to be constructed at a cost of Rs. 20 lakhs during the year 1969-70 at Gopalpur, Bauda in Ganjam district, Sarlicut in Puri district, Paradeep in Cuttack district and Adhuan and Chandipur in Balasore district.

Research: A scheme known as "Applied Research on Intensive Fish Production and Exploitation in Inland Waters" has been taken up in the year 1969-70.

Production (1968-69): Riverine Spawn 5,335 cups (1 cup is 50,000), Induced Breeding Spawn 277 cups, Carpio Spawn 139 cups, Fry 296 lakhs, Marine fish 800 M. tons, Inland fish 40·34 M. tons, Estuarine fish (Chilka) 3,160 M. tons, Canned fish products 752 kgs. Production of ice 1,283 M. tons.

Seven air conditioned fish breeding yards were expected to be established during 1969-70. Orisea Fisheries Development Corporation: Established as a fully Govt.-owned concern for commercial exploitation of fisheries, it has not been successful during the last seven years. It owns four Polish trawlers for deep-sea fishing.

WEST BENGAL

Kinds of sea fish caught: Pomfret, Bhetki, Mackerel, Prawn, Topsi, Hilsa, Chanda, Bhola, Bombay Duck, Ribbon, Shark, Rays, Rock Cod, Skate, Eel, Cat fish, Phasa, etc.

Total quantity of fish caught in 1966-67: 120,000 tonnes (based on internal production only).

Potential demand for fish in the local market: 5,10,000 metric tonnes (the State as a whole).

Gear used: Grill net, Drift net, Drag net, Fixed net, Herring trawl etc.

Ancillary industries like shark liver oil, gelatin, glue, fish-meal, and their production: One scheme for production of shark liver oil, fish-meal, processed fish and utilisation of other fish by-products is operated at Contai coast.

Extent to which production meets the demand: 20 per cent.

Budget allotment for the Department for 1969-70: Rs. 72,36,000.

Research: There is one Freshwater Fisheries Research Station at Kalyani. There is one Technological Research Station at Junpat for production and standardisation of various fish bye-products and fish curing yards both at Junpat and at Fragergunge. Brackish Water Experimental Fish Farm at Junput, Hill-Stream Fisheries Research Station at Kalimpong and a number of Fish Seed Farms in a number of districts.

State Fisheries Development Corporation Ltd.: A State Govt. undertaking under the name and style 'State Fisheries Development Corporation Ltd.' has been functioning since 1967, with the sole object of developing all hitherto neglected large water areas through 'Master Plans' for increasing the internal fish output. The Corporation has already taken in hand so far three projects at Digha, Alampore and Maharajgunge covering 2,200 acres.

ALCOHOL INDUSTRY

INDUSTRIAL alcohol is a very valuable material in the manufacture of acetone acetic acid, ether, chloroform, othyl acetate polyethylene, styrone, polyetyrene, etc. It is also necessary as a solvent in the manufacture of fine chemicals, medical preparations, toilets, etc. Since the last war, its importance has increased. It is now essential in the manufacture of ammunition and of artificial rubber.

(The details about the progress and achievements during the three Plans have been fully discussed in the Directory for the year 1965-66.)

It is estimated that during the Third Plan, Rs. 4.0 crores had been invested for attaining a capacity target of 324 million litres of alcohol by 1965-66. The imported component was likely to be about Rs. 40 lakhs.

The actual production of power and industrial alcohol are given below:

Thousand litres

Production									
Year	Power	Rectified spirit	Denatured spirit*						
1964	1,442	160,702							
1965	815	188,624							
1966	2,466	195,115							
1967	613	127,961	-property						
1968	381	163,153	_						

[·] Supply of statistics discontinued from 1964.

There was decline in capacity utilisation by the alcohol industry from 67 per cent in 1966 to 47 per cent in 1968. Total availability of alcohol, i.e., production plus imports minus exports was about 189,888 kilo litres in 1965. It shot up to 191,000 kilo litres in 1966 but came down to 143,000 kilo litres in 1968. The demand for alcohol is expected to go up to 300,000 kilo litres by 1971.

According to the Tariff Commission, there were 19 distilleries with a total production of 60,000 kilo litres at the time of independence. In 1965, there were 60 distilleries in the country with a capacity of 2.75 lakh kilo litres. Of these 37 were attached to sugar factories, and the rost were independent units. The latest data as available from D.G.T.D., put the present number of units at 65, with aggregate installed capacity of 3.12 lakh kilo litres.

The Maharashtra Government has granted a licence to Maharashtra Sugar Mills for the manufacture of potable liquor. A new brewery, built to a British design is also being planned to be set up in Maharashtra for the manufacture of Skol beer. The project is being promoted by Shaw Wallace and Co. Ltd. The brewery will cost £10 lakhs and have a capacity of 62,500 barrels. Because of the Government's regulations, all its brewing equipment will be manufactured in India. Its production is likely to go on stream by 1971. India is also seeking the assistance of FAO to make wines and to set up agro-industries.

Over the years, an acute shortage of alcohol has been felt by a number of industries. Prices of alcohol have risen by almost 50 to 80 per cent during the recent years. Almost Rs. 50 crores have been invested in industries dependent upon adequate availability of alcohol; these industries had been having a hard time in getting the same. The supply position had wersened since some States had begun setting up distilleries to manufacture alcohol for potable purpose.

Supply of alcohol has remained erratic over the years. Total incensed capacity for the production of ethyl alcohol was around 351 million litres, of which over 300 million litres had already been installed. But because of fluctuating production. India has had to import as much as 27 million gallons of alcohol in 1968.

Fall in output is mainly due to less production of sugar and molasses in the past few years.

ARECANUT INDUSTRY

A RECANUT is one of the most important commercial crops of India. It has an important place in the religious, social and cultural life of our people irrespective of caste, creed or social status. Chewing of arecanut with betel leaves and lime (Thambulam, Pan Supari) has become a habit with some people and a luxury of many in the country.

India ranks first in the world both in the acreage and production of arecanut. It is a source of livelihood for nearly four million people in the country.

The chief arecanut growing States in the country are Kerala, Mysore and Assam. These States account for nearly 93 per cent of the total area and production of the crop according to latest available official estimates. It is also cultivated to a smaller extent in certain areas of West Bengal, Tamil Nadu, Maharashtra, Andhra Pradesh, Orissa and Union Territory of Goa. Recently, Gujarat has also taken up its cultivation.

The overall average per capita consumption of betelnut in India is estimated at 0.33 kg. In Kerala it is 0.67 kg. and in Mysore 0.66 kg. Among the cities, Delhi and Nagpur are two of the most important consuming markets.

Betelnut (processed arecanut) varieties are numerous in India and can be broadly classified into unboiled, boiled and coloured varieties.

During 1967-68 the country had an estimated area of 148,000 hectares under arecanut cultivation with a production of 129,000 tonnes of cured arecanut. The Statewise break-up is given below:

State		•	Area (in thousand hectares)	Production (in thousand m. tonnes)
Kerala			76.0	47.2
Mysore			35.9	48.0
Assam	* 4		26.4	26.3
Tamil Nadu			3.0	2.5
West Bengal			3.1	1.3
Maharashtra		1.4	2.3	2-4
Andhra Pradesh			0.2	0.2
Goa	9.6	4.8	1.3	1.2
Total		4 0	148.2	129-1

The production of arecanut is at present inadequate for meeting the demand for internal consumption. In the past, substantial quantities were being imported from other producing countries viz., Ceylon, Malaya and Singapore to wipe out the deficit. In recent years, owing to restrictive import policy adopted by the Government, the imports steadily came down. At present there is no import of this commodity. Small quantities are being exported to Nepal, Kenya, Aden, Saudi Arabia and Mozambique.

Development: An additional production of 24,000 tonnes of arecanut has been proposed to be schieved by the end of the Fourth Five Year Plan, mainly through intensive cultivation in the existing areas. Increase in area is normally not recommended particularly in view of the need for conserving as much area as possible for food crops and also in view of the increased production potential from the less productive regions. The developmental activities during the Fourth Plan period will be concentrated in the three major States of Kerala, Mysore and Assam. The measures

proposed are intensive cultivation practices like proper manuring, irrigation and plant protection in addition to proper cultural practices, under planting and gap filling etc. Implementation of suitable package programmes wherein loans and subsidies will be granted for manuring, plant protection and irrigation purposes is programmed on extensive scale. Organisation of field demonstrations is also programmed in the important crop growing regions to educate the farmers on modern methods of cultivation.

The Government of India have sanctioned two separate demonstration schemes under the central sector during the Fourth Plan period for the organisation of field demonstrations in growers' fields in Assam and for the establishment of a model garden in Goa in the Central sector. The Government of India have also agreed in principle to meet the cost of the staff for implementing the package programme for arceanut in the states of Korala, Mysore and Assam. The target for additional production during the Fourth Plan has been set at 24,000 tonnes proposed to be achieved through scientific cultivation practices.

Marketing: Financial assistance in the form of managerial subsidy, share capital contribution and loan and subsidy for construction of godowns is being offered by the National Cooperative Development Corporation to meet the cost of management of the cooperative marketing societies in all important regions of production during the initial period in collaboration with the State Governments. There are 35 arecanut cooperative marketing societies located in the States of Kerale, Mysore, Tamil Nadu, Maharashtra and Goa, of which at present only four societies are receiving financial assistance for development of marketing of arecanut. The marketing societies in Mysore State handled about 35 per cent of the marketable surplus during the year.

The total quantity of arecanuts sold by the cooperative marketing societies during 1967-68 was 1,25,522 qtls. valued at Rs. 7-49 crores, which formed about 13 per cent of the total marketable surplus in the country, against 1,34,927 qtls. valued at Rs. 8 crores in 1966-67. The total membership and share capital of these societies rose from 60,509 and Rs. 46-30 lakks during 1966-67 to 68,568 and Rs. 52-95 lakks respectively during 1967-68.

Regulated Markets: Regulated markets have been established in the important assembling centres in Mysore and Kerala (Malabar region) States under the Agricultural Produce Markets Act. The regulated markets besides checking the malpractices prevailing in the trade, also collect and disseminate market intelligence for the benefit of growers and traders.

Grading: With a view to standardising the grading of arecanut and introducing Agmark grade standards at farmers' level in Mysore and Tamil Nadu states, the Government of India in collaboration with the respective State Governments have implemented schemes on an experimental basis in respect of sun dried whole, boiled whole and boiled split types of arecanuts. It was reported that the graded arecanuts had a favourable demand and fetched a premium price in the markets. The grade specifications which were on trial under this scheme have been taken up with the Agricultural Marketing Advisor to the Government of India for prescribing Agmark grade standards under the Agricultural Produce Grading and Marketing Rules.

Publicity: Propaganda materials in the form of bulletins, leaflets, pamphlets, charts, posters, etc. on the improved methods of cultivation based on the results of research, selection of seed materials, control of pests and diseases, market prices of the important trade varieties in the country and other matters of general importance to the farmers, are brought out and distributed amongst the

growers in all the important producing areas of the country. Besides this, at the various exhibitions/fairs etc. the techniques of improved agricultural practices are explained to the farmers. The Government of India also publishes a Quarterly Bulietin on arecanut and spices in English, Malayalam and Kannada languages for the benefit of the growers.

CASHEW NUT INDUSTRY

THE Cashew is grown extensively in several parts of the country and there are over 150 cashew processing factories, about 100 of which are situated in and around Quilon, which is the nerve centre of this industry. India has not reached self-sufficiency in the production of cashew nuts. The Cashew Development Council, Calicut is introducing a development programme by which an additional area of six lakh acres could be brought under cashew plantation and replanting scheme in old plantation areas, during the Fourth Plan period.

CASHEW TREE

The cashew tree (Anacardium Occidentale) is a drought resistant tree, adaptable to different kinds of soils and thriving under a variety of climatic conditions. But maximum production is obtained from good soil, preferably deep loam with adequate moisture.

Cashew tree ordinarily grows to a height of 20 to 30 ft. but in certain favourable conditions reaches a greater height.

CULTIVATION

The cashew tree is usually raised from seed and after sowing, practically no attention is paid to the crop, either by way of watering, manuring or other kinds of intercultivation. Being a hardy plant, it comes up well even under diverse conditions of soil and climate.

FLOWERING

The tree commences flowering from the 4th or 5th year. Normal yields can be obtained from the 8th to 10th year onwards and the tree continues to be productive for over 30 years.

The actual yield depends upon a variety of conditions and may vary from about 5 lbs. of dry raw cashew nuts to 50 lbs. per tree.

CASHEW APPLE

What distinguishes the cashew from all other fruits, is the formation of the nut which grows at the bottom end of the 'apple'. The 'apple' varies in size from 2 to 3 inches in length and 1½ to 2 inches in width. It has a thin waxy skin and is conical or pearlike in shape. It is a juicy fruit which, when fully ripe, is quite sweet and has a pleasant aroma. This fruit is particularly rich in Vitamin C. Botanically speaking the 'apple' is only the swollen end of the peduncle to which the cashewnut is attached.

A small percentage of the production of the apples is directly consumed and some quantity is used for the manufacture of vinegar, pickles, jam, beverages etc.

RAW CASHEW NUT

The whole cashew nut, which is attached to the end of the cashew apple, is about $1\frac{1}{2}$ inches long and is grey, brown or ash coloured. It is shaped like the kidney.

CASHEW KERNEL

The cashew kernel inside the nut, has a delicious taste, pleasing flavour and high nutritive value. It compares favourably with almonds and other nut foods in nutritive value. Cashew kernels contain about 21 per cent carbohydrates and appreciable quantities of calcium, phosphorus, fat, iron and vitamins A and B. Compared to other edible nuts, cashews contain a lower percentage of carbohydrates, fats and alkalinity and this gives it a definite advantage over other nut foods. Cashew kernels are consumed raw or fried, salted or sugared. It is considered as an ideal snack item in many countries. It is also widely used as a flavouring medium in the confectionery and baking industry.

TROPIX

Accounting for 90 per cent of the world demand for cashew kernels, Indian exports were valued at Rs. 60.9 crores in 1968-69.

PROCESSING

After collection of the raw cashew nuts, they are processed in cashew factories. Processing consists of roasting, shelling, peeling and grading.

PACKING

Cashews are packed for bulk exports in tins each containing 25 lbs. net weight of cashew kernels. The 'Vitapack' method employed for packing, provides for exhaustion of air from the tins and infusion of Carbon-di-oxide, before the tins are hermetically sealed. The tins are packed in wooden cases, cardboard cartons two in each case/carton and the cases are boxstrapped, before shipment.

Cashews, both plain and salted are also packed in small consumer size containers, of various capacities. While the greater part of exports are made in bulk packings, cashews packed in consumer size packings are also being increasingly exported to foreign markets.

QUALITY CONTROL

Qualified entomologists make regular inspection of cashew processing factories, affording all guidance and help to maintain these in hygienic and ideal conditions. To ensure that only cashews of approved standards are exported, a system of compulsory pre-shipment inspection is in force in India.

DIFFERENT APPROVED GRADES OF CASHEW KERNELS

1. 210 Count Wholes (W 210); 2. 240 Count Wholes (W 240); 3. 280 Count Wholes (W 280); 4. 320 Count Wholes (W 320); 5. 400 Count Wholes (W 400); 6. 450 Count Wholes (W 450); 7. 500 Count Wholes (W 500); 8. Scorched Wholes (S W); 9. Scorched Wholes Seconds or Scorched Wholes 1.A. (SSW or SW 1.A); 10. Dessert Wholes (DW); 11. Butts (B); 12. Splits (S); 13. Large White Pieces (LWP); 14. Small White Pieces

(SWP); 15. Baby Bits (BB); 16. Scorched Butts (SB); 17. Scorched Splits (SS); 18. Scorched Pieces (SP); 19. Scorched Small Pieces (SSP); 20. Scorched Pieces Seconds or Scorched Pieces IA (SPS); 21. Dessert Pieces (DP); 22. Dessert Small Pieces (DSP); 23. Dessert Butts (DB); 24. Dessert Splits (DS).

(Grade designation is given within brackets).

CASHEW-NUT SHELL LIQUID

Cashew-nut Shell liquid (CNSL) is a by-product of cashew industry. The nut has a shell of about \(\frac{1}{2} \) inch thickness inside which is a soft honeycomb structure containing a dark reddish brown viscous liquid. It is called the cashewnut shell liquid, which is the pericarp fluid of the cashew-nut.

Chemistry of CNSL: The cashew-nut shell liquid consists chiefly of the two naturally produced phenolic compounds — Anacardic acid (about 90 per cent) and Cardol (about 10 per cent).

Analysis and Specification: The specification of the Indian Standards Institution, New Delhi for untreated cashew-nut shell liquid (IS: 840-1956) is as follows:

Specific Gravity, 30°C/30°C		6.0	0-940 to 0-960
Viscosity at 30° in centipoises (max	a .		550
Moisture, per cent by weight (max.			1.0
Matter insoluble in toluene, per cent		weight	1.0
Volatile matter other than moisture	9. DO		
by weight (max.)			1.0
Iodine value (Wijs) min			220
200000 (11.30)			unless othe
			wise agree
Ash, per cent by weight (max.)	+ =	* 1	1.0
Polymerisation (a) Time in minutes (max.)		• •	19
(b) Centipoises at 25°C (min.)	* *		30

Uses and Applications: The innumerable industrial applications of the cashewnut shell liquid are based on the fact that it lends itself to polymerisation by various methods.

PATENT BOOKS

The Cashew Export Promotion Council, Ernakulam has published a collection (in two volumes) of 243 patents on Cashew-nut Shell Liquid taken in the U.S.A., U.K., Japan and India. The publication describes the various uses and applications of the shell liquid in the manufacture of paints, chemicals, plastics, brake linings, etc.

EXPORTS+

The export of cashew kernel and cashew shell liquid fetched Rs. 62-16 crores during 1968-69. But owing to low

production of raw nuts, the country had to import 1.96 lakh tonnes of raw nuts from East African countries, coeting Rs. 31-38 crores during the year. The net earning of foreign exchange was Rs. 30-78 crores.

CEMENT INDUSTRY

d.

THE coment industry in India occupies a position of basic and strategic importance in the economy.

During the first Plan period production of cement increased from 2.7 million tonnes to 4.6 million tonnes. During the Second Plan period, it rose from 4.6 million tonnes to about 7.8 million tonnes. By the end of the Third Plan, the production of cement rose sharply to about 12 million tonnes.

The trend of capacity and production during the last five years is indicated below:

			(In la	akh metri	c tons)
	1965	1966	1967	1968	1969*
Capacity	113	126	128	138	72
Production	106	111	117	119	64

[·] Relates to the first six months only.

[†] Export of cashew kernels from April 1989 to February 1970 amounted to 54,200 tonnes valued at Rs. 51-18 erores against 59,800 tonnes valued at Rs. 57-34 crores during the same period in 1968-69.

From a long-term point of view it is significant that the present level of per capita consumption of cement in the country at 22 kg, is extremely low in comparison with the consumption in advanced countries. The figures of per capita consumption of cement (in kg.) in 1966 in various countries are: Switzerland 715; Austria 593; West

Germany 563; Sweden 481; Belgium 463; France 457; Italy 426; Canada 398; Netherland 378; Japan 365; USA 342; U.K. 305 and India 22.

Even in U.K. which has the lowest level of per capita consumption of cement among the advanced countries consumes as much as 305 kg. per head every year.

The installed capacity, production and despatches of 10 leading companies for the years 1967 and 1968 are given below:

('000 tonnes)

		1967			1968

10.		315	327	312	315	344	326

Cement output in India touched the 95·16 lakh-tonne mark during the nine months ended September in 1969 against 83·70 lakh tonnes recorded in the corresponding period of 1968. The output of 27 companies, which are members of the Cement Manufacturers' Association increased following a rise in the rated capacity to 110·05 lakh tonnes against 97·56 lakh tonnes during the three quarters of 1968.

DIFFERENT TYPES OF CEMENT

- (1) Ordinary Portland Cement: Conforms to IS-269-1958 for ordinary portland cement.
- (2) Low Heat Portland Cement; Conforms to IS 269-1958 for low heat cement.
- (3) Rapid Hardening Portland Cement: This is specially useful for meeting the demands for speed in modern construction. It has the property of rapidly developing a high strength at any early stage, resulting in considerable reduction of construction period. Manufacturers of this type are A.C.C., Dalmia Cement (Bharat) and Orissa Cement Ltd.
- (4) White Cement: Widely used for tiles, terrazzo, artistic decorations and for extension and interior finishes in all types of buildings, this cement is as good as any portland cement and has the same toughness to withstand weathering and wearing. Being pure white this cement can be coloured to any desirable shade by mixing it with pigments, Manufacturers are A.C.C. (at Porbander and Kymore) and Travancore Cements at Kottayam.
- (5) Oilwell Cement: Oilwells are drilled to a depth of 1,000 to 5,000 metres or more. The ambient temperatures at such great depths are very high and ordinary cement grout (when used to cement the sides of the wells) will harden before it is pumped to those depths. Oilwell cement grout remains fluid for enough time under such conditions to allow placement. Once it is placed it develops full strength in a very short time and remains stable. The Shahabad factory of the ACC manufactures this type of cement.
- (6) Hydrophobic Cement: This type has an aversion for water and it can, therefore, be stored for comparatively

long periods under humid conditions. It can also be transported, even when it is raining, without being spoiled. The protective water repellent coating is destroyed by the abrasion of the sand and aggregates when the cement is mixed with these in the presence of water. This type is now manufactured by A.C.C. and Shree Digwijay Cement Co.

(7) Asbestos Cement: The controls on the distribution of asbestos cement sheet had been lifted with effect from June 1, 1966.

DECONTROL & PRICE

The control on cement industry was lifted from January 1, 1966. In the place of STC, a new organisation called "Cement Allocation and Co-ordinating Organisation" (CACO) was set up by the cement manufacturers with regional offices at Bombay, Calcutta, Delhi and Madras for the entire distribution of cement throughout the country as well as to meet the requirements of the Government and the public.

However, the Government by the Cement Control Order, 1967 have entrusted cement distribution to Cement Corporation of India Ltd. from January 1, 1968. The functions hitherto entrusted to the industry controlled CACO will be performed by CCI. The Government had announced that the production, sale, distribution and price of cement will be decontrolled with effect from January 1, 1970.*

CAPACITY AND AVAILABILITY

The position regarding capacity, availability, demand, surplus/deficit for 1969 to 1974 is given below:

(Million tonnes)

			france.	2011
Year	Capacity	Availability	Demand	Surplus (+) Deficit (-)
1969 1970 1971 1972 1973 1974	15.63 18.38 19.08 19.58 20.83 21.03	13·77 15·09 16·56 17·19 17·99 • 18·64	12·58 13·77 12·10 16·34 17·80 19·29	+ 1·19 + 1·32 + 1·46 + 0·85 + 0·19 - 0·65

At the time of going to press (April 1970) the decontrol had not been enforced. The matter was still under consideration,

The capacity and availability figures are given on the basis of new factories and extensions actually on hand or which are definitely going to be installed. As further now capacities are bound to be undertaken, the nominal deficit shown in 1974 will turn into a surplus. In fact, additional capacities totalling 2.8 million tonnes have been promised by various producers.

The activities of the Cement Corporation of India are limited for the present to the completion of the two projects already under way and it is decided to establish two more projects during the Fourth Plan period in regions where there are shortages.

COFFEE INDUSTRY

OFFEE cultivation is mainly confined to the hilly tracts of south India, from one thousand feet to six thousand feet above the mean sea level, and is centred in the Malnad area of Mysore, Tamii Nadu and Korala. In the lower elevations the better quality Arabica coffee has given place to the hardy but coarser Robusta coffee.

Coffee estates provide employment to nearly three lakh persons. There are over 47,000 registered coffee estates and about 5,000 unregistered estates. The area under coffee is about 1,30,000 hectares. The contribution to the national income from coffee is about Rs. 35 crores and in terms of foreign exchange earning it is about Rs. 18 crores.

There are only two types of coffee grown on commercial scale in India, the one most extensively cultivated being Coffee Arabica and the best in quality, with Robusta coming next in importance. About 21 species and subspecies of coffee are being grown in the Coffee Board's research stations. Many coffee estates are also interplanted with orange. Pepper trees are trained on shade trees and cardamom is grown in the valley slopes and ravines.

The area and production from 1964-65 of the two varieties of coffee are as under:

AREA IN THOUSAND HECTARES

	Year		Arabica	Robusta	Total
1964-65 1965-66 1966-67		. 4	78 78 78	52 51 50	130 129 128

PRODUCTION IN M. TONNES

Y	ar		Arabica	Robusta	Total
1964-65			42,304	18,597	60,901
1965-66			38,331	25,530	63,861
1966-67*		0.4	41,620	36,655 19,770	78,275 57,220

COFFEE BOARD

The Coffee Board is a statutory organization constituted under the Coffee Act (Act No. VII of 1942), and functions under the administrative control of the Government of India in the Ministry of Foreign Trade and Supply. The functions of the Board are as under:

- (1) the promotion of the sale and consumption in India and elsewhere of the coffee produced in India;
- (2) the promotion of agricultural and technological research in the interest of the coffee industry;
- (3) assistance to coffee estates for their development;

- (4) the securing of better working conditions and the provision and improvement of amenities and incentives for workers; and
- (5) the working of the measures enumerated in the Act relating to the operations of the surplus pool.

The Coffee Board consists of the Chairman and 32 other members representing the interests of coffee growers, the State Governments of Mysore, Tamil Nadu and Kerala, labour curing establishments, the trade and such the rinterests as in the opinion of the Central Government ought to be represented on the Board. The Board was re-constituted as from 10th July 1968 for a period of three years.

COIR INDUSTRY

COIR is the natural versatile golden fibre extracted from the husk, the outer covering of the coconut, 'Cocos Fibre' popularly known as Coir is classed among the Industrial Hard Fibres which enter the world market in the form of fibre, spun yarn, floor coverings, ourled coir, rubberised coir products and rope.

India and Ceylon are the only two countries producing coir on a commercial scale. India accounts for about 56 per cent of the total prediction of the coir in the world. The coir industry is mainly confined to the coastal strip of Kerala. Annual production of coir fibre in the country is estimated at 1,60,000 tonnes.

Kerala accounts for 6.10 lakh hectares out of a total of 8.94 lakh hectares under occount cultivation in India. The distribution of area under cultivation and production of coconuts for 1968-67 (latest available) is as follows:—

States			Area in '000 hectares	Production (million nuts)
Kerala		4 *	609-6	3,424.7

Source : Regional Office, Coconut Development, Ernakulam.

On an average, India exports 42,300 tonnes of coir yarn out of the total production of 1,40,000 tonnes annually. 47,500 tonnes of coir yarn are used for the production of coir manufactures (including coir rope) annually. Export of coir fibre as such is only to the extent of 1,100 tonnes.

India's production of coir products and coir rope are estimated at 25,000 tonnes and 20,000 tonnes respectively. About 70 per cent of the total production of coir products is exported to foreign countries. But only four per cent or less of the total quantity of coir rope produced is exported and the rest is consumed internally. About 1,500 tonnes of machine extracted coir fibre are produced in India annually. On an average 500 tonnes of curled coir (a product of the machine extracted fibre) are marketed abroad.

In the spindle spinning sector, there are about 25,000 units engaged in the production of corr yarn.

There are at present about 2,200 industrial establishments registered with the Board under the Coir Industry (Registration and Licensing) Rules, 1958, engaged in the production of ooir manufactures and rehanking of coir yarn. But only 163 units are registered under the Indian Factories Act in Kerala and the rest are mere cottage type establishments with one or two looms.

The industry provides employment for about 3 to 4 lakes of people in the coastal strip where the density of population is very high. The Kerala Government have fixed minimum wages in respect of both the sectors of the industry where hired labour is required.

The yarn produced in the different villages is being marketed chiefly in Alleppey, Cochin and Kozhikode. The manufacture of coir products is concentrated in and around Alleppey and a considerable share of the yarn brought from the producing centres is used for the production of coir floor coverings.

The Coir Board is responsible for the formulation of suitable measures to promote the growth of the industry on stable and healthy lines.

The Coir Industry Act gives powers to the Union Government to levy a cess on export of coir and coir products. At present the cess levied on coir fibre and yarn is at the rate of 98 paise per quintal. Nearly Rs. 4½ lakhs are collected under this bead.

Recently as per the recommendations of the Board, the Central Government have issued orders notifying eccount husks (raw and retted) as an essential commodity under the Essential Commodity Act of 1955. In exercise of the powers conferred under section 3 of the Essential Commodity Act 1955 (10 of 1955) the Central Government have issued orders for the Licensing of Coir Retting places. These rules provide powers to the Government for the control of the price of husks. The State Governments of Kerala and Tamil Nadu were authorised to implement the scheme.

A Central Coir Research Institute was set up in Kalavoor, Alleppey in Kerala to carry on fundamental as well as applied research. The Board also set up a National Coir Training and Design Centre to impart advanced and systematic training in the techniques of coir production. The Centre also conducts refresher classes to the executives of co-operative societies. This centre is also engaged in evolving novel designs. An extension service covering the various aspects of coir extraction, processing and manufacture especially spinning, dyeing and weaving has also started.

In order to compete with the products manufactured on powerlooms in West European countries, a policy decision has been taken to mechanise one third of the matting sector of the industry. Superior varieties of coir mattings in up-to-date designs and patterns to satisfy the sophisticated taste of the consuming public can be produced on powerlooms. A fully mechanised factory, set up by the Coir Board, has been commissioned for production. The total financial outlay is about Rs. 12 lakhs with a foreign exchange component of about Rs. 4·6 lakhs. Two other factories in the private sector have also already commenced commercial production.

Diversified uses for which coir can be put are many. Efforts at diversification of coir products have been going on for some time now. The results are machine extracted fibre and rubberised coir products.

Already 22 defibering units and eight rubberised coir producing units have been commissioned in various parts of the country. Rubberised coir is extensively used in the manufacture of mattress, pillows, moulded cushions, upholstery parts, etc. Rubberised coir mattress is particularly useful for use in hospitals.

A scheme of Quality Control and Pre-shipment Inspection was introduced to prevent the shipment of inferior goods which once did some damage to the reputation of Indian coir products. To achieve some sort of stability in price index floor prices have been fixed for the popular varieties of coir mats exported.

On an average export of coir and coir products used to earn about Rs. 12 erores (before devaluation) of foreign exchange, every year. The export earnings during 1968-69 amounted to Rs. 14-50 erores. The figures of export of coir and coir products during the years 1966-67 to 1968-69 are given in the table at the end.

In order to expand the home market for coir and coir products, the Coir Board has opened show rooms and sales depots in important cities like Bombay, Calcutta, New Delhi, Madras, Bangalore and Ernakulam. The sales effected through these sales depots have increased year by year.

The Board has also appointed 22 accredited dealers in the cities/towns of Delhi, Madras, Bombay, Nagpur, Kanpur, Hyderabad, Trivandrum, Ernakulam (A), Ernakulam (B), Bangalore (B), Mangalore (B), Mangalore (A), Mangalore (B), Vijayawada, Gauhati, Hubli, Calicut, Trichur, Cannanore (A), Cannanore (B), Udipi and Daltaganj, who are given some financial assistance, say four per cent of the sales effected by them. Few more will be appointed soon.

The outlay in the Fourth Plan for the coir industry as proposed by the Board is Rs. 5.5 crores, comprising Rs. 1.5 crores for centrally sponsored schemes to be executed by the Board direct and Rs. 4 crores for States and Union Territories schemes.

The State scheme also envisages the organisation of the industry on a co-operative basis. About 640 co-operative societies are now in position in different coconut growing states in India. Out of these 550 are in Kerala. Six of the societies in Kerala are directly engaged in the export trade.

COTTAGE INDUSTRIES

VILLAGE AND SMALL INDUSTRIES

ACCORDING to the working definition adopted by the Government, small-scale industries include all industrial units with a capital investment not exceeding Rs. 5 lakhs irrespective of the number of persons employed. Financial assistance to small industries is given by the Government, State Financial Corporations and banking institutions including the State Bank of India. Recently, measures were taken to make this assistance more effective.

The data about employment are extremely meagre. It is, however, very roughly estimated that at least 24

million persons are gainfully employed in these industries classified as under:—

Na	me o	f Indu	ıstry			Persons employed in lakhs.

THE KHADI AND VILLAGE INDUSTRIES COMMISSION

The Khadi and Village Industries Commission's functions are to plan, organise and implement programmes for the development of khadi and village industries.

The Commission is a non-profit making body, depends upon the Government of India for its finance and its programmes form a part of the Five Year Plans and its annual demands form a part of the budget of the Government of India.

The Commission which has five members including the Chairman, Vice-Chairman and Member-Secretary, generally acts in consultation with the advisory Khadi and Village Industries Board. Members of the Commission: U.N. Dhebar (Chairman); K. Arunachalam (Vice-Chairman); Somdutt (Member-Secretary); Manmohan Chowdhary (Member).

The industries coming under the purview of the Commission are: (a) Textile Industry: khadi—cotton, woollen and silk; (b) Food Processing Industries: processing of cereals and pulses, ghani oil, manufacture of canegur and khandsari, palmgur making and other palm products; (c) Mainly Forest-based Industries: cottage match, cottage soap, manufacture of shellac, collection of forest plants and fruits for medicinal purposes, bamboo and cane work, manufacture of gum resins, manufacture of katha; (d) Other Industries: handmade paper, beckeeping, cottage pottery, cottage leather, fibre other than coir, manufacture and use of manure and methane gas from cow-dung and other waste products, line manufacturing, blacksmithy, carpentry, fruit processing and fruit preservation, manufacture of household utensils in aluminium.

The programmes for the promotion and development of all these industries are implemented in all the States through the statutory State Khadi and Village Industries Boards. There are State Boards in almost all the States. In a few States the Commission has departmentally undertaken the development of idadi and village industries. The Commission provides financial assistance in the shape of grants and loans and gives technical guidance and training also.

Institutional Progress

By the end of 1968-69 there were about 1,000 registered institutions and 20,079 cooperative societies for khadi and village industries.

Production

The production of khadi (including silk, woollen and cotton) was of the value of Rs. 24.29 crores in 1967-68

and of Rs. 23.38 crores in 1968-69. The quantity of production was 638.85 lakh sq. metres in 1967-68 and 600.19 lakh sq. metres in 1968-69.

The value of production of village industries articles in 1968-69 was Rs. 81.35 crores as against Rs. 74.13 crores in 1967-68.

The following table shows the comparative details of production of khadi and village industries in 1967-68 and 1968-69.

(Rs. Crores)

Industry		1967-68	1968-69
Khadi		24-29	23-38
Processing of Cereals and Pu	lses	14-38	22.44
Village Oil	0.1	19-73	17.91
Village Leather	4.0	3.50	4.65
Cottage Match	4.1	0.20	0.22
Gur and Khandsari		21.80	21.50
Palm Gur		7-05	6-89
Non-edible Oils and Soap		2.13	1-90
Handmade Paper		0.50	0.54
Beekeeping	- 11	0.74	1.05
Village Pottery	1.1	1-78	2.09
Fibre		1.10	0.88
Carpentry and Blacksmithy	0.1	0.94	0-96
Lime	9.4	0.17	0.17
Methane Gas		0.11	0 15
Total	6.6	74.13	81-35

Sales

Sales of different khadi and village industries products increased from Rs. 87-10 crores in 1967-68 (khadi Rs. 25-01 crores and village industries Rs. 62-09 crores) to Rs. 84-84 crores in 1968-69 (khadi Rs. 20-74 crores and village industries Rs. 64-10 crores).

The sales of khadi amounted to Rs. 20.74 crores during 1968 69 as against Rs. 25.01 crores in the previous year. The bulk of the sales was effected through bhandars and bhavans.

Employment in Khadi

During 1968-69, the khadi programme provided employment to 11·10 lakh spinners (traditional, ambar, new model, wool and silk), 0·92 lakh weavers and 0·40 lakh others. The total number of persons employed in khadi was 13·35 lakhs.

Research

Grants have been made to promote research. The Commission's Central Research Institute for Village Industries at Wardha which is known as Janualal Bajaj Central Research Institute for Village Industries has been in the field for some time now. As a result of financial assistance by the Commission improved implements such as ambar beini, ambar charkha, dhunai modhia, improved ghanis and chakkis, all-metal neem seed decorticator-cumpulveriser, hand-operated poha-making machine and paddy sheller, hydraulic press for crushing edible oil seeds have been introduced opening out possibilities of raising the productivity and income of the persons employed.

Khadi Programme

The Commission disbursed Rs. 12-96 crores (Rs. 8-98 crores as grants and Rs. 3-98 crores as loans) for the development of khadi industry during 1968-69 as against Rs. 15-52 crores (Rs. 9-30 crores as grants and Rs. 6-22 crores as loans) in 1967-68.

AMBAR CHARKHA PROGRAMME

The two schemes, traditional charkha and ambar charkha, have been in operation side by side. A new model all-metal six spindle charkha, designed by the Prayog Samiti of the Sarva Seva Sangh and manufactured by the Textool Company at Coimbatore is now in operation. The charkha which has now two models—Coimbatore and Rajkot—is capable of fetching a wage of Rs. 2 for eight hours' work. At the end of 1968-69, about 4,555 new model charkhas (Coimbatore model) were in operation in 189 centres throughout the country.

During the year 1968-69 production of ambar cloth and traditional khadi was 660.21 lakh sq. mtrs. and khadi produced from the yern of new model charkha was 20.78 lakh sq. mtrs. The total production of cotton khadi thus amounted during 1968-69 to 660.21 lakh sq. mtrs. valued at Rs. 25.71 crores.

BMOOJUAH

The handloom industry provides gainful employment to a large number of rural craftsmen and helps to preserve their traditional art.

Production: The aggregate production of cotton textiles increased from 7,299 million metres in 1963 to 7,719 million metres in 1964 and to 7,643 million metres in 1965. The production declined to 7,336 million metres in 1966. The estimated production of handloom and powerloom cloth works out to 3,179 million metres in 1967 and 3,530 million metres in 1968.

Handloom Co-operatives: There were 14-15 lakh looms in the Co-operative fold as on 31st March, 1968. This is nearly 50 per cent of the known size of the industry. Similarly the number of weavers' cooperative societies has increased from 9,870 in 1957-58 to over 12,163 with 12-79 lakh weaver members and 13-89 lakh looms at present. Under the scheme of Handloom Finance of the Reserve Bank of India the credit limits sanctioned have risen from Rs. 180-19 lakhs in 1957-58 to Rs. 589-65 lakhs in 1964-65.

The Reserve Bank of India continued to provide accommodation to State Co-operative Banks on behalf of Apex Weavers' Co-operative Societies under section 17(2)(a) or 4(c) of the R.B.I. Act at the bank rate for purchase and sale of varn.

Marketing: All India Handloom Board has taken several steps for aiding the marketing of handloom products. This aid has brought into being 1,822 sales depots, 53 inter-state sales depots, 61 central depots, and 46 mobile vans. Government have also provided a subsidy to mitigate to a certain extent the lag between the competitive capacity of the mill industry and the handloom industry. Publicity and propaganda measures like holding of fashion shows, participation in exhibitions, release of press advertisements, bringing out posters, brochures, pamphlets and folders etc., setting up kiosks at airports, erection of hoardings, issue of souvenirs on cloth etc., screening of cinema slides, documentaries and observance of the annual handloom week have helped to focus the attention on the industry and to create handloom mindedness.

Exports: India's handloom products have always had fame and pride wherever attractive textiles are prized. In recent years, in the face of growing competition from mills within and products of other countries like China, Japan etc., exports of handlooms have declined gradually.

The aggregate value of exports of handloom fabrics in each of the years 1962 to 1968 is: 1962 Rs. 10·14 crores; 1963 Rs. 14·28 crores; 1964 Rs. 13·18 crores; 1965

Rs. 15·26 crores; 1966 Rs. 11·24 crores; 1967 Rs. 12·23 crores; 1968 Rs. 13·16 crores.

The highest level of exports was reached in 1965 and this was mainly due to the phenomenal increase in the exports of handwoven fabrics known as "Bleeding Madras", which alone accounted for Rs. 6 crores. It is seen from a study of the destination-wise exports to some of the leading countries in the above years that the maximum exports are now to our traditional markets only viz., countries such as Singapore, Aden, Nigeria, Malaysia etc. While our exports to the U.S.A. have declined sharply, countries like Sweden and West Germany have started importing more of handloom fabrics, particularly silk.

The Handloom Export Promotion Council has been trying to locate the impediments which stand in the way of increasing the exports of handwoven fabrics and how beet they could be solved.

Technical Improvement and Research

Technical improvement is the basic requirement for the development of an industry. With a view to increasing the productivity of the handloom weavers, financial assistance is provided to weavers' co-operatives to replace out-moded tools by efficient ones, for the introduction of improved looms, jacquards, dobbies etc., as also for setting up dyehouses, finishing and calendering plants, pattern making factorics etc. Under the above assistance, 547 dyehouses, 38 pattern making and 12 finishing plants were working during 1966. 29 co-operative spinning mills have started production of yarn of various counts.

The All India Handloom Board has set up Weavers' Service Centres at Bombay, Madras, Calcutta, Varanasi, Mangalagiri (A.P.), Indore, Bangalore and Kancheepuram. These Centres have been concerned with the gearing together of the channels of communication that carry the results of research to the production unit and so enable it to function with precision and vitality. This, it is attempting to accomplish through (a) Setting up of workshops and laboratories undertaking applied research in the field of dyes, designs and technical problems of yarn and structure; (b) By establishing a two way channel of communication between the Weavers' Service Centres and production units through (i) Short term training courses and (ii) by sending out technical personnel to weaving centres; (c) By helping to establish links between production units and the agencies concerned with the internal and external marketing.

These centres have well developed Artists' studios, dyes laboratories and libraries.

The two Indian Institutes of Handloom Technology at Salom and Varanasi continued to train candidates for the diploma courses in Higher Handloom Technology. The candidates who were successful in the diploma course have secured employment. The institutes continued the short term course for training of weavers in improved methods of production. They also rendered technical assistance in many directions to the handloom interests.

VILLAGE OIL

India is the second largest producer of oilseeds in the world and leads all other countries in respect of acreage under oilseeds.

Mills and ghanis are the two sectors in the oil industry in the country.

There are over 8,201 oil mills in the country.

The Village Oil Industry i.e. ghanis brought under its fold provided employment to 0.22 lakh full-timers during the year 1968-69. Besides, 9,591 part-time workers and 1,705 casual workers also found employment in the industry. The total earnings of these workers during the year (1968-69) was Rs. 161.86 lakhs.

During 1968-69, the expenditure incurred by the Commission for the development of the industry amounted to Rs. 121-37 lakhs of which Rs. 8-89 lakhs constituted grants and Rs. 112-48 lakhs loans.

There were 4,943 agencies operating various schemes under the Commission's purview of which 4,379 were co-operative societies and 564 were registered institutions.

During 1968-69, the production of oil through the registered ghanis was 3.84 lakh quintals valued at Rs. 1,472 lakhs and 5.34 lakh quintals of oil cake valued at Rs. 318 lakhs. The sales of oil and oil cake amounted to 3.64 lakh quintals and 5.02 lakh quintals respectively. The respective values of oils and oil cake sold were Rs. 1,470 lakhs and Rs. 323 lakhs.

Under the training programme the Commission trained 62 tells in the States of Assam and Andhra Pradesh during 1968-69.

PROCESSING OF CEREALS AND PULSES

The Rice Milling (Regulation) Act was passed in May 1958, which was amended during 1967-68.

The main features of the amended Act are: (i) provision for regulating the operation of hullers surreptitiously attached to oil engines, flour mills, agricultural pump sets, etc.; (ii) restriction on polish beyond 4 per cent; and (iii) restrictions on the starting of defunct rice mills and hullers.

In pursuance of the decisions taken at the meeting of Planning Ceminission, and the Khadi and Village Industries Commission, the Union Food and Agriculture Ministry issued suitable instructions to the State Governments for relaxing price control in favour of handpounded rice. The Khadi and Village Industries Commission also took up with the various State Governments the question of ensuring adequate supply of levy paddy to the handpounding units of the Commission for milling as agents of Government. However, the problem of ensuring adequate supply of raw material centinued to be acute in some of the rice growing states.

The disbursement during the year was Rs. $117\cdot07$ lakhs of which Rs. $11\cdot47$ lakhs were grants and Rs. $105\cdot60$ lakhs were loans.

To enable the artisans obtain higher production of better rice, the Commission distributed during the year 7,594 atta chakkis, 2,300 paddy chakkis, 185 winnowing fans and 203 dhenkis.

Under the production programme, 11.79 lakh quintals of paddy valued at Rs. 863.79 lakhs were dehusked during 1968-69. The industry provided employment to 58,208 persons in 1968-69 out of whom 10,176 were full-time workers and rest part-time workers. They earned respectively Rs. 19.48 lakhs and Rs. 23.57 lakhs. During the year the Commission's Central Training Institute at Wanakhori (Gujarat) imported training to 61 persons and the regional vidyalayas to 112 persons.

BEE-KEEPING INDUSTRY

With a view to organising and developing collection of honey on scientific lines the Commission distributes beehives on a subsidised basis, finances, rearing and distribution of bee-colonies, collection and marketing of honey. organises co-operative societies and trains apiarists, fieldmen, farmers and others in the art of bee-keeping.

Rs. 23.02 lakhs were disbursed in 1968-69 of which Rs. 16.36 lakhs formed grants, the remaining being loans.

During 1968-69, as many as 13,661 bee boxes and 647 honey extractors were distributed at subsidised rates. Under the programme 17·10 lakh kgs. of honey was collected in 1968-69 as against 14·68 lakh kgs. collected in 1967-68 and the whole of it was marketed. During the year 23 fieldmen were trained. The total number of villages covered by the end of March 1969 was 24,768.

HAND-MADE PAPER INDUSTRY

The hand-made paper industry, as being developed by the Commission, aims at utilising easily available raw materials like fibro, old gunny bags, rags, straws, grasses, waste paper etc. The programme of development consists of assisting in the setting up of big, medium, small and school units.

During 1968-69 the Commission disbursed Rs. 13.54 lakhs for the development of hand-made paper industry. The financial disbursement to various types of units depends upon the capacity to produce paper. Upto the end of 1968-69 the Commission had allotted 11 big, 59 medium and 77 small units. In addition to this, 24 home units, 9 jail units and 7 units to individual artisans also had been allotted.

The production of paper rose from 2,609 metric tonnes valued at Rs. 50·21 lakhs in 1967-68 to 2,787 metric tonnes valued at Rs. 54·02 lakhs in 1968-69.

NON-EDIBLE OILS AND SOAP

India possesses large quantities of a wide variety of nonedible oilseeds, e.g., neem, karanja, maroti, dupa, castor, undi, etc. The oils extracted from these seeds are highly valued as industrial oils.

During 1968-69 the Commission financed the programme to exploit the vegetable oilseeds to the tune of Rs. 44.69 lakhs of which Rs. 34.56 lakhs were loans and Rs. 10.13 lakhs grants.

To intensify efforts in improving production of non-edible oils. Oil Producing Units have been organised. During 1968-69 about 130 seed collection units, 88 oil production units and 315 seap production units reported production. As many as 412 institutions were engaged in production activities during the year.

The production of non-edible oil during the year 1968-69 was 14.07 lakh kgs. valued at Rs. 31.10 lakhs. The value of soap produced in 1968-69 was Rs. 124.28 lakhs as against Rs. 136.98 lakhs in 1967-68. The industry provided employment to 481 full-time workers and 1,18,000 part-time workers in 1968-69.

PALM-GUR

In Indis, there are four varieties of sugar-yielding Palms—Date, Palmyra, Coconut and Sago. While the total number of tappable palms in the country, mostly Date and Palmyra, is estimated at over five crores, only about 170 lakh palms are being tapped for the manufacture of palm-gur.

The significance of the Palm-Gur Industry in India lies in the manufacture of gur and sugar from the sweet juice of palms, popularly known as 'neera, in providing seasonal employment on a large scale, and in its effects on subsidiary occupation as in the manufacture of products from palm leaf.

The Commission has established a Central Researchcum-Training Centre at Dahanu (Maharashtra). Research in the preservation of neera, better processing methods and improved implements are being carried on.

For the development of the industry the Commission provided Rs. 40.85 lakhs during the year 1968-69.

There were 3,439 cooperative societies having a membership of 4·13 lakhs operating under the industry in 1968-69 as against 3,303 cooperative societies with a membership of 3·67 lakhs in 1967-68.

During 1968-69 the total number of persons trained was 3,433. The production of palmgur during the year was valued at Rs. 611-92 lakhs. In addition to palm-gur, palm sugar and other edible and non-edible articles from palm trees were also undertaken and the total value of these during 1968-69 was Rs. 76.68 lakhs.

GUR AND KHANDSARI

With a view to improving the quality of Gur, production of Khandsari and the efficiency of the farmers, the Commission has schemes to introduce improved equipment like crushers, centrifugals, pans, furnaces etc. The Commission also undertakes to train honorary workers and farmers in better methods of production with the help of improved equipment. The programme aims also at the organisation of co-operative societies to take up production and marketing of Gur and Khandsari and stocking and supplying of improved implements.

At the end of 1968-69, there were 1,355 co-operative societies and registered institutions engaged in the industry. The Commission constructed during the year 4,135 new furnaces and repaired 4,607 old ones.

The production of gur and khandsari during the year was 20·24 lakh quintals and 0·19 lakh quintals respectively, the total value of production of both being Rs. 21·50 crores. The entire gur and khandsari produced was sold during the year. The industry provided employment to a total number of 90,594 persons in 1968-69 who earned Rs. 213·91 lakhs as wages.

VILLAGE LEATHER INDUSTRY

The processing of hides and skins and the manufacture of leather goods are traditional village industries.

The object of the development programme of the Commission for the industry is the planned recovery and full utilisation of the various parts of dead animals so as to minimise waste and provide large-scale employment. There is a vast livestock population consisting of over 22.6 erores of cattle and 10 crores of sheep and goats.

The programme consists of the establishment of flaying centres, flaying platforms, village tanneries, glue manufacturing centres, bone crushing units, chrome tanning units, retanning of bag tanned sole leather units, foot-waru units and leather goods units. The Commission is the first organisation in the country to take up chrome tanning in the villages. Eight such units have already been set up and are working properly.

To assist the Commission there is an Advisory Committee consisting of representatives of this industry and trade.

During 1968-69, Rs. 42-29 lakhs were disbursed for the development of the industry of which Rs. 11-57 lakhs were grants and Rs. 30-72 lakhs loans.

During the year 61 and 88 persons were trained in the Arts of tanning and carcass utilisation respectively. As

against the production of goods valued at Rs. 350·18 lakhs in 1967-68, the production in 1968-69 was valued at Rs. 465·40 lakhs. During 1968-69, as many as 12,992 full-timera and 13,247 part-timers were employed in this industry, who earned Rs. 101·27 lakhs as wages.

COTTAGE MATCH INDUSTRY

The match industry in India is classified into A, B, C and D classes according to the size and production capacity of the manufacturing units.

The programme of the Commission consists in the promotion of the 'D' class, licensed to produce a maximum of 25 gross boxes per day and capable of employing about 40 persons each.

The development programme aims at the utilisation of the bamboo resources of the country for the manufacture of matches and the elimination of the use of match wood and timber.

The programme also provides for training, research and marketing schemes.

The Commission expended Rs. 7.84 lakks during 1968-69 of which Rs. 0.85 lakks were grants and the rest loans.

The production of cottage match-boxes rose from 2.44 lakh gross boxes in 1967.68 to 2.94 lakh gross boxes in 1968.69. During the year 9 persons were trained.

The Industry provided employment to 883 full-time workers and 2.527 part-time workers who earned a total wage of Rs. 2.66 lakhs during the year.

VILLAGE POTTERY INDUSTRY

The development programme for the industry consists of schemes for the promotion of production of pottery goods of various types, marketing, research, central and regional training, organisation and promotion of ocoperative societies, supply of improved equipment and improved furnaces.

The Commission's programme for the industry during the year comprised among other things technical research, reorganisation of production programme in some areas and introduction of earthen pipes for water channel for minor irrigation. The disbursements for the year 1968-69 were Rs. 36.64 lakhs of which Rs. 10.76 lakhs were grants and Rs. 25.88 lakhs loans.

The production activity for the pottery industry in 1968-69 registered a considerable rise, the value of goods produced being Re. 208-64 lakhs as against Rs. 181-02 lakhs in 1967-68. Pottery articles worth Rs. 203-03 lakhs were sold during 1968-69. Under the training programme, 105 supervisors and 155 artisans were trained during the year. The industry provided employment to 40,027 persons during the year and the wage bill amounted to Rs. 94-29 lakhs.

FIBRE INDUSTRY

With a view to utilizing various kinds of fibres like sisal, hemp, san-hemp, etc., which grow in abundance in villages, but remain mostly unprocessed, the Commission implements a development programme under which improved Charkhas are distributed, artisans are trained and model production centres are organised.

In 1968-69 Rs. 12-04 lakhs were disbursed. During the year 98 instructors and 1,519 artisans were trained. The production of fibre articles during 1967-68 and 1968-69 were Rs. 109-64 lakhs and Rs. 87-75 lakhs respectively. The industry provided employment to 18,332 persons. The total wages paid during 1968-69 were Rs. 46-50 lakhs.

CARPENTRY AND BLACKSMITHY

For developing the village carpentry and blacksmithy industry, the Commission disbursed Rs. 28.50 lakhs during 1968-69 of which Rs. 2.60 lakhs were grants and the rest loans. The value of production and sale during 1968-69 amounted to Rs. 93.60 lakhs and Rs. 92.02 lakhs respectively. The industry provided employment to 2,519 full-time workers and 1,326 part-time workers during the year and the wage bill was Rs. 21.68 lakhs.

MANUFACTURE AND USE OF MANURE AND METHANE GAS FROM COW-DUNG AND OTHER WASTE PRODUCTS

The total number of gas plants set up by the Commission during 1968-69 was 673, thus bringing the total number of gas plants at the end of 1968-69 to 2,373. There were 263 agencies which received funds for the development of the industry at the end of the year.

During 1968-69 the Commission disbursed Rs. 20-86 lakhs for building plants as against Rs. 9-58 lakhs in 1967-68. The production of methane gas increased from 27-68 lakh cubic metres valued at Rs. 6-95 lakhs in 1967-68 to 41-14 lakh cubic metres valued at Rs. 9-48 lakhs in 1968-69. Besides, about 29,678 tonnes of manure valued at Rs. 5-94 lakhs were also produced during 1968-69.

LIME MANUFACTURING INDUSTRY

The construction of low cost kiln and improved kiln designed by the Commission on modern lines continued to receive attention during 1968-69.

As against a disbursement of Rs. 4.61 lakhs in 1967-68, the Commission disbursed Rs. 3.08 lakhs in 1968-69 in the form of grants and loans. The production of lime during the year amounted to Rs. 17.10 lakhs and the industry provided employment to 3,932 persons. The total wages during the year amounted to Rs. 8.52 lakhs.

INTEGRATED DEVELOPMENT PROGRAMME

The programme aims at intensive development of khadi and village industries in the gramdan and bhoodan areas where some spade-work had already been done.

During 1968-69, the Commission approved 21 blocks, bringing the total number of blocks to 703. Of these 152 were Prakhand dan blocks, 314 gramdan blocks and the remaining were outside the areas covered by the bhoodan movement and were located in tribal and hill and border areas. By 1968-69, the programme covered 41,041 villages with a population of 2.21 crores.

Employment was provided to $3\cdot40$ lakh persons under khadi and $0\cdot64$ lakh persons under village industries, the total wages distributed to them being Rs. 244 lakhs and Rs. $56\cdot89$ lakhs respectively.

PROGRAMME FOR HILL AND BORDER AREAS

The Commission had by the end of 1968-69 spread a network of 85 centres in the border areas of almost all the

border States. Distribution and/or sale of implements and tools under khadi and village industries during 1968-69 were to the tune of Rs. 1-13 lakhs and Rs. 1-16 lakhs respectively.

WEAVING SUBSIDY SCHEME

The Khadi and Village Industries Commission introduced weaving subsidy scheme from 6th April 1964 under which the rebate on the sale price of khadi has been replaced by a system of providing facilities for free weaving of all handspun yarn.

The new scheme benefits the spinners who get khadi at the cost of cotton while the urban consumers continue to get khadi at the rate which existed under the previous scheme; the only difference is that the amount available as rebate on the old sale price would under the new scheme be deducted from the price at an earlier stage in the form of weaving subsidy.

KHADI AND VILLAGE INDUSTRIES IN FOURTH PLAN

The Khadi and Village Industries Commission has three main objectives in the Fourth Five Year Plan, viz., the social objective of providing employment, the economic objective of producing a saleable article, and the wider objective of creating self-reliance amongst the people and building up a strong rural community spirit. The production of khadi of all varieties during the Fourth Five Year Plan is estimated at 760·22 million sq. metres valued at Rs. 233·46 corors. Employment will be provided under khadi at the end of the Plan in 1973·74 to 24·99 lakh persons (20·94 lakh traditional and ambar charkhas, and 4·05 lakh new model charkhas). The production target for village industries during the Plan is put at Rs. 472·16 crores. The total number of people who will be either fully or partly employed under village industries by 1973-74 is estimated at 16·38 lakhs.

Technical Improvements

New equipment, tools and processes have been developed and many others are in the process of experimentation. It is proposed to take advantage of all the available modern scientific knowledge and experience in improving progressively the productivity and income of artisans.

The new model charkha, the sevagram semi-automatic looms, etc. for example, would still enhance productivity, raise the level of income and make cloth more durable. Average production per new model charkha at present ranges from 15 to 20 hanks for 8 hours work which ensures a wage of Rs. 1.50 to Rs. 2.00 a day.

OTHER INDUSTRIES

Industries such as collection of forest plants for medicinal purposes, manufacture of shellac, manufacture of gums and resins, manufacture of katha, fruit processing and preservation, etc. are new additions to the list of industries under the purview of the Commission. Financial assistance was given to them during the year for initiating the work.

HANDICRAFTS

Handicrafts occupy the sixth place in the country's exports.

The All-India Handicrafts Board studies the problems confronting the handicrafts industry and advises the government on the solution of these problems. The Board is also required to advise the government on grants and loans to be given to the state governments, private organisations and institutions for financing activities necessary for the development and improvement of handicrafts. It plans and formulates schemes for the development of handicrafts. The State governments are mainly responsible for the implementation of plans and schemes whereas the Board undertakes such developmental measures as are of national importance and of value to the over-all programme for development of handicrafts and common benefit to the States, e.g., organisation of and participation in exhibitions and fairs of national importance, mobile exhibition covering several States, nation-wide publicity campaign, technological research and improvement, quality control, economic research and studies, design development on regional basis and specialised training. It also promotes the development of co-operatives and arranges credit.

The Planning Commission had allocated Rs. 59-297 lakhs for 1969-70.

Schemes to be undertaken during the next five years include market research, promotion of inter-state marketing, laying down standards and specifications, extension of training facilities in the management of emporia, salesmanship and display, introduction of improved techniques with particular emphasis on reducing cost of production and opening of organised production centres.

Besides co-ordinated schemes for the expansion of exports in handicrafts, the Fourth Five Year Plan envisages orientation in production to meet the needs of customers in different income groups within the country and the promotion and development of rural crafts.

The exports of handicrafts during the years 1964-65, 1965-66, 1966-67, 1967-68 and 1968-69 have been (in Rs. crores) 25-36, 27-79, 40-41, 54-76 and 76-47 respectively.

In order to strengthen and co-ordinate the measures taken for promotion of handicrafts, the Board has set up Regional Exporters Associations at Delhi, Bombay, Madras and Calcutta and Craft Associations for Zari and Carpets.

A list of the major handicrafts is given below :-

Textiles: Hand-printing and traditional dyeing of textiles, brocades, himroo, carpets and druggets, rugs, gabbés and namdas, embroidery (cotton, silk, wool and zari), lace and lace work including nakki and gota making, shawls; Metalware: Silver and goldware, bidri filigree, brass and copperware, bronze work; Ceramics: Pottery and earthenware; Ivory: Ivory carving; Woodwork: Wood-carving and inlay, lacquer work including nirmal work, decorative furniture: Stone-work: Stone-carving including marble work and alabaster; Toys: Dolls and toys other than mechanical toys; Leather: Leather goods (Artistic work); Horn: Artistic articles; Bone: Artistic articles; Cane and Bamboo, etc. Articles made of cane, bamboo, willow, straw and grass including mats and pith crafts; Incense and perfumery; Flax and Fibre

articles; Bangles & Beads; Musical Instruments; Conchshell and semi-precious stones.

Miscellaneous: Miscellaneous traditional art objects such as Orissa, Mysore and Tanjore paintings, and handicraft products specially made for ceremonies, articles of worship and theatrical requisites such as costumes, masks, puppets, etc.

Steps taken to develop handicrafts include the establishment of design centres to revive traditional designs and create new ones and training centres to better techniques. Some of these training centres are also production centres.

Mobile exhibitions are taken round the country and Handicraft Weeks are held. A handicrafts museum has been established in New Delhi.

Design Centres

The Board has four regional Design Development Centres at Delhi, Calcutta, Bangalore and Bombay to look after designing and development of the crafts in their region, survey requirements, provide training and maintain close collaboration with the State centres, marketing organisations, exporters etc. State design centres were established and are situated in Kashmir, U.P., Bihar, W. Bengal, Himachal Pradesh, Bhopal, Tamil Nadu, Hyderabad, Orissa, Manipur, Tripura, Rajasthan, Punjab and Kerala.

During the III Five Year Plan over 5,000 original designs were evolved covering 16 crafts and nearly 500 parties were assisted.

Development of Co-operatives

The Board encourages formation of handicraft cooperatives and provides financial, technical and marketing facilities to them.

The number of handicraft co-operatives increased from 1,000 in 1957-58 to nearly 3,000 in 1967-68. In addition 200 handicrafts emporia have also been set up to expand marketing activities.

The Board has also started a training programme for the co-operative organisers for which trainees from Government Departments and co-operative organisations are selected for training. Up to April 1968 ten such courses had been held and 184 persons trained.

Survey of associations of artisans, dealers and exporters has been completed by the Indian Co-operative Union on behalf of the Board.

Credit Facilities

One of the main functions of the Board is to see that adequate credit facilities are made available to the handicrafts industries and trade at different stages of its production, storage, distribution and sales.

Awards: To bestow honour and encourage craftsmen, the Board has instituted National awards for Master-craftsmen. These awards are given every year during the "Republic Week" celebrations.

Handicrafts and Handlooms Export Corporation of India Ltd. (See under "All India Corporations.")

FILM INDUSTRY

NESCO has sponsored a study of Indian film heroes and the Institute of Social Sciences, Agra, has undertaken in co-operation with a group of International scientists, the study for which \$20,000 have been sanctioned in the first instance.

FILM INSTITUTE OF INDIA

Law College Road, Poona 4,

The Institute trains all categories of film technicians and artistes. It conducts diploma courses in Film Direction, Screenplay Writing, Motion Picture Photography, Sound Recording and Sound Engineering, Film Editing and Film

At the commencement of the ninth academic year (1969-70), the Institute had 150 students in various courses. So far 281 students have obtained diplomas. Out of these diploma holders, many are occupying responsible positions in the industry and in government organisations like Films Division and TV Centre of All India Radio.

The Institute has extensive ground for out-door shooting; a processing laboratory - both for 35 mm and 16 mm work and well-equipped studies. Whenever not required for the use of the Institute, these facilities are made available to outside producers on hire and this helps maintain close contacts with the film industry. There are 20 foreign students on the Institute's rolls. Countries represented are Afghanistan, Ceylon, Ghana, Jordan, Nepal, Philippines, Singapore, Tanzania, Somalia and

There are separate hostels for boys and girls.

Film Library: The Institute has a film library in which film classics are being collected from various countries. So far, 128 films have been obtained from USSR, USA, UK, France, Germany, Italy, Czechoslovakia etc. The library also has some selected Indian features and documentaries. The Institute's Book Library has 9,600 books valued at Rs. 58,000.

National Film Archive of India @: The National Film Archive of India is at present in the premises of the Film Institute, Poona. The present collection (as on 31-12-69) consist of 492 feature and short films (Indian & Foreign), 3886 stills, 1359 wall posters, 804 disc records, 2549 books and 156 journals. Notable among the acquisitions of the year are three Indian silent films of Himansu Rai: "LIGHT OF ASIA" (1926); "THROW OF DICE" (1927); "SHIRAZ" (1928)—received from the National Film Archive, London under the archival exchange programme.

Children's Film Society: Its object is to produce, acquire, distribute and exhibit films of special interest to child and juvenile audience. The Society's Regis-tered Office is at New Delhi and Administrative Headquarters at Bombay. Various State Governments and Union Territories are affiliate-members of the Society.

The Government of India provide the major portion of funds in the shape of annual grant-in-aid. Society's own revenue from commercial screening and sale of prints, etc. was Rs. 4 49 lakhs during the year ending March 31, 1969.

The Society organised 3,459 film shows during 1968-69 in schools, cinemas, etc. -- an increase of 133 per cent over the figures for the year 1963-64. These film shows were witnessed by over 14 lakh children and adults. In addition, film shows are also arranged by the Central and State Governments through their Publicity Vans in rural areas. On an average 40 to 50 lakh persons witness these shows.

The Society has so far produced over 65 films and have won 11 National and International Awards and recognitions for its films.

Chairman: Smt. Nandini Satpathy, Deputy Minister attached to the Prime Minister; Secretary: H. C. Srivastava; Public Relations Officer: R. P. Agnihotri.

FILMS DIVISION

The Films Division is the central film producing organisation of the Government of India under the Ministry of Information and Broadcasting and is responsible for production and distribution of newsreels, documentaries and other films for general information and education of the people. Its output is about 150 films a year. Most of these films are made in English and thirteen Indian languages. The Division supplies about 35,000 prints of its films annually for commercial and non-commercial distribution. Nearly 30 to 40 million people see its documentaries and newsreels each week.

Documentaries: During the period April to December 1968 the Division produced 54 films (121 reels), purchased four films (8 reels) and accepted as donation 11 films (16 reels). Out of the 54 films, 12 films (21 reels)one colour film (2 reels) and eleven black and white films (19 reels) were produced through private producers. Eight colour films and 34 black and white films were produced by the Division's units. Of these 69 films, 9 films were on family planning, 6 films on scientific farming, three on emergency and the remaining on a variety of subjects like developmental projects, savings, tourist publicity, external publicity, instructional training and teaching films and compilation films on visits of dignitaries. Between January and March 1969, the Division produced 40 films (213 reels). Out of 40 films, 13 films (23 reels) — 4 colour films (8 reels) and 9 black and white (15 reels) were produced through private producers. Two colour films (3 reels) and 25 black and white films (187 reels) were produced by the Division's

Newsreels: The production of newsreels continued according to the schedule of one reel a week in 14 languages viz., English, Hindi, Bengali, Tamil, Telugu, Marathi, Gujarati, Kannada, Malayalam, Assamese, Punjabi, Oriya, Urdu and Kashmiri. Stories were received from 24 foreign newsreel organisations as part of the arrangements for free exchange of newsreel material.

A Hindi print of the weekly newsreel and interesting sports items were supplied for use in the TV programme of All India Radio in New Delhi.

Newsreel coverage within the country is organised through 13 Newsreel Officers and two Assistant Newsreel Officers stationed in Delhi (4), Bombay (2), Calcutta (2), Madras (1), Ahmedabad (1), Hyderabad (1), Lucknow (1), Bangalore (1), Bhopal (1) and Chandigarh (1).

[@] The main objectives the Archive are 1) acquisition and preservation of national and international cinema, 2) film classification, documentation and research and 3) encouraging film study and spread of film culture.

Field Publicity

Nearly 20,300 prints were supplied to the field units of the Directorate of Field Publicity, State Governments, Films Division branches, Railway Zone, Department of Community Development, Ministry of Education, the Exhibition Division of the Directorate of Advertising and Visual Publicity, Development Commissioners, Social Education Organisers and Training Centres for exhibition through mobile vans.

Non-Commercial Exhibition

From April to March 1969, some 8,000 prints were sold to schools, Government departments and private bodies. These include prints supplied to the Ministry of External Affairs for exhibition through Indian Missions/Posts abroad. During April to March 1969, 5,551 shows were given by organisations to which prints were loaned and about 14 lakh persons attended the shows.

Against a Budget Grant of Rs. 1,51,97,000 a total expenditure of Rs. 1,51,58,000 was booked up to the end of March 1969 by the Films Division.

AWARDS

(See article 'Awards and Prizes')

Film Festivals: The Division participated in 35 international film festivals by entering 76 documentary films and received 25 diplomas and certificates of participation. Five documentary films of the Films Division won National Awards for films for 1967.

CENTRAL BOARD OF FILM CENSORS

The Board of Film Censors is a statutory body set up under the Cinematograph Act, 1952, for sanctioning films for public exhibition. Films suitable for unrestricted exhibition are granted 'U' certificates and those suitable for public exhibition restricted to adults only are given 'A' certificates.

The certificates issued by the Board are valid for 10 years from the date of issue. Provision exists for the issue of fresh certificates in respect of such films after the expiry of the 10-year period.

During 1969, the Central Board of Film Censors examined 2,28% films. The Board granted 1,546. "U" and nine 'A' certificates to Indian films and 1,934 "U" and 123 'A' certificates in respect of imported films. Certification was refused in 26 cases (3 Indian and 23 imported). The world footage excised from the films was 5,757.62 meters. 1,200 films were classified by the Board as predominantly educational.

In the case of 458 films, certificates were revalidated after the expiry of the ten-year period. Of these, 15 received 'A' certificates. Revalidation of certificate was not refused in the case of any feature film.

16 MM. FILMS

The use of the 16 mm. film for propaganda and publicity is realised by Governments, municipalities, and trade and industry.

The National Institute of Audio-Visual Education now renamed as the Department of Audio-Visual Education (National Council of Educational Research and Training), Indraprastha Estate, New Delhi, has been doing excellent work with 16 mm. films on a variety of topics. Its Library is the single largest collection of 16 mm. films, mainly for information and education. The films are loaned to member institutions free of charge. Films are sent to outstation members by registered post at the expense of the department.

There are in addition 16 mm, projectors and small theatres for films suitable for non-theatrical audiences maintained by the British Information Services, the British Council and the U.S. Information Services through their regional offices.

Most of the diplomatic missions and embassies in the Capital and Consulates in Bombay, Madras and Calcutta maintain a film section and arrange shows of special films.

The U.K. and U.S.A. representatives and the British Council maintain a special library of educational and informative films. These are available for exhibition free of charge.

16 mm, films on a variety of subjects are available from many countries in the world.

EXPORT, IMPORT

India is the second largest film producing country in the world. She produces annually between 300 to 320 films in 12 Indian languages, Production of colour pictures is on the increase. Export demand is mainly for Hindi and Tamil films. Indian films are exported to nearly 100 countries in the world. The total export earnings from Indian feature films including advertisement shorts according to the figures published by the D.G.C.I. & S., Calcutta during 1968-69 was Rs. 2·94 crores. The export earnings during 1969-70 (April to November) stood at Rs. 2·57 crores.

Marketing conditions abroad: The trading conditions that prevailed during the financial year 1968-69 and during the first 6 months of 1969-70 in some of the main traditional markets were as follows:—Demand from the U.K., Iran, West Indies, Singapore, Malaysia, Thailand and Fiji was steady. Enquiries from the Middle East, Persian Gulf and North Africa were somewhat limited. Exports to Burma were limited to the purchases made by the Motion Picture Agency Burma from the IMPEC. Exports to Ceylon were hampered by the import restrictions. The unsettled conditions in Nigeria affected our exports to the West African markets. While there was an improvement in the enquiries from Indonesia, despatches were limited to the orders against which the overseas buyers could open letters of credit in free foreign exchange. In general, overseas buyers showed greater interest in colour tilms.

Some of the importing countries like Kenya, Tanzania, Ghana, Iraq, Syria, Ceylon, Burma and Indonesia have imposed restrictions on the import of Indian films. These countries among themselves account for nearly 38 per cent of our total exports.

PRODUCTION

Films produced by India during the last seven years in black and white and colour respectively were: 1961: 289, 8; 1962: 307, 5; 1963: 287, 12; 1964: 269, 24; 1965: 290, 32; 1966: 276, 32; 1967: 285, 45.

Indian feature films certified by the Central Board of Film Censors during the period 1-I-1969 to 30-9-1969: Black and white 227; colour 43; total 270.

Language-wise break-up of Indian feature films certified during Jan. 1, 1969 to Sept. 30, 1969: Hindi 57; Hindustani 9; Hindi with English sub-titles 2; Urdu 2; Marathi 14; Gujarati 5; Punjabi 3; Konkani 1; Kashmiri 1; Documentary 1; Rajasthani 1; Bengali 22; Oriya 1; Tamil 53; Telugu 45; Kannada 32; Malayalam 21; Total 270.

EXHIBITION ABROAD

Copies of documentaries are in demand for regular exhibition in 84 Indian Missions abroad, Many television authorities show considerable interest in Indian films and the documentaries are frequently used by them

through the Tourist Officers/Indian Missions in their respective countries

Catalogue of the Films Division's documentaries is available with the Missions abroad.

GLASS INDUSTRY

INDIA manufactures almost all varieties of optical glass. Barring the sphere of decorative table-ware like handout crystal, fine goblets, chandeliers and plate glass, her progress in the industry has been phenomenal.

The more commonly used raw materials for glass industry are: sand, borax, soda ash and salt cake, dolo-

mite, lime or limestone, saltpetre and sulphur, manganese dioxide and colouring materials.

The industry comprises the manufacture of sheet glass, blown and pressedware and bangles.

The production of different types of glass and glassware from 1962 onwards is given below:

		Sheet	t Glass	Laborat	ory Glass	Glass	Shells	Other G	lassware
Year		Installed Capacity '000 Sq. Metres	Production '000 Sq. Metres	Installed Capacity Metric Tonnes	Production Metric Tonnes	Installed Capacity Lakh Pieces	Production Lakh Pieces	Metric Tonnes 7 8 3,35,928 1,86,33	Production Matric Tonnes
		1	2	3	4	5	6	7	8

The know-how for the production of optical glass, a strategic defence material, was developed at the Central Glass & Ceramic Research Institute, Calcutta, and a plant of 10 tonne annual capacity was set up at the Institute in 1961 to meet the requirements of defence and

civilian instrument industry in respect of all major types of optical glass.

A public sector ophthalmic glass plant having a capacity of 300 tonnes per annum was set up by the Government of India at Durgapur, West Bengal, with Soviet assistance. The factory started production of spectacle glass blanks in 1969.

Imports	and e	ports	are as follows:	(Rs. lakhs)
			Imports	Exports
1962			136.94	$24 \cdot 05$
1962 63			148.58	24.11

1985-66	4.0		125 · 16	35 ⋅ 04
1966-67			108-18	$40 \cdot 41$
1967-68	4.4		163.00	$62 \cdot 00$
1968-69	* *		148.65	121 · 16

Exports are mainly of bangles, the chief markets being Ceylon and countries in Africa, Middle and Far East.

A new Company — Glass Lined Equipment Co. Ltd. has been established at Umreth near Anand for manufacturing glass enamelled equipment such as reactors, evaporators, storage vessels, valves, pipes and fittings required in the chemical, pharmaceutical and petrochemical industries.

The per capita consumption of glass is very low. The annual consumption is only one lb. which is about one-hundredth of the consumption in U.S.A.

HIDES, SKINS AND LEATHER

THE tanning industry in India is a traditional industry engaged in tanning vegetable tanned hides and skins mostly for export purposes. A large proportion of the vegetable tanning industry is concentrated in the States of Tamil Nadu, Andhra and Mysore. Nearly 90 per cent of vegetable tanned goat and 70 per cent of tanned hides are exported.

The tanneries in Madras specialise in the manufacture of light leathers like wet blue goat skins, handgrain morocco, clothing leather, etc. Calcutta units concentrate on chrome tanned hides, chrome uppers and wet blue hides and skins.

Leather is widely used for belting industrial gloves and aprons, diaphragms, oil seals, oil filters, washers etc.

Requirements of raw hides, the principal raw material in the manufacture of pickers and picking hands are met mostly from imports.

During 1968-69, the availability of cow hides was estimated at 19.25 million tonnes and that of buffalo at 6.3 million tonnes. This is expected to increase to 20.51

million tonnes and 6.85 million tonnes respectively by 1973-74. During this period, the estimated production of raw goat skin and sheep skin is expected to increase from 44.60 million tonnes and 16.52 million tonnes respectively to 49.20 million tonnes and 16.81 million tonnes respectively.

The tanning industry comprises four sections, viz., 1. organised tanneries producing finished vegetable tanned buffalo leather and chrome tanned upper leather; 2. tanneries producing vegetable tanned leather known to the trade as E. I. kips and E. I. tanned skins; 3. small-scale chrome tanneries producing chrome tanned upper leather; and 4. village tanneries producing vegetable tanned cow and buffalo leather and vegetable tanned leather from goat and sheep skins.

There are 77 large-scale factories manufacturing tanneries with a production capital of Rs. 7·3 crores. Nearly 10,000 people are employed in these 77 units.

The annual installed capacity and production of each of these items is as follows:

				Chrome Ta	nned Hides		nned Buffalo w Hides	Leather Cloth	
	Year		_	Capacity (Thou	Production asands)	Capacity (Tho:	Production usands)	Capacity (Thousa	Production nd metres)
1964 1965 1966 1967 1968	2 0 T T D T	9 1 6 0 6 0	# D D D D D D D D D D D D D D D D D D D	1,580·4 1,580·4 1,580·4 1,580·4 1,580·4	915·8 868·6 909·6 898·0 820·0	4,678 · 8 4,678 · 8 4,816 · 3 4,828 · 8 4,828 · 8	3,344·4 3,433·8 3,310·1 3,178·0 2,550·0	8,262·0 9,551·0 12,255·6 12,555·6	8,990 · 4 9,133 · 2 11,898 · 2 10,789 · 5

According to the Annual Survey of Industries, 1963, the total productive capital on tanneries and leather finishing plants was about Rs. 4.3 crores and total employment came to 8,290. The gross ex-factory value of output was Rs. 16.9 crores.

The trend of the value of exports and imports since 1965-66 is given below

		MO TOLL	10 01 01	spores and s—		EXPORT	(Figures in crores)		
Year	East India tanned hides and skins		Pickled goat skins	Tanned reptile skins	Raw goat and kid skins	Goat hair	Tanning materials		
				Re.	Rs.	Rs.	Rs.	Rs.	Rs.
1965-66 1966-67 1967-68 1968-69	* *		**	25·34 41·28 34·77 49·53	2·37 0·94 0·63 0·55	0·92 1·90 3·59 2·75	6·03 13·27 6·14 3·83	0.59 0.88 0.58 0.71	0·55 0·36 0·34 0·26

Note: Figures do not include export of wet-blue chrome tanned goat and sheep skins, finished leather manufactures.

Tanning Materials — Excluding Cutch Extract.

	Year			Raw hides and calf skins	Raw goat and sheep skins	Wattle bark	Wattle extract	Other tanning materials	Leather tanning and curing machinery
				Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1965-66	4.4			1.41	0.76	0.19	1.24	0.21	0.14
1966-67	* 4	0.4		1.29	0-22	0.31	2.43	0.82	0.16
1967-68	4.4	= 4	* *	1.06	0.10	0-17	1.63	0.55	0.29
1968-69	* *	* *		1.60	0.04	0.28	2.85	0.58	0.15

The export of East India tanned hides and skins reached a record in 1968-69. The exports of these items during the year amounted to Rs. 5,379-56 lakhs against Rs. 3,992-28 lakhs during 1967-68 an increase of about 40 per cent.

The exports of finished leather and leather manufactures in 1968-69 was Rs. 33 crores, Rs. 8 crores more than the target. The positive forecast for 1969-70 is Rs. 40 crores,

India imports about 15,000 tons of Wattle extract and bark per year. By the end of the Second Plan the total area under wattle cultivation had reached about 27,000 acres. During the Third Plan period more area had been extended under wattle plantations in the States of Tamil Nadu, Kerala and Assam.

The mechanised sector claims about 25 per cent of our exports. Major part of it goes to Western Countries. 75 per cent of the exports came from the decentralised sector and the largest chunk of it goes to currency trade area.

A beginning has been made by the Co-operative Mutual Insurance Company, Bombay, to insure milch animals and drought cattle in the States of Maharashtra and Gujarat. A Development Council for Leather, Leather Goods and Pickers industries was constituted in January 1960. A new public sector enterprise — Tannery and Footwear Corporation of India — is to be formed during the Fourth Plan.

FOOTWEAR INDUSTRY

According to the Annual Survey of Industries, 1966, there were 11 registered factories manufacturing footwear. The productive capital of these units was about Rs. 3.00 crores in 1966 and the gross output was Rs. 7.3 crores.

The capacity for the Indian type of footwear which is hand-made fluctuates with demand and data are not available for Statewise figures.

Reliable production statistics for small and cottage units which are responsible for manufacturing over 90 per cent of the total output are not available.

Import of leather footwear is insignificant.

Export of Leather Footoear: Quantity in million pairs and value in Rs. lakhs respectively during the following year: $1964-65: 4\cdot02$; $348; 1965-66: 4\cdot69; 431; 1966-67: 5\cdot29; 670; 1967-68: —; 752.$

The Government of India has re-imposed the 10 per cent excise duty on footwear parts costing more than Rs. 8. The 10 per cent duty is, as before, liable only on the produce of the so called organised sector of the industry.

In a seminar on leather inductry hold in August 1969, it has been decided to establish 150 modern mechanised units all over the country for the manufacture of footwear and leather goods in the small-scale sector.

JUTE INDUSTRY

THE jute industry retains its place as India's largest foreign exchange earner, but its share in the total exports from the country has declined over the years. It was about 16 per cent in 1968 against 23 per cent in 1965.

The 1968-69 exports at 636,600 tonnes were the lowest recorded for years. Exports of sacking, the major markets for which used to be Africa, South East Asia and Australia, have declined steadily from 461,400 tonnes in 1954-55 to a meagre 70,800 tonnes in 1968-69, In 1968-69, 292,400 tonnes of hessian were exported from India. The output and exports of carpet backing went up from 11,300 tonnes and 13,600 tonnes respectively in 1958-59 to 206,500 tonnes and 219,200 tonnes in 1968-69.

The Government of India has reduced the export duty on jute carpet-backing cloth by Rs. 300 per tonne with effect from December 1969. Simultaneously the jute industry also reduced the price of such cloth by Rs. 300

per tonne. As a result jute carpet-backing cloth is available to the overseas buyers at Rs. 4,233 per tonne, Rs. 600 per tonne cheaper.

The country has achieved self-sufficiency in jute production. However, vagaries of nature and other factors have caused variations in crop outturn from year to year. 1964-65, 1965-66 and 1966-67 were poor crop seasons and stocks had to be replenished by imports from Pakistan and Thailand. The severest shortage in fibre supply in the current decade occurred in 1968-69. It ied to curtailment of goods' production and because fibre and consequently goods' prices rose to very high levels, exports of jute products suffered.

Modernisation and Diversification: The jute industry spent Rs. 50 crores on nodernisation in the 'fifties. It has again drawn up a Rs. 50-crore programme of modernisation for implementation during the Fourth Plan period. Investment of large sums started from 1968

for the installation of broadlooms for the manufacture of carpet backing. The complement of broadlooms increased from 3,400 at the end of 1967-68 to 5,600 at the end of 1968-69. The industry has carried on research for the improvement of existing products and development of new lines over a number of years. Carpet backing accounted for 22·2 per cent of the industry's total production in 1968-69 and 34·4 per cent of its exports. Other improved and new products developed in recent years are a lightweight woolpack, dyed and bleached cloth for the decorative market, laminated goods, etc.

The jute industry has today 71 units in operation with the heaviest concentration of looms in the world — about 41,000 looms distributed at the beginning of 1969 as follows: 11,900 sacking, 23,000 hessian, 4,800 carpet backing and 1,300 others.

The industry still accounts for 35 per cent of world output and 55 per cent of world exports of jute goods. It employs over 220,000 workers. A capital of Rs. 160

crores is invested in the industry.

The table below gives the production and exports of jute goods during the past few years:

PRODUCTION AND EXPORTS OF JUTE GOODS

				Production	('000 tons)		Exports ('000 tons)	April-March Value
Year (July-Jun	10)		Hessian	Sacking	Others	Total	(all-India) April-March	(Rs. in crores)

LAC INDUSTRY

AC is a resin which finds extensive application in industries. It is a resinous protective secretion of an insect which lives by sucking the sap of certain trees and shrubs called lac hosts.

There are four crops of sticklac, named after the Hindu mouths in which the collection of each crop commences. These are 'Baisakhi' and 'Katki' 'from one strain of the insect (Rangeeni) and 'Jethwi' and 'Aghani' from another strain (Kusumi). The first processed product, after the crushing and washing of sticklac is known as 'seedlac'. From this shellac is manufactured either by melting it (seedlac) manually in cloth bags held near a fire place called 'bhattas' or by the mechanised process of extraction with suitable solvents.

Lac is used in the manufacture of french polish, gramophone records, electrical insulating materials, shellacmoulded articles, micanite, hats, grinding wheels, adhesives, cements, wood turning, metal enamelling, printing ink, etc.

PRODUCTION

Lac is grown mainly in Bihar, West Bengal, Madhya Pradesh, Maharashtra and Uttar Pradesh. Till recently India produced approximately 85 per cent of the world production. But in recent years Thailand has also increased its production and now, on an average, India's share is between 50 and 60 per cent of world production. The Statewise break-up of average production in India during the years 1964-69 is as follows:

Stat	е					Average Crop (in quintals)
Bihar		1.4				1,55,783
Madhya Pradesh	4.8	8.6				60,121
West Bengal	0.1	8.0	9.4			27,684
Maharashtra	* *	* *				5,934
Uttar Pradesh Orissa	* *	1.4	9.4	- 9	4.2	19,333
Charleson	6.4	* *			1.5	6,830
Other States.	* *	* *	4.5		0.0	783
	4 1	2.4	* =			1,903
Total	* *	p +	71			2,78,371

The total production in 1968-69 was 2,95,980 quintals and in 1967-68 it was 3,87,791 quintals. The preliminary report issued by the Regional Office, Lac Development, Ranchi, puts the total yield of Baisakhi lac crop in 1969 at 1,54,896 quintals, and of Jethwi lac at 13,062 quintals.

EXPORTS

Between 85 and 90 per cent of the lac produced in India is exported. The U.S.A., till recently, bought the largest quantity of Indian lac. But of late, the U.S.S.R. has emerged as the largest buyer.

The table below gives exports of lac to important countries during 1967-68 and 1968-69.

(The figures are in quintals)

ORGANISATIONS CONNECTED WITH LAC DEVELOPMENT AND INDUSTRIES

For looking after the development and marketing of lac and also for guiding and coordinating lac development work in the States, a Regional Office, Lac Development, has been created under the Department of Agriculture of Government of India with headquarters at Ranchi with effect from 1st April 1966. The Government of India have also constituted the Indian Lac Development Council on which various interests connected with lac are represented. The primary function of the Council is to advise the Government on all matters relating to development of lac cultivation, trade and industry.

There is also a Shellac Export Promotion Council with headquarters at Calcutta whose function is to promote the export of lac to foreign countries. On account of its dependence on foreign countries, the internal prices of lac very often fell to very low levels which reduced the foreign exchange earnings and acted as a disincentive to the producer. In order to guard against this, a body of exporters of lac called the Indian Lac Exporters Association has been formed with Government support. The major functions of the Association are to assist the Government in the fixation of minimum prices of all grades of lac at the export stage, maintenance of quality at export stage and administration of the Minimum Export price.

The Bihar Cooperative Lac Marketing Federation has been formed in Bihar with the object of giving a price support to the cultivator at the time when the market price falls below certain levels. Similar organisations in other States are in the offing.

To improve upon the technique of lac cultivation and to find out new uses of lac are the responsibilities of the Indian Lac Research Institute at Namkum. This Institute is under the control of the Indian Council of Agricultural Research.

NON-FERROUS INDUSTRY

(See also under "Mines and Minerals".)

COPPER

Though there are many copper fields in India, extraction of copper ores is at present confined to only three mines viz., Musabani, Surda and Patharghora in Bihar, which are operated by Messrs. Indian Copper Corporation Ltd. More and more deposits of copper are being located and important among such are: Khetri and Daribo in Rajasthan and Rangpo area in Sikkim. Hindusthan Copper Ltd., a public sector undertaking, is at present engaged in the development of Khetri and Kolihan to produce 31,000 tonnes of electrolytic grade copper metal per annum. It is also proposed to recover sulphur values in the ore by adopting flash smelting process to produce about 600 tonnes of sulphuric acid per day which would be utilised to produce 214,400 tonnes of triple superphosphate fertiliser per annum. The project including the acid and fertiliser plant is estimated to cost Rs. 88 erores.

Though the world average grade of copper ore milled is about 1.5 per cent. Khetri will have one per cent grade with a production of 31,000 tonnes electrolytic copper per year.

Annual plan for 1969-70 has provided Rs. 17.0 crores for the plan expenditure against Rs. 6.1 crores (estimated) in 1968-69.

ZINC

Deposits of zinc are known to occur at only Zawar and Dareba-Rajpura areas in Rajasthan. The lead-zinc deposits in these two areas are estimated at 96 90 million tonnes. At present two units of Hindusthan Zinc Ltd. in the public sector and Cominco Binani Zinc Ltd. in the private sector are engaged in the manufacture of zinc.

Hindusthan Zinc Ltd. is formed to develop the full potential of Zawar Mines. The Zinc smelter plant of this unit went into regular production from January 1968. The rated capacity of the plants in MT per year is as follows: Zinc 18,000; Superphosphate 76,200; Cadmium 78.

Production of zinc in 1967-68 amounted to 4,802 tonnes. This smelter is reported to be experiencing acute shortage of raw material viz. zinc concentrates to feed the plant.

The draft Fourth Plan has provided an expenditure of Rs. 742 lakhs for development of Mochia mines to produce 2,000 tonnes of ore per day needed to feed the Debari zinc smelter. A further provision of Rs. 1,652 lakhs has been made for prospecting and exploration works at Zawar Mines, doubling the capacity of Debari Zinc smelter from 18,000 tonnes to 36,000 tonnes.

Another zinc smelter at Alwaye (Kerala) in the private sector based on imported concentrates and having an installed capacity of 20,000 tonnes, started production in January 1967. The smelter was expected to attain its rated production by the end of 1969. It is also expected to double its capacity at the end of the Fourth Plan.

Most of the sulphide ores bearing zine contain appreciable amounts of cadmium, and the major portion of world's cadmium comes as a by-product of zine industry. It is reported that zine blende received from zawar mines contains about 0.30 to 0.35 per cent cadmium.

The projected demand and supply schedules of zine during the Fourth Plan are given below:

9		-		
	1969-70	1970-71	1971-72	1973-74 (tonnes)
Demand Production Capacity	96,800	106,500	117,100	142,000 70,000 76,000

The Union Government decided to exempt zinc concentrates from import duty of 15 per cent.

It has now been decided to establish a zinc smelter plant at Vizag. The plant will have an annual capacity of 30,000 tonnes of zinc, 40,000 tonnes of sulphuric acid, and 70,100 tonnes of cadmium and will be based on imported concentrates.

ALUMINIUM

Aluminium is the only non-ferrous metal which India can produce in large quantities because of extensive deposits of bauxite. At present, considerable attention has been paid for augmenting the production due to the high priority accorded by the Government of India for import substitution.

At present there are four primary producers in the private sector viz., Hindusthan Aluminium Corporation Ltd., Ind. Aluminium Co. Ltd., Madras Aluminium Co. Ltd., and Aluminium Corporation of India Ltd.

Looking to the heavy demand for Aluminium in the country, the three units have plans for further expansion. Hind. Aluminium Corporation of India has obtained an industrial licence from the Government of India permitting expansion from 60,000 to 120,000 tonnes of aluminium ingot per annum. This unit has already entered into the first stage of expansion of production capacity from 60,000 to 80,000 tonnes per annum.

The demand for aluminium in India has recorded a steep increase in line with the trend all over the world. The output during the Plan periods and the anticipated production at the end of Fourth Plan period are given below:

Year				(000 tonnes)
1960-61 (Product	ion)		1.0		18-2
1965-66 (Product	ion)	4.7	* *		67
1968-69 (Product	ion)				117
Capacity Production	* 4				120
1973-74					230
Capacity	**	a 1	9.0	* *	220

By the end of the Fourth Plan, it is hoped that India will be fully self-sufficient in aluminium.

Bharat Aluminium Company Ltd., a public sector undertaking incorporated in November 1965, was entrusted with the main object of constructing, managing and operating the Koyna (Maharashtra) and Korba (M.P.) projects.

Koyna Project: The plant is based on the Udgeri and Dhangarwadi (both in the Kolhapur region) bauxite deposits and electric power from Koyna Hydel station.

Korba Project: This project envisages a two lakh tonne (per annum) alumina plant, a one lakh tonne (per annum) smelter and facilities for manufacture of semis.

TIN

At present there is no indigenous production in the primary metal. So India has to depend on imports.

LEAD

Lead ores are known to occur at a number of places in India. The only large deposits now being worked are those at Zawar. The Hindusthan Zinc Ltd. has established a lead smelter plant at Tundo in Bihar. Production of lead amounted to 2,335 topnes in 1967-68 against 2,514 tonnes in 1966-67.

ANTIMONY

For antimony there is only one smelter at Bombay, owned by Star Metal Refinery Pvt. Ltd., based on imported ores with capacity of 1,000 tons.

FOURTH PLAN

By the end of the Fourth Plan, it is expected that India will be fully sufficient in Aluminium and meet half its requirements of zinc and one-third of copper from indigenous resources. The outlay on metals in Rs. crores is fixed as follows in the central sector: Continuing Schemes 682.47; New Schemes 3,04.00; Total 986.47.

The share of copper, aluminium and zinc in the total outlay of continuing schemes is given below (Figures in Rs. lakhs): 1. Khetri Copper Project 58,00; 2. Korba Al. Project and 3. Koyna Aluminium Project 100,00; 4. Gujarat Alumina Plant (Central Share) 1,00; 5. Doubling the capacity of zinc smelter Delani 5,00; 6. Hind Zinc Ltd. (development of mine for production of 2,000 tonnes ore per day) 742; 7. Hind. Copper Ltd. 20,00; 8. Hind. Zinc Ltd. (1 Prospecting and lead-zinc deposits of zawar mines; 2. Development of new mine in the zawar area) 11,52.

EXPLORATION OF NEW MINES

Agnigundala Copper/Lead Deposits (Andhra Pradesh): The Geological Survey of India has found promising copper/lead deposits at Agnigundala in District Guntur of Andhra Pradesh. Though the reserves have been indicated to the extent of nearly 18-27 million tonnes of copper ore they have to be exploited for long run economic considerations. The development of the Agnigundala lead/copper belt was assigned to Hindustan Copper Ltd. in October, 1966. The Government has also approved in principle the development of these deposits.

The company has prepared a preliminary feasibility study on the upper level development of Bandalamottu lead/copper prospects in this area. The scheme provides for 6,500 metres of core drilling from the surface to delineate the shape of the ore body for lead and copper and an exploratory mining scheme expected to develop 1.12 million tonnes of lead ore containing 6.5 per cent. of lead

for the production of 500 tonnes of lead concentrate per day. The Agnigundala ore contained 1.5 per cent copper and 6.5 per cent of lead. The scheme with smelter is estimated to cost Rs. 5.68 crores and without smelter Rs. 4.89 crores. Exploitation is expected to commence from 1971.

Rakha Copper Project (District Singhbhum-Bihar): The Hindustan Copper Ltd. has prepared a scheme for the exploitation of Rakha Copper Deposits in District Singhbhum, Bihar at an estimated cost of Rs. 7·41 crores. The total ore reserves have been estimated at 13·9 million tonnes averaging 1·5 per cent. copper. It is proposed to develop a mine to produce 1,000 tonnes of ore per day to start with. 3,500 tonnes of copper metal will be produced per annum. The scheme is under consideration.

Dariba: Copper Deposits (Rajasthan): A scheme for carrying out further exploration in the area is now under consideration. In the meantime surveying, de-watering etc. are being done.

RUBBER INDUSTRY

INDIA produced 71,054 metric tonnes of raw rubber during 1968-69 as against 64,468 metric tonnes in 1967-68.

During the five-month period, April to August 1969, 30,012 tonnes of natural rubber, 8,893 tonnes of synthetic rubber and 5,550 (estimate) tonnes of reclaimed rubber were produced in India. Production of synthetic rubber declined considerably due to the strike of workers in the synthetic factory.

The consumption of all kinds of rubber during the period in India was 54,490 tonnes against 51,369 tonnes during the same period last year,

A total of 10,943 tonnes of rubber was imported during the period against 1,407 tonnes during the same period last year.

Of an area of about 1,87,514 hectares under rubber cultivation at the end of 1968-69, 1,74,734 hectares are located in the State of Kerala. Other rubber growing areas are the districts of Kanyakumari, Coimbatore, Salem, Nilgiris, Tirunelvely and Madurai in Tamil Nadu and Coorg, South Canara and Chickmagalur in Mysore State, and Andamans, Tripura, Maharashtra and Goa.

The total number of rubber estates registered upto the end of 1968-69 was 1,00,090.

The following are other details:-

Year	Planted area in heotares	Tappable Area (worked out on the basis of year of planting) in hectares	Production (Metric Tonnes)	Average yield per hectare in kgs.	
1964-65	155,324	108,500	45,616	420	
1965-66	164,713	112,700	50,530	448	
1966-67	171,260	113,500	54,818	483	
1967-68	181,592	117,700	64,468	548	
1968-69	187,514	122,200	71,054	581	

STATEWISE DISTRIBUTION OF THE PLANTED AREA AT THE END OF 1968-69

(Area in hectares)

	Hol	dings	Estates							
STATES	No. of units	Area	No. of units	Area						
Kerala	91,760	118,621	584	56,113						
Tamil Nadu	1,585	3,589	41	5,859						
Mysore	100	324	12	2,778						
Andamana			3	388						
Tripura	1	8	Nil	Nil						
Maharashtra	1	16	Nil	Nil						
Goa	3	18	Nil	Nil						
				-144						

Areas upto and including 20 hectares are classified as Small Holdings — (small growers).

Areas above 20 hectares are classified as Estates --- (large growers).

With effect from October 20, 1967, the Government of India fixed for all classes of business minimum prices, exclusive of sales tax, for the various grades and qualities of rubber and latex of different concentrations, excluding the cost of container. However, on November 16, 1968, Government lifted the maximum ceiling prices.

The quantities actually consumed during the last few years in metric tonnes were:

1964-65:	76,342	(natural	61.057:	synthetic	15.285):
1965-66:	85,318				21,553);
1966-67:	92.277			synthetic	
1967 - 68:		(natural			
1968-69:				synthetic	

Imports of rubber in metric tonnes were: 1964-65:18,318 (natural 15,003; synthetic 3,315); 1965-66:19,092 (natural 16,357; synthetic 2,735); 1966-67: 29,150 (natural 23,544; synthetic 5,606); 1967-68: 12,678 (natural 9,551; synthetic 3,127); 1968-69: 11,457 (natural 8,548; synthetic 2,909).

The production of natural rubber at the end of the Third Plan was 50,530 tonnes as against target of 45,000 tonnes. The estimate for 1969-70 is placed at 81,000 tonnes. In 1968-69 the percentage consumption of synthetic rubber to total consumption of natural and synthetic rubber was 24.

The total value of rubber plantation in the country is estimated at over Rs. 104 crores. The rubber plantation industry offered direct employment to about 135,000 workers in 1967-68 and means of livelihood for over 6.7 lakh people according to a modest estimate.

SYNTHETIC AND NATURAL RUBBER

Synthetic rubber (polymer) or man-made rubber is the chemical combination of two or more molecules (monomer) resulting in the formation of a new compound (a large molecule polymer) of the same empirical formula but of greater molecular weight. Natural rubber consists mainly of a polymer of isoprene.

Different varieties of synthetic rubber are: Styrene Butadiene Rubber (SBR), Butyl Rubber, Neoprene, Cispolyisoprene, Cispolybutadiene, Polysulphide Rubber and Nitrite Rubber.

The production of natural rubber by the end of 1967-68 has reached 64,468 tonnes. In case of synthetic rubber, 1,20,000 tonnes capacity would be established by 1970-71.

The major producers of natural rubber are Malaysia, Indonesia, Thailand, and Ceylon.

The following table shows the trend of total area under rubber cultivation, production and average yield during the last four years in our country.

Year		Total area (hectares)	Production (Tonnes)	Average yield (kg. per hectare)	
1964-65		155,324	45,616	420	
1965-66	4.5	164,713	50,530	448	
1966-67		171,260	54,818	482	
1967-68		181,592	64,468	548	

However, compared with other producing countries in the world, India's share in the total production is only 2.6 per cent as can be seen from the following table:

			Co	ountry								d	Production Juring 1968 000 tonnes)	Percentage to total production
Malaysia		b v	1 +							* 6	4.4		1,042	40.2
Indonesia		6 4	* *	4.6		* *					* "		740	28.5

PRODUCTION AND CONSUMPTION OF RUBBER

(In metric tonnes)

			Produ	etion	Consumption					
Year		Nat. Rubber	Syn. Rubber	Recl. Rubber	Grand Total	Nat. Rubber	Syn. Rubber	Recl. Rubber	Grand Total	
1950-51		15,830	-		15,830	19,854		_	19,854	
1960-61	4.5	25,697		5,183	30,880	48,148	7,397	5,453	60,998	
1965-66		50,530	14,741	9,764	75,035	63,765	21,553	9,774	95,092	
1966-67		54,818	22,358	11,538	88,714	68,685	23,592	10,913	103,190	
1967-68	* *	64,468	19,942	12,228	96,638	74,158	23,324	11,862	109,704	

The increase in the rate of consumption of raw rubber in India during the last 15 years has been fairly high. In spite of such a progress, the Indian rubber industry is still small in magnitude, in comparison with that of the more affluent nations.

The world consumption of synthetic rubber rose to 60 per cent of the total consumption in 1968 against 2 per cent in 1940. The synthetic rubber consumption in the last 25 years has gained such significance that in the U.S., the consumption is now 77 per cent of the total. The corresponding figures for other countries are, the U.K. 54 per cent, France 59 per cent, Japan 57 per cent, Germany 60 per cent. The percentage consumption of synthetic rubber in 1968 for India was only 23 per cent. It is estimated that the total world consumption of rubber (natural and synthetic) will be around 7½ million tonnes by 1975 and the proportion of synthetic rubber may come to 70 per cent. Therefore, if this increase in demand for synthetic rubber is to be met, an additional investment will be required.

India has been producing natural rubber since 1902 and has currently about 500,000 acres of land, mainly in Karala devoted to the production of natural rubber. Until 1956 there was little consumption of synthetic rubber, as India was, in fact, surplus in natural rubber. Gradually India started importing small quantities of synthetic rubber and by 1960 Indian rubber industry was consuming around 11 per cent synthetic rubber. Consideration was given, as early as 1957 by the Government of India to plan for the domestic production of synthetic rubber in view of the projected increase in demand of rubber. The local production of synthetic rubber was running far below the total capacity and in spite of that, the production during the last five year period was about 100,000 tonnes.

The total rubber consumption in India has been increasing at an average rate of 10 per cent per annum. The

following table gives the requirement of new rubber upto 1974-75.

('000 tonnes)

Year		Demand	Availability of natural rubber	Deficit	
1968-69		1.14	71	43	
1969-70		1,25	82	43	
1970-71		1,40	92	48	
1971-72		1,55	1.02	53	
1972-73		1,70	1,15	55	
1973-74		1,82	1,25	57	
1974–75		2,00	1,35	65	

In 1968-69, the import of natural rubber also continued in spite of the local production of synthetic rubber mainly because of the fact that the prices of imported natural rubber as well as indigenous natural rubber were lower than the local synthetic rubber. Still the percentage consumption of synthetic rubber has come around 25 per cent of the total consumption. But, by the end of IV Plan, when the total new rubber consumption is likely to be around 1,80,000 tonnes, some 55,000 tonnes of synthetic rubber, produced locally can be consumed. The estimated production of natural rubber will be some 1,25,000 tonnes and coupled with the consumption of 55,000 tonnes of synthetic rubber, only marginal quantities of special synthetic rubber will have to be imported.

Rubber Goods: India has a modern manufacturing industry engaged in the manufacture of various rubber goods such as tyres, toys, rubber footwears, tubes, hoses, fan beits, water-proof fabrics — Mackintosh, latex foam sponges and other rubber components of railway fittings etc. Of this, the manufacture of tyres and tubes accounts for more than 70 per cent of the total consumption of rubber.

The actual production of tyres for 1967-68 and 1968-69 and the estimated production for the next five years are given below:—

1967-68		- 1			.,	27,50,000
1968-69		2.5			* 1	37,30,000
196970	4 5	* *		* *		42,00,000
1970-71		* *	p n	6.0	* *	50,00,000
1971-72	h w	70.70			4.1	56,00,000
1972-73	F 4	* *			* *	63,00,000
197374	1.4			1.1		70,00,000

The estimated total requirements of automobile tyres and tubes are given below:—

		0				
1968-69		* *		* *		34,96,672
1969-70	w 6					38,48,239
1970-71	* *	* *			D-4	42,56,226
1971–72		1.7		* #	4.0	47,37,836
1972-73	* *	* *	10.4	* *	* *	52,99,278
1973-74	0.0		1.3			59,67,077

The present installed capacity of the various tyre manufacturing units is as follows:— (In lakhs)

		Existing capacity	Expansion under im- plementation	Total
Dunlop		11-97	2.50	14.47
Firestone		6.72	_	6.72
Ceat	P 4	4.00	2.50	6.50
Madras Rubber		3-60	2.50	6.10
Good Year	4.6	3.10	2.90	6.00
Incheck		3.00	3.00	6-00
Premier	* *	3-00	3.00	6-00
Mody (New)		_	4.00	4.00
Total	* 11	35.39	20 · 40	55.79

Considerable increase is registered in the export front of Indian Rubber products during the year 1968-69. This can be evident from the following comparative figures of export performance by the rubber industry during the years 1967-68 and 1968-69.

Product	1967–68	1968-69
	(Rupees	Lakhs)
Automobile tyres and tubes	226.8	327.6
Tyre retreading material	5.6	2.9
Canvas footwear-rubber sole	159.3	200.8
Cycle tyres and tubes	65-4	76.2
Rubber gloves	43.8	61.7
Other rubber products	34.0	58.6
Total	534.9	727.8

This increase of Rs. 192.9 lakhs works out to about 36 per cent increase in exports in 1968-69 over the previous year.

To ensure sale of synthetic rubber, produced indigenously, at reasonable prices to consumers, the Union Government has decided to control the sale prices of such rubber under Essential Commodities Act. The sale prices have been fixed after a cost study. The ex-works prices including Selling Commission of different grades of rubber are: Grade S-1,500 and S-1,502, Rs. 4-40 per kg., grade S-1,712, Rs. 3-90 per kg. and grade S-1958 Rs. 6-80 per kg.

SERICULTURE AND SILK

N EXT to handloom and khadi, sericulture is the biggest village industry extending part or whole-time employment to about 3.2 million people. Sericulture provides raw materials for India's traditional handlooms which consume over 90 per cent of rawsilk output. Exports of pure silk fabrics, fetched about Rs. 60 million in foreign exchange in 1968. The target of exports of pure silk fabrics for the Fourth Plan period has been fixed at Rs. 590 million.

A physical target of 3.0 million kgs. of raw silk has been fixed at the end of the Fourth Plan as against actual production of 2.321 million kgs. in 1968.

Silk is cultivated in 12 out of 17 States and in 3 out of 10 Union Territories. Mulberry silk is produced mainly in three States viz., Mysore, West Bengal and Jammu and Kashmir which together account for 98 per cent of the total mulberry silk production.

Among the non-mulberry varieties, tasar is extensively reared in the forest regions of Bihar, Madhya Pradesh and Orissa. Assam produces about 90 per cent of eri silk and the entire Muga silk is its exclusive production.

There are at present two Govt. Spun Silk Mills—at Channapatna in Mysore State and Assam Spun Silk Mills Ltd., at Jagi Road in Assam. The two mills together have an installed spindleage of 9,000 for spun silk yarn and 840 for noil yarn and the rated production capacity is 45,000 kgs. of spun silk yarn and 57,400 kgs. of noil yarn annually.

SILK INDUSTRY IN STATES Andhra Pradesh

Andhra State produces small quantities of the three varieties of silk viz., mulberry, eri and tasar. The production of mulberry, eri and tasar during 1968 was 63 kgs., 26 kgs. and 809 kgs. respectively. The State possesses great potential for tasar. Mulberry silk industry is confined to the districts of Anantapur and Chittoor, eri culture to Mahbubnagar and Kurnool while tasar to the forest regions along the banks of the river Godavari in Karimnagar, Warangal and Adilabad Districts. It has a flourishing handloom silk weaving industry dispersed in Peddapuram, Dharmavaram, Siddipet, Raparti, etc. Eight sericultural schemes with an outlay of Rs. 1.75 lakhs were implemented by the State during 1968-69.

Assam

Assam is the biggest non-mulberry State having an extensive eri culture, exclusive muga culture and a little of mulberry silk production. The main silk cultivating districts are Goalpara, Kamrup and Nowgong in the Assam valley. Sibsagar is the main area for mulberry production. Since there are no large-scale industries in this border State, silk cultivation plays a vital role in its economy. It is estimated that about a million people derive their livelihood from silk cultivation.

There are 11 silk farms, two mulberry graft nurseries, four mulberry silk reeling units, four muga farms, 12 eri

grainages and 33 cocoon growers' and reelers' co-operatives and one experimental tasar seed station. Three cocoon marketing centres have been set up. There is also a well-equipped seri-cultural training institute and a research institute at Titahar. For utilisation of silk waste, the State Government has set up a 3,000 spindle Assam Spun Silk Mills at Jagi Road. The State implemented 11 sericultural schemes. The Central Silk Board had approved an outlay of Rs. 12.283 lakhs for these schemes during 1968-69.

Bihar

Bihar is predominantly a tasar-producing State, contributing about 40 per cent of India's total tasar silk production. It is also the biggest eri silk-cultivating State after Assam. Bihar has also a small mulberry silk production. About 1,20,000 people, it is estimated, derive their livelihood from silk cultivation. The Board approved a provision of Rs. 7·00 lakhs for the implementation of 10 sericultural schemes during 1968-69.

Bihar produces over 1,26,726 kgs. of tasar raw silk annually. For development of the tasar silk industry, the State Government has set up in recent years 16 tasar sed supply stations, 42 sub-stations, 18 training centres, four marketing centres and 15 co-operatives. There is also a silk institute in Bhagalpur. The Central Silk Board established a central tasar research station at Ranchi in 1964. The State Government have decided to set up a spun silk mill with 3,000 spindles at Bhagalpur during the Fourth Plan.

Jammu & Kashmir

Kashmir is considered as a prolific source for univoltine silk in India. The industry is mainly practised in the districts of Anantnag, Baramulla, Doda, Jammu, Reasi and Udhampur. The annual production of raw silk is about 66,832 kgs. or about four per cent of the total mulberry silk output. The industry provides employment to about 3,50,000 persons. The Kashmir Valley has the most suitable climate for univoltine silkworm rearing. The Board had approved 15 sericultural schemes, with an allocation of Rs. 23·12 lakhs which have been implemented during 1968-69.

There are also 45 mulberry nurseries — 29 in Jammu and 16 in Kashmir and four basic graft nurseries — two in Jammu and two in Kashmir. In recent years two basic seed cocoon farms have been set up. Besides, there are two hibernation centres at Srinagar and Batote. The C.S.B. has also established a Central Silkworm Seed Station in Srinagar for production of grand parent stock seed evolving suitable race of silkworms.

The entire cocoon output is reeled by filatures located in Srinagar and Jammu. These two factories have five units having a total installed capacity of 749 basins. There are no cottage basins or charkas in the State. There are about 1,030 handlooms and 148 powerlooms engaged in silk weaving. The main items of production are white plain silk called "tabby", silk shirting and coatings.

Madhya Pradesh

Madhya Pradesh is the leading tasar producing State. The industry provides employment to about 50,000 rural people. The State has also a small mulberry silk production.

There are nine mulberry silk farms, one grainage, one graft nursery and a reeling unit, eight tasar seed farms, two tasar training centres, six tasar cocoon markets, a tasar research unit and one reeling and spinning unit. The Central Silk Board has established a Central Tasar Silkworm Seed Station at Lakha in 1964. 11 schemes were technically approved by the Board at a total cost of Rs. 5-170 lakhs.

Maharashtra

In Maharashtra, Bhandara and Chanda districts have traditional tasar culture and there is one tasar farm at Armori; the State has also taken up eri cultivation on experimental basis. The Maharashtra State Khadi and Village Industries Board has under its fold two mulberry farms at Gureghar and Wai mainly for the purpose of research and demonstration.

Mysore

Mysore is the biggest polyvoltine mulberry silk producing State in India contributing over three-fourths of the total mulberry silk production. The industry is concentrated in the districts of Bangalore, Kolar, Mandya, Mysore and Tumkur and to a small extent in Belgaum and Coorg. About seven per cent of the total population of the State derives livelihood from silk cultivation. The State Sericultural Department has spotted the presence of tasar silkworm in the forests of Sirsi (North Kanara District) and a scheme for development of tasar industry is under implementation. The State obtained 19 sericultural schemes technically approved by the Board with an allocation of Rs. 29.00 lakks during 1968-69.

There are about 78,500 hectares under mulberry cultivation. The yield of leaf per acre from rainfed plantations is about 1,800 kgs. and from irrigated areas about 3,600 kgs. per year. Nearly five to six crops are taken from irrigated plantations and four to five from rainfed ones. There are four graft nurseries producing over six lakh grafts of improved strains.

At present there is a hill rearing station at B.R. hills for preservation of stock races and their amelioration. There are six nurseries, 35 silk farms, 54 grainages, 489 licensed seed preparers and 107 chawki centres.

Raw silk reeling is done by traditional charkas by improved cottage basins and also by filatures. Mysore produces about 8.56 lakh kgs. of charka silk (including 23,208 kgs. of dupion silk), 4.17 lakh kgs. of cottage basin and 1.33 lakh kgs. of filature silk. The State has at present over 4,250 active charkas, 2,850 cottage basins and 1,000 filature basins.

The Silk Marketing Co-operative Society, Bangalore has recently set up branches at Nanjangud and Kancheepuram (Tamil Nadu). There are 61 Government occom markets established under Mysore Silkworm Seed Act in addition to a voluntary cocoon market at Ramnagaram. For utilisation of silkwaste, the State has a Spun Silk Mill with 6,000 spindles. Besides, it has a sericultural training school at Channapatna and a silk conditioning house in Bangalore. The Central Sericultural Research and Training Institute, Mysore has a Central Silk Board project functioning at Mysore. The State has a flourishing silk twisting industry with over 60,000 spindles and a silk weaving industry with over 7,500 hand-looms and 2,600 power-

Orissa

Orissa is a non-mulberry State having traditional tasar silk industry. The annual production of tasar silk is about 21,000 kgs. About 1,15,000 people depend for their bread on this pursuit. The State has no mulberry culture.

The State has now three seed supply stations, two eri seed stations, one reeling and spinning centre, one research unit and 19 tasar rearers' co-operative societies. The State has established a Tasar Co-operative Society in 1963. Besides tasar rearers' co-operatives, four weavers' co-operatives have also been organised, under the sericultural schemes. Seven schemes were implemented during 1963-69 at an outlay of Rs. 2·00 lakhs.

Punjab

Sericulture is practised mainly in the districts of Amritsar, Gurdapur, Hoshiarpur and to some extent in Ferozepur also. Mulberry is raised as tree and is mainly cultivated for their fruits and timber.

The present requirement of industrial seed in the State is 1,500 ozs. which is prepared at Dalhousie grainage. The State has a Basic Seed Station at Sujanpur. A demonstration-cum-training centre for reeling is operating at Dinanagar. Almost the entire ecocon crop is reeled on Charkas. The Punjab State had a provision of Rs. 1.099 lakhs at its disposal for implementing 4 sericultural schemes during 1968-69.

Tamil Nadu

The sericulture industry in Tamil Nadu is at present confined to the districts of Coimbators, Nilgiris, Salem and Tirunelveli. The industry provides employment to about 6,000 people. Mulberry is raised as 'bush'. The area under mulberry was 1,658 hectares in 1967. There are 11 mulberry graft nurseries, one basic seed farm, four Government silk farms, one Government grainage, two chawki units, one reeling unit of 25 basins, four cocoon markets, one gut section at Coonoor and a Sericultural Co-operative Society at Talvadi. Tamil Nadu at present produces about 3,950 kgs, of raw silk. It is one of the major raw silk consuming States with over 20,000 handlooms on silk weaving. The State obtained technical approval from Central Silk Board for implementing 13 sericultural schemes with a provision of Rs. 9.490 lakhs, during 1968-69.

Uttar Pradesh

The State accounts for an annual production of 3,000 Kgs. of mulberry silk. Five sericultural schemes at a total cost of Rs. 5.452 lakhs were implemented during 1968-69.

Mulberry silk industry is practised in six districts of Dehra Dun, Etawah, Garhwal, Gorakhpur, Nainital and Saharanpur. Eri culture is carried on in two districts of Rampur and Deoria and tasar culture is found in Mirzapur district.

Both bivoltine and polyvoltine silkworm races are reared. Forty-five chawki rearing centres and four demonstration silk farms have been set up. For production of disease-free seed, there are three grainages, and for production of basic seed cocoons, four farms. Recently 35 rearers' co-operatives and an apex society have been organised in the State. A co-operative silk filature of 30 basins was established in 1964. U.P. is a major raw silk consuming area with over 30,000 silk handlooms concentrated in Varanasi alone.

West Bengal

Mulberry culture is practised in the districts of Bankura, Birbhum, Darjeeling, Malda and Murshidabad. The annual production of mulberry silk in the State is 2.91 lakh kgs. Mulberry is cultivated as 'bush'. There are about 6,600 hectares under mulberry. There are 16 mulberry nurseries and 12 Government grainages and 40 aided grainages. The State has also four mulberry graft nurseries, three in Malda and one in Murshidabad district. Three tasar seed stations with their sub-stations and three eri seed stations are functioning in the State.

The Board had approved 16 schemes with an allocation of Rs. 8·430 lakks for implementation during 1968-69.

There is a foreign race seed station at Kalimpong and a hill nursery for raising F1 seed of foreign races at Matigara. Two chawki rearing centres have also been set up. Raw ailk reeling is done on traditional charka. The use of Cottage basins for reeling has shown a progressive increase. A 100-basin filature has been set up at Madhughat (Malda Dist.). The State has established two training institutes — one for sericulture at Berhampore and other for reeling at Peddie (Malda). Besides, the Central Government's Central Sericultural Research Station is also located at Berhampore. The silk conditioning house is stationed at Calcutta. The important weaving centres are Bishnupur, Baswa, Raghunathpur and Chak Islampur. There are over 4,500 hand-looms in the State.

UNION TERRITORIES

Himachal Pradesh

Himachal Pradesh rears bivoltine mulberry silkworms. Kangra district forms a potential zone for production of reeling cocoons. The other regions where sericulture is practised are Sirmur and Mandi districts. The State has 22 mulberry graft nurseries, 53 block mulberry plantations, one basic seed station at Nagrota, two Government Grainages and 13 mulberry farms, one reeling-cumdemonstration centre and one silk filature at Nurpur. The present requirement of industrial seed in the State is about 1,400 ozs.

Manipur

Manipur has both mulberry and eri silk cultivation and potential for muga and tasar culture. Manipur produces about 300 kgs. of mulberry and about 429 kgs. of non-mulberry silk. The territory has three silk farms, and demonstration centres for eri and muga. There are over 4,000 rearers. Nine schemes at a total cost of Rs. 0.922 lakh were approved by the Board for implementation during 1968-69.

Tripura

Sericulture has been recently introduced. In addition to six mulberry farms, two demonstration centres, one for eri rearing and the other for tasar rearing have been set up. Some 50 families have taken up silk cultivation as source of their livelihood. The Central Silk Board approved 5 sericultural schemes with a provision of Rs. 0-400 lakh, for implementation during 1968-69.

CENTRAL SILK BOARD

An apex body consolidating and coordinating the sericulture industry in States, is the Central Silk Board. CSB is a 'body corporate' charged with functions 'to promote development of silk industry by such measures as it thinks fit'. The measures include rendering financial and technical assistance, 'undertaking, assisting or encouraging scientific, technological and economic research', 'devising means for improvement of all sectors', collection of statistics and to advise the Central Government on all matters relating to the raw silk industry, including import and export of raw silk.

Liaison Offices: In order to co-ordinate the developmental activities of silk industry in the States, the Board has set up liaison offices in New Delhi, Calcutts, Bangalore and Srinagar. These offices keep close watch on the sericultural schemes under implementation in the States and report technical progress.

Main Activities

1. Providing Funds for silk schemes: CSB recommends financial assistance in the form of either grant-in-aid or loan for execution of silk schemes by the State Governments. It also assesses technical progress of sericultural schemes under implementation in the country.

2. Providing Technical Know-How: CSB gives assistance for scientific and technical work undertaken by States' sericulture departments and helps them to secure technical personnel and guidance. The Board has so far sponsored visits of four sericultural experts from Japan and deputed 20 Indian Sericulture Officials to Japan and two to China. CSB also appoints experts' committees to help States to overcome major problems. Service Stations: Central Silk Board has established a Service Station viz. Central Silkworm Seed Station at Srinagar for production of basic seed. It has taken over from the Government of Tamil Nadu, the Hill Rearing Station at Cooncor (Nilgiri District) now named as Silkworm Seed Station to function as a sub-station for the Central Silkworm Seed Station, Srinagar. It has also established a Central Tasar Silkworm Seed Station at Lakha (M.P.). The Board also contemplates to set up a pilot centre in Himachal Pradesh for demonstrating the modern techniques of rearing/reeling with improved appliances.

Sericultural Research:

Central Silk Board has co-ordinated sericultural research in the country. The Board is guided by a Committee of scientists on all matters relating to sericultural research. The Research Institute/Stations working under the control of the Board are:

The Central Sericultural Research & Training Institute, Mysore;

The Central Tasar Research Station, Ranchi, Bihar.

The Central Sericultural Research Station, Berhampore (W.B.) and

The Sericultural Research Station, Titabar, Assam.

Training :

Central Silk Board is also assigned the task of training technical personnel on all India basis. The All India Sericultural Training Institute, Mysore, has been integrated with the Board's Research Station at Mysore. So far 280 candidates from various States have been trained.

Distribution of Imported Silk: CSB advises the Government of India on import policy.

Domestic demand for raw silk in the country has always been in excess of the country's production. The Tariff Commission had estimated in 1966, the demand for mulberry and non-mulberry silk at 2.2 million kgs. for 1967 against which production in 1966 was 2.046 million kgs. Imports of raw silk are arranged to meet the gap between demand and production and also to meet the requirements of high grade imported silk by specialised sectors of the industry. Imports during 1968 amounted

to 0-37 lakh kgs. valued at Rs. 51-21lakhs as against 0-42 lakh kgs. valued at Rs. 54-67 lakhs in 1966. From June 1966, imports of raw silk are permitted under the liberalised import policy for exporters against their export performance.

With effect from 2nd January, 1965, quality inspection of tasar silk fabrics was introduced to conform to minimum specifications prescribed, with a view to ensuring a sound foundation for export trade in tasar fabrics.

Exports: Exports of mulberry silk fabrics earned Rs. 4·18 crores in 1968 as against Rs. 2·88 crores in 1967 and Rs. 1·73 crores in 1965, while tasar exports fetched Rs. 1·32 crores in 1968 as opposed to Rs. 0·54 crore in 1966 and Rs. 0·72 crore in 1965. Of late Japan, West Germany, Sweden and Hong Kong have evinced keen interest in our tasar fabrics, the former two countries importing goods worth rupees eleven lakhs each.

The U.S. is our biggest market for mulberry silk fabrics importing goods worth Rs. 65.07 lakhs in 1968 followed by Sweden (Rs. 51.42 lakhs). Other major importers are Hong Kong, U.S.S.R., Japan, Malaysia, the U.K., and West Germany.

A variety-wise review of exports, indicates that dress materials and furnishing fabrics, valued at Rs. 1-92 crores in 1968, constituted over 46 per cent of our mulberry silk exports, while scarves and sarees accounted for 26 per cent and 15 per cent respectively. Other items in the list of our fabrics exports are ties, garments, brocades, silk embroidery yarn, etc. Of late readymade garments are gaining ground abroad whose exports were valued at Rs. 47-46 lakhs in 1968 against Rs. 32 lakhs in 1967.

Devaluation gave a prop for our silkwaste exports. Silkwaste exports were of the order of 4.95 lakh kgs. in 1968 earning Rs. 46.96 lakhs in foreign exchange as against 6.68 lakh kgs. valued at Rs. 66.49 lakhs in 1966.

Under the present export policy of silkwaste, the silkwaste of South Indian origin is allowed to be exported only through Madras Port and is linked with supplies effected to the indigenous spun silk mills situated at Channapatna (Mysore) and Jagi Road (Assam).

Protection to Sericulture Industry: The Government of India have accepted the recommendation of the Tariff Commission that protection to the sericulture industry should be continued for a further period of three years upto the 31st December 1969 at the existing rate of protective duty viz. 30 per cent ad valorem only.

SMALL-SCALE INDUSTRIES*

INDIAN industry is made up primarily of smallscale rather than large-scale units. It is reckoned that there are about two crore persons engaged in small-scale and cottage industries.

The small-scale industry is primarily the responsibility of the State Government and not of the Centre. But the Centre supplements the efforts of the State Governments.

Small-scale industries include all industrial units with a capital investment of not more than Rs. 7-5 lakhs irrespective of the number of persons employed. Capital investment now means investment only in plant and machinery, irrespective of the number of people employed and excluding investment on lands and buildings.

Under the State Aid to Industries Act/Rules State Governments are empowered to provide finance in the form of loans, guarantees for loans raised from banks, subscription to shares and debentures, etc. Although loans under the Act are generally for medium and longterm needs, advances are made for short-term requirements also.

In most of the States, loans up to Rs. 1,000 are being advanced on personal bonds, up to Rs. 5,000 against one or more personal sureties and above Rs. 5,000 at 75 per cent of the security (land, building, machinery, equipment, stocks and other assets including those created out of the loans). These loans are repayable in easy equal instalments spread over 10 years. No loan to any single party can normally exceed Rs. one lakh and to an industrial co-operative Rs. two lakhs without the prior concurrence of the Central Government.

The rate of interest on loans advanced under State Aid to Industries Act would be governed by the capital investment of small-scale industries — it would be 3 per cent to industrial undertakings with capital investment upto Rs. 2 lakhs, 4½ per cent to undertakings with capital investment of Rs. 2 to 4 lakhs and 6 per cent to undertakings with capital investment of more than Rs. 4 lakhs. This does not, however, apply to industrial co-operatives in the small-scale sector which will continue to receive loans at 2½ per cent.

New industries as well as industries which need revival or development in the cottage and small-scale sectors are eligible for grant of loans. Preference would be given to small-scale units in the light of their capital investment i.e. units with smaller capital investment would be given preference over others. While much is not yet known about the role of commercial banks in this process, the State Bank of India under its liberalised scheme made significant progress. Another landmark had been the initiation from 1st July 1960 of the Credit Guarantee Scheme by the Reserve Bank of India. Loans are also guaranteed to small industries by the National Small Industries Corporation and the State Financial Corporations. The N.S.I.C. has been extending financial assistance through its scheme under which it supplies machines on hire-purchase basis.

The most recent introduction is the scheme of the State Bank of India to grant loans to technicians on personal surety for starting small industries related to their respective technique or know-how.

Small-scale industries are distinct from village industries and handicrafts. Generally speaking village industries are of traditional nature catering primarily to local markets.

Small-scale industries can and do produce a large variety of consumer goods:—bicycles, agricultural implements, sewing machines, domestic electrical appliances, builders' hardware, cutlery and domestic hardware, furniture, wood work, footwear and other leather products, ceramics, glassware, sports goods, hand tools, surgical and drawing and surveying instruments, mechanical toys, matches, chemicals, paints and varnishes, polishes, etc.

Small-scale industries can really be classified into four main groups:—manufacturing industries, feeder industries to large industries, servicing industries, and ancillaries to large industries.

Manufacturing industries include complete articles or products manufactured for sale directly to consumers (consumer items) and in some cases used as spare parts.

Feeder industries are a kind of general engineering shops which specialise in certain types of products and services such as castings, forging tools and dies, electroplating and galvanizing, welding and other services for large scale industries. They do not have a regular line of work but take job orders from time to time depending upon the need of the large industry.

Servicing industries mostly cover light repair shops which are necessary to maintain mechanical equipment owned by the community. They cater to such works as auto repairs, repair of cycles and radios, photographic studios, repair of pumps, motors and other kinds of light machinery used in industry, agriculture, etc.

The working group on small-scale industries has agreed for an allocation of Rs. 927-03 lakbs for the establishment, expansion and servicing of small-scale industries during 1963-69 against an estimated expenditure of Rs. 792 lakbs during 1967-68.

Ancillaries to large-scale units include parts and components for several light engineering products such as cycles, sewing machines, electric motors, radios, clocks, automobiles, diesel engines, textile and other machinery and machine tools.

REVIEW

The Small-scale Industries Board which helps the Government in formulating various policies and programmes relating to the development of small-scale industries was reconstituted with effect from July 1961.

Up to the end of 1968, nearly 1.25 lakh small-scale units had been registered on an optional basis with the States' Industries Directorates as compared to about one lakh units at the end of 1965. The number of on-register small-scale factories which availed of facilities from Central Small Industries Organisation have been estimated at about 3 lakhs. Even the limited data available on the production and employment potential of this sector show that in 1963, about 29 per cent of total output in the industrial sector and 21 per cent of the value added by manufacture, were contributed by the small-scale sector. They provided employment to about 1.5 million workers.

Apart from the Central and State assistance to the small-scale industries, the State Bank of India and 14 major commercial banks, and the State Financial Corporations have been advancing long and medium term loans.

The number of industrial cooperative societies increased from 36,000 with a membership of 2.73 million in 1960-61 and sales Rs. 81.2 crores to about 57,000 with a membership of 3.65 million in 1967-68 and sales Rs. 185.1 crores.

Considerable progress was also made in providing credit facilities to small industries from institutional agencies. The credit limits sanctioned by the State Bank increased from Rs. 149.7 crores in 1968 to Rs. 180 crores in 1969.

Under the credit guarantee scheme of the Reserve Bank, guarantees for loans amounting to about Rs. 110 crores were sanctioned, as against Rs. 188.8 crores applied for.

In pursuance of the recommendations of the Rural Industries Planning Committee which was constituted in April 1962, 45 Rural Industries Projects have been taken up in selected rural areas. According to a recent review, nearly 1,450 new units had been set up in these project areas up to 1964-65. Recently, 4 more Projects have been taken up in the vicinity of large-scale industrial complexes of Ranchi, Durgapur, Bhadrawati and Bhilai.

The intensive campaign which aims at the development of small-scale industries in under-developed areas in various districts of States was launched in the States of Andhra, Uttar Pradesh, Madhya Pradesh, Mysore, Punjab* and West Bengal during 1961-62, bringing the total number of such districts to 42.

There are now 16 Small Industries Service Institutes, 6 Branch Institutes and 66 Extension Centres, including Production Centres. They give valuable assistance to the small-scale units such as giving technical advice and demonstrations, preparing drawings for various types of improved tools and small machines and giving training in the handling of modern tools and equipment. The various training programmes initiated by the Small Industries Service Institutes include training of block level extension officers, evening classes in business management for the benefit of Government Officers and small-scale industrialists. Forty-seven mobile workshops fitted

with modern machine tools attached to the S.I.S.I. have been touring rural areas with a view to imparting technical knowledge.

The responsibility for the development of *khadi* and village industries, which help in relieving unemployment and under-employment in rural areas, has been vested in the Khadi and Village Industries Commission. (For details of the progress achieved in village industries, see article *Cottage Industries* in this book.)

The development of the coir industry, which is entirely in the small-scale sector, is the responsibility of the Coir Board. A sum of Rs. 3 crores had been allotted for its development during the Third Plan. The provision in the Fourth Plan for the industry is Rs. 4-42 crores.

An outlay of Rs. 101·74 crores has been provided in the Fourth Plan for the development programme of small-scale industries and industrial estates as compared to the estimated expenditure of Rs. 86 crores in the Third Plan. The break-up of the Fourth Plan allocation under the major heads is as follows (in Rs. crores): State Government schemes: 67·74; Industrial Estate: 20; Central Government schemes: 34.

According to the Fourth Plan (1969-74) the estimated expenditure during the Third Plan for the development of village and small-scale industries amounted to Rs. 219-56 crores, while the Fourth Plan provides for an outlay of Rs. 200 crores.

DEVELOPMENT AGENCIES

The nature of assistance available and the organisations responsible for rendering such assistance are given below:—

- I. (i) The technical know-how; (ii) industries information service; (iii) model schemes and industrial designs; and (iv) market research: Central Small Industries Organisation (Small Industries Service Institutes and Extension Centres); (v) Common facilities (Small industries service institutes, extension centres and State Govts.).
- 2. Training: both technical and managerial (Small industries service institutes, State Govts. Directorates of Industries), Directorate of Training and Employment (Industrial Training Institute).
- 3. Finance: (a) For each loans:—(i) Long term (State Govts. under State Aid to Industries Acts, State Financial Corporations); (ii) Short term (State Bank of India, cooperative banks, scheduled banks under the Guarantee Scheme of the Reserve Bank of India); (b) For machinery on hire purchase (National Small Industries Corporation, New Delhi and its branches).
- 4. Marketing Services (Specially Govt. Purchase Scheme) (National Small Industries Corporation and its branches).
- 5. Factory accommodation in industrial estates (State Goyts, Directorates of Industries), National Small Industries Corporation (for accommodation at Okhla and Naini industrial estates only).
- 6. Raw material and power supply (State Directorates of Industries).

The agencies mainly concerned with the development of small-scale industries in the country are thus the State Directorates of Industries, Small Scale Industries Organisation under the Development Commissioner, Small Industries Service Institutes functioning in the States as well as in New Delhi and the National Small Industries Corporation, with four branches one each at Bombay, Calcutta, Delhi and Madras.

[·] Composite State.

INDUSTRIES AND LOCATION

The Office of the Development Commissioner of Small-Scale Industries, New Delhi, carried out a survey in certain areas relating to location of industry and production. The findings of this survey which show what industries were located in the area surveyed and what the production was in that area are given in the 1959-60 edition of the Directory.

EXPORTS

The following items of small industries' products have been selected by the National Small Industries Corporation for promoting their sales in overseas markets:—Leather footwear and leather goods; Cotton and Woollen hosiery; Sports goods; Builders' hardware, locks and scissors; Tinned fruits, chutneys and pickles; Paints and varnishes; Glass beads.

National Small Industries Corporation and the State Trading Corporation also assist in import and distribution of some articles like copper, zinc, copper and brass scrap, cycle and sewing machine parts, knitting needles.

NATIONAL SMALL INDUSTRIES CORPORATION LTD.

(See article 'All India Corporations').

SERVICE INSTITUTES

The Institutes give broad outlines of the potentialities of different small-scale industries. They supply information on the number of existing units, their production and installed capacities as well as the present consumption, future demands and export possibilities for their products.

Information about the working capital required for a new unit, suppliers of machinery and raw materials and markets for the sale of products, is also made available by the Institutes.

There are 22 Small Industries Service Institutes including six branch institutes in the country.

They are located in New Delhi, Bombay, Calcutta, Madras, Agra, Jaipur, Ludhiana, Bangalore, Indore, Rajkot, Patna, Cuttack, Gauhati, Srinagar, Kanpur, Allahabad, Hubli, Hyderabad, Trichur, Ahmedabad and Goa.

There are also 66 Extension Centres to provide specialized technical assistance to particular industries.

INDUSTRIAL ESTATES

Another feature of the industrial policy is the establishment of industrial estates. This was initiated in 1955.

The main object is decentralization. Government seeks to remove small industrial units from crowded urban

areas and thus reduce the pressure on the latter, and secondly it seeks to provide small units with factory space and common facilities for efficient working.

The State Governments acquire and develop land, construct roads, put up factory buildings, arrange for supply of water and electricity and also set up common service workshops. The factory buildings in the States are then let out at concessional rents, outright sale or hire-purchase basis to small entrepreneurs.

The Government of India advance to the States the entire cost of the estates as loans. Grants are also given for specific purposes, such as planning and designing of these estates. The loans will carry interest at 4½ per cent.

These industrial estates provide better accommodation for small industries with facilities of power, water, etc. They bring industries together and facilitate the establishment of common servicing centres, introduction of modern techniques, collective purchase of raw materials and sale of finished products. They stimulate the cooperative spirit among them.

Industrial estates are of two kinds — large estates near big cities and urban areas and small ones in community development blocks.

The larger estates cost roughly from Rs. 20 to 30 lakhs, the smaller ones from Rs. 2 to 3 lakhs.

Only two - the one at Naini and the other at Okhla - are under the National Small Scale Industries Corporation. The rest are under the States.

During 1960, the Government took decision to establish several new types of Industrial Estates namely Industrial Estates by private agencies, Ancillary Industrial Estates, Functional Industrial Estates, University Industrial Estates and smaller Industrial Estates.

Apart from the government sponsored industrial estates a number of estates are being set up by Cooperative Societies and Joint Stock Companies of industrialists. In Maharashtra and Gujarat 20 such estates were functioning at the end of March 1965.

The State Governments had established 345 industrial estates by the end of September 1967. They provided accommodation in 5,814 sheds. The investment in fixed asset is Rs. 207 crores and employment provided is 979,000 persons which forms 9·1 and 40·1 per cent of all India factories investment and employment respectively.

With the nationalisation of 14 major commercial banks it is expected that more funds would be allocated to this sector.

Industrial Estates approved by the State Governments appear already in the previous editions of the Directory.

SPICES

INDIA has been, from ancient times, regarded as the home of spices. Spices play a very important part in the dietary of the people. The crops that produce the major spices are pepper, ginger, cardamom, turmeric and chillies, the minor spices being coriander, cumin, celery, fennel, fenugreek, clove, nutmeg, cinnamon and vanilla.

Indian spices are of the finest quality and today the demand for them has considerably increased in all countries. After meeting the internal requirements, substantial quantities of these spices are exported to foreign countries, to earn the much needed foreign exchange to our country.

PEPPER

Pepper is the most important dollar earning spice crop in India. It is grown in an area of about 100.89 thousand hectares. Production for 1968.69 is estimated at 21,420 tonnes against 22,700 tonnes during 1967.68. Indian pepper is of the finest quality in the world. In India, pepper is grown extensively in the States of Kerala, and Malnad parts of Mysore and on a small scale in

scattered localities in the eastern slopes of the Western Ghats.

More than 90 per cent of the pepper cultivation in India is concentrated in Kerala, the rest being shared by Mysore, Tamil Nadu and Pondicherry. During 1967-68, India had 102,260 hectares under pepper cultivation with a total production of 22,700 tonnes. The State-wise break-up for 1968-69 is given below:

State		Area ('000 hectares)	Production ('000 tonnes)
Kerala		 98-83	20.44
Mysore		 1.80	0.92
Tamil Nadu		 0.23	0.05
Others	a #	 0.03	0.01
Total		100-89	21.42

Export of pepper, which ranks first among dollar earning spices, was 18,952 tonnes valued at Rs. 9.75 crores during 1968-69.

GINGER

India is the largest producer of ginger in the world. During 1968-69 the country had 20,680 hectares under ginger and production was 19,290 tonnes with the following state-wise break-up.

State		Area ('000 hectares)	Production ('000 tonnes)
Andhra Pradesh		0.85	0.20
Gujarat		0.79	0.60
Kerala	4.0	11-42	10.84
Madhya Pradesh		0.71	0.64
Maharashtra		0.36	0.28
Mysore		1.06	1.14
Orissa	4.1	1.64	1.88
Rajasthan	4.4	0.06	0.05
Tamil Nadu		0.37	0.33
West Bengal		1.50	2-00
Himachal Pradesh		1.66	0.97
Tripura		0.26	0.36
Total		20.68	19.29

By exporting 1,717 tonnes of ginger, India earned foreign exchange worth Rs. 0.89 crore during 1968-69.

CHILLIES

The cultivation of this crop is scattered over almost all the states. The major chilli growing states are Maharashtra, Andhra Pradesh, Mysore, Tamil Nadu and Madhya Pradesh. The area under chillies in India during 1968-69 was estimated at 675,700 hectares and the total production at 418,700 tonnes. The state-wise break-up of area and production is shown in the following table.

State					Area ('000 hectares)	Production ('000 tonnes)
Andl. D	2 2	-				81.4
Andhra P	racesn	4.0			144.5	
Assam	1.0			4.1	7-7	4.7
Bihar	4.5				21-7	16.3
Gujarat				• 1	23.2	14·I
Li	* 4	* 1		* 1		. 2.3
Haryana	4.0	4.6		0.0	4.5	
Jammu &	Kashi	nir		0.0	1.0	3.0

State		(*(Area 000 hectares)	Production ('000 tonnes'	
Kerala			3-2	2.1

Tripura		4.4	1.1	0.4	
Pondicherry	b 4		0.1	0.1	
Total	**	- 1	675.7	418-7	

Through exports of 9,208 tonnes of chillies the country earned foreign exchange worth Rs. 2.26 crores during 1968-69.

TURMERIC

The major turmeric growing States in India are Maharashtra, Andhra Pradesh, Bihar, Tamil Nadu, Orissa and Kerala. The production of turmeric in India during 1967-68 was 118,200 tonnes from an area of about 55,800 heetres. The state-wise break-up of area and production of turmeric is given in the table below:

State		(Area '000 hectares)	Production ('000 tonnes)
Andhra Pradesh		B B	14.0	37.7
Assam			4.1	2.5
Bihar			6.0	6.9
Kerala			4.4	3.7
Madhya Pradesl	h.	4.4	0.3	0.2
Maharashtra			9.8	16.6
Mysore	4.0		1-3	2.6
Orissa	4.0	* 1	7-0	19.6
Rajasthan			0-1	0.1
Tamil Nadu		4.4	6-6	23 · 8
Uttar Pradesh			0-4	0.8
West Bengal			1.2	3.3
Tripura	4.4	4.6	0.6	0.6
Total	V V		55.8	118-2

The exports of turmeric during 1968-69 amounted to 6,351 tonnes and fetched Rs. 2-11 crores by way of foreign exchange.

TREE SPICES

India is in deficit in respect of tree spices viz. clove, nutmeg and cinnamon and to supplement the internal demand, imports are being made. During 1968-69, 45 tonnes of clove valued at Rs. 2·72 lakhs, 56 tonnes of nutmeg valued at Rs. 4·05 lakhs and two tonnes of cinnamon valued at Rs. 6·13 lakh were imported into the country.

DEVELOPMENT

Adoption of intensive cultivation practices such as proper manuring, plant protection, irrigation etc., increase in area wherever considered necessary and adoption of high yielding improved varieties of seed materials wherever available are some of the measures proposed. Large scale

multiplication and distribution of the new hybrid pepper 'Panniyur—I' which gives about four times the yield of the best local variety is one of the important measures already adopted. It is proposed to achieve an additional production of 19,000 tonnes of pepper, 5,000 tonnes of Ginger and 15,000 tonnes of turmeric by the end of the Fourth Five Year Plan period. A total annual production of 20,000 seedlings of clove and 10,000 seedlings each of nutmeg and cinnamon has been targetted for distribution to growers during the Fourth Plan period. A programme for production of nutmeg grafts which are early bearers has also been envisaged during the Fourth Plan period.

MARKETING

Since some of the major spices viz. pepper, ginger, turneric and chillies offer good scope for marketing on oc-operative lines, the National Co-operative Development Corporation provides financial assistance in the form of managerial subsidy in collaboration with the concerned State Governments, to such of those selected societies in the important regions of production. As a result of the efforts made by the Regional Office, Arecanut & Spices Development, several schemes for organisation and development of co-operative marketing of spice

orops such as pepper, ginger, chillies and turmerie were implemented in the major producing states of Kerala, Mysore, Tamil Nadu, Andhra Pradesh, Orissa etc.

The following will indicate the quantities of these commodities co-operatively handled during the year 1966-67.

		Quantity	Value
Pepper	4 +	9,840 quintals	Rs. 35-33 lakhs
Ginger	4.4	1,061 ,,	Rs. 2.86 ,,
Chillies	* *	6,310 ,,	Rs. 18-05 ,,
Turmeric		6,059 ,,	Rs. 8.52 ,,

PUBLICITY

Leaflets on turmeric, chillies, coriander, cumin & fennel, based on the latest results on research are prepared and distributed among the growers of the crop. Besides, a documentary film on Panniyur—I has been produced and released in English, Malayalam, Kannada and Tamil languages. Panels depicting the techniques of improved agricultural practices including pests and disease control are prepared and explained to the farmers at various exhibitions and fairs.

SUGAR INDUSTRY

THE Sugar Industry in India is the second largest industry in the public sector, next only to textiles. The total capital employed in the industry is over Rs. 400 crores and the value of its production about Rs. 660 crores. It contributes about Rs. 150 crores to the Central and State Exchequers by way of excise duty, cane cess etc. The industry employs over 2.25 lakh workers who receive about Rs. 40 crores annually by way of salaries. Besides, it sustains about 20 million agriculturists who received about Rs. 400 crores in 1968-69 season.

PRODUCTION IN THE PLAN PERIOD

The Sugar Industry produced in 1955-56 the last year

of the First Five-Year Plan, about 18.9 lakh tonnes of sugar, in 1960-61 the last year of the Second Plan, 30.3 lakh tonnes and in 1965-66 the last year of the Third Plan about 35.3 lakh tonnes.

The industry has achieved a record production of 35.60 lakh tonnes during the year 1968-69.

SUGARCANE

The following table gives the figures of sugarcane acreage, production of sugarcane, per acre yields of sugarcane and sugar production actually achieved in the season 1962-63 to 1968-69.

	Year			Area under sugarcane (acres)	Sugarcane production (tonnes)	Yield of cane per acre (tonnes)	Sugar production (tonnes)
1962-63		* 1		56,35,000	9,44,66,000	16.76	21,35,183
963-64	4.1		**	55,77,000	10,49,07,900	18-81	25,62,345
964-65			2.4	63,28,000	11,95,98,000	18.90	32,31,786
965-66				68,67,000	11,96,42,000	17.42	35,32,259
1966-67			1.1	57,53,000	9,27,26,000	15.94	21,50,699
967-68				50,33,000	9,68,84,000	19.30	22,48,994
968-69				60,50,000	11,75,80,000	19.44	35,60,880

The following are the regionwise figures of sugar production achieved in the 1967-68 (Oct./Sept.) and 1968-69 seasons respectively in lakh tonnes:

West Bengal 0·07; 0·07; Assam 0·04; 0·05; Whole Bihar 1·47; 2·60; Eastern U.P. 2·39; 3·71; West U.P.: "A" 2·03; 2·39; "B" 0·96; 1·11; "C" 1·64; 2·68; "D" 1·11; 1·86; Whole U.P. 8·13; 11·75; Haryana 0·54; 0·69; Punjab; 0·27; 0·41; Raigathan 0·06; 0·13; M.P. 0·04; 0·14; Orissa 0·05; 0·15; Maharashtra 6·21; 9·74; Gujarat 0·47; 0·76; Andhra Pradesh 1·89; 3·40; Tamil Nadu 1·87; 3·32; Mysore 1·22; 2·10; Kerala

0.07; 0.08; Pondicherry 0.09; 0.21; All India 22.49; 35.60.

SUGAR EXPORTS

Following the sharp decline in sugar production during the 1966-67 season exports in 1967 had to be limited to only about 2-17 lakh tonnes against about 4-41 lakh tonnes exported in 1966. In 1968 and 1969 about 98,000 and 95,400 tonnes of sugar were exported to meet the preferential quota of U.S.A. and U.K. The countrywise break-up of sugar exports during the years 1966 to 1969 is given below:—

(metric tonnes)

Country									1966	1967	1968	1969
U.S.A.									65,442 · 149	66,273 · 105	73,327 - 746	70,000-000
Japan								* *		Process.	_

[•] Includes about 3,000 tonnes exported against the quota for 1968-69.

Towards the end of 1968, a new International Sugar Agreement was negotiated. Under this India has been allotted an export quota of 3.5 lakh tonnes.

PROSPECTS FOR THE 1969-70 SEASON

The Government have continued their policy of partial decontrol for the season 1969-70. Under this policy the Government will acquire 70 per cent of the sugar produced leaving 30 per cent of the production for free sale.

The prespects for sugar production in the 1969-70* season are quite bright. The cane acreage in factory areas in the 1969-70 season is higher by about 14 per cent as compared to the last year and expectations are that the sugar production in the season may be around 40/42 lakh tonnes.

CO-OPERATIVE SECTOR

National Federation of Co-operative Sugar Factories Ltd.

L-8, South Extension Part II, New Delhi 49.

The National Federation was set up in December 1960 with the object of coordinating and facilitating the working

of co-operative sugar factories, State and Zonal Federations and to assist in the promotion of organisation of new co-operative sugar factories.

So far, licences/letters of intent have been issued for establishment of 110 co-operative sugar factories. Of these 64 sugar factories have gone already into operation. Others are in various stages of establishment. In the year 1968-69, the co-operative sugar factories produced 12.05 lakh tonnes of sugar, which was 34 per cent of the total production in the country in that year. The co-operative sector was also the major producer and supplier of raw sugar for export in 1969. The co-operatives' contribution was 0.73 lakh tonnes of raw sugar or about 77 per cent of the total raw sugar production.

The National Federation has undertaken many useful activities during the last nine years of its existence and has made its presence felt. It is recognised by Government as the main spokesman of the co-operative sector in the sugar industry.

The total sugar production during the first seven months of 1969-70 was 36-77 lakh tonnes against 20.95 lakh tonnes during the same period in 1968-69.

TOBACCO INDUSTRY*

INDIA is the third most important tobacco producing country next only to U.S.A. and Mainland China and accounts for about 8 per cent of the total world tobacco production. She is also the fourth biggest exporter of tobacco in the world today.

India produces several types of tobacco which fall under two botanical species namely N. tabacum and N. rustica, and are used for different purposes such as in the manufacture of cigarettes, bidis, cigars and cheroots, and for chewing, hockah and snuff. The total area under tobacco during 1967-68 was .397,600 hectares and the total production was 344 million kgs. The estimated production of tobacco in million kg. under different types during 1967-68 is given below:

Cigarette Tobacco 125 (Virginia 86.9; Others 38.1); Bidi Tobacco 95; Chewing Tobacco 63.7; Hookah Tobacco 35; Cigar and Cheroot Tobacco 20.8; Snuff 4.5; Total 344.

Andhra Pradesh, Gujarat, Tamil Nadu, Mysore, Bihar, Uttar Pradesh, West Bengal and Maharashtra, are the important tobacco growing States in the country.

Statewise figures of tobacco production (in million Kg.) for 1967-68 are as follows: Andhra Pradesh 155.2; Gujarat 90.3; Tamił Nadu 19.7; Mysoro 14.9; Bihar 11.2; Uttar Pradesh 10.4; West Bengal 10.2; Maharashtra 7.5; Others 24.6; Total 344.

Source: —Directorate of Economics and Statistics Ministry of Food, Agriculture, Community Development and Cooperation (Department of Agriculture), Government of India, New Delhi.

Variety-wise experts of unmanufactured tobacce (in million kg.) from India during 1968-69 were as follows: Virginia, Flue-cured 41-2; Virginia, Sun-cured 1-1; Sun-cured Country (Natu) 1-7; Chewing 4-3; Others 4-4; Total 52-7 (Valued at Rs. 33-2 crores).

Indian tobacco, mostly unmanufactured, is exported to over 60 countries in the world; Among them United Kingdom continues to be the main market. U.S.S.R., Japan, S. Yemen Republic, German Democratic Republic, Belgium, Nepal, Singapore, United Arab Republic, Indonesia and Netherlands are the other important countries importing tobacco from India. Exports of raw tobacco (in million kgs) to different countries during 1968-69 were as follows: U.K. 23·7; U.S.S.R. 5·0; Japan 3·3; S. Yemen Republic 3·3; G.D.R. 1·7; Belgium 1·5; Nepal 1·5; Singapore 1·5; U.A.R. 1·3; Indonesia 1·2; Netherlands 1·1; Others 7·6; Total 52·7.

Source: -- Monthly Statistics for Foreign Trade of India, Department of Commercial Intelligence & Statistics, Calcutta.

Only about 3.3 lakh kgs. of unmanufactured tobacco was imported into India during 1968-69 for blending in the manufacture of cigarettes and for the use of cigar industry. Imports of tobacco products were negligible.

It is estimated that about eight lakh growers and six lakh curers are engaged in the tobacco industry in India besides several lakhs employed in grading, marketing and manufacturing. There are in all 13 cigarette factories in India—six in Maharashtra, two each in Uttar Pradesh and West Bengal and one each in Andhra Pradesh, Bihar and Mysore. It is estimated that about 60 billion pieces of cigarettes were manufactured in India in 1968.

Bidi industry is spread all over the country and it is estimated that about 240 billion pieces of bidis were rolled in India during 1967-68.

Tobacco is an excisable commodity and its movements, processing and manufacture from the stage of harvesting till it is consumed or exported are controlled by the Central Board of Excise and Customs of the Ministry of Finance, Government of India. Different rates of duties are levied for different types and modes of consumption.

Tobacco which is a good source of revenue to the National Exchequer contributed Rs. 167 crores by way of excise duties during 1968-69. It also fetched Rs. 33-8 crores of foreign exchange during the same year.

Research programmes on tobacco are implemented by the Indian Council of Agricultural Research. The Central Tobacco Research Institute at Rajahmundry (Andhra Pradesh) has been set up mainly to investigate the fundamental problems connected with various aspects of tobacco. The institute also coordinates the work of other tobacco experimental farms spread all over the country. The regional research stations attached to the Institute in various States are carrying out research work on the improvement in the yield and quality of different types of tobacco grown in the concerned regions. The research work on bidi tobacco is undertaken at the Institute of Agriculture, Anand (Gujarat) and the Tobacco Research Station, Nipani (Mysore). Besides, the Indian Council of Agricultural Research also finances several other schemes in the important tobacco growing States in the country.

The Regional Office, Tobacco Development in the Ministry of Food, Agriculture, Community Development and Cooperation (Department of Agriculture), Government of India with its Headquarters in Madras looks after the development and marketing activities of tobacco. All the schemes on tobacco development, marketing economics, including the centrally sponsored schemes on tobacco are financed by the Government of India through this Regional Office.

The Indian Tobacco Development Council constituted by the Government of India is having official representatives from Central and State Governments, representatives of tobacco growers, traders, industry, Members of Parliament etc. This Council is an advisory body which will (1) consider from time to time the tobacco development programmes formulated by the Central and State Governments, (2) consider and review the progress of tobacco development in the context of targets laid down, (3) consider and review the problems of tobacco marketing and trade including price policy and to make suggestion for improvement etc. and (4) attend to any other function which may from time to time be assigned by the Government of India.

A well organised extension service operates in the tobacco growing areas under the control of Agricultural Departments of the State Governments for educating and training the farmers in the improved methods of harvesting, handling and curing of tobacco.

A unique feature of India's tobacco export trade is that all unmanufactured tobacco exported from the country is strictly controlled for quality. Statutory grades for all the varieties entering the export trade have been prescribed under the provisions of the Agricultural Produce (Grading and Marketing) Act, 1937. These grades are popularly known as 'Agmark' grades. With a view

^{*} Tobacco consumption: Consumption of tobacco in cigarette and bidi manufacture has fallen by 13.260 tonnes in 1968. The figures for 1966, 1967 and 1968 were 1,43,260 tonnes, 1,38,130 tonnes and 1,24,870 tonnes respectively in 1968-69 up to November, 1,20,000 kg. of tobacco, worth Rs. 5.53 lakhs, has Leen imported. The corresponding figures for 1967-68 are 6,30,000 kg. and Rs. 132.82 lakhs.

BANKING 107

to enabling the reputation of Indian tobacco in the world market the Government of India by a notification in 1945 prohibited the export of specified varieties unless the same were graded and marked under the 'Agmark' and were certified to that effect.

The main objective of the Tobacco Export Promotion Council set up by the Government of India is to support, protect, maintain and promote exports of unmanufactured and manufactured tobacco. The Council undertakes market studies in foreign countries and supplies information to Indian exporters on the market situation and trade opportunities abroad through participation in International Exhibitions and Trade Fairs. The Council also sends delegations, study and sales team to identify the foreign requirements and to promote exports by personal contacts.

BANKING

SCHEDULED COMMERCIAL BANKS

DURING 1968, the number of scheduled commercial banks which account for most of banking business in India stood at 73. The total number of branches of these scheduled banks rose to 7,445 against 6,779 in 1967. The population served per office declined from 73 thousand to 69 thousand in 1968. During the year four more clearing houses were established bringing the total number of clearing houses to 97.

DEPOSITS

Aggregate deposits of the scheduled commercial banks (business in India) rose from Rs. 4,221 crores in 1968 to Rs. 4,842 crores at the end of December, 1969. Of this,

demand deposits (excluding inter-bank deposits) amounted to Rs. 2,110 crores (43.6 per cent) and time deposits (excluding inter-bank deposits) Rs. 2,732 crores (56.4 per cent).

Total deposits of the different classes of scheduled commercial banks during 1968 (total business) are given below in Table I. It may be seen from this table that the aggregate deposits have risen from Rs. 4,085 crores in 1967 to Rs. 4,619 crores in 1968. Of this the fixed deposits amounted to Rs. 2,329 crores (50.4 per cent), savings Bank deposits Rs. 1,096 crores (23.7 per cent) and current deposits, Rs. 1,194 crores (25.9 per cent).

CREDIT EXPANSION

At the end of December 1969, the total bank credit of scheduled commercial banks (business in India) at Rs. 3,585 crores were higher by $16\cdot 8$ per cent higher than Rs. 3,069 crores, a year ago.

Total bank credit of different classes of scheduled commercial banks (total business) at the end of 1966, 1967 and 1968 is indicated in the table below:

(Rs. crores) Ratio of Total Bank Bank credit to Credit deposits State Bank of India ... 1966 541 68.8 1967 596 69.4 1968 755 79.5 Subsidiaries of State Bank of India 1966 127 53-1 1967 162 61-4 1968 200 70-0 Other Indian scheduled banks 1966 1.58088.9 1967 1,735 67-8 1968 1,909 64-8 Foreign scheduled banks 1966 301 80-1 1967 336 83.4 1968 384 88-3 Total scheduled banks 1966 2,549 68-6 1967 2,828 69-2 1968 3,249 70.3

INVESTMENTS

According to a survey conducted by the RBI total investments of scheduled commercial banks at Rs. 1,258 crores as on March 31, 1968 recorded a larger increase of Rs. 142 crores compared with Rs. 120 crores during the corresponding period of 1967. The investments worth Rs. 1,234 crores of Indian offices were held mostly in the government securities, which amounted to Rs. 1,009 crores. The share of government securities declined marginally by 1.9 per cent to 80.2 per cent.

NATIONALISATION OF MAJOR INDIAN BANKS

The Government of India issued an ordinance on July 19, 1969 announcing its decision to take into public ownership and management of 14 major Indian scheduled commercial banks having an aggregate deposits of not less than Rs. 50 crores as on the last Friday of June, 1969. These banks are as follows: Central Bank, Punjab National Bank, Bank of India, Bank of Baroda, United Commercial Bank, United Bank, Allahabad Bank, Dena Bank, The Indian Bank, Canara Bank, Union Bank, Syndicate Bank, Bank of Maharashtra and the Indian Overseas Bank.

The Government of India introduced in the Parliament, the Banking Companies (Acquisition and Transfer of Undertakings) Bill on July 25, 1969 to replace the above ordinance. The Bill was passed by the Lok Sabha and Rajya Sabha on August 4, 1969 and August 8, 1969 respectively. The President gave his assent to the Bill on August 9, 1969.

A full bench of the Supreme Court declared on February 10, 1970, the Banking Companies (Acquisition and Transfer of Undertakings) Act as unconstitutional. It gave this verdict on the writ petition of Dr. R. C. Cooper and Shri T. M. Gurubaxani challenging the validity of the nationalisation. Three major points which weighed with the judgement are: (1) It makes hostile discrimination against the named banks in that it prohibits these banks from carrying on banking business, whereas other banks are permitted to carry on business, and even new banks may be formed which may be engaged in business; (2) It in reality restricts the named banks from carrying on business other than banking as defined in Sec. (B) of the Banking Regulations Act, 1949 and (3) The Act violates the guarantee of compensation under Act 31(2) in that it

provides for giving certain amounts determined according to principles which are not relevant in the determination of compensation of the undertaking of the named banks and by the method prescribed the amounts so declared cannot be regarded as compensation. The ten to one majority judgement was delivered by Mr. Justice J. C. Shah.

In the light of the above developments, Union Government renationalised the 14 banks taken over in July by an ordinance signed by the President of India. Under this ordinance compensation was fixed at Rs. 87.4 crores instead of Rs. 75 crores under the previous Act struck down by the Supreme Court. Under the new ordinance, the old banks are left free to do any business. On March 24, 1970, the Lok Sabha passed the Bill to replace the ordinance for regularising the nationalisation of the 14 major banks. The Bill* received parliamentary approval by the Rajya Sabha on 26-3-1970.

The banking companies will now have the option of collecting compensation in cash in three annual instalments or in ten-year or 30-year securities carrying interest at 4½ per cent or 5½ per cent a year respectively. Compensation is to be paid to the companies. Provision has also been made for the immediate payment of 75 per cent of the paid-up capital of the compensation payable to each of the 14 banks is as follows (Figures in Rs. lakhs): Central Bank of India 1,750; Bank of India 1,470; Punjab National Bank 1,020; Bank of Baroda 840; United Commercial Bank 830; Canara Bank 360; United Bank 420; Dena Bank 360; Syndicate Bank 360; Union Bank 310; Allahabad Bank 310; Bank of Maharashtra 230 and Indian Overseas Bank 250.

CAPITAL MARKET

THE gilt-edged market continued to maintain its uptrend during 1968-69 and equity prices staged a significant recovery. The capital issues activity, however, recorded a decline and consents granted for issue of shares and debentures were also substantially lower. The control over capital issues was further relaxed. The capital raised by non-Government companies was almost of the same magnitude as in the previous year. The magnitude of financial assistance sanctioned by the termlending institutions rose substantially, the increase in financial assistance sanctioned to small-scale industries being particularly marked. In the sphere of company legislation the Companies (Amendment) Bill, 1968 as finally passed by Parliament was enacted as the Companies (Amendment) Act, 1969 in May 1969.

THE GILT-EDGED MARKET

In the gilt-edged market, the uptrend noticed since the beginning of 1966-67 was continued during 1968-69. The Reserve Bank's All-India Index of Government and semi-Government securities (base: 1961-62 = 100) rose steadily from 97·1 at the end of March 1968 to 98·7 by end-March 1969 showing an increase of 1·6 per cent on top of a rise of 2·6 per cent last year. The bullish tone during the year was sustained by the easier monetary policy as reflected in the cut in the Bank rate effective March 2, 1968 and the comfortable resources position of commercial banks. The firmness in the market is also attributable to the Bank's open market operations which have helped to infuse a degree of confidence in the market and strengthen

the undertone of trading; over the year the operations resulted in net sales of Government securities.

The Central and State Governments completed their borrowing programmes for the year 1968-69. The Centre did it in two phases by issuing on May 11, 1968, the 51 per cent Loan, 1995 for Rs. 175 crores and on July 26, 1968, the 41 per cent Loan, 1975 for Rs. 135 crores. Both the loans were issued at par and were fully subscribed with total subscriptions amounting to Rs. 321 crores, of which conversion accounted for Rs. 184 crores and cash for Rs. 137 crores. Fifteen State Governments also issued 12-Year 52 per cent 1980 Loans for an aggregate amount of Rs. 116.50 crores at issue prices varying from Rs. 97.50 to Rs. 99.50 per cent between September 2 and September 7, 1968. The new State loans were over-subscribed; the total subscriptions retained amounted to Rs. 127.85 crores, of which Rs. 10.52 crores were in the form of conversion.

Loan-wise, price increases were noticed both in the Central and State Government securities. The Reserve Bank's index of Government of India securities increased from 97-4 at end-March 1968 to 98-7 by end-March 1969 and that of State Government securities went up from 96-2 to 98-8. In the Central list, the rise in prices was more marked in the medium long-dated securities. Among the short-dateds, the 3 per cent Loan, 1970-75 showed the largest gain of Rs. 2-10 at Rs. 98-00, other increases ranged between 15 p. in the case of the 4 per cent Loan, 1969 to 75 p. in the case of the 3½ per cent Loan, 1969. Among

^{*} The President gave his assent to the Bill on April 1, 1970.

the medium-shorts, the maximum gain of Rs. 6·50 was recorded in the 2½ per cent Loan, 1976, which rose to Rs. 88·25. The 3½ per cent Loan, 1974, showed an increase of Rs. 1·70 at Rs. 97·80. In the medium-longs, the largest gain of Rs. 3·80 was noticed in the 4 per cent Loan, 1979 which rose to Rs. 97·95, whereas the 5 per cent Loan, 1982 showed the smallest gain of Rs. 1·05 at Rs. 101·85. The long-dateds section noticed increases in all the issues except the 5½ per cent Loan, 1992 which showed a decline of 25 p. The rise in other issues ranged from 10 p. in the case of the 3 per cent Loan, 1986 or later to Rs. 2·25 in the case of the 3 per cent Non-terminable Loan. Both the 5½ per cent Loan, 1995 and the 4½ per cent Loan 1975—new loans issued at par—also gained Re. 1 and 15 p. respectively.

INDUSTRIAL SECURITIES MARKET

The equity prices recorded a gradual rise during the greater part of 1968-69 as against the decline observed in the preceding year. The recovery in share prices commenced since the end of February 1968 subsequent to concessions granted to the corporate sector in the Union Budget for 1968-69 to stimulate production and exports and reduction in the Bank Rate from 6 per cent to 5 per cent in early March 1968. Except for a short spell of easiness early in the year the recovery continued and towards the end of 1968-69 the stock exchanges were in an ebullient mood. The Reserve Bank's All-India Index of Variable Dividend Industrial Securities (Base: 1961-62 = 100) rose from 77.5 during the week ended March 30, 1968 to 87.9 during the week ended March 29, 1969, showing a net increase of 13.4 per cent as against a decline of 4.4 per cent recorded during 1967-68. The prices of fixed-interest bearing industrial securities - preference shares and debentures - were slightly higher during 1968-69 than in the previous year.

The uptrend in equity prices, interrupted between March 9, 1968 and April 13, 1968 due to rush for gold in the world's free markets and the consequent uncertainties regarding reserve currencies in the international financial markets, continued till the end of June 1968. In addition to the concessions granted to the corporate sector in the Union Budget for 1968-69 and the reduction in the Bank Rete, some of the other important factors which assisted the uptrend were (1) the Aid-India Consortium's appreciation of India's requirements of foreign aid, (ii) the announcement of the import policy for 1968-69 designed to encourage exports and production and (iii) a reduction of $\frac{1}{4}$ per cent in the refinancing rates of I.D.B.I. from May 11, 1968. The Reserve Bank's index of equity prices rose from 77-5 to 81.0 between the weeks ended March 30 and June 29, 1968.

The gradual recovery in equity prices showed fluctuations within a narrow range during July-September 1968. The equity price index after declining to 80·4 during the week ended July 27, rose to 81·4 till August 31 and declined thereafter to 79·1 by September 28, 1968. Market sentiment was affected, among other things, by (i) the reports of less than expected increase in the steel prices, (ii) reports of damage to standing crops caused by droughts of floods in different parts of the country, (iii) disappointing reports about the working of certain leading companies, and (iv) the apprehensions of decline in production due to reduction in supply of power to industries in the Bombay-Poona region.

From October 1968 onwards the equity prices resumed their earlier uptrend and the index consistently moved up from 79.5 to a higher level of 89.8 between october 5, 1968 and March 8, 1969 and closed at 87.9 by March

29, 1969. The buoyancy in equity prices reflected the gradual revival of confidence, rising investment demand. relative price stability in commodity markets, rising industrial production and expectations of further improvement in the economy during 1969. The sentiment was also assisted by the Union Budget for 1969-70 which provided such incentives as reduction of export duties on jute goods and tea with a view to stimulating exports, inclusion of jute and cotton textile industries in the list of priority industries for the purpose of development rebate and raising of income-tax exemption limit in respect of dividend income from Rs. 500 to Rs. 1,000. The other encouraging factors were, (a) expectations of a high level of agricultural production, (b) reports of rising exports, (c) continuation of the liberalised credit policy for the priority sectors by the Reserve Bank of India, (d) announcement by the International Development Association in January 1969 of \$125 million credit to India for imports of components and materials for machinery, and (e) announcement in February 1969 of further relaxation of curbs on the issue of capital by companies.

Among the stock exchanges, according to the regional equity index, Bombay Stock Exchange recorded the highest gains (16.0 per cent), followed by Calcutta (12.5 per cent), Ahmedabad (10.9 per cent), Madras (7.3 per cent) and Delhi (6.8 per cent) during 1968-69.

The improvement in equity prices was shared by the major sub-groups. The maximum increase was registered by the sub-group 'edible and vegetable oils' which rose by 48·9 per cent following Government's permission to raise the prices of their products to compensate for the rising prices of oilseeds. Equity prices of 'rubber and rubber products' also climbed up by 41·0 per cent. Paper shares evoked interest after the announcement of decontrol of paper prices in May 1968 and recorded an increase of 38·7 per cent. Other sub-groups which showed substantial increases were 'other mining' (37·6 per cent), 'shipping and other transport (33·6 per cent), 'basic industrial chemicals' (27·7 per cent), 'other chemicals' (28·6 per cent), and 'sugar' (21·5 per cent). Insurance shares also recorded a notable rise (22·5 per cent). The sub-groups machinery other than 'transport and electrical' and 'coal' which had declined substantially in the last year also rose by 14·8 per cent and 14·4 per cent, respectively. Equities of 'banks', 'cotton textiles' and 'jute textiles' were moderately higher.

A few sub-groups, however, registered small declines during 1968-69. 'Foundries and engineering workshops' dropped by $5\cdot3$ per cent. In the plantations group, coffee plantations declined by $4\cdot5$ per cent and tea plantations by $2\cdot8$ per cent.

As regards fixed interest-yielding industrial securities both debentures and preference shares recorded increases in contrast to the easiness noticed in the year 1967-68. The All-India Index of debentures (Base: 1961-62 = 100) rose by 1·7 per cent from 91·7 at the end of March 1968 to 93·3 at the end of March 1969. The All-India Index for preference shares registered an increase of 1·2 per cent from 85·8 at the close of March 1968 to 86·8 at the close of March 1969.

During the year, the average yield (gross) on the variable dividend industrial securities declined from 8·22 per cent during 1967-68 to 6·81 per cent during 1968-69 and that on debentures from 8·37 per cent to 7·96 per cent; but on preference shares it increased fractionally from 9·86 per cent to 9·97 per cent probably due to rise in the rate of dividend offered on the preference shares from 9·3 per cent to 9·5 per cent.

From December 1946, the Reserve Bank of India started constructing indices of security prices. These indices (All-India) reveal the following trend:—

	& Semi- Securities	Indu Secu	strial rities			8	Generation	her

CAPITAL ISSUES

New capital issues activity both through prospectus and rights slackened during April 1968-March 1969 in contrast to the modest improvement recorded in the previous year. The decline was both in number and value of equity issues. The preference and debenture issues were also at a lower level during 1968-69. The prospectus issues, though lower in amount, accounted for slightly higher percentage share in the total capital issues in 1968-69 than in the previous year. The share of equity, however, was lower while those of preference and debenture issues were higher. The amount of capital raised by non-Government companies in 1968 was almost at the same level as in 1967.

The amount offered to the public for subscription through the prospectus issues recorded a small decline from Rs. 43·0 crores in 1967-68 to Rs. 39·8 crores in 1968-69 but its share in the prospectus issues rose substantially from 64·6 per cent to 89·5 per cent, while that of foreign participation declined steeply from 17·9 per cent to 2·6 per cent. The share of promoters also decreased from 8·4 per cent in the preceding year to 6·0 per cent in 1968-69. The rate of dividend offered on the majority of preference shares was in the range of 9·3 per cent to 9·5 per cent,

although four companies offered 10 per cent dividend. The rate of interest offered on debentures was maintained at 7.75 per cent except one where it was 9 per cent.

Public response to capital issues during 1968 as observed from replies to questionnaires sent to individual companies continued to be selective. According to data available in respect of 45 issues, 15 were over-subscribed, 4 fully subscribed and the remaining 26 under-subscribed. The amount devolving on the underwriters was 39 per cont of the amount underwritten almost at the same level as in the previous year. The promoters continued to rely heavily on financial institutions for underwriting support for their public issues.

Consents/No. objections granted by the Controller of Capital Issues to non-Government companies during 1968 for the issue of shares (other than bonus) and debentures at Rs. 87.4 crores were substantially lower than the amount consented during the previous year (Rs. 150.6 crores). Consents for initial issues amounted to Rs. 36.7 crores and further issues by existing companies Rs. 50.7 crores. Consents were granted to non-Government companies for issue of bonus shares worth Rs. 33.6 crores as against Rs. 47.8 crores in 1967.

Total capital (excluding bonus and miscellaneous issues) raised by non-Government companies during 1968 amounted to Rs. 84-3 crores as against Rs. 84-8 crores in 1967. The capital raised through equities declined from Rs. 55-6 crores in 1967 to Rs. 46-3 crores in 1968, whereas capital raised through preference shares and debentures increased

from Rs. 7.6 crores and Rs. 21.6 crores to Rs. 9.9 crores and Rs. 28.1 crores, respectively. The capitalisation through bonus shares registered a sharp decline from Rs. 84.1 crores to Rs. 27.9 crores. Miscellaneous issues, on the other hand, increased from Rs. 2.7 crores to Rs. 5.8 crores (Table I).

Table I: Capital Consents and Capital Raised by Non-Government Companies

(Rs. crores)

				CAPITAL CON- OBJECTION CEI			CAPITAL RAISED

[•] Excluding private Limited companies, banks, insurance companies and provident societies incorporated as companies. Note: Data for 1968 are provisional.

RELAXATION OF CONTROL OVER CAPITAL ISSUES

The Government announced a major relaxation in capital issues control in February 1969 through the Capital Issues (Exemption) Order, 1969. According to the new Exemption Order, public limited companies issuing capital exceeding Rs. 25 lakhs during a period of twelve months would be required to file a statement of their capital issue proposals with the Controller of Capital Issues at least thirty days before the date of the proposed offer of capital Such proposals would be exempted from the Capital Issues Control if they conform to certain stipulated financial criteria regarding debt-equity ratio, the equity-preference ratio, issue of capital at par, issue of preference shares and debentures carrying rates of dividend and interest, respectively, not exceeding certain notified limits. These limits are 9.5 per cent dividend for preference shares and 7.75 per cent interest for debentures. These

may be varied from time to time by notifications. For the facility of subscribers to the share capital of a company, a new criterion has been added to the effect that the subscription to the shares, if phased in calls, should be got fully paid up within a period of five years from the date of the offer.

Private limited companies, banking and insurance companies and Government companies except where an offer of shares for subscription by the public is involved, and public limited companies so long as they issue capital not exceeding Rs. 25 lakhs during a period of twelve months have been exempted from the Capital Issues Control earlier.

Under the Capital Issues (Exemption) Order, 1969, Government have retained control over bonus issues of all companies without any lower exemption limit and issues of capital at a premium by public limited companies.

FINANCE CORPORATIONS

Under the Industrial Finance Corporation Act, a Corporation was established on July 1,1948 to provide medium and long-term finance to public limited companies and co-operative societies registered in India, including the acceding States, and engaged in the manufacture or processing of goods or in mining or in the generation or distribution of electricity or any other form of power.

Seventeen States have established State Financial Corporations — Punjab, Haryans, Himachal Pradesh, Maharashtra, West Bengal, Kerala, U.P., Rajasthan, Assam, Bihar, Madhya Pradesh, Andhra, Orissa, Mysore, Jammu and Kashmir, Tamil Nadu and Gujarat. In addition, Delhi also has a financial corporation.

Besides the State Financial Corporations, there are other State Corporations and All India Corporations. For details see under the articles "State Corporations" and "All India Corporations".

INDUSTRIAL STRUCTURE AND POLICY

THE qualitative change in the direction of industrialisation after the advent of planning is evident from the following table:

Value added in manufacturing industry

(Rs. Millions at 1960-61 prices)

Industries	1950-51	1965-66	Percentage increase	
Consumer goods Intermediate	2,607	4,876	87%	
goods . Machinery .	. 895 . 309	6,202 3,159 103	593 % 922 % 232 %	
	3,842	14,340		

These aggregates, besides indicating the large strides taken since the beginning of 1950 also underline the

structural changes that have occurred during the period. While the percentage increase in value added in respect of consumer goods was only 87 per cent, it was as high as 593 per cent for intermediate goods and 922 per cent for machinery items. The growth sectors have expanded much more rapidly than the traditional industries.

Industrial production nearly trebled over the three Plan periods. Production of finished steel went up from 1 million tonnes to 4 million tonnes, aluminium from 4,000 tonnes to 96,300 tonnes, coal from 33 million tonnes to 68.5 million tonnes, cement from 2.7 to 11.5 million tonnes, petroleum products from 0.2 million tonnes to 14.4 million tonnes, nitrogenous fertilizers from 9,000 tonnes to 3,67,000 tonnes, machine tools from Rs. 0.3 crores to Rs. 23.5 crores and automobiles from 16,500 to 67,000 between 1950-51 and 1967-68.

Figures of industrial production in respect of certain key industries in 1967-68 as compared to 1950-51 and their average annual growth rate during these seventeen years are:

Production in key industries

Industry	7				Unit	1950-51	, 1987-68	Compound annual rate of growth (per cent)
Finished steel					'000 tonnes	1,040	4,150	8.5

Jute manufacture	= =	4.5	4.4	* 1	'000 tonnes	837	1,156	2-1

@ Figures relate to cal miar year.

The diversification in industrial structure in these years is also reflected in the employment position in various sectors. For example, while the labour employed in traditional industries like textiles and sugar (organised sector) increased from 1·12 to 1·26 million and 95,000 to 131,000 i.e., by 13 per cent and 38 per cent respectively in 1966 as compared to 1951, the percentage increase in labour force in newer fields like basic metal industry and machinery (other than electric) industry was of the order of 159 per cent and 222 per cent respectively. The employment increased from 102,000 to 264,000 in basic metal industry and from 107,000 to 345,000 in machinery industry (other than electric). The increase in labour force in electric machinery industry was as high as 400 per cent for the corresponding period.

Industrial licensing has also played a useful role in the remarkable growth of small-scale industries over the last decade. On the basis of the data available regarding the number of small-scale industries registered with the State Directorates of Industries, the number of small-scale units increased from about 35,000 to over one lakh numbers between 1961 and 1965 and further increased to 1,31,422 by 1968.

This growth in small-scale industries has been achieved through a variety of measures. In certain industries which are particularly suitable for development in the small-scale sector, a policy of reservation or common programme was adopted. In addition, other positive support by way of price preference in the purchase of products from small-scale industries, fiscal incentives and technical guidance and marketing assistance was also provided. This policy has generally had a beneficial effect on the wide-spread development of small-scale industries. In several small-scale industries, competitive ability has improved to a point where they are in a position to stand on their own without special reservations in their favour. The main thrust of policy is to make them increasingly viable and technologically efficient so that they become an integral part of the total industrial structure, capable of making their contribution on their own strength.

It should be, however, emphasised that throughout this period (1951-1968), growth of the large-scale (factory) sector has been faster than that of the small-scale (non-factory) sector. As a result, the share of the large-scale sector in the combined manufacturing (in terms of income generated) has been rising more or less steadily. In 1948-49, the large-scale sector accounted for about 40 per cent of the total manufacturing sector: the small-scale sector accounted for the other 60 per cent. By 1966-

67, the large-scale sector accounted for about 70 per cent of the manufacturing sector; the share of the small-scale sector shrank to 30 per cent. This sharp reversal of the relative shares of the two sectors marks an important qualitative change in our industrial scene.

Even within the large-scale industry there have been significant differential growth rates. While traditional industries like cotton textiles, jute textiles, sugar, leather industry and beverages have developed at less than average pace, new industries like engineering and chemicals have shot up at great speed. Some of industry groups which have recorded spectacular increases in output are: chemicals (4-fold), metal products (6-fold), electricity generation (also 6-fold), electrical machinery and transport equipment (both 9-fold), non-electrical machinery (13-fold) and petroleum products (21-fold).

It is usual to divide the various industries under three categories: (1) consumer goods, (2) intermediate goods, and (3) machinery. In 1950-51, the machinery group accounted for only 8 per cent of the value added through manufacturing. The output (in real terms) in this group increased more than ten-fold during the subsequent 15 year period, so that the share of the machinery group in the total output rose from 8 per cent to 22 per cent. Similarly, the share of intermediate goods has also gone up from 23 per cent to 43 per cent. Consequently, the share of consumer goods has halved from 68 per cent to 34 per cent. All this indicates an increasing sophistication of India's industrial structure.

The recovery in production in the large-scale industrial sector noticed since the first quarter of 1968 continued throughout the year. For the calendar year 1968 the overall growth rate was 6·3 per cent. All the major industrial groups participated in the recovery. The improvement was more marked in the case of basic industries and capital goods industries.

Intermediate goods industries and consumer goods industries also registered increases.

Overall, industries accounting for about three-fourths of the weightage in the General Index registered increases in output. Important among these industries were cotton spinning, motor vehicles, iron and steel, mining and quarrying, sugar, and paper and paper products. There were a few industries which were by and large unaffected by the recession and which continued to register high growth rates. Among these, mention may be made of non-ferrous metals, fertilizers, electricity generation and consumer durables like radio receivers, motor cycles and bicycles.

Among the industries which continued to lag behind, the important ones were manufacture of mining, earthmoving and construction machinery and rail-road equipment, heavy electrical engineering including electrical motors and furnaces and electrical cables and wires.

The overall improvement in industrial production was brought about by larger availability of raw materials for agriculture-based industries, increased demand for consumer goods including some consumer durables following large increases in agricultural income, sharp rise in export demand for certain engineering items, and liberal credit facilities from banking and financial institutions. The upward revision of the prices of industrial products such as coal, steel and cement was followed by a step-up in their production. The import liberalisation in favour of the priority industries, including export industries, in respect of requirements of raw materials, components and spares helped these industries to maintain high levels of production.

The increase in the level of output was reflected in better utilisation of capacity particularly in intermediate and consumer goods industries. The stock-output ratio in these industries showed a significant fall. On the other hand, despite some recovery in basic and capital goods industries, the capacity in a number of industries in these groups continued to be underutilised.

Table 4—Utilisation of Capacity in Selected Industries
(Percentages)

51 44	37
	66 23 21 52 23 54 51

^{*} Provisional.

Table below taken from the Annual Survey of Industries 1966 shows certain important characteristics in respect of India as a whole for the years 1965 and 1966 and also the percentage change in these characteristics in 1966 over 1965.

The data relate to the factories registered under the Factories Act, 1948 and which employed 50 or more workers with the aid of power or 100 or more workers without the aid of power on any day during the reference year, the sector known as the Census Sector.

	1965	1966	Percentage change over 1965
1. Number of factories	13,424	12,300	(-) 8.38
2. Number of factories reporting	13,155	11,933	() 9.29
3. Productive capital (Rs. crores) 4. Employment (000) 5. Salaries, wages and	6,446 3,986	7,548 3,934	17·07 (-) 1·31
benefits, total (Rs. crores)	903	987	9-30

^{*} Now Tamil Nadu.

	1965	1966	Percentage change over 1965
6. Ex-factory value of output (Rs. crores) 7. Value at factory of input including de-	6,502	7,213	10.93
preciation (Rs. crores)	4,795	5,403	12.67
facture (Rs. crores)	1,707	1,810	6.03

It will be seen from the above table that the number of factories in the Census Sector decreased in 1966, compared to 1965, by 8-9 per cent. This was due to revision of frame used for ASI-1966 Census Sector.

Census factories selected in the previous round and found not fulfilling the two-fold criterion of being a census factory in the ASI-63 and ASI-64 as per employment data reported in the previous year's return as also as per list of factories for the year ending 1965 or as per ASI-65 return were excluded from the Census Sector.

The employment showed a small decline of 1.3 per cent. Other characteristics, however, showed a rise in the current prices, the productive capital by about 17 per cent, the ex-factory value of output by 11 per cent and the value added by manufacture by about 6 per cent.

Among the industry groups — Spinning, Weaving and Finishing of Textiles occupied the pride of place. In the year 1966 this group covered 10 per cent of the reporting units, accounted for about 9 per cent of the productive capital, 29 per cent of the employment, 20 per cent of the value of output and 22 per cent of the total value added. Approximately a similar position obtained in the preceding years, in so far as this particular group is concerned.

The value added by manufacture is a measure of the contribution of the manufacturing industries as a whole to National Income. Taking this as an index, the order of importance of the more important industry groups for the year 1966 is as follows:—I. Spinning, Weaving and Finishing of Textiles; 2. Electric light and Power and Gas Manufacture and Distribution; 3. Iron and Steel, Basic Industries; 4. Machinery except Electrical; 5. Electrical Machinery; 6. Miscellaneous Chemical Products; 7. Miscellaneous Food Preparations; 8. Manufacture of motor vehicles.

The States of Maharashtra, West Bengal, Madras,* Gujarat, Bihar and Uttar Pradesh were the most industrialised in the country. In the year 1966 these six States together accounted for 64 per cent of the census factories reporting data, 66 per cent of the productive capital employed, 71 per cent of the employment, 75 per cent of the value of output and 75 per cent of the value added by manufacture. The position in 1965 was almost similar so far as these States are concerned. In 1965 they accounted for 63 per cent of the reporting factories, 66 per cent of productive capital, 71 per cent of employment, 75 per cent of the value of output and 77 per cent of the value added by manufacture.

· Seventeen States and Territories, namely, Andhra Pradesh, Assam, Jammu and Kashmir, Kerala, Madhya Pradesh, Mysore, Orissa, Punjab, Rajasthan, Andaman and Nicobar, Delhi, Himachal Pradesh, Tripura, Pondicherry, Goa, Haryana and Chandigarh accounted for about 36 per cent of the reporting units in 1966, 34 per cent of the productive capital employed, 29 per cent of the total employment, 25 per cent of the value of output and 25 per cent of the value added by manufacture.

The Table 'A' below gives the comparative picture of the two sectors in manufacturing industry—Census Sector and Sample Sector between 1963 and 1964 the latest years for which data are available in respect of capital, employment and output.

		1963		1964		
	Census sector	Sample sector	All factories	Census sector	Sample sector	All factories

THE INDUSTRIAL LICENSING POLICY INQUIRY COMMITTEE

This Committee which was set up to examine how the industrial licensing system has operated, submitted its report during the year 1969. It made many important recommendations, some of them of a controversial nature.

The Committee's conclusion was that the licensing system must continue but in a much more rationalised and purposeful manner. Positive licensing would be principally confined to strategic, basic, and core industrial sectors for which, the committee emphasises, it was essential that detailed industry plans should be prepared. Unless this was done, licensing cannot but be ad hoc and arbitrary.

The committee also recommended a greater and purposeful use of bans and reservations. Industries, which can and should be developed mainly in the small and medium sectors should be reserved for these and no further capacity in these industries should be permitted to be created in the large-scale sector. Similarly, industries which produced less essential consumer goods and whose production may make large drafts on searce resources should be similarly banned and no further capacity should be permitted to be created. The committee preferred the use of bans to limit licensing in such areas so that ad hoc and arbitrary licensing could be avoided. It also recommended that bans should be imposed for longer periods and not be subject to aix-monthly reviews as at present. In these areas where capacities would not be further created, the committee specifically pointed out the necessity of using fiscal devices to ensure that undue profits are not made by those who are largely established in those industries. #

As regards the area that was neither covered by the detailed industry plans nor by bans and reservations, the committee recommended the use of licensing only for

the limited purpose of preventing development of industry in these areas by the larger industrial houses (whose assets already exceed Re. 35 crores). Otherwise, licences should be freely granted in this area and it should be left to the operation of the market forces combined with fiscal and monetary measures to ensure that this area develops as required within the broad context of the national Plan.

In addition to the limited use of licensing to prevent further concentration of economic power, another major recommendation of the committee in the same direction was regarding the development of the 'joint sector'. The committee pointed out that in a number of crucial areas, funds were being provided in substantial proportions by public financial institutions, and sometimes directly by the Government. In spite of this, the Government had permitted the industries to be managed entirely as if the money required was provided by the private shareholders and the management. In most cases, even though the LIC together with other institutions was a very large shareholder, the shareholding rights were not utilised for participation in management.

The committee recommended that this idea of non-interference in management should be firmly set aside. The whole or part of the assistance provided through leans or debentures should be convertible into equity at the option of the assisting institution and the Government must participate in the management of industries financed by it. The committee recommended this approach so as to prevent the building up of private industrial empires on the basis of public money and at the same time ensure that important projects do not suffer for want of finance merely on the ground that they were initiated by a private sector concern. This approach was also expected to ensure that important concerns were so managed as to subserve the public interest.

Early in 1970, the Government announced its decision on the Licensing Policy Inquiry Committee's report.

In the course of a Press Note, the Government said: It accepted the recommendation of the Committee that there should be a list of 'core' industries consisting of basic, critical and strategic industries. Detailed industry plans will be prepared for these industries and essential inputs made available on a priority basis. Care will be taken to ensure that an adequate proportion of foreign exchange is kept apart for 'non-core' industries also. A list of 'core' industries has been drawn up by the Planning Commission in consultation with the economic ministries in the light of the production gaps that have to be closed in the course of the Fourth Plan. This list is given below:

I. Agricultural Inputs: (1) Fertilisers—nitrogenous and phosphatic; (2) pesticides (basic chemicals only); (3) tractors and power tillers; and (4) rock phosphate and pyrites. II. Iron and Steel: (1) iron ore, (2) pig iron and steel; and (3) alloy and special steels. III. Non ferrous Metals. IV. Petroleum: (1) Oil exploration and production; (2) petroleum refining; (3) selected petro-chemicals—integrated petro-chemical complexes, D.M.T., caprolactum: acrylonitrile and synthetic rubber. V. Coking Coal. VI. Heavy Industrial Machinery (to be specified). VII. Ship-building and Dredgers. VIII. Newsprint. IX. Electronics selected components, testing and control equipment, wireless and micro-wave equipment.

Such of the industries in the 'core' list as are included in Schedule A of the Industrial Policy Resolution, 1956 (as amended from time to time) will continue to be reserved for the public sector. In addition to the 'core' sector, all new investment propositions of over Rs. 5 crores shall be deemed to be in the 'heavy investment' Sector. Except for industries reserved for the public sector under the Industrial Policy Resolution, 1956, (as amended from time to time), undertakings belonging to the larger Industrial Houses, as defined in the report of the Industrial Licensing Policy Inquiry Committee, together with foreign concerns and subsidiaries or branches of foreign companies, would be expected, along with other applicants, to participate in and contribute to the establishment of industries in the 'core' and 'heavy investment' sectors, leaving the opportunities in the remaining sectors primarily to other classes of entrepreneurs.

The 'joint sector' concept, suggested in the ILPIC report, has been accepted in principle. It will be Government's endeavour to apply the concept in the case of major projects taken up by private enterprise groups in the two sectors referred to above, as may be appropriate. In the 'middle' sector, involving investments ranging from Rs. 1 crore to Rs. 5 crores, licence applications of parties other than undertakings belonging to the larger Industrial Houses shall be given special consideration and shall be issued liberally, except where foreign exchange implications necessitate careful scrutiny. Licence applications from undertakings belonging to or controlled by the larger Industrial Groups and foreign branches/subsidiaries shall be considered from normal expansion, where such expansion is necessary to develop to a minimum economic level which would ensure greater cost efficiency. The provisions of the Monopolies and Restrictive Trade Practices Act will be taken into account.

Small-Scale Sector: The existing policy of reservation for the small-scale sector (involving investments in machinery and equipment up to Rs. 7.5 lakks) will be continued and the area of such reservation will be extended, wherever production in this sector can be expected to grow to meet demand adequately. Industries which are proposed to be added to the ones already reserved exclusively for development in the small-scale sector have been listed by the Planning Commission in consultation with the Ministry of Industrial Development as follows:

Steel furniture; cycle tyres and tubes; mechanical toys; aluminium utensils; fountain pens and ball-point pens; electric horns; hydraulic jacks below 30 tonnes capacity and tooth paste.

Exemption Limit: The exemption limit from licensing provisions, including licensing of new undertakings and substantial expansion of existing units, will be raised from Rs. 25 lakhs to Rs. I crore (by way of fixed assets in land, buildings and machinery) in the case of undertakings or categories of undertakings which have existing assets of less than Rs. 5 crores and which (i) do not belong to the larger Industrial House, as classified by the Industrial Licensing Policy Inquiry Committee; (ii) do not require more than Rs. 10 lakhs or more than 10 per cent by way of foreign exchange for import of machinery and equipment, whichever is less, and do not also require foreign exchange, except marginally, for import of raw materials, components and the like and (iii) are not included in the category of 'dominant undertakings' as defined in the Monopolies Act. There will be no commitment on the part of the Government to provide foreign exchange for maintenance and raw material imports for units which benefit from the exemption from licensing.

Public Financial Institutions: With the acceptance of the 'joint-sector' concept in principle, it will be ensured in future that there is a greater degree of participation in management, particularly at policy levels, in the case of major projects involving substantial assistance from public financial institutions. Public financial institutions will also, as part of their financial assistance arrangements, exercise option for converting loans given and debentures issued in future, either wholly or partly, into equity within a specific period of time. As for loans and debentures given in the past, the financial institutions concerned would have discretion to negotiate conversion in case of default. The Department of Banking will be issuing necessary instructions in this regard.

Role of the Public Sector: Alongside of the measures taken to reduce the concentration of economic power, the scope of public sector is proposed to be substantially expanded beyond the fields included in the Industrial Policy Resolution of 1956. Various production ministries will examine the possibility of taking up short gestation projects yielding quick returns so as to cover, to the extent fessible, major production gaps likely to develop in various industrial sectors in the next few years. In order to meet the resources requirements for an expanded public sector programme, it has been decided in principle that the public financial institutions should be authorised to consider applications for financial assistance for projects to be set up in the public sector on the same terms as applications from private parties. The Department of Banking would issue necessary instructions in this regard after detailed examination.

THE CO-OPERATIVE MOVEMENT (1967-68)*

DETAILS RELATE TO THE YEAR 1967-68

THE number of all types of co-operative banks and credit societies declined by 6,896 during 1967-68 and stood at 193,428 as on June 30, 1968. The total membership of all the credit societies as on June 30, 1968 was about 40,253,000. Their aggregate working capital increased from Rs. 2,424·4 crores as on June 30, 1967 to Rs. 2,780·7 crores as on June 30, 1968 representing an increase of Rs. 356·3 crores. The owned resources of the institutions rose by Rs. 75·8 crores during the period under report and amounted to Rs. 548·0 crores as on June 30, 1968. The borrowed funds representing deposits, debentures and borrowing from the higher financing agencies, stood at Rs. 2,232·9 crores on June 30, 1968.

STATE CO-OPERATIVE BANKS

There were 25 state co perative banks with a total membership of 12,977 banks and societies and 8,409 individuals as on June 30, 1968. The details of their working capital in crores of rupees as on June 30, 1968 are as follows (figures in brackets relate to June 30, 1967): Owned funds 64.96 (55.64); deposits 179.60 (147.38); borrowings: Government 20.24 (22.68); Reserve Bank 166.55 (172.99); other sources 12.29 (4.25); working capital 443.64 (402.95). Loans and advances (representing Ioans made, cash credit and overdraft limits sanctioned and bills discounted) increased from Rs. 450.8 crores during 1966.67 to Rs. 539.8 crores.

CENTRAL CO-OPERATIVE BANKS

As on June 30, 1968 there were 344 central co-operative banks with a membership of 355,000. The working capital of these banks increased during the year by Rs. 67·7 crores to Rs. 70·6 crores. The details of the working capital in crores of rupees are as follows (figures in brackets relate to June 30 1967.): Owned funds 135·5 (115·6); deposits 300·6 (259·3); borrowings 269·9 (263·3); Working Capital 706·0 (638·3).

The loans and advances of the central banks rose during the year by Rs. 100 crores i.e. from Rs. 625.4 crores in 1966-67 to Rs. 726.9 crores in 1967-68. The loans outstanding as on June 30, 1968 stood at Rs. 549.9 crores representing an increase of Rs. 50.6 crores over the figure for 1966-67. As on June 30, 1968 the total overdues stood at Rs. 135.8 crores constituting 24.7 per cent of the loans outstanding.

AGRICULTURAL CREDIT SOCIETIES

The number of primary agricultural credit societies decreased further by 6,931 and stood at 171,804 as on June 30,1968. As against 28,074,000 members of all the societies (active and dormant) as at the end of the year, the number of members who were borrowing during 1967-68 was 10,791,000 or 38 per cent of the total membership.

The working capital of the societies increased from Rs. 625-2 crores as on June 30, 1967 to Rs. 709-2 crores as on June 30, 1968. Their owned funds increased by Rs. 24-7 crores and deposits by Rs. 8 crores. Loans issued during the year amounted to Rs. 428-2 crores showing an increase of Rs. 63-0 crores over the 1966-67 figure. The overdues have risen from Rs. 160-2 crores as on June 30, 1967 to Rs. 171-0 crores as on June 30, 1968 and formed 32 per cent of the loans outstanding compared to 30 per cent as on June 30, 1967.

NON-AGRICULTURAL CREDIT SOCIETIES

The non-agricultural credit societies comprising urban banks, employees' credit societies and others numbered 13,965 as at the end of June 1968. Their membership increased from 7,485,000 to 7,593,000 during the year. The working capital of the societies increased by Rs. 29·0 crores during the year and stood at Rs. 334·3 crores. The deposits held by these societies amounted to Rs. 213·4 crores and formed 64 per cent of the working capital. The loans and advances made during the year (comprising loans made, cash credit and overdraft limits sanctioned) amounted to Rs. 312·2 crores compared to Rs. 276·1 crores during 1966-67. Loans overdue at Rs. 15·1 crores formed 6 per cent of the total loans outstanding.

CENTRAL LAND DEVELOPMENT BANKS

The number of central land development banks remained constant at 19 during the year. Their membership as on June 30,1968 consisted of 905 primary land development banks and societies and 915,342 individuals, including nominal members. The share capital of the banks rose by Rs. 5·2 crores and stood at Rs. 24·1 crores at the end of June 1968. Their borrowings increased by Rs. 76·6 crores to Rs. 315·2 crores in June 1968. The value of debentures outstanding increased from Rs. 232·0 crores to Rs. 299·5 crores. The loans issued during the year rose by Rs. 33·6 crores representing an increase of 57 per cent.

PRIMARY LAND DEVELOPMENT BANKS

The number of primary land development banks (including three land mortgage sections of central co-operative banks) increased from 707 to 731 during 1967-68, Of those 451 banks were concentrated in Andhra Pradesh, Mysore and Tamil Nadu. The membership of the banks increased from 2,156,816 to 2,446,725 and the working capital from Rs. 173.6 crores to Rs. 223.4 crores during 1967-68. Loans outstanding in June 1968 stood at Rs. 203.5 crores having risen by Rs. 48.8 crores during the year. The overdue loans stood at Rs. 5.9 crores compared to Rs. 5.7 crores at the end of the previous year.

STATE PARTICIPATION

State contribution to the share capital of credit societies of all types increased to Rs. 57·8 crores from Rs. 50·4 crores at the end of June 1967. As on June 30, 1968 State Government share capital in state co-operative banks was Rs. 11·4 crores, in central banks Rs. 26·6 crores, in industrial banks Rs. 1-3 crores, in primary agricultural credit societies Rs. 11·8 crores and in central land development banks Rs. 6·7 crores.

NON-CREDIT SOCIETIES

Details relate to the year 1966-67.

The number of all types of non-credit societies, both agricultural and non-agricultural, at the close of 1966-67 stood at 133,006 representing an increase of 812 over the previous year. Number of different types of societies: Weavers' societies 12,946; other types of industrial societies 33,994; consumers' societies 14,208; housing societies 12,739; milk supply societies 9,046; farming societies 7,866; sugar cane supply societies 6,561; co-operative fisheries societies 3,483; marketing societies 3,476. Membership of these different societies was 17,289,990 and their working capital Rs. 762-3 crores.

The following are some of the important types of non-credit societies.

AGRICULTURAL MARKETING SOCIETIES

National and State Marketing Societies: The National Agricultural Co-operative Marketing Federation, New Delhi, is the marketing society at the national level.

[•] Source: Statements Relating to Co-operative Movement in India, 1967-88 for Credit Societies and 1966-67 for Non-Credit Societies, by Reserve Bank of India.

It sold agricultural produce worth Rs. 2-3 crores as against Rs. 1 crore in 1965-66.

At the state level, there were 24 federations consisting of 21 general purpose marketing societies, one society dealing in arecanut in Mysore and three in fruits and vegetables in Delhi. The apex societies had a membership of 6,036 societies and 424 individuals and others as regular members and 693 nominal members. The value of agricultural produce sold by all the apex societies was Rs. 105·2 crores as compared with Rs. 73·5 crores in 1965-66. The apex societies sold agricultural requisites of the value of Rs. 53·2 crores of which Rs. 44·3 crores represented the value of fertilizers.

Central Marketing Societies: These societies functioning at the district or the regional level, numbered 156. These societies sold agricultural produce worth Rs. 29·1 crores as against Rs. 11·6 crores worth of agricultural produce sold by 11·7 societies in 1965-66. The value of agricultural requisites and consumers' articles sold by them was Rs. 53·9 crores and Rs. 38·1 crores in 1966-67 as against Rs. 38·8 crores and Rs. 30·4 crores respectively in 1965-66.

Primary Marketing Societies: The total number of primary marketing societies increased from 3,198 in 1965-66 to 3,295 in 1966-67. The membership of all the primary marketing societies consisted of 147,267 societies, 1,837,706 individuals and others as regular members and 107,975 nominal (individual) members. Their working capital as on June 30, 1967 was Rs. 76-5 crores. The value of sales of the primary marketing societies during the year increased from Rs. 316-9 crores in 1965-66 to Rs. 367-7 crores in 1966-67 of which the value of produce sold as owners came to Rs. 219-1 crores and as agents to Rs. 146-7 crores and agricultural produce accounted for Rs. 146-7 crores and agricultural requisites Rs. 77-7 crores.

Linking of Credit with Marketing: Primary marketing societies numbering 534 assisted in the linking of credit with marketing. They recovered loans amounting to Rs. 10·4 crores on behalf of 16,818 primary agricultural credit societies as against 525 societies recovering loans totalling Rs. 12·2 crores on behalf of 16,823 primary agricultural credit societies. Co-operative marketing societies in Maharashtra, Mysore and Uttar Pradesh together accounted for 85 per cent of the total recoveries made by marketing societies in 1966-67 on behalf of credit societies. The percentage of the total amount recovered by the marketing and the processing societies to the total recoveries effected by primary agricultural credit societies during 1966-67 works out to 7·6 per cent as against 7·9 per cent in 1965-66.

AGRICULTURAL PROCESSING SOCIETIES

Co-operative Sugar Factories: The number of co-operative sugar factories increased by four during the year, bringing their total number to 82 as on June 30, 1967. During 1966-67, 55 factories were in production. All the sugar factories had on their membership rolls 11,998 societies, 302,701 cane-growers and 13,933 members other than sugar-cane growers. The value of sugar produced by the working factories decreased from Rs. 112-1 crores in 1965-66 to Rs. 73-3 crores in 1966-67. Their sales of sugar and bye-products rose to Rs. 103-8 crores in 1966-67 from Rs. 88-1 crores in 1965-66.

Cotton Ginning and Pressing Societies: There were 163 such societies of which 83 were in Gujarat and 67 in Maharashtra. These societies operated 3,175 gins and ginned 21·1 lakh quintals of cotton. They sold cotton of the value of Rs. 18·7 crores and agricultural requisites

worth Rs. 3.5 crores. In addition to these, 47 marketing societies also undertook processing of cotton.

Other Agricultural Processing Societies; There were 1,528 primary societies of which 188 were engaged in paddy husking (other than rice mills); 155 were rice mills; 333 societies were engaged in oil crushing; 26 processed fruits and vegetables and 826 were engaged in the processing of other commodities. They had a membership of 8,623 societies and 196,694 individuals. The value of their sales decreased from Rs. 3.6 crores in 1965-66 to Rs. 2.8 crores in 1966-67.

OTHER NON-CREDIT SOCIETIES

Farming Societies: The number of joint farming societies and their membership increased during the year by 251 and 7,282 respectively and stood at 5,328 and 1,17,092 respectively as on June 30, 1967. The number of members working on full-time basis in field operations was 55,313 and that of members engaged in parttime field operations was 17,685. The area under operation of these societies was 2.6 lakh hectares (6.5 lakh acres) of which 1.8 lakh hectares (4.3 lakh acres) were under cultivation as compared with 2.6 lakh hectares and 1.9 lakh hectares respectively in 1965-66. The value of production showed an increase from Rs. 3.8 crores to Rs. 5.4 crores. The number of collective farming societies increased from 2,218 to 2,538 and their membership rose from 78,060 to 91,305. The area commanded by them and that brought under cultivation by them was 1.5 lakh hectares and 0.9 lakh hectares respectively.

Irrigation Societies: The number of irrigation societies increased from 1,558 as on June 30,1966 to 1,631 as on June 30 1967. The area commanded and that actually irrigated by them was 1.6 lakh hectares respectively. These societies had Rs. 3.0 lakhs worth of irrigation works at the end of the year.

Fisheries Societies: The number of all Fisheries Societies (state, central and primary) increased from 3,338 as on June 30, 1966 to 3,483 as June 30, 1967. Their membership increased from 3·5 lakhs to 3·6 lakhs. Loans advanced by them declined to Rs. 73·6 lakhs from Rs. 81·3 lakhs in 1965-66. The value of their catch was Rs. 2·9 crores while their sales were of the order of Rs. 7·1 crores as compared to Rs. 2·0 crores and Rs. 4·0 crores respectively in 1965-66.

INDUSTRIAL SOCIETIES

Weavers' Co-operative Societies: There were 23 apex weavers' societies, 107 central societies and 12,816 primary weavers' societies as on June 30, 1967. The total membership of the primary weavers' societies as on June 30, 1967 was 1,333,021. They had a working capital of Rs. 35·2 crores consisting of Rs. 13·4 crores of owned funds, Rs. 2·5 crores of deposits and Rs. 19·4 crores of borrowings. The value of the cloth produced and the value of cloth sold during the year was Rs. 52·5 crores and Rs. 53·9 crores respectively. These societies were running 1,989 sale deposits, 110 pattern-making factories and 719 dye-houses.

Other Industrial Societies: There were 20 state, 132 central and 33,842 primary industrial societies as on June 30, 1967. The 18,198 active primary societies had a membership of 11·1 lakhs of which 0·03 lakh were societies and 11·0 lakhs individuals. The value of production by the primary societies during the year was Rs. 28·1 crores and that of sales was Rs. 29·2 crores as against Rs. 27·9 crores and Rs. 28·8 crores respectively during the previous year.

Spinning Mills: The number of co-operative spinning mills as on June 30, 1967 was 66 as against 65 in 1965-66. They had 14, 222 societies and 82,373 individuals as members. They had 893,415 spindles as against 839,832 in 1965-66. The value of yarn sold by them increased from Rs. 7·5 crores in 1965-66 to Rs. 11·5 crores in 1966-67.

Consumers' Stores: The number of wholesale stores rose from 272 to 371 during the year under review. Their sales increased from Rs. 159·5 crores in 1965-66 to Rs. 190·2 crores in 1966-67. The number of primary stores rose from 13,077 to 13,837. Their membership increased to 3,371,622 from 2,927,712 as at the end of the previous year. Their purchases and sales during the year increased by Rs. 43·7 crores and Rs. 33·1 crores respectively and aggregated to Rs. 185·9 crores and Rs. 195·4 crores. The purchases and sales of all consumers' stores numbering 14,208 during the year stood at Rs. 364·9 crores and Rs. 385·5 crores respectively as against Rs. 288·3 crores and Rs. 321·8 crores respectively.

Housing Societies: There were 16 state societies with a membership of 7,540. In 1966-67 they advanced loans to the tune of Rs. 11·1 crores and amount outstanding as at the end of the year was Rs. 36·9 crores. The number of primary housing societies increased by 958 to 12,723 as on June 30, 1967, with a membership of 815,612. The number of independent houses constructed by these societies and their members in 1966-67 was 6,439 and 9,102 respectively of the value of Rs. 6·8 crores and Rs. 6·7 crores as against 6,666 and 10,421 houses valued at Rs. 6·5 crores and Rs. 7·0 crores in 1965-66. The number of tenements constructed by the societies

during 1966-67 was 15,571 as against 15,218 in 1965-66.

STATE PARTICIPATION

The total amount of State government's contribution to the share capital of all types of non-credit societies increased from Rs. 41.9 coroes in 1965-66 to Rs. 53.1 crores in 1966-67. Of this, marketing societies received Rs. 19.8 crores, sugar factories Rs. 12.9 crores and spinning mills Rs. 8.1 crores. These three types of societies had received nearly 76 per cent of the total investment by the State Governments in the shares of Co-operatives in the non-credit sector.

Now called Tamil Nadu

POPULATION*

Note: -Unless otherwise stated the following article is based on the 1961 census which is the latest.

INDIA has only 2.4 per cent of world's land and 1.5 per cent of world income but 14 per cent of world's population. Population in India roughly grows at the rate of 13 million a year. The population estimate 1969.70 is about 540 millions. Between 1951 and 1969, India's population rose by 48 per cent from 363 millions

Birth rate per thousand, death rate per thousand and growth rate per cent respectively: 1951-60 (Census): 41·7; 22·8; 2·15; 1961-65 (Projected) 41·0; 17·2; 2·38; 1966-70 (Projected) 38·6; 14·0; 2·46; 1976-80 (Projected) 28·7;

 $9 \cdot 2$: $1 \cdot 95$

Expectation of life at birth (in years): 1941-50 (Census): Males 32·5; Females 31·7; Overall 32·1; 1966-67 (Projected) Males 53·2; Females 51·9; Overall 52·6.

Literacy: Literacy in the country is estimated to have gone up by 9 % since 1961 from 24 per cent to 33

Blind Persons: There are 4.5 million blind persons in the country against the total blind population of 15 millions in the world.

CENSUS 1961

The population of India has registered an unprecedented increase of 21.5 per cent from 359 million in 1951 to 439 million in 1961 according to the 1961 census figures.

The number of cities with a population of more than a million has gone up from five to six or seven, the number and the order of precedence varying with the definition adopted.

URBAN DENSITY

Greater Bombay ranks first with 4.15 million and Calcutta second with 2.93 million, Delhi (including New

Delhi, Shahdara and the Cantonment) third with 2.34 million, Madras fourth with 1.73 million, Hyderabad fifth with 1.25 million, and Ahmedabad sixth with 1.15 million.

If, however, the population of Calcutta (including 34 contiguous urban townships in a compact area of 164 sq. miles) is aggregated, "Greater Calcutta" ranks first with 5.55 million inhabitants. Similarly, "Metropolitan Bangalore" has a population of 1.21 million.

The density of population for the country works out to 370 per square mile as against 312 in 1951.

The highest urban density is to be found in Calcutta city (75,038). This compares with 22,293 per square mile in Greater Bombay and 55,208 in Madras.

The City-Sadar-Paharganj area of Delhi, however, has a density of 143,185 persons per sq. mile and the Karolbagh-Patel Nagar area of Delhi a density of 74,195. According to the final census reports these two areas "can be counted in the forefront of the world's highest density areas."

The highest increase in urban population during the last ten years has been recorded in Assam (116:69 per cent). Orissa comes next with 87:02 per cent, followed by Bihar, 49:08 per cent. Madhya Pradesh showed an increase of 47:76 per cent while Kerala 42:44 per cent.

GROWTH OF POPULATION FROM 1901-1961

(Persons and approx. percentage respectively); 1901 (236,281,245;...); 1911 (252,122,410; + 5·73); 1921 (251,352,261; - 0·31); 1931 (279,015,498; + 11·01); 1941 (318,701,012; + 14·22); 1951 (361,129,622; + 13·31); 1961 (439,235,082; + 21·50).

EDUCATION

UNDER the Constitution of India, Education is mostly managed by the State Governments. The Union Government is responsible for the maintenance of the Central Universities and institutions of national importance, for promotion of research and coordination and determination of standards in higher education and research. Cultural activities in relation to foreign countries also fall within its purview.

Under Article 351 of the Constitution the Union Government is responsible for developing and promoting Hindi language along with Sanskrit and other Indian languages.

The Government of India is also responsible for education in Union Territories. In the case of Territories, which have their own legislatures, some of the powers are enjoyed by the respective Governments. The obligations of the Union Government are discharged by the Ministry of Education, through its various programmes, activities, pilot projects and research conducted on the one hand by the Ministry of Education and on the other hand through the agency of different bodies like the University Grants Commission, the Council of Scientific and Industrial Research, National Council of Educational Research and Training, Central Hindi Directorate, Indian

[†] Before reorganisation in Nov. 1966.

Council of Cultural Relations and other similar organisations financed and administered by the Union Government. There are also a number of advisory bodies like the Central Advisory Board of Education, All-India Council for Technical Education, National Council for Women's Education which assist the Ministry of Education in working out its programmes and policies.

Though Education is a state subject, the Central Government and the State Governments work together in the formulation, implementation and evaluation of the various programmes. Social and economic planning, which includes educational planning, is a concurrent responsibility.

The authority of the Government in controlling the system of public instruction is in part shared with, and in part delegated to Universities and State Boards of Secondary and Intermediate Education as regards secondary education and to local bodies as regards elementary education in some States. The control over higher education is exercised through the University Grants Commission, a statutory body, originally set up in 1953 by the Union Government following the recommendation of the Radhakrishnan Commission on University Education.

EDUCATION COMMISSION

The Education Commission, appointed by the Government of India in 1964 to survey the entire field of educational development and to make a comprehensive review of the country's educational system submitted, its report in June, 1966. The report provided the basis for widespread discussions at all levels regarding the reconstruction of the educational structure in the country. On a detailed examination of the recommendations of the Education Commission, a Government resolution on the national policy on education was formulated and placed on the table of both Houses of Parliament on 24th July 1968.

FOURTH FIVE-YEAR PLAN*

The approach to Education during the Fourth Five-Year Plan is three-fold: (i) to remove the present deficiencies in the system and link it more effectively with the increasing demands of social and economic development; (ii) to remove internal stresses and strains in the educational system which have developed in consequence of rapid expansion in the first three Plans and (iii) to extend the system in response to social urges and economic needs. A sum of Rs. 809 crores (Rs. 259 crores in the Central Sector and Rs. 550 crores in the State Sector) has been allocated for educational development in the Fourth Plan.

Statewise allocation in Rs. lakks for Education in the Fourth Plan as mentioned in the Draft Fourth Plan: (The figures within brackets indicate allocation for general, technical and cultural education respectively); Andhra Pradesh (3,300; 300; 20); Assam (2,263; 301; 23); Bihar (3,061; 310; 1); Gujarat (2,550; 300; 50); Haryana (1,300; 155; 3); Jammu & Kashmir (769; 60; 20); Kerala (1,700; 225; 1); Madhya Pradesh (3,200; 400; 25); Maharashtra (5,500; 950; 22); Mysore (1,000; 200; 1); Nagaland (401; 45; 10); Orissa (1,425; 150; 25); Punjab (2,100; 85; 2); Rajasthan (1,400; 30; 15); Tamil Nadu (5,000; 503; 40); Uttar Pradesh (5,295; 1,048; 1); West Bengal (3,260; 370; 15); Union Territories: A. and N. Islands (100; —; 5); Chandigarh (50; 20; 1); Dadra and Nagar Haveli (23; ...; ...); Delhi (2,300; 251; 9); Gos, Daman and Diu (300; 84; 10); Himachal Pradesh (609; 50; 2); L. M. and A. Islands (36; ...; 1); Manipur (303; 20; 1); N.E.F.A. (200; ...; 1); Pondicherry (210; 20; 2); Tripura (332; 95; 1); Total (47,987; 5,972; 298); Grand total 54,257.

The following table shows the enrolment at different stages of education during 1968-69 and target at the end of the Fourth Plan (1973-74) (Enrolment in lakes):

Stage and age g	roup	3		1968-69	Fourth Plan (Target)

		mercej		300	00.0
Enrolment	+ +	8.4	* *	16.9	26.6
% of age-group	* 1	0.0	9.0	2.9	3.8

Illiteracy: As on March 31, 1969 the number of illiterates was 349 millions.

PRIMARY EDUCATION

Primary education (Classes I to VII or I to VIII as the case may be) is free in all States except Assam (boys only in Classes VI-VIII), Bihar (boys only in classes V-VIII), Uttar Pradesh (for boys only in Classes VII & VIII) and West Bengal (in some urban areas in Classes I to V and generally in Classes VI to VIII). All education is free in Jammu & Kashmir and Nagaland. The entire school education is free in Tamil Nadu, Andhra Pradesh, Kerala and Mysore.

STATE INSTITUTES OF EDUCATION

With a view to improving the quality of education at various levels particularly at the primary and middle schools levels, a centrally sponsored scheme known as "Establishment of State Institutes of Education" was started during the year 1963-64. Under this scheme, State institutes have been established in all the States, except Nagaland. These Institutes are intended to give training to school teachers, head-masters, inspecting officers and the staff of training institutions; to conduct research studies and investigations in the field of elementary education and to produce suitable literature for the benefit of teachers.

For 1968-69, hundred per cent Central assistance had been provided to the State Governments for this Centrally sponsored scheme. In the Fourth Plan, it has been transferred to the state sector.

SECONDARY EDUCATION

In the middle of the Third Plan, the Central Government also initiated certain quality improvement programmes such as establishment of State Bureaux of Educational and Vocational Guidance, State Evaluation Units, State Institutes of Science and improvement of Science Education in secondary schools, etc. as Centrally sponsored schemes. They continue in the Fourth Plan, but in the State sector.

The predominant pattern of education in the country comprises eight years of elementary (Basic) education; three years of secondary education with diversified

EDUCATION 143

courses to give it a vocational bias and make it a terminal point for entry into trade or profession; and three years of university education leading to the first degree. Some of the States have adopted a pattern of seven years of elementary (Basic) education followed by four years of secondary education.

Education Commission 1966, has recommended a pattern of ten years of general education, two years of higher secondary or one to three years of vocational education and a course of three years or more for higher education leading to first degree.

There were 30,039 High and Higher Secondary Schools in 1967-68.

At the end of the Third Plan, 17.8 per cent of the children in the age-group 14-17 were studying in secondary classes. The Fourth Plan (1969-74) target is to raise the total enrolment in this age-group to 10.40 millions and the percentage of enrolment to 26.0. Estimated enrolment in 1968-69 was 6.59 million (4.97 million boys and 1.62 million girls).

The study of languages forms an important part of school education. Considering all aspects, the Education Commission (1964-66) has suggested a modified three-language formula, including (a) the mother tongue or the regional language, (b) the official language of the Union or the associate official language of the Union as long as it exists, and (c) a modern Indian or European language not covered under (a) and (b) and other than that used as the medium of education.

Central Schools

The Central Schools Scheme has been implemented by the Government of India in pursuance of the recommendation of the Second Pay Commission, to provide educational facilities to the children of transferable Central Government employees. Under this scheme, 118 higher secondary schools have been established with a common syllabus, and a common medium of instruction Hindi/English and to prepare students for a common examination, viz., the All-India Higher Secondary Examination of the Central Board of Secondary Education, New Delhi. These schools are being developed as quality schools, at a moderate cost to the parent. The children of the various categories of personnel liable to transfer are eligible for admission in the following order of priority: Central Government employees including Defence personnel; All-India Services employees of autonomous and semi-autonomous bodies fully financed by the Central Government: floating and local population.

On August 1, 1968, about 64,668 children were studying in these schools, registering an increase of 13 per cent over the enrolment in the previous year. The entire expenditure on the running of the schools is borne by the Ministry of Education.

No tuition fee is charged in Classes I to VIII. Tuition fee at the rate of Rs. 6, Rs. 7, and Rs. 8 per month is charged in Classes IX, X and XI respectively. Scheduled Caste/Tribe students are exempted from payment of tuition fees.

Central Board of Secondary Education

The Central Board of Secondary Education was reconstituted in 1962 to enable it to play a more useful role in the field of secondary education and to meet the educational needs of the students whose parents have to move from one State to another from time to time.

The Board conducts the Ail-India Higher Secondary, Higher Secondary (Three-year course), Higher Secondary

(One-year course), Higher Secondary Technical, Demonstration Multipurpose Higher Secondary Examinations.

Any educational institution situated in or outside India can get itself affiliated to the Board. The total number of higher secondary schools recognised by the Board is about 700. All the Central Schools (120) set up by the Govt. of India prepare their candidates for the All-India Higher Secondary Examination of the Board. Similarly, all the Military Schools and Sainik Schools (20) located in different states are also affiliated to the Board, besides several other well-known public schools in the country. All the higher secondary schools in the union territories of Delhi, Manipur, Goa, Laccadive and Andaman & Nicobar islands, are affiliated to the Board. The Indian Schools in Tehran (Iran), Kuwait and Bahrain (Arabian Gulf) are also affiliated to the Board.

NATIONAL COUNCIL OF EDUCATIONAL RESEARCH AND TRAINING

The National Council of Educational Research and Training was set up by the Government of India in September, 1961 as an autonomous organisation. The objectives of the Council are to assist the Ministry of Education and Youth Services in the formulation and implementation of its policies and major programmes in the field of school education. For the realisation of these objectives, the main functions are: to undertake or organise studies, investigations and surveys relating to school education; preservice and inservice training mainly at an advanced level; organise extension services for such institutions as are engaged in educational research, training of teachers; provision of extension services to schools; disseminate improved educational techniques and practices; act as a clearing house for ideas; advise State Governments and other educational organisations and institutions on matters relating to school education; undertake publication of books, periodicals and other literature.

Constituents of the NCERT

The Council has set up three academic bodies called the National Institute of Education, the Central Institute of Education and the four Regional Colleges of Education located at Ajmer, Bhopal, Bhubaneswar and Mysore. The National Institute of Education, which was reorganised as per the Resolution of the Government of India of August, 1969, situated in Delhi, functions through the following constituent Departments/Units: Department of Educational Psychology and Foundations of Education; Department of Pre-Primary and Primary Education; Department of Science Education (including Central Science Workshop); Department of Social Sciences and Humanities; Department of Teacher Education; Department of Teaching Aids; Department of Textbooks; Data Processing and Educational Survey Unit; and Library, Documentation and Information Services,

Besides the above Departments, the Council has a Department of Adult Education which is concerned with literacy programmes for neo-literates as also an integrated programme of workers' education.

Summer Institute in Science

The Council, in collaboration with the W.G.C. and U.S.A.I.D., has been organising summer institutes for science teachers in biology, chemistry, physics and mathematics. In 1968, 64 such institutes were organised.

Summer Institutes in Humanities and Social Sciences

The National Institute of Education also organises summer institutes. During the summer vacations of 1968,

it organised 10 Institutes in the following subjects, viz.: Geography 4; Problems of Indian Education 1; Linguistics and Language Teaching 1; Research Methodology and Experimental Designs 1; Learning Motivation and Group Processes 1; Social Education 1 and Educational Psychology 1. A few more summer institutes for the teachers of Central Schools in Chemistry, Physics, Mathematics, English and Hindi were also organised.

National Science Talent Search Scheme

Under this scheme, about 350 students are selected every year at the close of the secondary school stage and are assisted financially to pursue courses in basic sciences up to the Ph.D. level. Besides this, the scheme also provides for book grants, re-imbursement of the tuition fees of the beneficiaries.

Extension

Under this Programme extension workers have been given special training in developing instructional materials and improving the use of school Libraries. There are 97 secondary extension centres/units in the selected University departments and Secondary Training Colleges and 45 Primary Extension Centres in the Elementary Teachers Training Institutions and State Institutes of Education. Three field Units were established in the States of Andhra Pradesh, Rajasthan and Assam,

Examination Reform

The Council has been continuing a comprehensive programme of examination reform. Training courses and workshops are held in education evaluation for examiners, paper-setters and others concerned with developing new techniques for setting better papers and better scoring procedures.

Regional Colleges of Education

The Regional Colleges of Education represent a new experiment in teacher training. The colleges offer a widerange of courses in which subject-matter and pedagogical training are integrated. The NCERT had added the Programme of Summer School-cum-Correspondence course for the B.Ed. degree in all the four regional colleges. The enrolment in the Summer-School-cum-Correspondence courses leading to the award of B.Ed. degree being run by the four regional colleges is 955.

National Awards for Teachers

(See article "Awards and Prizes".)

WOMEN'S EDUCATION

The Central and State Governments give due weight to the advice of the National Council for Women's Education in framing programmes and policies in the matter of education for women. Similar bodies have been set up by the various State Governments.

With the object of overcoming the lag in the education of girls and women, some of the important measures taken by the Government are;—

- (i) Appointment in several State Directorates of Education, of Deputy Joint Directors of Education specially charged with the formulation and execution of special programmes for girls' education.
- (ii) Appointment of special committees from time to time to study problems of girls' education.
- (iii) In addition to the schemes of general education which benefit boys as well as girls, special programmes including those relating to the construction of staff quarters for women teachers in rural areas, attendance allowance, appointment of school mothers, construction of sanitary

- blocks and hostels for girls, condensed educational courses and the establishment of polytechnics for girls, have been functioning.
- (iv) Assistance to Voluntary Educational Organisations working in the field of Women's Education.
- (v) Holding of seminars in different States to discuss problems and programmes of girls' education.

The enrolment figures at all stages for the year 1968-69 were 26-22 million girls: 20-88 million in classes I to IV, 3.72 million in classes VI to VIII and 1-62 million in classes IX to XI

It is, however, expected that by the end of the Fourth Five Year Plan 71.5 per cent of girls at the primary stage, 26.3 per cent at the middle stage and 12.8 per cent at the secondary stage in the respective age-groups will be in schools.

RURAL HIGHER EDUCATION*

The National Council for Rural Higher Education, established in 1956, advises Government on all matters relating to the development of rural higher education.

Under the scheme, 14 Rural Institutes are at present functioning in different parts of the country. These are: Gandhigram Rural Institute, Gandhigram, Madura; Sri Ramakrishna Mission Vidyalaya Rural Institute, Coimbatore: Lok Bharati Rural Institute, Sanosara; Rural Institute, Amravati; Karmaveer Higher Rural Institute, Gargoti; Vidya Bhawan Rural Institute, Udaipur; Balwant Vidyapeeth Rural Institute. Bichpuri, Agra; Rural Institute, Jamia Millia, New Delhi; Rural Institute of Higher Studies, Birouli, Bihar; Kasturba Rural Institute, Rappura; Rural Institute, Wardha; Rural Institute, Hanumanamatti, Mysore State; Kasturbagram Rural Institute, Indore and Rural Institute, Thavanoor (Kerala).

The courses, as approved by the Council and adopted by the Rural Institutes, are:

(i) a three-year Diploma Course in Rural Services; (ii) a three-year Diploma Course in Civil and Rural Engineering; (iii) a two-year Certificate Course in Agricultural Science; (iv) a one-year Sanitary Inspectors Course; (v) a one-year Advanced Course for Sanitary Inspectors; (vi) a two-year Post-Diploma Course in Rural Sociology and Community Development; (vii) a two-year Post-Diploma Course in Rural Economics and Cooperation (viii) a three-year Diploma Course in Rural Services (Education) and (ix) a one-year Preparatory Course to initiate matriculates into the three-year Diploma Course in Rural Services. The post-graduate Diplomas in (i) Rural Economics and Cooperation, and (ii) Rural Sociology and Community Development have so far been recognised by the Government of India and some State Governments as equivalent to the M.A. degree of an Indian University for purposes of employment under them.

The financial allocations for rural institutes of higher education for 1969-70 were Rs. 24·50 lakhs (revised) and in 1970-71 Budget were Rs. 26·035 lakhs.

BOOK DEVELOPMENT PROGRAMME

The Ministry is associated with the programmes of collaboration with the Governments of the U.S.A., the U.K. and the U.S.S.R. for the republication of standard education works originating in the respective countries. So far about 600 American books, 200 British books and 84 Russian books have been republished under programmes of the respective countries.

In order to safeguard the interests of Indian authors whose books could be regarded as standard ones, the

^{*} The number of candidates who took the annual examinations conducted by the National Council for Rural Higher Education in 1969 was 1,268 of whom 802 were declared successful.

EDUCATION 145

Ministry is also operating a programme for republication of low-priced editions of selected standard educational works written by Indian authors.

In order to stimulate the production of books of all types, the Government of India has also set up in February 1967, a National Book Development Board which would lay down the guidelines for the promotion of book development in the context of the overall requirements of the country. The Board is constituted with representatives of various sectors of the books industry as also of the various governmental and non-governmental agencies dealing with implementation of books programmes of various kinds.

SOCIAL EDUCATION

The programme of Social Education is put through literacy classes, community centres, and libraries which are an essential agency of mass education.

Radio listening and discussion groups, demonstrations, and excursions have been effectively used. Besides radio, visual aids and printed literature have served as means of imparting education to the masses.

The Department of Adult Education under NCERT, has been training Social Education personnel of different categories deputed by the State Governments etc.

To encourage production of suitable literature for neoliterates and the new reading public, the Ministry of Education has organised a number of schemes, including the award of prizes to authors, and the bulk purchase of good books.

The Workers' Social Education Institutes at Indore and Nagpur serve as pilot projects of social education for industrial workers.

The Central Government assists voluntary educational organisations for the development of their activities in the field of social education.

Another project of importance undertaken in the field of social education relates to "Farmers' Education and Functional Literacy" conducted jointly by the Ministries of Food and Agriculture, Education, and Information and Broadcasting. It has been initiated in a selected district in each of the ten States of Punjab, Uttar Pradesh, Mysore, Andhra Pradesh, Gujarat, Haryana, Madhya Pradesh, Tamil Nadu, Orissa and West Bengal. With 100 per cent Central assistance, it is estimated that about 23,400 adult farmers are covered by the literacy classes under the scheme.

HINDI, SANSKRIT AND MODERN INDIAN LANGUAGES

The Hindi Shiksha Samiti advises the Ministry of Education on matters relating to propagation and development of Hindi in the country.

Development Programmes of Hindi: The programme for the propagation of Hindi includes grant of financial assistance to voluntary Hindi Organisations, appointment of Hindi teachers in middle and higher secondary schools in non-Hindi speaking States, establishment of Hindi teacher training colleges in non-Hindi speaking States, free supply of Hindi books to schools and colleges, award of scholarships for post-matric studies in Hindi in non-Hindi speaking States and award of prizes to Hindi writers and poets belonging to non-Hindi speaking areas. The programme of enrichment and development of Hindi includes schemes of preparation, translation and publication of standard books of university level in Hindi through official and voluntary agencies as well as universities and

learned societies, preparation and translation of books in Hindi with the assistance of private publishing concerns and preparation of official literature and evolution of scientific and technical terminology in Hindi.

Thirteen first prizes of the value of Rs. 1,000 each and 13 second prizes of the value of Rs. 500 each are awarded to Hindi writers of non-Hindi speaking States for their literary works in Hindi.

Upto the end of December 1969, 11 volumes of the 12-volume Hindi Encyclopaedia were brought out and the remaining one volume is expected to be published shortly.

Commission for Scientific and Technical Terminology

In pursuance of the Presidential order of the 27th of April, 1967, the Standing Commission for Scientific and Technical Terminology was set up for evolution of Scientific and Technical Terminology in Hindi and Regional languages. The functions of the Commission were laid down as follows:—

- (a) Review of the work done so far in the field of scientific and technical terminology in the light of principles laid down in paragraph 3 of the Presidential Order.
- (b) Formulation of principles relating to coordination and evolution of scientific and technical terminology in Hindi and other languages.
- (c) Coordination of the work done by different agencies of the States in the field of scientific and technical terminology, with the consent or at the instance of the State Governments concerned, and approval of glossaries for use in Hindi and other Indian languages as may be submitted to it by the concerned agencies.
- (d) The Commission may also take up preparation of standard scientific text-books using the new terminology evolved or approved by it, preparation of scientific and technical dictionaries and translation into Indian languages of scientific books in foreign languages.

Sanskrit

The Central Sanskrit Board has played an important role in the formulation and implementation of a number of schemes for promotion of Sanskrit. The most notable recommendation of the Board during 1966-67 related to the setting up of Shri Lal Bahadur Shastri Rashtriya Sanskrit Vidyapeetha in Delhi and running it on the lines of the Kendriya Sanskrit Vidyapeetha, Tirupati. The Vidyapeetha started functioning from 1-4-1967.

The traditional type of Sanskrit education was encouraged by giving suitable grants to voluntary Sanskrit organisations, Gurukulas. About 100 scholars trained on traditional lines continued their research and were awarded scholarships. About 1,000 merit scholarships were awarded to students studying Sanskrit in higher secondary schools. 386 eminent Sanskrit Pandits enjoyed suitable assistance under the Scheme of Financial Assistance to eminent Sanskrit Pandits in indigent circumstances.

During 1968-69, the Ministry of Education assisted in bringing out 11 Sanskrit publications including two out-of-print books by individuals, organisations and private publishers. With financial assistance from the Ministry, the Deccan College of Postgraduate and Research Institute, Poons, has been engaged on compiling a Sanskrit-English dictionary based on historical principles, which is likely to be ready by 1976.

Modern Indian Languages

Under the scheme for the development of Modern Indian Languages, grants up to 50 per cent of the expenditure on approved items are sanctioned for bringing out publications like encyclopaedias, bilingual dictionaries, books of knowledge, publications bringing out similarities among different Indian languages, catalogues of manuscripts, books of cultural, literary, indological or linguistic interest, etc. Grants on the same basis are also given for holding literary conferences, seminars and exhibitions and for conducting other important activities considered conducive to the development of Indian languages. Assistance has also been rendered by way of purchasing copies of printed publications.

Under another scheme, assistance is given to State Governments to enable them to take up programmes for the development of the regional languages.

Bharatiya Bhasha Samiti: This advisory body consisting of 51 members advises the Government on all matters relating to the propagation and development of Indian languages.

SCHOLARSHIPS

The Government of India have been operating a number of scholarship schemes for study in India. A brief report on the important schemes is as below:

National Loan Scholarships: Financial assistance is given to the poor but meritorious students to complete their education. The loan is recoverable in monthly instalments commencing one year after the loance secures employment or three years after the grant of scholarship whichever is earlier.

During 1969-70, 20,000 awards were distributed among all the States and Union Territories. In each year of the Fourth Plan, it is proposed to give 20,000 awards. The estimated expenditure during the first year of the Plan is Rs. I,48,00,000 (Plan) and Rs. 5,12,83,400.

National Scholarships Scheme: Under this scheme 2,650 awards were made every year during the Third Plan.

In 1968-69, the Merit-cum-Means Scholarships Scheme for technical studies was merged with it and the number of awards under the amalgamated scheme raised to 8,250. The number of scholarships during 1969-70 is 8,500. Scholarships under this scheme are awarded to students with a parental income up to Rs. 500 p.m. The estimated expenditure during the first year of the Fourth Plan is Rs. 2,26,11,000.

Scholarships for study in Residential Schools: Two hundred candidates were selected by the Union Ministry of Education under its scheme of Merit Scholarships for study in Residential Schools for the academic session started in 1970. They included five Scheduled Castes and two Scheduled Tribes candidates.

Scholarship for School Teachers' Children: The number of scholarships awarded every year during the Third Plan was 500. It is proposed to give 500 awards in each year during the Fourth Plan. The estimated expenditure in the first year of the Fourth Plan is Rs. 20,87,200.

Scholarships for Study Abroad: In order to accelerate the pace of development of education, science and technology and to meet the shortage of trained personnel in different fields, the Government of India has also been accepting offers of scholarships and fellowships

for study/research/training of Indian nationals abroad made by foreign governments and organisations. As a measure of reciprocity and to promote cultural relations with other countries, the Government of India has also been offering scholarships and fellowships to the nationals of other countries for study in India.

During the year under report, a number of scholarship schemes were in operation which can be classified into the following sections:

- I. Scholarships for Indian Nationals for Study in India.
- II. Scholarships for Indian Nationals for Study abroad.
- III. Scholarships for students belonging to Scheduled Castes and Tribes etc.
- IV. Programme of Exchange of Scholars.
- V. Scholarships for Foreign Nationals for Study in India.

Students in U.S.A.: There were 9,594 Indian students, trainees, physicians, surgeons, visiting scholars and faculty members in the United States as on January 1, 1969 according to a survey of the Education Department of the Indian Embassy in Washington.

Foreign Students

As on June 7, 1967, 4,662 foreign students, coming from over 50 countries, were studying in our country.

A large number of these students were receiving scholarships covering tuition fees, cost of books, study tour expenses, maintenance allowance, cost of travel, etc. Some seats were also reserved in the universities for them and as far as possible, accommodation was reserved in university and college hostels.

NATIONAL FITNESS CORPS

The National Fitness Corps is a comprehensive youth programme adopted on a national scale combining activities designed to develop the total personality of Indian youth.

The broad aspects of the integrated scheme are:-

- (1) Objects: (a) to make youth physically strong and resilient by developing in them physical efficiency, toughness, endurance, courage, discipline and patriotic fervour; (b) to develop among students a sense of appreciation for the democratic values of life and love for their country, its past history and future destiny.
- (2) Programme consists of: (i) Exercise Tables; (ii) Drill and Marching; (iii) Lezium; (iv) Track and Field Events; (v) Games and Relays; (vi) Gymnastics for boys/ Folk Dances for girls; (vii) Simple Combats, Wrestling, Judo; (viii) Hiking and Cross-country; (ix) Instruction and Practice in Tests; (x) Field Craft (for boys)/Home Nursing (for girls); (xi) Information on Indian Constitution and Democratic set-up, Practical Projects and Community singing; (xii) Civil Defence; (xiii) Swimming etc.

School Curriculum

The programme of National Fitness Corps is a compulsory subject for all children of the age group 9-16 plus in Middle, High and Higher Secondary Schools. There is a compulsory or core group of activities which every child must do as part of the N.F.C. activities, while there are also a few optional items meant for children having a special flair for them.

Teacher Training

As a result of the decision of the Central Government to decentralise the whole programme of National Fitness Corps, all the training centres set up by this directorate have since been closed down.

15,893 State PETs/ACCTs and 5,112 Central N.D.S. instructors have been recriented and 847 persons sponsored by all states have received training in C.P. Ed/D.P. Ed at the erstwhile training centres.

Foreign Trained Scientific and Technical Personnel

Among the Scientific & Technical Personnel who have been abroad after January 1, 1957 for higher studies, training or employment 15,005 were registered by Jan. 1, 1970, in the Indians Abroad Section of the National Register maintained by the Directorate of Scientific & Technical Personnel.

The position in each field is briefly indicated below.

Registration of Indiane Abroad as on Jan. 1, 1970.

147

Subjec	ota				Total Registered
Scientists		**			4,766
Social Scientists					239
Engineers					6,014
Technologists		4.4	• •		1,055
Medical Personnel		* *	* *	* *	2,931
Total					15,005

In addition, 594 persons in the field of Business Administration and Accountancy had been registered by Jan. 1, 1970 who had been abroad for studies, training or employment.

The broad distribution of those selected to the Pool for the temporary placement of Scientists, Engineers, Technologists, Medical personnel and Social Scientists, commonly known as the Scientists' Pool is given below.

SELECTIONS TO THE SCIENTISTS' POOL FROM VARIOUS COUNTRIES AS ON 1ST JANUARY 1970

MEDIUM OF INSTRUCTION IN UNIVERSITIES

The vice-chancellors' conference at New Delhi in Sept. 1967 accepted in the plenary session a statement agreeing to a change in the medium of education at the undergraduate level to Indian languages within a period of about five to ten years, depending on the degree of preparatory work already done, the nature of the subject and other relevant factors. It was, at the same time stressed that in the programme of change-over, the importance of English should be fully recognised and adequate arrangements made for its study at the under-graduate level.

At the post-graduate and research level the question of medium of education lost its usual meaning as the students would have to depend on books and journals in English and other important world languages in science, medicine and technology.

In the case of All-India institutions, the present arrangements regarding the medium of instruction might continue as recommended by the Education Commission. In the case of large cities with a multi-lingual population, medium of education might continue to be English in addition to the regional languages which the university would provide.

A large number of the universities have already switched over to regional languages either wholly or in conjunction with English. A quick survey of the university scene shows that while the science students particularly at the post-graduate level, prefer English as the medium of instruction and examination, there is an ever-increasing

number who have already changed over to the regional language. In most universities, the number of Englishmedium pupils is sharply falling.

Over 40 universities in the country including Delhi, Calcutta, Madras, Mysore, Lucknow, Gujarat, Banaras, Allahabad, Punjab, Patna, Osmania, Vikram, Sagar and Visva Bharati offer a regional language, as the medium of instruction (in addition to English) at the degree level in the faculties of arts and commerce. In most of these a regional language can be offered as the medium even for the sciences but students generally opt for English. The only exception to this will be Shivaji University which, in the near future, will insist on English as the sole medium for science education.

The picture changes altogether at the post-graduate level. Of the 40 universities only 18 or so have provision for teaching or examining through a regional language. English thus continues to be the only medium at this level in the other universities. The wholly regional universities like the Ravi Shankar, Gujarat Vidyapeeth and Kashi Vidyapeeth teach and examine in Hindi, Gujarati and Marathi only. So far as science subjects are concerned, English would appear to be the only medium at this level.

According to a statement made by the Central Education Minister in the Parliament in August 1969, out of 86 universities in the country 52 had already introduced either Hindi or other Indian languages as the medium of instruction in addition to English.

Literature in Indian Languages

The Government of India have initiated a scheme with a proposed outlay of Rs. 15 crores in the Fourth

Plan for assisting the production of university-level books in regional languages.

The Government has agreed to grant Rs. one crore to each State Government, excluding the administrations of Union Territories and Nagaland, spread over a period of six years from 1968-69 for the production of books in the regional languages to facilitate the switch-over to regional languages.

Fifteen States have already set up book production boards. The Education Ministry has so far released onaccount grants to Rajasthan, Bihar, Madhya Pradesh, Andhra Pradesh, Haryana, Uttar Pradesh, Tamil Nadu, Mysore, Kerala, West Bengal, Assam and Maharashtra.

The States have been advised that they could straight-away incur further expenditure of Rs. 4 lakhs each during 1969-70 and more funds would be given if needed.

In addition, the Ministry has also a plan under which 100 fellowships would be offered each year for the five years of the Fourth Plan to first class post-graduate students, who would take up the translation or writing of original books in regional languages.

Each translator has to have triple competence, competence in the foreign language, in the subject, and in the regional language.

Already more than 800 books in different subjects are available in Hindi at the university level.

UNIVERSITY GRANTS COMMISSION

(Bahadur Shah Zafar Marg, New Delhi-1)

Basic facts and figures (1968-69)

The total number of universities during 1968-69 was 76 (as on 31-3-1969) and the number of institutions deemed to be universities was ten. The total number of colleges was 3,112 as against 2,899 in 1967-68. The total student enrolment in the universities and colleges was 24,73,264 as against 22,18,972 during 1967-68.

The number of teachers in universities and colleges was 1,10,943.

Grants paid during 1968-69

Grants are provided to universities and institutions deemed to be universities for the implementation of development programmes sanctioned by the Commission. The development needs of agricultural universities are looked after by the Indian Council of Agricultural Research, Ministry of Food and Agriculture. The Commission's grants are meant for additional staff, library and laboratory facilities, accommodation for teaching and research, books, furniture, equipment etc. The development programmes of the universities are examined and discussed by the visiting Committees with the universities/institutions concerned, during each Plan period. Development grants are also provided to the colleges for projects approved by the Commission.

In 1968-69 the Commission released to the universities Rs. 119·71 lakhs and Rs. 260·93 lakhs as development grants for the humanities (including social sciences) and science subjects respectively.

The Commission has been providing grants for the development and expansion of higher education in Engineering and Technology to university departments and institutions maintained by the universities. The grants paid during 1968-69 amounted to Rs. 242-72 lakhs. These grants are intended for the improvement/expansion of existing facilities, five-year integrated courses, courses

in chemical engineering, pharmacy and business administration, specialised post-graduate courses, and research programmes, fellowships etc.

Area Studies: Financial assistance is provided by the Commission to the universities concerned for promoting the programme of area studies relating to the life, institutions, culture and language of countries, with which India has close social, political and economic relations.

Publication Grants: For the publication of the research works and doctoral thesis financial assistance is provided to the universities on a cent per cent basis.

Central Universities: The Commission provided maintenance grants amounting to Rs. 583.84 lakhs to the four central universities during 1968-69. The maintenance grants paid to Constituent/Affiliated colleges of Delhi University amounted to Rs. 193.35 lakhs and the grants paid to these colleges for specific purposes amounted to Rs. 30.23 lakhs.

New Universities: Six universities were established during 1968-69. They are: (1) Gujarat Ayurveda university (Jamnagar), (2) Jawaharlal Nehru university (New-Delhi), (3) Maharashtra Krishi Vidyapeeth (Poona), (4) Calcut University (Kerala), (5) Awadesh Pratap Singh University (Rewa), (6) Assam Agricultural University (Jorhat).

Colleges: The Commission provides assistance to colleges for the requisite facilities for their development programmes. Financial assistance is also given to selected colleges for the pestgraduate instruction for providing additional staff, teaching accommodation, library and laboratory facilities etc. on a sharing basis. Apart from the assistance given to colleges for post-graduate studies, grants were also provided to colleges on the prescribed sharing basis for extension of libraries and laboratories and purchase of scientific equipment, books and journals, provision of residential accommodation for teaching staff and students etc.

Centre for Advanced Study: The development of centres of advanced study in the universities is one of the major programmes undertaken by the Commission for raising standards at the postgraduate and research levels and encouraging the pursuit of excellence in specific fields. The U.G.C. has been providing assistance to a number of university departments, carefully selected on the basis of existing facilities and potentialities for further development to function as centres of advanced study in specialised fields. The departments recognised by the Commission as centres of advanced study function on an All-India basis and provide facilities to scholars of outstanding ability for advanced studies and research.

So far 30 university departments have been recognised as centres of advanced study of which three viz. the Department of Sociology, Delhi University, the Department of Bio-chemistry, Indian Institute of Science, Bangalore and the Department of History, Aligarh Muslim University, were recognised as centres during 1968-69.

146 scholarships and fellowships are available in the centres which have helped students and teachers from various parts of the country to come to these centres. Visiting fellowships have also been provided to centres to enable them to invite scientists and scholars from within and outside the country.

Programmes for Teachers

Summer Institutes, Seminars and Refresher Courses: During 1968-69, 61 summer institutes were organised in science subjects for the benefit of secondary school

EDUCATION 149

teachers, Funds for these institutes were provided by the National Council of Educational Research and Training, Ministry of Education & Youth Services. The United States Agency for International Development provided books and equipment, and also made available the services of American consultants, who worked as members of the academic staff of the institutes. Four of the summer institutes one each in physics, chemistry, biology and mathematics, were organised in collaboration with the British Council. The total number of participants in the institutes for school teachers was 2,302. These summer institutes incidentally helped in establishing links between schools and universities, and revitalising science education in the schools.

Summer Institutes for College Teachers: During 1968-69, 61 summer institutes for college teachers were organised in collaboration with the National Science Foundation and the United States Agency for International Development. The total number of participants in these institutes was 2,109. Upto 1968, 190 summer institutes in physics, chemistry, biology and mathematics were organised in which 6,922 college teachers participated.

Ten summer institutes in English language were organised in 1963-69 in collaboration with the British Council. The Commission sponsored a scheme for research participation in science subjects for college teachers. The Commission provided assistance to the universities for academic conferences, symposia, refresher courses, seminars etc., for the improvement of the standards of teaching and research. The Commission has been providing assistance to the universities for the provision of facilities required for their programmes of teaching and research.

Exchange of Teachers: Under the scheme of 'Exchange of Teachers', financial assistance is provided to the universities on a cent per cent basis, to enable them to invite reputed teachers and experts from other universities or centres of learning in the country for short periods to deliver lectures, conduct seminars or guide research works.

Residential Accommodation for Teachers: For the period upto 1968-69, grants amounting to Rs. 1-19 crores for the construction of teachers' hostels and Rs. 2-85 crores for staff quarters were provided to the universities.

Programmes for Students

Welfare and Discipline: The Commission continued to provide assistance to the universities and the colleges, within the available resources, for research scholarships and fellowships, hostels, student homes, non-resident student centres, health centres, student aid fund etc.

Scholarships and Fellowships: Scholarships for undergraduate and postgraduate studies are provided by the Ministry of Education & Youth Services and other agencies. In addition the University Grants Commission has made provision for a specific number of scholarships and fellowships which are awarded every year for promoting research and advanced study in different fields.

Senior fellowships of Rs. 500 per month and junior fellowships of Rs. 300 per month are available for a period of two years and three years respectively.

The Commission has also been providing research fellowships in Engineering and Technology of the value of Rs. 400 per month. Each of these fellowships also exries an amount of Rs. 1,000 per annum for meeting expenditure on contingencies related to the research undertaken, and an additional amount of Rs. 1,000 may be provided for field work and publication of research work completed. Five hundred research scholarships,

each of the value of Rs. 250 p.m. and available for a period of three years, were allocated to 64 universities for promoting research in science subjects and the humanities and social sciences.

Universities (January 1970)

The names of Universities with their Vice-Chancellors are given below:—

Agra University-Shital Prasad; Aligarh Muslim University-Prof. Abdul Aleem; Allahabad University-Prof. A. B. Lal; Andhra University (Waltair)-L. Bullayya; Andhra Pradesh Agricultural University (Hyderabad) -O. Pulla Reddi; Annamalai University (Annamalainagar) -Dr. S. P. Adinarayan; Assam Agricultural University (Jorhat)—Dr. S. R. Barooah; Awadesh Pratap Singh University (Rowa)— L. O. Joshi; Banaras Hindu Uni-versity (Varanasi)—Dr. K. L. Shrimali; Bangatore University-T. K. Tukol; Berhampur University-R. P. Padhi; Bhagalpur University-Satyendra Narayan Aggarwal; Bihar University (Muzaffarpur)—Dr. P. S. Muhar; Bombay University—Dr. P. B. Gajendragadkar; Burdwan University—Prof. P. N. Bhaduri; Calcutta University— Dr. S. N. Sen; Calicut University (Kerala)—M. Muhammad Ghani; Delhi University—Dr. K. N. Raj; Dibrugarh University-Dr. B. R. Seth; Gauhati University-Dr. M. N. Goswami; Gorakhpur University—P. T. Chandi; Gujarat University (Ahmodabad)—Prof. Umashankar Jethalal Joshi; Gujarat Ayurveda University (Jamnagar) —Mohan Lal P. Vyas; Indira Kala Sanget Vishwavidya-laya (Khairagarh, M.P.)—Vacant; Indore University— K. L. Joshi; Jabalpur University-Dr. R. B. Pandey; Jadavpur University (Calcutta)-Prof. Hem Chandra Guha[†]; Jammu University—Dr. J. N. Bhan; Jawaharlal Nehru University (New Delhi) — G. Parthasarathi; Jawaharlal Nehru Krishi Vishwavidyalaya (Jabalpur) - Dr. L. S. Negi; Jiwaji University (Gwalior) - S. S. Bhandarkar; Jodhpur University-V. V. John; Kanpur University-Radha Krishna ; Kalyani University—Dr. S. K. Mukherjee; Kameshwar Singh Darbhanga Sanskrit University (Darbhanga) Vacant; Karnatak University (Dharwar)-Dr. A. S. Adke; Kashmir University (Srinagar)-Kh. Noor-ud-Din (Acting); Kerala University (Trivandrum)-Dr. A. Aiyappan; Kurukshetra University—S. K. Dutta; Lucknow University—Prof. M. B. Lal; Madras University—N. D. Sundaravadivelu; Madurai University—T. P. N. D. Sundaravadivelu; Madurai University—T. P. Meenakshisundaran; Magadh University (Bodh Gaya, Bihar)—B. M. K. Sinha; Maharaja Sayajirao University of Baroda—Dr. C. S. Patel; Maharashira Krishi Vidyapeeth Agricultural College (Poona)—H. G. Patil, Padma Shri; Marathwada University (Aurangabad)—Dr. N. R. Tawde; Meerut University—Dr. R. K. Singh; Mysore University—Prof. D. Javare Gowda; Nagmur University—Dr. V. B. Kolta: North Respand University Nagpur University-Dr. V. B. Kolte; North Bengal University (Darjeeling)—Prof. A. C. Roy; Orissa University of Agriculture and Technology (Bhubaneswar)—Dr. B. Samant Rai; Osmania University (Hyderabad)-Prof. Ravada Satyanarayana; Panjab University (Chandigarh) -Suraj Bhan ; Punjab Agricultural University (Ludhiana) -Dr. M. S. Randhawa; Patna University-Dr. K. K. Datta; Poona University—Vacant; Punjabi University (Patiala)—Kirpal Singh Narang; Punjabrao Krishi Vidyapith (Akola)—L. N. Bongirwar; Rabindra Bharati (Calcutta)-Dr. (Shrimati) Roma Chaudhury; Rajasthan University (Jaipur)-Dr. P. L. Bhatnagar; Ranchi University—Dr. George Jacob; Ravi Shankar University (Raipur)—B. L. Pandey; Roorkee University—M. R. Chopra; Sambalpur University—K. C. Patnaik; Sardar Patel University (Vallabh Vidyanagar)—I. J. Patel; Saugar University—Prof. M. P. Sharma; Saurashtra University (Rajkot)-Dr. R. Mankad; Shivaji University (Kolhapur)

^{*} It is reported that he has resigned.

—A. G. Pawar; Shrimati Nathibai Damodar Thakersey Women's University (Bombay)—Smt. Sharda Divan; South Gujarat University (Surat) —Prof. C. N. Vakil; Sri Venkateswara University (Tirupati)—Dr. D. Jaganatha Reddy; Udaipur University—Dr. G. S. Mahajani; University of Agricultural Sciences (Bangalore)—Dr. K. C. Naik; Utkal University (Bhubaneswar)—Dr. Sadasiva Misra; U.P. Agriculture University (Nainital)—D. P. Singh; Varanaseya Sanskrit Vishuwuidyalaya (Varanasi)—Dr. Gauri Nath Shastri; Vikram University (Ujjain)—Dr. Shiv Mangal Singh 'Suman'; Visva-Bharati (Santiniketan)—Vacant; Guru Nanak University (Amritsar)—S. Bishan Singh Samundri.

Names of Institutions Deemed to be Universities

Birla Institute of Technology & Science (Pilani)—Dr. C. R. Mitra (Director); Gujarat Vidyapith (Ahmedabad)—Thakorebhai Desai (Vice-Chancellor); Gurukul Kangri Vishwavidyalaya (Hardwar)—Acharya Priya Vrata (Vice-Chancellor); Indian Agricultural Research Institute (Pusa Institute, New Delhi)—Dr. M. S. Swaminathan (Director); Indian Institute of Science (Bangalore)—Dr. S. Dhawan (Director); Indian School of Mines (Dhanbad)—Prof. D. N. Prasad (Director); Jamia Millia Islamia (New Delhi)—Dr. M. Mujeeb (Vice-Chancellor); Kashi Vidyapeeth (Varanasi)—Raja Ram Shastri (Vice-Chancellor); Tata Institute of Social Sciences (Bombay)—Dr. M. S. Gore (Director).

TECHNICAL EDUCATION

The All-India Council for Technical Education advises the Government on all matters relating to the co-ordination and development of technical education in the country.

Five Higher Technological Institutions of national importance at Kharagpur, Bombay, Madras, New Delhi and Kanpur have been set up. The admission to these institutes at the under-graduate level are made on the basis of a common entrance examination conducted at several centres in the country and one centre at London. Besides these, fourteen large-sized regional engineering colleges, a number of other engineering colleges, technological institutions and polytechnics have been set up. For specialised courses such as Mining, Engineering and Metallurgy, a number of centres have been established both for degree and diploma courses. For Printing Technology, four regional schools one each at Madras, Calcutta, Allahabad and Bombay have been established. Telecommunication Engineering, Chemical Engineering, Architecture, Textile Technology, Petroleum Technology, Production Technology, Geophysics are some of the subjects in which institutions are today offering courses. Besides the establishment of new institutions and new courses, the old institutions have also been expanded and developed. By 1968-69 the number of institutions for degree and diploma courses has risen to 138 and 284 with an admission capacity of 25,000 and 48,048 respectively. Today about 2,200 places have been made available in 45 institutions for advanced training for post-graduate courses and research. 114 Junior Technical Schools had been established by the academic year 1968-69, designed especially for those who wish to enter industry and other technical occupations. There are also 21 women's polytechnics in different parts of the country offering vocational technical courses which are of special interest to women.

All India Council

The Council represents all the interests which are concerned with the technical education. It consists of representatives of all State Governments, Ministries of the Central Government, Parliament, Industry, Commerce, Labour, professional and learned societies, Universities, Technical Institutions and various other concerned interests. Its functioning, inter alia, includes the preparation of plans for the development of technical manpower of different types and suggesting measures to meet them, suggesting improvement in the pattern of technical education from time to time to suit changing conditions. establishing liaison between industry, Government departments and other organisations on the one hand and tech. nical institutions on the other, coordinating the activities of States, recommending grants and other forms of assist. ance that might be given by the Centre to the State Govern. ment institutions, University institutions and other organisations for development of technical education. For the proper discharge of its functions, the Council has set up a Coordinating Committee, four Regional Committees and seven Boards of Technical Studies.

Courses

Technical Education in India is a four-tiered structure comprising post-graduate courses and research; first degree courses; diploma courses; and Vocational or Industrial training.

A scheme has also been formulated for a two-year diploma course for training technicians, with higher secondary as the admission qualification. The scheme aims at giving specialised training in particular fields of engineering directly related to the functions of a diploma holder in Industry.

A scheme for part-time diploma courses in engineering for persons working in the Industry has also been introduced.

Indian Institute of Science, Bangalore: (See under Mysore State Associations for details).

School of Planning and Architecture, Delhi: The School offers graduate courses in Architecture for the Bachelor's degree course of the university of Delhi and the National Diploma course of the All India Council for Technical Education. Besides, post-graduate courses in Town and Country Planning — both part-time and full-time and in Housing (full-time) are run by the School.

All India Institute of Management, Calcutta and Ahmedabad: The institutes were established by the Central Government in 1962-63 in collaboration with the State Governments, local industrialists and Ford Foundation. They conduct post-graduate courses and research in management and related fields. The institutes also do consultancy work in response to requests from Government departments and private enterprises.

Administrative Staff College, Hyderabad: This institute offers a 12-week course to young administrators from all walks of national life in the principles and techniques of organisation, administration and leadership in civil life.

National Institute for Training in Industrial Engineering, Bombay: Established in 1964 with the U.N. Special Fund Assistance, the institute is intended to train suitably qualified persons in industrial engineering methods and techniques.

National Institute of Foundry & Forge Technology, Ranchi: With a view to providing training facilities in foundry engineering and forging, the Central Government had established the institute in 1966-67. It will also conduct short-term refresher courses in the latest methods and techniques of production, design and development for persons working in the industry.

Scheme-wise financial allocations for technical education* during 1968-69 (Revised) and 1969-70 (Estimates) respectively: (Rupees lakks): Post-graduate courses and Research 43·43; 50·00; Post-graduate Courses and Research at

Major financial allocations during 1969-70 (revised) and 1970-71 (estimates) respectively (Rs. lakh): Indian Institutes of Technology 875-84;
 877-46; National Institute of Foundry & Forge Technology, Ranchi 19-17; 45-00; NITTE, Bombay 10-51; 16-05; Indian Institutes of Management 53-57; 38-00; School of Planning & Architecture, New Delhi 16-84; 17-55; Indian School of Mines, Dhanbad 28-79; 27-21; (See page 151)

Regional Engineering Colleges 25.00; 30.00; Parttime Courses 17.73; 8.50; Fellowships for Training of Teachers and Technical Institutions 17.74; 14.19; Practical Training Stipends scheme (Plan) 109.00; 110.00; (Non-plan) 22.00; 40.00; Research Training scholarships/ Research Fellowships Scheme (Non-plan) 5.00; 5.20; Summer Institutes 18.00; 23.00; Recurring Grants-in-Aid to others for Specialised Courses (Non-plan) 4.58; 4-58; Revision of Salary Scales of Teachers (Plan) 26.00; 15.00; Establishment of Four Regional Institutes for Training of Teachers of Polytechnics 58.70; 49.90; Regional Engineering Colleges 300.00; 313.00; Indian Institute of Technology (Plan) 521-92; 347-00; (Non-Plan) 355·29; 527·24; School of Planning & Architecture, New Delhi (Plan) 5·04; 2·64; (Non-Plan) 10·96; 14·20; National Institute of Foundry and Forge, Ranchi 7.78; 20.00; Management Institutions (Plan) 38.77; 27.19; (Non-Plan) 23-29; 28-11; Indian School of Mines, Dhanbad (Plan) 5-13; 8-46; (Non-Plan) 21-18; 21-10; Indian Institute of Science, Bangalore (Non-Plan) 112-00; 112-00; Directorate of Practical Training in Mines, Dhanbad (Non-Plan) 1-83; 1-93; National Institute for Training in Industrial Engineering, Bombay -; 5.51; Central Grants to Private Institutions 11.00; 102.50; Grants to other Parties under Old AICTE Scheme 16.10; 16-10.

Fourth Plan Programme

Technical institutions have been planned for an annual admission capacity of 25,000 students at the degree level

and 48,600 students at the diploma level. The actual admissions in 1968-69 were about 17,890 in degree and 31,500 in diploma courses. The main emphasis in technical education, during the Fourth Plan, will be on improving quality and standards. The improvement programmes would relate to pre-service and in-service training of teachers, re-organisation of diploma courses in order to diversify and recrient them functionally to the needs of the industry, expansion and improvement of post-graduate engineering studies and research, curriculum development and proparation of instructional materials including laboratory equipment. The number of places for practical training in industry, which was increased from 2,000 in 1967-68 to 11,000 places in 1968-69, will be maintained at about the same level during the Fourth Plan. Centres of advanced study will be developed in aeronautics, material sciences and electronics and automation. Facilities for part-time degree and diploma courses will be increased. Management studies at the Institutes of Management at. Calcutta and Ahmedabad and in the universities will be further developed. Support will be given for further development to the Indian Institute of Science, Bangalore, the National Institute of Training for Industrial Engineering, the National Institute of Forge and Foundry and other institutions.

Allocation for technical education during the Fourth Plan: Rs. 54·32 crores for the States, Rs. 5·40 crores for the Union Territories and Rs. 60·00 crores for the Centre.

FAMILY PLANNING

THE estimated population of India was about 540 million in 1969-70. The population in the country is increasing annually at 25 per thousand with the net addition of 13 million people in the country every year. India has taken up family planning on Governmental level.

The Fourth Five-Year Plan has provided a sum of Rs. 315 crores for the programme and the aim is to reduce the birth rate of 41 per thousand to 23 per thousand in about 10 years time by voluntary adoption of any of the available family planning methods by the 97 million couples (1969 Oct. estimate) in the reproductive age group 15-44 years. This is sought to be achieved by a four point programme consisting of effective (1) Mass education and motivation; (2) Training of medical, paramedical, extension education and other personnel; (3) Supplies and services and (4) Research in all fields — communication and motivation, demography, medical and biological.

ORGANIZATIONAL SET-UP

Family Planning has been a state subject. A separate department of Family Planning has been created in the Ministry of Health, F.P. & Urban Development with the Commissioner for Family Planning as the technical head. To establish liaison with the State, six Regional Directors have been appointed. The states have established State Family Planning and District Family Planning Bureaus and the Primary Health Centres for family planning work. In the urban areas one clinic against almost every population of 50,000 has been established. In the rural areas 5,080 Family Planning Centres have been in position by the end of December 1968.

Expert advice and consultation on technical matters are provided to the Department of Family Planning by various committees.

TRAINING

A Central corps of Family Planning doctors has been created to offer the services of doctors to needy states. Five Central Training Institutes namely:—

- 1. Central Family Planning Institute, New Delhi;
- 2. Central Health Education Bureau, New Delhi;
- 3. All India Institute of Hygiene & Public Health, Calcutta;
- 4. Family Planning Training & Research Centre, Bombay;
- 5. Institute of Rural Health & F.P., Gandhigram, have been established to train the key personnel. Besides, 44 Regional Training Contres have been set up to train mainly the paramedical and non-medical staff. Training efforts are also being supplemented by the sixteen Central Family Planning Field Units established against one in each State. In the long-term course 4,436 doctors and 18,145 others have been trained so far and in the short-term course 11,268 doctors and 1,39,054 others have been trained.

RESEARCH

At present there are eight demographic Research Centres one each at Dharwar, Delhi, Lucknow, Calcutta, Patna, Poona, Baroda and Bombay. Similarly 8 Family Planning Communication Action Research Projects have been functioning at: (1) Planning Research & Action Institute, Lucknow; (2) University of Kerala, Trivandrum; (3) Indian Statistical Institute, Calcutta; (4) Central Family Planning Institute, New Delhi; (5) Institute of Rural Health & Family Planning, Gandhigram; (6) Utkal University, Bhubaneswar; (7) India International Centre, New Delhi; (8) Shri V. T. K. Institute of Rural Development, Baroda.

Technical Teacher Training Institutes for Polytechnic Teachers 37·20; 61·07; Practical Training Stipends Scheme 177·00; 175·00; Postgraduate courses & Research 45·00; 80·00; Regional Engineering Colleges 290·64; 299·00; Quality Improvement Programmes 32·30; 73·00; Central Grants to Private Institutes 79·20; 80·00; Loan for Construction of Hostels 120·50; 152·29; Indian Institute of Science, Bangalore 119·54; 113·00.

Medical and Bio-medical studies on various aspects of Family Planning are being carried out at the various institutions and universities in New Delhi, Calcutta, Lucknow, Ahmedabad, Bombay and Chandigarh under the overall control of Indian Council of Medical Research. The main aim of bio-medical research is to bring out new contraceptives like the injectible contraceptives, etc. and study the effects of contraceptives currently in use.

EDUCATIONAL AND MOTIVATION

At 22 Radio Stations special Family Planning Colls have been established to relay Family Planning Programme, Special Family Planning Publicity Units have been established under the Ministry of Information and Broadcasting. Exhibition Units by the Central and State Governments have also been set up. Various feature films, documentaries and slides have been prepared for use in cinema houses all over the country.

Some States have provided schemes for the appointment of Family Planning Sahayakas with suitable honorarium.

SUPPLIES AND SERVICES

With the target of approaching 97 million couples in the reproductive age group for adopting one or the other con-

traceptive methods a net work of mobile and static services is being provided through 7,057 static and 754 mobile units, 1,806 urban centres and 5,130 rural centres with over 24,762 sub-centres and 9,000 other medical insitutions where family planning advice and supplies are available.

By the end of Dec. 1969 about 6.9 million sterilization operations were performed and 3.1 million loops inserted. It is estimated that in a single year (1968-69) only, about 1.4 million births were prevented.

ACHIEVEMENTS

Sterilizations and introduction of loops respectively in the States up to Dec. 31, 1969; Andhra Pradesh 6,29,199; 1,41,130; Assam 51,363; 1,17,072; Bihar 3,64,296; 1,28,650; Gujarat 4,01,068; 1,64,151; Haryana 84,672; 2,01,607; Jammu & Kashmir 34,373; 35,093; Korala 3,44,011; 1,80,815; Madhya Pradesh 5,77,519; 1,55,399; Maharashtra 10,84,162; 3,17,729; Mysore 3,60,770; 2,34,630; Orissa 3,85,900; 1,18,753; Punjab 1,69,620; 3,66,587; Rajasthan 1,54,305; 87,938; Tamil Nadu 8,80,589; 67,969, Uttar Pradesh 5,98,904; 4,01,067; West Bengal 5,39,811; 2,88,099; Nagaland, Union territories and Contral Government institutions 2,40,385; 1,71,221; Total 69,00,897; 31,77,910.

ELECTRIC POWER DEVELOPMENT

(By courtesy of the Central Water and Power Commission, Power Wing.)

THE revised figures in respect of the aggregate generating capacity* in kW for 1965-66 & the provisional figures for 1966-67 & 1967-68 are given below: 1965-66 90,27,019; 1966-67: 10,189,114 and 1967-68: 11,883,163.

The total installed plant capacity at the end of March 1968 was 11,883·163 MW, including 136·00 MW of plant in the Chola Power Station of the Central Railway, 306·00 MW of plant in the Neyveli Power Station and 62·50 MW in the Renukot Power Station (U.P.). The net addition to generating capacity of utilities was 1,790·996 MW, which represents an increase of 17·7 per cent of the installed plant capacity in the previous year. The total power generated by all the utility undertakings was approximately 41·95 million kWh and the quantum of power purchased by them from non-utilities was 104·74 million kWh. The increase in the sales during the year was approximately 3,609 million kWh equivalent to an increase of 12·4 per cent over the sales in the previous year.

The production and sale of electric power for the years 1966-67 and 1967-68 were as follows (in million kWh):

		Generated	Sold
1966-67 (Provisional)	* *	36,375·587	29,127-636
1967-68		41,194·637	32,736-872

An analysis of electric power consumption in million kWh is given below. The figures in brackets show the percentage of total energy consumption.

	1966-67	1967-68
Domestic or Residential		
light and small power	2,626 - 727	2,927 - 966
	(9.0)	(8.9)
Commercial light and		
small power	1,819.649	1,750-176
	(6.2)	(5.3)

Below 10,000	0.00	* *	1,039	41		
TOTAL	0 0		2,601	59		

D1-4		 Villages electrified†			
Population		States	Union Territory		
Over 10,000		 682	1		
5,000-10,000	• 0	 2,309 3	9		
1,000-5,000		 26,957	542		
Below 1,000		 27,424	2,616		
TOTAL		 57,372	3,168		

^{*} During 1968-69 the generating capacity was 14.28 million kW and at the end of Dec. 1969 it was 15.1 million kW. By March 1970 it is expected to be 15.6 million kW.

† The no. of villages electrified as on 30.9-1969 was 73,554 benefiting 110 million people.

Some individual industries have power stations of their own. The number of installations and the installed capacity in respect of the following industries in kW respectively are as follows (as on 31st March, 1968):

Aluminium (P) 6; 22,600; Aluminium (S) 10; 630; Cement (P) 27; 109,514; Cement (S) 27; 630; Chemicals 37; 30,647; Collieries 145; 47,998; Copper (P) 1; 8,975; Copper (S) 1,; —; Cotton Textiles 319; 116,330; Engineering 28; 7,228; Ferro-Manganese 5; 32; Fertilizers 5; 82,405; Gold 1; 6,700; Iron & Steel (P) 7; 366,544; Iron & Steel (S) 18; 600; Jute 72; 32,220; Mines 7; 4,877; Oil and Petroleum 7; 57,809; Paper 26; 83,292; Silk 20; 44,992; Soap 9; 488; Sugar 134; 172,145;

Tanneries 7; 757; Wool 11; 3,398; Miscellaneous 11; 6,825.

The number of undertakings reckoned on ownership basis at the end of 1966-67 and 1967-68 was distributed as follows: State Government/State Electricity Board: 25;38; Power Corporation: 1;1; Municipality: 44;44; Companies: 160; 158; Total 230; 241.

The total number of consumers at the end of 1967-68 was 10,631,914 in all (Domestic 7,625,274; Commercial 1,712,237 Industrial (including railways, tramways and public water works and sewage pumping) 424,402; Public lighting 49,102; Irrigation 833,438).

The State-wise analysis of plant, generation and sales for 1967-68 is as follows:--

State	3		Installed capacity (kW)	Energy generated (mln. kWh)	Energy sold to Consumers (mln. kWh)	Capacity in Industrial Establishments (kW)	Annual per capita consumption (excluding self-gen- eration of non-utilities (kWh)	Annual per capita consumption (including self-gen- cration of non-utilities (kWh)
Andhra Pradesh		4 5	640,835	1,949.563	1,334.300	62,390	32.60	36.50

ADMINISTRATION OF JUSTICE

THE Indian Union though a dual polity has no dual judiciary at all. The Supreme Court and the High Courts form one single integrated judiciary having jurisdiction and providing remedies in all cases arising under the constitutional law, the civil law or the criminal law. This is done in order to eliminate all diversities in remedial procedure.

The writs are now issued by the Supreme Court of India and the various High Courts in the territory of India. All laws which existed before independence continue to operate in India as before subject to adaptation and modification made therein. Article 372 of the Constitution provides inter alia that, subject to the other provisions of the Constitution all laws in force in the territory of India immediately before the commencement of the Constitution shall continue in force therein until altered, repealed or amended by a competent Legislature or other competent authority.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Muslim.

SUPREME COURT

Art. 124 of the Constitution provides for the establishment of a Supreme Court of India consisting of a Chief Justice of India and seven other judges. There is provision in law for the appointment in all of 13 other judges. At present there are 11 judges including the Chief Justice (see Act 17 of 1960). Every judge of the Supreme Court shall be appointed by the President and shall hold office until he attains the age of sixty-five years. In the course of appointment of a Judge the Chief Justice shall always be consulted. Only a citizen of India who has been for at least 5 years a judge of a High Court, or for 10 years an advocate of a High Court, or a person, who in the opinion of the President, is a distinguished jurist, is qualified to be appointed judge of the Supreme Court.

A judge of the Supreme Court is not liable to be removed from his office except by an order of the President passed after an address by each House of Parliament, supported by a majority of the total membership of that House, and by a majority of not less than two thirds of the members of that House present and voting, has been presented to

ADMINISTRATION OF JUSTICE

the President in the same session for such removal, on the ground of proved misbehaviour or incapacity. Parliament passed a law laying down the procedure to be followed in such cases (see Act No. 51 of 1968). The Act is known as Judges (Inquiry) Act. No person who has held office as a judge of the Supreme Court shall plead or act in any court or before any authority within the territory of India.

The Supreme Court is a court of record with all the powers of such a court including the power to punish for contempt. The seat of the Court is to be in Delhi or such other place as the Chief Justice with the approval of the President may from time to time appoint.

The Supreme Court has exclusive original jurisdiction in any dispute (a) between the Government of India and one or more States; (b) between Government of India and one or more States on the one side and one or more other States, on the other; (c) between two or more States, if and in so far as the dispute involves any question (whether of law or fact) on which the existence or extent of a legal right depends (Art, 131).

The appellate jurisdiction of the Supreme Court extends over all appeals from any judgment, decree or final order of a High Court, in civil, criminal or other proceedings, if the High Court certifies that the case involves a substantial question of law as to the interpretation of the Constitution. If the High Court refuses such a certificate the Supreme Court may grant special leave to appeal in a proper case (Art. 136). An appeal shall also lie to the Supreme Court from a High Court in civil matters, when the amount or value of the subject matter in dispute is not less than Rs. 20,000 or the High Court certifies the case to be a fit one for appeal to the Supreme Court (Art. 133).

In criminal matters under Art. 134 an appeal lies to the Supreme Court from any judgment, final order or sentence of a High Court, if the High Court has (a) on appeal reversed an order of acquittal of an accused person and sentenced him to death; or (b) has withdrawn for trial before itself any case from a subordinate court and has in such trial convicted the accused person and sentenced him to death; or (c) the High Court has certified that the case is a fit one for appeal.

For purposes of appeals to the Supreme Court, the Judicial Commissioners' Courts are to be considered as High Courts,

Under Art. 136 discretion is given to the Supreme Court to grant special leave to appeal from any judgment, decree, sentence or order, in any matter passed by any Court or Tribunal in the territory of India.

The Supreme Court has also power to review its own judgement (Art. 137).

The jurisdiction and powers of the Federal Court are also exercisable by the Supreme Court (Art. 135) including the advisory power to give its opinion on questions of law or fact referred to it by the President (Art. 143).

The law declared by the Supreme Court shall be binding on all courts in the territory of India excepting the Supreme Court itself.

Parliament has the power to legislate on the constitution, organisation, jurisdiction and powers of the Supreme Court.

Article 32 of the Constitution guarantees the right to move the Supreme Court by appropriate proceedings for the enforcement of Fundamental Rights; and for the enforcement of such rights the Supreme Court has power to issue directions or orders or writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, quo warranto and Certiorars whichever may be appropriate.

Power is given to Parliament to enlarge the jurisdiction of the Supreme Court by appropriate legislation (Arf. 138).

The royal prerogetive to grant, paretons, reprieves, respites or remissions of punishments now resides in the President (Art. 72).

Under Art. 348, all proceedings in the North Court and in every High Court in India and the schoritative text of all Bills and Acts of Tailinnan and the State Legislatures and of all Ordinances promulgated by the President or Governors and of all orders, rules and regulations issued under the Constitution or any law shall be in the English language. If this language is to be replaced by any other language, Parliament must legislate to that effect. Parliament has passed the Official Languages Act (No. 19 of 1963). Though the Act enables the Governor of a State to authorise the use of Hindi or the official language of the State in the High Court, it does not include any provision, with respect to the language in the Supreme Court.

All authorities, civil and criminal in the territory of India, have to act in aid of the Supreme Court (Art. 144). The independence of the judges of the Supreme Court, is secured by charging their salaries on the Consolidated Fund of India, and by prohibiting any discussion in the legislature on the conduct of the judges in their official capacity.

HIGH COURTS

Every State has a High Court. However there is only one High Court for Assam and Nagaland States and also only one High Court for Punjab and Haryana. There is a separate High Court for Delhi.

Every High Court is a court of record and has all powers of such court including the power to commit for contempt of itself.

Every judge of a High Court is appointed by the President after consultation with the Chief Justice of India, the Governor of the State and the Chief Justice of the particular High Court; and he holds office until he attains the age of sixty-two years.

A person is not qualified to be appointed a judge of a High Court unless he is a citizen of India and has either held judicial office or practised as an advocate for 10 years in any of the States.

A High Court judge is not liable to be removed from his office except in the manner provided in Art. 124 (4) for the removal of a judge of the Supreme Court or India.

There is provision in the Constitution for the appointment of additional or acting judges.

The High Courts have powers of superintendence over all subordinate Courts and tribunals within their respective jurisdiction.

Legislation affecting constitution and organisation of the High Courts can be passed by Parliament alone.

On an average more than 14,000 cases are filed in the High Courts of India every month.

The Central Government has made separate judicial arrangements in the Union Territories, Goa, Daman and Diu, Himachal Pradesh, Manipur, Tripura, Andaman and Nicobar Islands and Laccadive, Minicoy and Amindivi Islands.

Under Article 241 of the Constitution, Parliament can by law constitute a High Court for a Union Territory or declare any court in any such territory to be a High Court for all or any purposes of the Constitution. Judicial Commissioner's Court in Goa, Daman and Diu is declared a High Court for certain purposes.

LOWER COURTS

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled as courts of session and courts of magistrates.

Every State, outside the towns of Madras, Bombay and Calcutta, is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions judge, with assistants if need be. These stationary sessions courts are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the State.

Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates. In the towns of Madras, Bombay and Calcutta, Precidency Magistrates deal with magisterial cases and benches of Justices of the Peace or Honorary Magistrates dispose of the less important cases.

Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of the country.

There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs. 500. In the towns of Madras, Bombay and Calcutta where the High Courts have original jurisdiction, Small Causes Courts dispose of money suits up to Rs. 3,000.

In Bombay and Madras there are also City Civil Courts. The City Civil Court in Bombay has a pecuniary jurisdiction of upto Rs. 25,000.

As Insolvency Courts the High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers are conferred on the District Courts by the Provincial Insolvency Act of 1920.

There are Coroners only for the Presidency Towns of Calcutta and Bombay. Eleswhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors.

SPECIAL COURTS

Labour Courts and Industrial Courts now exist in most States.

A Labour Court consists of a single judge.

These Courts decide upon disputes regarding (a) propriety or legality of an order passed by an employer, (b) the application and interpretation of standing orders, (c) they also decide disputes referred to them by Government for arbitration. Legality or otherwise of strikes or lock-outs or closure, etc. is also decided by them.

An appeal against the judgment of the Labour Courts lies to the Industrial Court. This court has also original jurisdiction regarding matters referred to it by the Government or by representative Unions. It decides upon questions of law referred to it by Wage Boards and references regarding interpretation of the Act and the Rules. It has power of superintendence over Labour Courts.

The Industrial Disputes Act was passed by the Central Legislature in 1947 for the investigation and settlement of industrial disputes.

Industrial Tribunals were established under this Act. If the conciliation bodies set up under this Act fail to bring about a settlement, the matter is referred to the Industrial Tribunals.

Neither party to a dispute is entitled to be represented by a legal practitioner except with the consent of the other party and by leave of Tribunal.

Industrial Tribunals are not permanent Courts. Whenever a matter is referred to the Government regarding an industrial dispute the Government appoints one or more persons as Industrial Tribunal to adjudicate upon the dispute.

The Industrial Disputes (Amendment and Miscellaneous Provisions) Act No. 36 of 1956 makes provision for the constitution of the following courts and tribunals:

- 1. Labour Courts to be constituted by the appropriate Government. A court is to consist of one judge only.
- 2. Industrial Tribunals. A Tribunal is to consist of one judge only. A person is not qualified to be a member of a Tribunal unless he has been judge of a High Court, The Tribunals will be constituted by the appropriate Government.
- 3. National Tribunals. These Tribunals will be constituted by the Central Government. Here also a tribunal is to consist of one judge only.

This Act came into force on 1st Sept., 1956.

The Industrial Disputes (Amendment) Act 41 of 1956 and the Dock Workers (Regulation of Employment) Act, 1948, are two other Acts with respect to labour cases.

Administration of labour laws is a divided responsibility. The Central Government has the following organisations for the administration of labour laws. (1) The Office of the Chief Labour Commissioner, New Delhi. (2) The Office of the Coal Mines Welfare Commissioner, Dhanbad. (3) The Office of the Coal Mines Provident Fund Commissioner, Dhanbad. (4) The Office of the Welfare Commissioner, Mica Mines Labour Welfare Fund, Dhanbad and Nellore. (5) The Office of the Chief Inspector of Mines, Dhanbad. (6) The Office of the Chief Adviser of Factories, New Delhi. (7) The Office of the Director-General, Employees' State Insurance Corporation, New Delhi. (8) The Office of the Controller of Emigrant Labour, Shillong. (9) The Office of the Director, Labour Bureau, Simla. (10) The Office of the Central Provident Fund Commissioner, New Delhi.

The State Governments also have their own organisations for the administration and enforcement of labour laws.

Juvenile offenders are tried by the Juvenile Courts.

Panchayat Courts (called Nyaya Panchayat) are in existence in many States. The members of the Panchayat Court are elected by the Village Panchayat. Sections 30-44 of the Act lay down rules about the suits that may be tried and the suits that may not be tried by the Court. A Nyaya Panchayat cannot alter or revise its decision. An appeal against a decision of the Nyaya Panchayat lies to the District Judge.

LAW OFFICIALS

The Government of India have their own law colleague in the Law Minister of the Union Cabinet. All Government measures are drafted in his Ministry after their substance is decided upon by the administrative departments concerned.

Outside the Cabinet the principal law officers of the Government of India are the Attorney-General, Solicitor-General appointed by the President. At Bombay and Calcutta the Government of India have their own law officers.

Each of the State Governments has its own Advocate-General.

In addition to the Advocate-General there is also a Government Pleader in many States. He usually belongs to the Appellate Side of the High Court while the Advocate-General belongs to the Original Side where the High Court has both Original and Appellate Sides. The Government Pleader is assisted by an Assistant Government Pleader and they look after criminal work.

The State Governments have their own law officers, in addition to the Advocate-General and the Government Pleader. The law officer is designated Remembrancer of Legal Affairs.

Sheriffs are attached to the High Courts of Bombay, Calcutta and Madras.

There are Official Assignees in three States — Maharashtra, W. Bengal and Tamil Nadu. The appointment is made by the Chief Justice of the High Court concerned.

In addition to the Official Assignee, a Deputy Official Assignee may also be appointed. Another officer of the court is the Insolvency Registrar who may be vested with the powers mentioned in section 6 of the Presidency Towns Insolvency Act.

The heirs of a deceased Hindu are entitled to get a share even in the undivided interest in the Mitakshara coparcenary property. A Hindu can make a will even of his undivided interest in the coparcenary property.

The Hindu Adoptions and Maintenance Act 79 of 1956 was passed in December 1956. Under the Act the adoption of a son or a daughter is permitted. The consent of the wife is necessary for adoption, which is now purely secular in character.

SOCIAL REFORMS

Besides these laws, Parliament has passed two important Acts relating to social reform. The Suppression of Immoral Traffic in Women and Girls' Act (No. 104 of 1956) was passed in December 1956. This Act provides in pursuance of the International Convention signed at New York on 9th May 1950 for the suppression of immoral traffic in women and girls. The Women's and Children's Institutions Licensing Act (No. 105 of 1956) was passed in December 1956. This Act provides for the licensing of such institutions and of matters relating to them.

Yet another Act, in social reform is the Probation of Offenders Act (20 of 1958).

Dowry Prohibition Act was passed in 1961. Public Provident Fund Act was passed in 1968.

CONSTITUTION OF INDIA

STATES

NDIA, that is, Bharat is a sovereign democratic republic.

It is variously called the Republic of India, the Union of India, The Indian Union.

The Union is made up of 17 States and 10 Union Territorries. A new State called the hill State of Meghalaya, an autonomous State which is in the nature of a State within the State of Assam came into existence on April 2, 1970.

See page 1 under "Physiography" for more details.

FEDERATION

The constitution of India is quasi-federal in nature.

The distribution of power between the Centre and the local administrations follows the accepted principle that subjects which for convenience and efficiency ought to be administered on an all-India basis are vested in the Union Government, while others (of the nation-building sort) which can be conveniently administered on a local basis are vested in the State Governments.

Thus, defence, foreign affairs, transport and communications, currency and coinage, banking, customs and export duties, and the administration of justice at the higher level are all Central subjects, while State powers include those over police, public health, education, agriculture, forests and so on.

There is a third group of subjects that fall betwixt and between such as trade and industry, economic and social planning, social security and insurance, labour welfare, price control, electricity, newspapers and books and vital statistics. On these subjects both the Centre and the State can freely legislate, it being understood that whenever there is conflict between Union and State legislation the Union laws will ordinarily prevail.

Three detailed lists of subjects are drawn up, the Union List, the State List and the Concurrent List, and the residuary power rests with the Union. That is to say, if at any time, a subject which does not figure in any of the three lists, comes up for consideration the power of dealing with it lies with the Union Government.

The three lists are given in the Seventh Schedule.

It may be added that the Union List has 97 entries, the State List 65 and the Concurrent List 47.

All elections are directed and controlled by an Election Commission. Elections to the Lok Sabha and the Legislative Assemblies of the States are on the basis of adult suffrage. Seats are reserved in the Lok Sabha for the Scheduled Castes and the Scheduled Tribes.

There is a Public Service Commission for the Union and every State has a Public Service Commission. The Union Public Service Commission operates for the Union Territories as well.

In the Indian Union the rights of Indian citizenship are given to 1. One who is born in India, 2. Either of whose parents was born in India, and 3. Who has been a resident of India for five years. Provision is also made for persons who are affected by the partition of the sub-continent.

FUNDAMENTAL RIGHTS

Certain fundamental rights are guaranteed to every citizen for the first time. All citizens have equal opportunities.

Freedom of speech and expression is guaranteed, and the right to hold meetings (without arms), to form unions and associations, to move freely in India and to reside in any part, to acquire property and to practise any profession are also assured to the citizens of India under the Constitution.

Preventive detention is also forbidden except in certain

Children under the age of 14 will not be allowed to be employed in factories and forced labour like begar is prohibited.

India is a secular State and as such there is freedom of conscience.

Untouchability is abolished.

These fundamental rights can be enforced by the Supreme Court and by High Courts which have the authority to issue prerogative writs such as habeas corpus, certiorari, prohibition, etc.

It must also be pointed out that some of these fundamental rights can be suspended in case of emergency, and the remedies available for their enforcement may also be suspended by an order of the President.

The Supreme Court of India delivered an important judgement in Golaknath case in Feb. 1967 laying down that Parliament has no power to amend the constitution with a view to curtailing or abridging the fundamental rights.

The Scheduled Castes and Tribes have special representation in the legislatures of the country upto 1970 (see separate articles on the Scheduled Castes and Tribes). In certain tribal areas there are autonomous administrative bodies.

As for Anglo-Indians, the President may nominate not more than two members of the Anglo-Indian community to the Lok Sabha if he thinks that the community is not adequately represented. Similar power is given to the Governor of a State. The Governor can nominate one member to the Legislative Assembly. In West Bengal, however, he can nominate not more than two.

The claims of the Scheduled Castes and the Scheduled Tribes are to be considered in making appointments to services.

All reservation including reservation of seats for Scheduled and Tribal classes are to cease at the end of 1970 according to the eighth amendment to the constitution.

A Bill extending these reservations upto 1980 is passed by Parliament.

A special officer for the Scheduled Castes and the Scheduled Tribes has been appointed.

UNION EXECUTIVE

The executive head of the Indian Union is the President. He is elected by the elected members of the Houses of Parliament and the Legislative Assemblies of all the States. His term of office is five years, and he is eligible for reelection. Only a person who is a citizen of India and has completed the age of thirty-five years is qualified to contest the election.

He is the Supreme Commander of the Armed Forces.

He has the power to grant pardons or remission of punishment.

The President is entitled to the use of an official residence without payment of rent, and a salary of Rs. 10,000 per month and allowances. Provision has also been made by an Act of Parliament for a pension of Rs. 15,000 per annum. He is also entitled to a maximum of Rs. 12,000 per annum for the sake of secretarial staff and other expenses.

The President has the power of summoning, proroguing and dissolving Parliament. At the commencement of each session he addresses both Houses of Parliament assembled together. He has the right of sending messages to Parliament and sending back a Bill presented to him for his assent. This power however can be used by him only once. He has right to veto a Bill passed by Parliament.

The President has legislative powers under certain circumstances. When neither of the Houses of Parliament is in session and the President is satisfied that circumstances exist which make immediate action necessary he may promulgate an ordinance.

Such ordinance must be put before both the Houses of Parliament and will cease to operate at the expiration of six weeks from the reassembly of Parliament.

The President can also declare emergency if he is satisfied that the security of India or any part thereof is threatened either by war or internal disturbances when the legislature is in session. Such a proclamation would give additional powers to the Union executive and the Legislature.

The judges of the Supreme Court and the High Courts, the Attorney-General of India and the Comptroller and and Auditor-General of India are all appointed by the President. The heads of States, i.e., Governors are also appointed by the President.

The President has the power of appointing ambassadors abroad and receiving diplomatic representatives of foreign

All executive action of the Government of India is taken in the name of the Pesident and it is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers.

Provision is made for the impeachment of the President, by Parliament, for violation of the Constitution. If such a resolution is passed by a majority of not less than two-thirds of the total membership, such a resolution has the effect of removing the President from office.

In the exercise of his functions, the President has the aid and advice of a Council of Ministers, with the Prime Minister at the head of it. The President appoints the Prime Minister and other Ministers are appointed on the advice of the Prime Minister.

The Council of Ministers is collectively responsible to the Lok Sabha (the Lower House). Every Minister must be a member of either House of Parliament, and he is required to take an oath of office and secrecy.

The salaries and allowances of Ministers are determined by Parliament.

There is a Vice-President of India, who is ex-officio Chairman of the Rajya Sabha (the Upper House). The Vice-President acts as President during a casual vacancy in the office of the President. He is elected by the members of both Houses of Parliament and his term of office is five years.

UNION PARLIAMENT

The Parliament consists of the President and two Houses known as, as stready mentioned, the Lok Sabha and the Rajya Sabha. It must meet at least twice a year. The maximum strength or the two Houses is fixed at 250 (12 nominated) for the Rajya Sabha and 525 for the Lok Sabha (not more than 500 from the States and 25 from the Territorice).

The Rajya Sabha is elected by the elected members of the Legislative Assemblies of the States and of the Union Territories of Himachal Pradesh, Manipur, Tripura and Pondicherry, while the Lok Sabha is elected directly by the voters in the country. Delhi has now a Metropolitan Council.

The elections to the Lok Sabha are based on adult suffrage and joint electorates. There is no reservation of seats for any group except Scheduled Castes and Scheduled Tribes The Rajya Sabha is a permanent body with one-third of its members retiring every second year. The Vice-President of the Union is also the Chairman of the Rajya Sabha. The Rajya Sabha has also a Deputy Chairman.

The Lok Sabha has a duration of five years, ordinarily. There is a Speaker and a Deputy Speaker of the House both of whom are elected by its members.

All these posts carry a salary and allowances.

Under certain circumstances, the members can be disqualified and their seats declared vacant.

All legislation requires the consent of both Houses of Parliament, and every question is decided by a simple majority of those present and voting except on amendments to the constitution.

Money Bills can be introduced only in the Lok Sabha. The Rajya Sabha can only return a bill with its recommendations to the Lok Sabha within a period of fourteen days of its receipt. Bills passed by Parliament are submitted to the President for his assent. Only on such assent being given does the Bill become law.

A Bill normally goes through the following stages. It is first published. After introduction there is a general debate. Third, there is a clause-by-clause discussion. Then it is voted upon. A specially important measure may go before a select committee or a joint select committee. A Money Bill has a slightly different passage. After it has been passed in the Lok Sabha it is sent to the Rajya Sabha which has to return it within fourteen days with its recommendations which may be accepted or rejected.

The quorum is fixed at one-tenth of the membership of the House.

The language used in Parliament is either Hindi or English.

Distribution of Seats

The distribution of seats in the Rajya Sabha is as follows:

Andhra Pradesh 18; Assam 7; Bihar 22; Gujarat 11; Haryana 5; Kerala 9; Madhya Pradesh 16; Maharashtra 19; Mysore 12; Orissa 10; Punjab 7; Rajasthan 10; Tamii Nadu 18; Uttar Pradesh 34; West Bengal 16; Jammu and Kashmir 4; Delhi 3; Himachal Pradesh 3; Manipur 1; Pondicherry 1; Tripura 1; Nagaland 1; Total 228.

The President has nominated 12 members. Thus the total of elected and nominated members is 240.

The allocation of seats in the Lok Sabha is as follows:

Andhra Pradesh 41; Assam 14; Bihar 53; Gujarat 24; Haryana 9; Jammu & Kashmir 6; Kerala 19; Madhya Pradesh 37; Maharashtra 45; Mysore 27; Nagaland 1; Orissa 20; Punjab 13; Rajasthan 23; Tamil Nadu 39; Uttar Pradesh 85; West Bengal 40; Andaman and Nicobar Islands 1, Chandigarh 1, Dadra & Nagar Haveli 1; Delhi 7; Goa, Daman & Diu 2; Himachal Pradesh 6; Laccadive, Minicoy and Amindivi Islands 1; Manipur 2; Pondicherry 1; Tripura 2; NEFA 1; Total: 521. There are two nominated members. Hence the Total is 523.

Out of these 37 are reserved for the Scheduled Tribes and 75 for the Scheduled Castes.

Parliament's control over the administration is also exercised through a series of committees. The Committees can summon witnesses or require documents to be produced. There is a Committee on Privileges which sees to breaches of Parliamentary privilege, a Business

Advisory Committee which helps the Ministry of Parliamentary Affairs in drawing up the programme for a session.

Two very important Committees are the Public Accounts Committee and the Estimates Committee. They are elected by the House of the People and Ministers are barred from membership. The Public Accounts Committee ensures that money is spent for the purpose for which Parliament has voted it, and criticises cases of waste, or extravagance. The Estimates Committee examines possibilities of economy and reform in financial administration and the manner in which estimates may be presented to Parliament.

The programme of work for any session is worked out by the Ministry of Parliamentary Affairs.

SUPREME COURT

(See under 'Administration of Justice').

STATE GOVERNMENT

The 17 States have Governors at their heads, the Union Territories Andaman & Nicobar Islands, Manipur and Tripura have Chief Commissioners, Delhi, Himachal Pradesh, Goa and Pondicherry have Lieutenant-Governors, Laccadive and Dadra have Administrators.

Zonal Councils

There are five zones: Northern zone (Punjab, Rajasthan, Kashmir, Delhi and Himachal Pradesh); Central zone (Uttar Pradesh and Madhya Pradesh); Eastern zone (Bihar, West Bengal, Orissa, Assam, Manipur and Tripura); Western zone (Gujarat, Maharashtra and Mysore); Southern zone (Andhra Pradesh, Tamil Nadu, and Kerala and also Mysore as a permanent invitee).

(More details were given in the previous edition of the Directory).

States

The Governor of a State is appointed by the President. Executive power is vested in the Governor who is appointed for a term of five years, ordinarily. Only a citizen of India and one who has completed 35 years of age, is eligible for such an appointment.

The Governor, like the President, has power to grant pardon, etc. He will have a Council of Ministers to aid and advise him. The Governor also appoints an Advocate-General for the State.

Legislature

Ten States, Andhra Pradesh, Bihar, Kashmir, Madhya Pradesh, Tamil Nadu, Maharashtra, Mysore, Uttar Pradesh have two Houses of Legislature; the others, only one. The two Houses are called the Legislative Assembly (sometimes Vidhan Sabha) and the Legislative Council (sometimes Vidhan Parishad). The former has a duration of five years, while the latter is a permanent body with one-third of the members retiring every second year.

The minimum strength of an Assembly is 60 and the maximum 500.

The minimum strength of a Council is 40, and the maximum one-third of the State Assembly.

An Assembly is elected directly on a basis of adult franchise with reservation of seats for the Scheduled Castes and Tribes. The composition of a Council is more complicated. About a third are elected by the Assembly, another third by local authorities (municipalities, district boards), about a twelfth by registered teachers in schools not lower than the secondary school standard, and about

a twelfth by registered graduates of not less than three years' standing. And the rest are nominated by the Governor from among persons who have distinguished themselves in art, science, literature, co-operation and social service.

The Legislature must meet at least twice a year. While the Assembly consists of members who are directly elected from territorial constituencies, the Council consists of members nominated by the Governor, elected by the Assembly and of representatives of local bodies and special interests.

The legislature can frame its own rules of procedure but it is more or less the same as in Parliament. The quorum for a meeting is one-tenth of the membership or ten whichever is higher.

In case of disagreement, if the Bill is passed a second time after three months of its reference to the Council it automatically becomes law after one month of its passage in the lower house.

The State legislature too has its Committees like Parliament.

For the number of seats (including nominated members) in the Legislative Assembly and the Legislative Council see under each Assembly or Council in the article "Legislative Assemblies and Legislative Councils".

About the Kashmir Assembly it may be mentioned that 25 seats are now vacant waiting to be filled in by members from that part of Kashmir now under occupation by Pakistan troops.

The effective strength of the Assembly is 75.

The right of summoning, proroguing and dissolving the legislature is vested in the Governor, who addresses the legislature at the commencement of each session.

Like the Parliament there is a Speaker, a Deputy Speaker, a Chairman and a Deputy Chairman for the Legislative Assembly and the Legislative Council respectively. These officers of the legislatures are entitled to salary and allowances.

The language in the legislature can be either Hindi or English or any other language allowed by the Speaker.

The State Legislatures cannot discuss the conduct of any judge of the Supreme Court or of a High Court in the discharge of his duties.

As the Governor is a part of the legislature, he has certain legislative powers. He can promulgate ordinances during the recess of the legislature; such ordinances must be placed before the legislature and cease to operate at the expiration of six weeks from the reassembly of the legislature.

The salary of the Governor is Rs. 5,500 per month and he is also entitled to certain allowances.

UNION TERRITORIES

(See page I under "Physiography".)

There are special provisions for Hill Areas of Manipur Section 52).

The Act also provides for appointment of a Judicial Commissioner.

Provision is also made for introduction of President's rule in case of failure of constitutional machinery in the Union Territory.

There is a High Court for each State and a Judicial Commissioners' Court each for the Union Territories of Manipur, Tripura and Goa, Daman and Diu.

The salary of a Chief Justice of a State is Rs. 4,000, and of a High Court Judge Rs. 3,500.

A High Court for Delhi and Himachal Pradesh is constituted under an Act of Parliament.

EMERGENCY PROVISIONS

If the President is satisfied that a grave emergency exists, and the security of India or any part thereof is threatened either by war or internal disturbance, he may make a declaration to that effect. Such proclamation must be approved by both the Houses of Parliament, before the expiration of two months, otherwise it ceases to operate at the end of that period. As a result of this proclamation Parliament will be authorised to legislate on items included in the State list and the President, to issue directions to the Governor. The President of India made a Proclamation of Emergency in October 1962 after the Chinese aggression.

The President may proclaim a failure of constitutional machinery in a State if he learns that the Government of the State cannot be carried on according to the provisions of the constitution. If this is done, President's rule will be introduced in the State. Upto Sept. 1969, there have been 17 cases of failure of constitutional mechanism in the States.

This, however, would not be applicable to the functions of the High Courts. Somewhat similar provision is also made for financial emergency.

AMENDMENT OF THE CONSTITUTION

For purposes of amendment the items are divided into three classes with a different procedure for each class.

For amendment of the provision with respect to the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament, etc., the amendment must be passed by both the Houses of Parliament by a majority of the total membership of the House and by a majority of two-thirds of the members present and voting, and must further be ratified by the legislatures of not less than one-half of the States.

In other cases no reference to the State legislatures is necessary. Parliament by itself can amend the Constitution in the manner mentioned above. In some cases amendments can be effected even by a bare majority such as is required for the passing of any ordinary law. The Supreme Court in Golaknath case (Feb. 1967) laid down that Parliament has no power to curtail fundamental rights.

There were 22 amendments to the constitution upto the end of September 1969.

CIVIL AVIATION

TOTAL public sector outlay for Civil Aviation for the Fourth Plan (1969-74) according to the Final Plan Document: Rs. 203-00 crores.

Provision for Revenue or current expenditure in the Budget Estimates for 1970-71; Rs. 8-47 crores (net). Provision for capital outlay on aviation during 1970-71; Rs. 10-80 crores.

AIR-TRANSPORT

In addition to the two Corporations — Indian Airlines Corporation and Air India — there were 18 flying clubs and nine air transport companies holding permits for non-scheduled services on 31st December 1969.

During the year 1969*, approximately 16,653 hours and 5,175,800 kilometres were flown on non-scheduled operations against the previous year's figures of 15,304 hours and 4,573,000 kilometres. The number of passengers and amount of freight carried were approximately 151,087 and 11,346 tonnes respectively as against the previous year's figures of 152,511 and 12,131 tonnes of freight.

During 1969 (estimated), 149,262 hours and 66,590,000 kilometres were flown on scheduled air services against the previous year's figures of 135,425 hours and 60,047,000 kilometres. The number of passengers and amount of freight carried during 1969 (estimated) were 2,499,200 and 30,759 tonnes against the 1968 figures of 2,108,229 passengers and 25,394 tonnes of freight.

INDIAN AIRLINES CORPORATION

(Airlines House, 113, Gurdwara Rakabganj Road, New Delhi)

The present fleet consists of seven Caravelles VI-N, 14 Viscounts 700 Se., 14 Fokker Friendships, 12 HS-748's and nine DC-3's. On order: Three HS-748's. An order for buying seven Boeing 737 for the Indian Airlines from the Boeing Co. was signed on March 19, 1970. The delivery of the planes will begin from November this year at the rate of a plane a month. The plane will have a capacity of 115 passengers.

Total number of employees as on 31-3-1969: 13,178. The crew strength consists of 425 pilots. The airline's services extend over the entire sub-continent, including Afghanistan, Nepal, Burma and Ceylon.

The operations of the Corporation have been divided into four regions, namely, Delhi, Bombay, Madras and Calcutta.

Members of the Board: S. Mohan Kumaramangalam (Chairman); J. R. D. Tata, Air Chief Marshal P. C. Lal, Air Marshal M. S. Chaturvedi, K. N. Mookerjee, K. T. Saterawala, N. Khosla, Ravi J. Matthai, Y. T. Shah.

General Manager: K. T. Satarawala.
Assistant General Manager: B. Israni.
Financial Controller: V. Satyamurti.
Director of Engineering: A. H. Mehta.
Director of Operations: Capt. R. G. Patwardhan.
Director of Planning: B. S. Bahadur.
Commercial Director: C. J. Lisely.
Controller of Stores & Purchases: J. A. D'Silva.
Director of Personnel: M. K. Basu.
Public Relations Manager: H. J. D'Penha.
Secretary: S. K. Chatterjee.
Controller, Central Space Control: S. Sen Gupta.
Bombay, Pagina a. Paginagal Director: Capt. D.

Bombay Region: Regional Director: Capt. D. A. Samant.

Calcutta Region: Regional Director: H. N. Kelawala.

Delhi Region: Regional Director: K. N. Kathju.

Madras Region : Regional Director : Capt. A. M. Kapur.

Indian Airlines is now a full member of the International Air Transport Association. It has set up training establishments for its Flying, Engineering and Traffic personnel. Besides regular passenger and freight services, I.A. operates a Night Airmail Service linking Bombay, Delhi, Calcutta and Madras.

During April 68-March 69, the Indian Airlines on its scheduled services, flew approximately 38,075 million kilometres, carrying 1,957,875 passengers, 14,833 tonnes of cargo and 10,125 tonnes of mail.

The capacity ton kilometres operated during the year 1968-69 under review is 201,281,476 as against 203,085,613 during the corresponding period of 1967-68.

The airline has introduced a Scholarship Scheme for promising children of low paid staff.

The direct contribution of Indian Airlines to the budget revenues of 1968-69 amounts to nearly Rs. 11.30 crores.

The airline's foreign exchange earnings were Rs. 7.61 crores in 1968-69 thus making it one of the big net earners of foreign exchange.

The balance of Rs. 3.96 crores comprises payment of excise and customs duty which amounts to Rs. 2.74 crores on fuel alone in this financial year and sales tax of Rs. 1.22 crores. The operating profit for 1968-69 was Rs. 3.57 crores against Rs. 1.33 crores in the previous year and net profit was Rs. 1.66 crores against loss of Rs. 0.26 crore in 1967-68.

AIR-INDIA

Air-India now has a total of 35 online and 79 offline sales offices covering five continents.

Air-India at present operates seven services a week to New York via London. London is also served with eight additional terminator services, two via Moscow and six via Middle East Europe. In addition, Air India has introduced a twice-weekly Gulf Terminator service to Kuwait, one of which operates via Bahrain and the other via Dubai. The airline also operates four services a week to Tokyo; three to Nairobi, one of which is extended to Entobbe; and three to Singapore, one of which is extended to Jakarta. Of the remaining two services to Singapore, one is operated to Sydney via Perth and the other to Nandi via Perth and Sydney. In addition a weekly service is operated to Mauritius.

Air-India, today has a fleet of five Boeing 707-437 intercontinental jets, three Boeing 707-337Bs and two Boeing 707-337Cs.

During 1967-68 Air-India flew 22-861 million revenue kilometres carrying 285,459 revenue passengers, 1,516 tonnes of mail and 10,404 tonnes of eargo. Comparable figures for 1966-67 were 18-792 million revenue kilometres, 254,736 revenue passengers, 1,411 tonnes of mail and 9,657 tonnes of cargo.

Members of the Board: Chairman: J. R. D. Tata; Members: S. Mchan Kumaramangalam, Air Chief Marshal P. C. Lal, Air Marshal M. S. Chaturvedi, K. T. Satarwala, Y. T. Shah, N. Khosla, K. N. Mookerjee, Ravi J. Matthai.

[•] Figures are estimated.

Air-India Executives: J. R. D. Tata (Chairman); Air Mashal M. S. Chaturvedi (General Manager); S. K. Kooka (Commercial Director); K. K. Unni (Asst. General Manager); Capt. K. Vishvanath (Director of Planning (Technical)); K. G. Appusamy (Director of Engineering); Capt. K. M. Mathen (Director of Operations); C. V. R. Rao (Financial Controller); S. C. Kale (Controller of Stores & Purchases); S. K. Nanda (Chief Personnel Manager).

AIR-INDIA OFFICES

Head Office: Air India Building, 20th Floor, Nariman Point, Bombay 1-BR. Tel. 292728.

Commercial Headquarters: Bank of India Building, Fourth Floor, Mahatma Gandhi Road, Bombay-1 BR. Tel. 256811.

Other Departments: Bombay Airport, Santa Crus, Bombay-29 AS. Tel. 535461.

Information/Booking: 131, Mahatma Gandhi Road, Fort, Bombay-1 BR. Tel. 259380.

Geneva Office: 1-3 Rue de Chantepoulet; London Office: 17/18 New Bond Street, WIY OBD; New York Office: 410 Park Avenue, New York 10022; Nairobi Office: Lugard House, Government Road; Tokyo Office: Hibiya Mitsui Building; Sydney Office: P. & O. Building, 3 Elizabeth Street; Nandi Office: Terminal Building, Nandi Airport.

Operating Results: 1968/69 (Rupess in Crores). Operating Revenue: 59·50; Operating Expenses: 54·68; Operating Profit*: 4·82; Net Surplus after Tax: 1·84.

Total No. of employees (as on March 31, 1969): 8,821; Unduplicated route Kilometres (as on March 31, 1969): 57,603.

AERODROMES

At the end of October 1969, 85 aerodromes were maintained by the Civil Aviation Department.

Aerodromes by Categories: International Aerodromes (4): Bombay Airport, Calcutta Airport, Delhi Airport, Madras Airport.

Major Aerodromes (11): Agartala; Ahmedabad; Amritsar; Begumpet; Delhi (Safdarjung); Gauhati; Jaipur; Lucknow; Nagpur; Patna; Tiruchirapalli.

Intermediate Aerodromes (38): Aurangabad; Balurghat; Baroda; Behala; Belgaum; Bhavnagar; Bhuntar (Kulu); Bhopal; Bhubaneswar; Bhuj; Bombay (Juhu); Coimbatore; Gaya; Indore; Junagadh (Keehod); Kailashahar; Kamalpur; Kandla; Khajuraho; Khowai; Kota; Kumbhirgram; Madurai; Mangalore (Bajpe); Mohanbari; Nagargul (Nadirgul) (Gliderdrome, Hyderabad); North Lakhimpur (Lilalari); Pantnagar (Phoellagh); Porbandar; Port Blair; Rajkot; Ranchi; Trivandrum; Tulihal (Imphal); Udaipur; Varanasi (Banaras); Vijayawada; Visakhapatnam.

Minor Aerodromes (32): Akola; Bilaspur; Chakulia; Cooch-Behar; Cuddappah; Donakonda; Hadapsar (Gliderdrome, Poona); Jhansi; Jharsuguda; Jabalpur; Kanpur (Civil); Khandwa; Kolhapur; Lalitpur; Malda; Muzaffarpur (Rewaghat); Mysore; Palanpur (Deesa); Panagarh; Panna; Pasigaht; Raipur; Rajahmundry; Ramnad; Raxaul; Rupsi; Satna; Shella; Sholapur; Tanjore; Vellore; Warangal.

WORKS

During the period from 1st January 1969 to 31st October 1969, work was completed on the extension of 14/32 runway to 2,560 metres (8,400 feet) at Bombay airport and extension, additions and alterations to, provision of airconditioning plant in the arrival lounge and customs block and provision of furniture in the terminal building

at Delhi airport. Works were also completed during the period on extension of runway at Baroda aerodrome, strengthening of runway at Varanasi aerodrome and all-weather runway at Khajuraho aerodrome.

At the end of October 1969, work was in progress on the construction of new international terminal building, the terminal block and control tower at Calcutta airport and construction of a new terminal building, apron and taxi track at Begumpet aerodrome. Other important works in progress at the end of the period under review include extension of 10/28 runway to 3,810 metres (12,500 feet) at Delhi airport, construction of fair weather strip at Hassan aerodrome, strengthening and extension of the runway to 1,768 metres (5,800 feet) at Mangalore aerodrome, strengthening of the runway at Begumpet aerodrome and extension of the main runway to 1,829 metres (6,600 feet) at Baroda aerodrome.

TRAINING CENTRE, ALLAHABAD

The Civil Aviation Training Centre, Allahabad comprises Aerodrome and Communication Schools. Ab-initio as well as refresher training is given in these schools to departmental officers and to the foreign nationals as are approved by the Government.

The Civil Aviation Fire Service Training Centre at Dum Dum gives training in the Basic Course in Crash Fire Rescue for regular fire crew. The Government Gliding Centre at Poona gives training for glider instructors.

FLYING CLUBS

At the end of October 1969, there were 24 subsidised flying clubs with their headquarters at Amritsar, Hyderabad, Gauhati, Banasthali, Patna, Bombay, Coimbatore, New Delhi, Bangalore, Baroda, Lucknow, Hissar, Jamshedpur, Karnal, Trivandrum, Indore, Nagpur, Madras, Jullundur Cantt., Bhubaneshwar, Patiala, Jaipur, Behala (Calcutta) and Raipur.

Gliding Centres/Clubs: At the end of October 1969, there were three Government Gliding Centres at Bangalore, Lucknow and Poons and 13 subsidised Gliding Clubs at Ahmedabad, Amritsar, New Delhi, Deolsli, Jaipur, Kanpur, Pilani, Raipur, Patiala, Patna, Jullundur Cantt., Agra and Hissar.

AERONAUTICAL COMMUNICATION SERVICES

At the end of October 1969, there were 92 Aeronautical Communication Stations providing 177 Radio Navigation facilities and 526 Aeronautical Communication Channels.

List of Aeronautical Communication Stations maintained by the Civil Aviation Department as on 31st October, 1969: Agartala, Ahmedabad, Akola, Aligurh, Allahabad, Amritsar, Aurangabad, Balurghat, Bangalore, Banihal, Baroda, Belgaum, Bellary, Berhampore, Berachampa, Bhatinda, Bhavnagar, Bhopal, Bhubaneswar, Bhuj, Bombay, Calcutta, Chakulia, Cochin, Coimbatore, Cooch-Behar, Dhanbad, Delhi (Palam), Delhi (Safdarjung), Farukhabad, Gauhati, Gaya, Hissar, Khajuraho, Gwalior, Hyderabad, Gegumpet), Imphal, Indore, Jabalpur, Jaipur, Jammu, Jamnagar, Jamshedpur, Jharsuguda, Jedhpur, Kailashahar. Kamalpur, Kandla, Kanpur, Katihar, Keshod, Khowai, Kota, Kud, Kulu, Kumbhirgram, Lalitpur, Lilabari, Lucknow, Madrae, Madurai, Magadi, Mandasor, Mangalore, Mchanbari, Muzaffarnagar, Muzaffarpur, Nagpur, Panagarh, Passighat, Pataudi, Patna, Pant Nagar (Phoelbagh), Perbandar, Pert Blair, Qazi Gund. Rajpur, Rajkot, Ranchi, Roorkela, Kupsi, Sikandrabad, Songadh, Srinagar, Tarakeswar, Tiruchirapalli, Trivandrum, Udaipur, Varanasi, Vijayawada, Vikarabad, Visakhapatnam.

ROADS 163

AIRCRAFT

At the end of October 1969, 641 aircraft held current certificates of registration and 255 aircraft held current certificates of airworthiness. During the period from 1st January 1969 to 31st October, 1969, 28 new aircraft were registered and the registration of 11 aircraft was cancelled. Two hundred and forty-three aircraft including three aircraft of foreign nationality were inspected for issue or renewal of certificate of airworthiness.

The number of gliders registered at the end of October 1969, was 96.

On 31st October 1969, 53 aircraft were engaged in aerial work and agricultural operations,

RESEARCH AND DEVELOPMENT

Research and development for Civil Aviation are undertaken by the Research and Development Organisation of the Civil Aviation Department at the Technical Centre, Safdarjung, New Delhi.

The Research and Development Directorate in Civil Aviation has two distinct functions/activities. One is airworthiness engineering function for the Directorate General of Civil Aviation, including field work and operational safety. These include type certification, approval of modifications, laying down of Design and Operational Airworthiness requirement, service failure investigations evaluation of performance and economics of civil transport aircraft, personal planes, agricultural aircraft and heli-

copters and other ad-hoc technical problems referred to from time to time. The second function relates to research, development and evaluation at the Technical Centre Laboratory. These include design and development of light aircraft and gliders, standardisation and development testing of aeronautical materials and processes, development of safety devices and operational research.

ACCIDENTS

During the period from 1st January, 1969 to 31st October 1969, there were 21 major accidents in India involving 19 Indian registered aircraft and one foreign registered aircraft. The same foreign registered aircraft having crashed twice accounted for two accidents. In addition to this, there was one major accident in East Pakistan involving an Indian registered aircraft. Three of the accidents to Indian registered aircraft were fatal resulting in the death of 47 persons including six members of crew.

Of the 20 Indian registered aircraft involved in accidents, four were operating scheduled passenger services, two were operating non-scheduled flights, six were engaged in training and cross-country flights, five in agricultural operations and three on joy-rides and miscellaneous flights.

At the end of October, 1969 out of the 20 accidents to Indian registered aircraft, 11 had been investigated and eight were under investigation by the Department. The accident to Indian registered aircraft which crashed in East Pakistan was under investigation by the Pakistan Government authorities.

ROADS

IT is estimated that India in 1914 had 273,000 Km. of roads. Against this, the length in April 1969 was 941,100 Km. made up of 317,800 Km. of metalled roads and 623,300 Km. of unmetalled roads. Included in this, however, are roads constructed in Community Development and N.E.S. Blocks, amounting to about 370,000 Km. which are generally mere tracks and are often not properly maintained.

On the administrative side roads may be divided into two main classes. State Roads under the Public Works Department and Local Roads in charge of local bodies.

1st, 2nd & 3rd FIVE YEAR PLANS

The progress of road development during the past three Plan periods and during the three successive Annual Plans has been as follows. (Figures are in kilometres, the first indicating surfaced, second unsurfaced and third total): First Plan (183,023; 315,321; 498,344); Second Plan (225,790; 473,330; 709,120); Third Plan (280,586; 611,136; 891,722); 1969 (Estimated) (317,800; 623,300; 941,100).

The financial allocations for road development from the beginning of the First Five Year Plan have totalled a sum of Rs. 1,134-86 crores, distributed as under (in Rs. crores): First Plan 134-47; Second Plan 245-80; Third Plan 451-12; 1966-67: 111-53; 1967-68: 100-88; 1968-69: 91-06; Total 1,134-86.

NATIONAL HIGHWAYS

National Highways include the following roads:—1. The Grand Trunk Road from Calcutta to Amritsar via Banaras, Kanpur, Agra and Deihi; 2. The Agra-Bombay Banad; 3. The Bombay-Bangalore-Madras Road; 4. The Madras-Calcutta Road; 5. The Calcutta-Nagpur-Bombay Road; 6. The Banaras-Nagpur-Hyderabad-Bangalore-

Cape Comorin Road; 7. The Delhi-Ahmedabad-Bombay Road; 8. The Road from Ahmedabad to Kandla with a branch Road to Porbandar; 9. The Hindustan-Tibet Road from Ambala to Tibet border via Simla; 10. The Delhi-Lucknow-Gorakhpur-Muzzafarpur Road with a branch Road to Nepal border; 11. The Assam Access Road; 12. The Assam Trunk Road on the South Bank of the Brahmaputra; 13. The Road branching off from the Assam Trunk Road towards the Burma border through the State of Manipur.

In 1961 three additional roads were classed as National Highways. They are Jabalpur-Bhopal-Biaro Road, Agra-Jaipur-Bikaner Road and Sholapur-Chitradurg Road. Consequently, the length of the National Highway system has now increased to 23,720 Km. (14,739 miles).

In April 1969 there were still 402 Km. of missing links on this road system. Seventeen major bridges are still to be built, 1,400 Km. of low grade surfaces need to be upgraded and 3,000 weak, narrow or damaged bridges need to be replaced.

Some of the important works completed on national highways so far are the Barakar and Poon bridges and the rail-road bridge over the Ganga near Mokameh in Bihar, the Kathjuri and Kuskhai bridges in Orissa, Mahi bridge in Gujarat, Pennar and Champavati bridges in Andhra Pradesh, Pugalur and Palar bridges in Tamil Nadu, Beyne and Ghagger bridges in the Punjab,* Gheesh, Rupnarain and Leesh bridges in West Bongal, Bygool, Bhakra and Betwa bridges in U.P., the Chambal bridge near Dholpur in Madhya Pradesh, Tungabhadra bridge at Hospet in Mysore, Bassein creek bridge near Bombay in Maharashtra and the bridge over the Ganga at Gurhmukeshwar in U.P.

^{*} Composite State.

Among the important projects in progress are the construction of the "Pipra-Kasia link road and the bridge over the Gandak at Dumariaghat on National Highway No. 28 in Bihar, the construction of the Yamuna bridge behind the Humayun's tomb in Delhi, Neendkara bridge on N. H. No. 47 in Kerala, Thana Creek bridge on the Bombay-Panvel route in Maharashtra, improvement of N. H. Nos. 31, 37 and 38 in certain sections of Assam, and bridges over the Yamuna at Agra, the Ganga at Allahabad (N.H. No. 2) and the Ghagra at Dobrighat (N. H. No. 29) in Uttar Pradesh.

The west coast road, though under construction mainly at the cost of the Central Government, has not yet been declared a National Highway. Passing through the States of Maharashtra, Mysore, Goa and Kerala this 1,140 km. road from Panvel in Maharashtra to Chalissery in Kerala is expected to be completed by March 1971 at a cost of Rs. 23·15 crores. The Section now remaining to be completed is the portion in Goa territory including a bridge over the river Zuari in addition to a major bridge over Baliapatam with approaches in Kerala.

The actual National Highway lengths (in Km.) in the various States in 1967 were as follows:—

Andhra 2,312, Assam 1,366, Bihar 1,757, Gujarat 1,088, Haryana 697, Kerala 415, M.P. 2,621, Maharashtra 2,393, Mysore 1,183, Nagaland 111, Orissa 1,339, Punjab 436, Rajasthan 1,255, Tamil Nadu 1,707, U.P. 2,341, West Bengal 1,376, Delhi 72, H.P. 87, Manipur 212 and border areas including Jammu & Kashmir 902. Total length excluding missing links 23,720 Km.

EXPRESS HIGHWAYS

Five express highways designed for fast motor traffic have formed part of recent road schemes. Two of these are at the northern outskirts of Bombay City known as the Western and Eastern Express Highways. The third one joins Calcutta to the Dum Dum Airport. Work on the remaining two express highways, roughly 100 miles each, and connecting Calcutta to Durgapur in West Bengal and Sukinda mines to Paradip port in Orisea, is in progress. The last one is almost complete.

NEW ROAD PLAN

This plan has been prepared for execution during the 20-year period from 1961 to 1981.

The broad outline of the plan is to raise the mileage of roads from 4·10 lakhs in 1961 to 6·57 lakhs by 1981 with provision for two lane carriage-ways on National Highways. The Plan aims at increasing the intensity of roads from 0·32 to 0·52 per square mile of territory. When the plan is completed the average distance from a village in an agricultural area to a metalled road will be reduced from five to three miles and the distance to an unmetalled road will be reduced from two to 1½ miles.

There is also a provision to have 1,000 miles of Expressways with limited access and also grade separation at most of the crossings.

The cost of this scheme is estimated at Rs. 5,200 crores which, it is recommended, should be split up between four 5-year periods as under:—

1961-62 to 1965-66: Rs. 590 crores; 1966-67 to 1970-71: Rs. 1,075 crores; 1971-72 to 1975-76: Rs. 1,545 crores; 1976-77 to 1980-81: Rs. 2,000 crores.

Statement showing how the allotments in the scheme are made—for Highways, District Roads and Village Roads. The first figure indicates the targets proposed in the Plan in miles and the second the cost in Rs. crores (improvement and new construction): National Highways 32,000; 980; State Highways 70,000; 1,580; Major District Roads 1,50,000; 1,360; Other District Roads

1,80,000; 650; Village Roads (Classifie\1) 2,25,000; 630; Total 6,57,000; 5,200.

INTERNATIONAL HIGHWAYS

A major development which took shape during the Third Plan period is the linking up of our national highways with the international higways as proposed by the ECAFE.

These highways are divided into two categories, the first consisting of main arterial routes joinking the capitals of the countries and the second consisting of other routes joining main cities, ports etc. with the arterial network. Constituting a part of the main international system by linking India with Lahore in Pakistan and Mandalay in Burma the main arterial highway through India is the Amritsar-Delhi-Agra-Calcutta-Golaghat-Imphal road. Next in importance are two routes, Agra via Gwalior, Hyderabad and Bangalore to Danushkodi and Barhi to Kathmandu. Highways of the second category in India will include roads such as Agra-Bombay, Delhi-Multan, Bangalore-Madras, Golaghat-Ledo etc.

BORDER ROADS

A "Border Roads Development Board" was formed in March 1960 to accelerate the economic development of the North and North Eastern border areas. Its programme includes improvement of certain existing roads and tracks and construction of new ones. While all road agencies like the State P.W.D. and the Central P.W.D. cooperate with the Board, work is being carried out directly by the Board in the most forward areas and especially at high altitudes and in difficult terrain. The Board has taken over overall responsibility for the maintenance and improvement of the Pathankot-Jammu-Srinagar-Uri National Highway.

World's Highest Road: The world's highest road from Manali to Leh has been completed by the Border Roads Organisation 15 months ahead of schedule. The average altitude of the terrain is 14,000 feet. The road negotiates four very high passes varying from 16,000 to 18,000 feet. It has reduced substantially the distance between Chandigarh and Ladakh.

LENGTH OF ROADS IN INDIA (as on 31-3-1967)

(In Kilometres)

		(TH POTTON	10/100)

REVENUE FROM MOTOR TRANSPORT

In 1963-69 the expenditure on roads is estimated at Rs. 164-28 erores, made up of Rs. 105-23 erores on road construction or improvements and Rs. 59-05 erores on road maintenance. The Governments at the Centre and in the States realised in the year an amount of Rs. 537-41 erores from motor transport, as under:

	Revenue, 1968-69 (Rs. in Crores
Central Revenues. Motor Spirit and Diesel Oil Duties Tyre Excise and Import Duties Vehicle Parts Imports Duties	359-63
State Revenue. Vehicle Taxes and Petrol Sales Taxes, Passenger and Goods Taxes, etc.	177-78
Total	537-41

MOTOR VEHICLES

The number of motor vehicles in use in India in March 1968 was 1,307,222.

The distribution of vehicles among the various States are shown in a table under "Motor Vehicles in India" in Automobile Industry. The growth of motor vehicles in India in the past ten years is about 192 per cent the total number having increased from 4.47 lakhs in March 1957 to 13.07 lakhs in March 1968.

NATIONALISED TRANSPORT

Nationalised bus services covered in 1989 almost the major parts of Gujarat, Maharashtra, Orissa, Delhi, Haryana, Manipur and Himachal Pradesh.

No nationalisation has taken place in Tripura, Gos and Pondicherry; but in the remaining parts of the country the extent to which services have been nationalised varies from one State to another, some having started only experimental nationalisation as in Rajasthan while in some others such as Punjab and U.P., roughly half of the passenger buses are owned by the nationalised sector. Mysore has 32 per cent of buses under State ownership and Andhra Pradesh 36 per cent. In the rest of the country comprising Assam, West Bengal, Tamil Nadu, Jammu &

Kashmir, M.P. and Kerala, State-owned buses vary from 16 to 27 per cent. In the country as a whole nationalised buses accounted for 38 per cent of passenger services in 1969.

Freight transport is operated by certain State Transport organisations such as those in Assam, Maharashtra, Uttar Pradesh, Jammu & Kashmir and Himachal Pradesh. While these freight lorries as a rule operate on charter basis or on scheduled parcel services without monopoly, the State Transport in Assam has a monopoly of the truck traffic on 68 miles of roads and the goods traffic in Himachal Pradesh is a virtual State monopoly. The number of goods lorries operated by nationalised concerns is however not more than one per cent of the total goods vehicles in India.

TRANSPORT BODIES

The Roads Wing under the Ministry of Transport gives technical advice and arranges for the allocation of Central Road Fund reserves among the States.

There is an inter-State Transport Commission to develop, co-ordinate and regulate operation of motor vehicles in areas or routes common to two or more States.

There is a Transport Development Council, consisting principally of Ministers and officials.

Enquiry Committees

In 1965 the Government of India appointed three enquiry committees. One known as the Study Group on viable units recommended in 1968 that various forms of encouragement should be afforded by Government to induce transport operators to combine into bigger units so as to be able to provide more efficient services and effect economies in costs. The second Road Transport Taxation Enquiry Committee has found that the incidence of present taxation constitutes disincentive to the growth of road transport. In its report submitted at the end of November 1987, it has recommended that the prevailing taxes which are high should be reduced. The third Committee dealing with the financing of the road transport industry, also made several recommendations in 1968 such as the inclusion of road transport industry in the list of priority industries, restoration of the development rebate originally granted to it and the grant of a further rebate of 8 per cent from income tax to ensure that the development of road transport matches the future needs of the economy.

SOME ALL INDIA CORPORATIONS

AGRICULTURAL REFINANCE CORPORATION

Garment House, 4th Floor, Dr. Annie Besant Road, Post Box No. 6552, Werli, Bombay-18 WB.

Objects: The Agricultural Refinance Corporation is primarily a refinancing agency and its object is to provide financial accommodation of a medium-term or long-term nature to the various special schemes of agricultural development which cannot be satisfactorily financed by the existing credit agencies either on account of the volume of funds involved or the terms and conditions of repayment or because the projects as such cannot be brought within the normal rules of business under which the land mortgage banks and State Co-operative banks are functioning.

UNIT TRUST OF INDIA

Head Office: Bombay Life Building, 45, Veer Nariman Road, Bombay-1.

Basic objective: To afford the small investor a means of acquiring a share in the widening prosperity based on

steady industrial growth of the country which combines the advantages of minimum risk and a reasonable return.

A Unit Trust pools the savings of the community and invests them in securities of various types. To pool the savings, the Trust sells 'units'. All units rank equal for the distribution of income, regardless of when they are acquired. The Trust offers one other important and unique advantage: it is always ready both to sell and buy its units at prices published by it. A Unit holder is thus assured complete liquidity for his investment.

Some Salient Features: Besides the Trust's offices at Bombay, Calcutta, Delhi and Madras, units are on sale at all the branches of the numerous leading banks which have contributed to the initial capital of the Trust and at over 15,000 post offices throughout the country. Units can also be obtained through 286 'approved' brokers on the recognised stock exchanges and 1,775 individual agents appointed so far, by the Trust.

During the five years i.e. from July 1, 1964 to June 30, 1969, sales of units aggregated Rs. 63·02 crores. Allowing for repurchases, units sold and outstanding as at the end of June 1969, amounted to over Rs. 56 crores, the number of unit holders being 2,69,181.

The Trust has paid dividend for the year ended June 1969 at the rate of $7\cdot1\%$ per annum as against 7% paid for each of the preceding three years.

The Trust is exempt from payment of income-tax and other taxes on income.

Income upto Rs. 1,000 from the Unit Trust received by an individual unit holder is free from income tax irrespective of the amount of his other income. That is, income upto Rs. 1,000 from units is not included in the computation of the total income for purposes of income tax.

Units can be sold back to the Unit Trust of India any time. The sale and repurchase prices of units are determined in accordance with the provisions laid down in the Unit Scheme and are announced daily.

Transfer of units to third parties is possible. A unit holder can also transfer units in favour of a bank for purposes of borrowing.

The Trust has introduced Voluntary Savings Plan 1969 from 1st July 1969. This provides a facility whereby a person of even relatively small means can regularly invest in units.

URANIUM CORPORATION OF INDIA LIMITED

P.O. Jaduguda Mines, Dist. Singhbhum, Bihar.

It is a wholly-owned Government of India enterprise under the Department of Atomic Energy. Its objectives are to provide the Uranium requirements for the Atomic Energy Programme of the country. GOLD AND SILVER

The year 1968-69 witnessed two significant developments in the bullion market. The Gold Control, which since January 1963 was administered under the Defence of India Rules, 1962 (Part XIIA), has been brought on a permanent statutory footing from September 1, 1968 with the passing of the Gold (Control) Act, 1968. In regard to silver, an Ordinance, amending the Sea Customs Act, 1962, was promulgated on January 3, 1969 with a view to curbing the large-scale unauthorised exports of the metal. As regards trading in the Bombay bullion market, the prices of both the metals scaled new peaks.

The Gold (Control) Act, 1968 besides retaining the main provisions of the earlier gold control regulations, as modified in November 1966, has incorporated the following new provisions designed to plug the loopholes in the gold control rules: (i) a licensed dealer or refiner has to declare all gold articles and ornaments belonging to him notwithstanding the exemption limits allowed for the general public, (ii) an explanation has been added to the definition of the term "ornaments" with a view to excluding orude

manufactures of gold from the facility available in law for the acquisition, possession etc. of genuine ornaments, (iii) in order to ensure that the members of the public get quality goods from the dealers it is provided that every licensed dealer shall stamp every piece of article or ornament prepared by him, certifying the purity of gold, (iv) in order to avoid trafficking in smuggled gold, it is laid down that an artisan employed by a dealer shall work only at the dealer's premises and not outside, and (v) certificates are now granted to the goldsmiths on a permanent basis instead of annual certificates given hitherto.

During the year, steps to prevent smuggling of foreign goods including bullion into the country were further strengthened. With a view to facilitating the detection and confiscation of certain notified goods smuggled into the country and preventing smuggling of silver out of the country, the Customs (Amendment) Ordinance, 1969 was promulgated on January 3, 1969. The notifications issued under the Ordinance provide for, in respect of notified goods including silver, intimation of place of storage, furnishing details of notified goods, maintenance of accounts, transport and sale under cover of vouchers and reasonable precautions before acquisition.

Following the introduction of a two-tier system of gold prices in the wake of world monetary crisis in March 1968, the gold prices in the London market stood at \$38 per ounce on April, 1968. Throughout the year the free market price commanded a high premium over the official or monetary price and rose to \$43.75 by March 10, 1969 in the London market; on that day the price in Paris shot upto \$48.43 per ounce. Towards the close of the year there was a slight abatement of the pressure on gold prices.

Silver prices in the international markets moved rather erratically but closed lower on balance.

FOREIGN EXCHANGE CONTROLS

THE par value is Indian Rupees 7.50 = US\$1. All transactions in foreign exchange must be conducted through authorised dealers, whose dealings with the general public must be effected as follows: in sterling, at rates fixed by the Foreign Exchange Dealers' Association; in other currencies, at rates based on the fixed rates for sterling and the London market rates for sterling against the other currency concerned. Authorised dealers are permitted to cover their requirements of foreign currencies in the London market, and to cover their permitted transactions in certain currencies against sterling, rupees, or any one of these currencies, either spot or forward for periods not exceeding six months, with authorised banks in any country outside the Bilateral Account group.

ADMINISTRATION OF CONTROL

Exchange control is administered by the Reserve Bank of India, in accordance with the general policy laid down by the Indian Government in consultation with the Reserve Bank. Much of the routine work of exchange control is delegated to certain commercial banks, which act as authorised dealers permitted to buy and sell foreign exchange for specified purposes under regulations laid down by the Reserve Bank.

DEVELOPMENTS IN EXCHANGE CONTROL

The major developments in the sphere of exchange control during 1968-69 related to export promotion, pursuit of studies abroad, investments by non-residents

of Indian origin, booking of passage for travel abroad and delegation of powers to authorised dealers. In keeping with the objective of liberalising exchange facilities for export promotion, (i) the minimum annual export turnover prescribed for the issue of blanket exchange permits was reduced, (ii) registered Export Houses, irrespective of their past performance, were made eligible for the grant of blanket permits, (iii) the purpose for which blanket permits could be utilised was liberalised, (iv) exporters were permitted to receive advance remittances from overseas buyers and (") the conditions governing release of exchange for export promotion tours to new firms entering the export field were relaxed. As regards studies abroad, (i) exchange facilities were granted for post-graduate diploma courses in non-technical subjects and for courses in Management or Administration by B.Sc. and engineering graduates, (ii) the minimum marks stipulated were relaxed in the case of students with teaching or research experience and (iii) the validity period of the foreign ex-change permits was changed from one year to the total duration of the course. Non-residents of Indian origin were permitted to invest in public or private limited companies irrespective of whether the companies are engaged in industry, trade or business. Further, as an experimental measure, for a period of three years, they were also permitted to invest in partnership and proprietorship concerns subject to certain conditions. Airline/steamer companies were allowed to book passages in the case of certain categories of travellers without prior permission of the Bank. As an experimental measure, P form clearance facilities were granted in certain cases, provided the host abroad agreed to meet the total cost including passage both ways. Powers were delegated to authorised dealers for undertaking certain types of transactions so as to minimise the inconvenience and delay. These developments are detailed below.

Export Promotion

In April 1968, the minimum annual export turnover prescribed for the issue of blanket exchange permit to exporters was reduced from Rs. 20 lakhs to Rs. 5 lakhs in the case of non-traditional goods. For traditional goods, the separate minimum annual turnover prescribed earlier for tea and jute goods (Rs. 100 lakhs) and all other items (Rs. 50 lakhs) was abolished and a uniform minimum annual turnover of Rs. 25 lakhs was made applicable to all traditional goods. The registered Export Houses were also made eligible for the grant of blanket exchange permits irrespective of their past performance. Further, the purpose for which the exchange authorised under blanket permits could be utilised was liberalised in that it could now be used not only for travel abroad but also for a few additional purposes, such as, conducting market studies, advertising abroad, participation in overseas exhibitions, trade fairs etc. For meeting these additional requirements, the value of blanket permits has been enhanced by 50 per cent. In view of the difficulties experienced by exporters in raising funds locally for export financing, they have now been permitted to receive advance remittances from overseas buyers/agents provided the rate of interest payable does not exceed 8 per cent and that the shipments are effected within one year from the date of receipt of the advance.

In keeping with the objective of liberalising exchange facilities for export promotion tours, the official recommendation required to be furnished by new firms, entering the export field, in support of their applications for release of exchange, was discontinued in May 1968.

Education

The minimum marks prescribed for the release of exchange to holders of engineering degree proceeding abroad for taking up degree courses in engineering or other technical subjects was raised from 55 per cent to 60 per cent in April 1968. Engineering graduates with 60 per cent marks were also made eligible for the grant of exchange facilities for taking up diploma courses in technical subjects. Beginning with September 1968, however, the minimum marks stipulation was dispensed with in the case of candidates who have secured the first or second rank in their degree examination.

The foreign exchange facilities granted hitherto to students with 60 per cent marks in Honours or Master's degree examination for taking up degree courses in nontechnical subjects were extended in April 1968 to cover post-graduate diploma courses in non-technical subjects at any university or institution. The minimum marks stipulation was, however, dispensed with in May 1968 in the case of students who had secured the first or second rank in the Honours or Master's degree examination. The requirement of 60 per cent marks was further relaxed again in May 1968 in the cases of all studies, whether technical or non-technical and whether it leads to a degree or diploma, provided the candidates have secured 50 per cent marks in their degree examination and have at least two years' teaching or research experience or five years' experience in an industry related to the proposed course of study abroad.

In July 1968 the foreign exchange facilities for taking up degree courses in Management or Administration, which were hitherto granted to candidates with 60 per cent marks in Honours or Master's degree examination, were extended to B.Sc. degree holders and engineering degree holders with 60 per cent marks. Holders of diplomas, which have been recognised as equivalent to a degree for recruitment to Central Government services, were made eligible in March 1969 for grant of foreign exchange facilities on lines similar to those extended to corresponding degree holders.

In order to avoid inconvenience to parties making remittances against permits issued to students for their studies abroad, it was decided in January 1969 to discontinue issuing permits valid for one year at a time and instead issue permits valid for the total duration of the course. Authorised dealers were empowered to effect remittances during the validity period of the permit provided the necessary documentary evidence in regard to progress made by the student is furnished by the remitter.

Investments by non-residents of Indian Origin: In May 1968 it was decided to permit withdrawals from the National Defence Remittance Scheme Special Accounts held by non-residents of India an origin for purposes of extending loans to or for investment in interest bearing deposits with public or private limited companies on the following conditions, namely, (a) the rate of interest payable on the loan or deposit does not exceed 12 per cent per annum and (b) the borrowing company would give an undertaking to the effect that the interest and principal amount will be credited back to the respective Special Accounts and that the loan or deposit will not contravene the requirements notified from time to time by the Non-Banking Companies Department of the Bank.

Hitherto, investments by non-residents of Indian origin in public or private limited companies were permitted only in those companies which are engaged in industry and not in trade or business. This stipulation was withdrawn in November 1968 and investments are now permitted irrespective of whether the companies are engaged in industry, trade or business; the restriction on the repatriation of dividends and sale proceeds of investments would, however, continue. In December 1968, it was decided to permit, as an experimental measure for a period of three years, investments by non-residents of Indian origin in partnership and proprietorship concerns subject to the condition that neither the capital invested nor the profits carned would be allowed to be repairmited abroad and that this would be credited to the non-resident blocked account of the investor until such time he takes up Indian citizenship. This facility was also extended to fundsheld in National Defence Remittance Scheme Special Accounts - subject to the same conditions except that profits and sale proceeds will have to be credited to the respective Special Accounts.

Booking Passage

Airline/steamer companies and Travel Agents were authorised in June 1968 to book, without obtaining prior approval of the Bank, passages in respect of certain categories of travellers, such as (a) wife and children proceeding abroad to join the head of family employed abroad provided the passage fare has been paid abroad, (b) Indian nationals employed abroad returning to their country of employment after a visit to India, provided passage fare has been paid abroad, (c) members of families of airline/steamship company staff who are posted

for duty abroad for at least one year, (d) persons holding letters of appointment from foreign Governments provided Prepaid Ticket Advice has been received from abroad in respect of the passage and (e) employees posted for duty at overseas branches of Indian banks and insurance companies and members of their families.

In March 1969, it was decided to grant, as an experimental measure, depending on the bonafides of the case, 'P' form clearance for visits abroad based on hospitality extended by persons who are not close relatives and by friends provided the host abroad not only agrees to meet the cost of the stay abroad, but also remits the cost of passage both ways. The 'P' Form clearance under this arrangement would be restricted to one month and to the country in which the host is residing.

Delegation of Powers

With a view to minimising inconvenience and delay, further powers were delegated to the authorised dealers in September 1968 for undertaking certain types of transactions without obtaining the prior approval of the Bank. Accordingly, the amounts upto which they could make remittances, without prior approval for payment of subscriptions or membership fees by firms or companies and other corporate bodies and for meeting legal expenses in connection with dishonoured export bills were raised from £ 15 per annum to £ 100 per annum and from Rs. 500 to Rs. 1,000 respectively. Authorised dealers were also allowed to effect remittances not exceeding £ 15 towards foreign university admission fees and a similar amount on account of examinations held in India for securing admission in foreign institutions. They have also been permitted to grant loans or overdrafts upto Rs. 20,000 to their non-resident constituents who are Indian nationals or persons of Indian origin provided the advances are fully secured by deposits or rupee securities acquired by the constituents out of their remittances from abroad.

Others

The other developments during the year were the following: (a) North Korea, which was excluded from the list of bilateral account countries in 1964, was again included in the bilateral account group in April 1968 following the extension of the trade agreement with that country for a period of two years beginning with January 1968. (b) The forward sales of exchange against imports on a deferred payments basis, which were hitherto subject to the condition that deliveries should correspond to the instalments falling due under the relative letters of credit or guarantees approved by the Bank were liberalised in June 1968 and authorised dealers were permitted to make forward sales for the aggregate amount of payments to be made under the relative letters of credit or guarantees. (c) In order to meet the rising cost of living in foreign countries the scales at which exchange is released for business travel abroad were revised upwards in June 1968. These revised scales were also made applicable to journalists proceeding abroad and others going abroad for conferences or on atudy tours. (d) Following the introduction of the Import Deposit Scheme in the U.K. the period of realisation of 50 per cent of the invoice value of goods exported from India to the U.K. which comes under the purview of the Scheme, was extended, as a temporary measure in January 1969 to eight months so as to enable the exporters to grant credit facilities to U.K. importers for a period longer than usual; the remaining 50 per cent is to be received within the stipulated six months period. Authorised dealers were permitted to purchase sterling represented by the 50 per cent value covered by this relaxation for delivery upto eight months forward. To enable the authorised dealers to offer this facility the Bank agreed to buy sterling from them for delivery within eight months at the same rate as applicable to purchases for delivery within six months.

INDIA'S INTERNATIONAL INVESTMENT POSITION IN 1965-66 AND 1966-67†

INDIA has increasingly shown a net debtor position in regard to international investments since the beginning of the Second Plan. The net external indebtedness of the country rose by Rs. 562 crores in 1965-66 to Rs. 3,853 crores in March 1966 and by a further Rs. 952 crores in 1966-67 to Rs. 4,805 crores in March 1967. This net addition of Rs. 1,514 crores was nearly 50 per cent higher than in the two previous years 1963-64 and 1964-65 (Rs. 1,046 crores) and was the result of a net inflow of Rs. 1,274 crores into the official sector (Rs. 473 crores in 1965-66 and Rs. 801 crores in 1966-67), and of Rs. 240 crores into the non-official sector (Rs. 89 crores and Rs. 151 crores respectively).

The country's gross external liabilities at Rs. 5,587 crores as at the end of March 1967, went up by about Rs. 1,557 crores over the two year period under review (Rs. 620 crores in 1965-66 and Rs. 937 crores in 1966-67). The bulk of the increase in liabilities was on account of the official sector (Rs. 554 crores in 1965-66 and Rs. 768 crores in 1966-67). Most of the increase in 1965-66 and the whole of it in 1966-67 were due to berrowings abroad (net of repayments). Excluding net drawings on the I.M.F. as well as P. L. 480 assistance, the external loans, net of repayments, amounted to Rs. 372 crores in 1965-66 and Rs. 408 crores in 1966-67.

The liabilities of the private sector, representing the outstanding foreign direct and portfolio investments, increased by Rs. 74 crores in 1965-66 and by Rs. 161 crores in 1966-67.

Industrywise the bulk of the total net inflow of foreign investments (both direct and portfolio) in the private sector went into manufacturing (Rs. 56 crores in 1965-66 and Rs. 95 crores in 1966-67) and services (Rs. 28 crores in 1965 and Rs. 79 crores in 1966-67).

Countrywise, about 60 per cent of the total net inflow (direct and portfolio combined) in each year was from the U.S.A. and the U.K. The U.S.A. accounted for 44 per cent and the U.K. for 14 per cent in 1965-66 against 39 per cent and 32 per cent respectively in 1966-67. The prominent among the other countries was West Germany with 10 per cent in 1965-66 and 14 per cent in 1966-67. The country's external assets increased by a small amount (Rs. 43 crores) during the two years to Rs. 782 crores at the end of March 1967.

OFFICIAL SECTOR

Gross liabilities of the official sector rose by Rs. 554 crores in 1965-66 and by Rs. 768 crores in 1966-67. The bulk of the increase in total liabilities in each of the two

۲.

† Source : August 1969 Issue of the Reserve Bank of India Bulletin.

years was by way of a rise in drawings, net of amortisation payments, on foreign loans obtained from various countries under the external assistance programme; these amounted to Rs. 452 erores in 1965-66 and to Rs. 752 erores in 1966-67. The large utilisation reflected the shift in the emphasis from project to non-project assistance from the consortium countries. In addition to these

drawings on the various lines of external credit, there were net drawings on the I.M.F. to the tune of Rs. 30 crores and Rs. 46 crores during the two years respectively.

Other liabilities declined by about Rs. 30 crores in 1966-67 wholly due to a fall in P.L. 480 balances and increased by Rs. 72 crores in 1965-66 mainly due to a rise in the liabilities arising out of P.L. 480 transactions.

[†] Excluding gold holdings. Comprise mainly (i) Claims on Pakistan under the Partition Debt (Rs. 300 crores), (ii) gold and foreign currency subscriptions to international institutions and (iii) loans extended to foreign governments. Comprise mainly (i) rupee liabilities to non-resident official institutions including balances held with the R.B.I. by the East European Countries under payment agreements, (ii) P.L. 480 and 665 balances and (iii) liabilities to Kuwait, Bahrain and Qatar consequent upon withdrawal of Indian currency from these countries.

Assets: Gross assets of the official sector increased by Rs. 82 crores in 1965-66 but feil by Rs. 33 crores in 1966-67, both mainly on account of changes in the country's foreign exchange reserves. Reserves rose by Rs. 66 crores in 1965-66 owing partly to a net drawing on the I.M.F. (Rs. 30 crores) and partly to other contributory factors such as receipts under the National Defence-Remittance Scheme. The external payments position became critical in 1966-67 resulting in a net deficit of Rs. 37 crores on reserves. The fall in reserves would have been larger during the year but for the net assistance from the I.M.F. (Rs. 46 crores).

Other assets of the official sector showed only small rises of Rs. 16 crores and Rs. 3 crores respectively during the two years. The increase in 1965-66 was wholly due to India's additional gold subscription to the I.M.F. (Rs. 18 crores) consequent upon the general increase in member's quotas while in 1966-67 it was mainly due to the subscription to the Asian Development Bank (Rs. 7 crores).

Country-wise Position: More than one half of the total external liabilities of the official sector of Rs. 4,212 crores at the end of March 1967 was to the U.S.A. (Rs. 2,305 crores or 55 per cent). The balance was mainly on

account of international financial institutions (Rs. 757 crores or 18 per cent), the U.K. (Rs. 333 crores or 8 per cent), the U.S.S.R. (Rs. 274 crores or 7 per cent), West Germany (Rs. 241 crores or 6 per cent) and Japan (Rs. 113 crores or 3 per cent).

About one half of the total official external assets of Rs. 594 crores as at the end of March 1967 represented the claims on Pakistan under the Partition Debt (Rs. 300 crores); sterling and dollar holdings held in the U.K. and the U.S.A. accounted for about a fifth and the bulk of the balance represented capital subscribed to the international institutions (22 per cent).

PRIVATE SECTOR

Owing to the continued inflow of foreign investments, the net debtor position of the private sector increased by Rs. 97 crores in 1965-66 and further by Rs. 152 crores in 1966-67 bringing the total net external indebtodness of this sector to Rs. 1,111 crores as at the end of March 1967 (Table below).

Gross liabilities of this sector increased by Rs. 234 crores during the years together, while its total assets showed a decline of Rs. 15 crores.

	2. Long-term					-957-3	-1.032 · 2	-1.444.7	-1.192.9	

^{*} Short-term assets comprise mainly export bills which are in the nature of short-term trade credits by exporters and credit balances in the accounts of rupee companies firms which are accorded special facilities to retain their export proceeds abroad for meeting their foreign exchange commitments or are allowed to make periodic block remittances for honouring their commitments subject to rendering of accounts to the Exchange Control Department. † Short-term liabilities consist of mainly debit balances in the company accounts and net unremitted dividends accruing to non-residents on their investments in rupee companies.

[@] Long-term assets cover investments of rupee companies in foreign securities and branches and miscellaneous assets such as lands, estates, buildings, long-term deposits, loans and advances. These are as per survey of India's Foreign Liabilities and Assets, 1961, and in the absence of such a survey, it has not been possible to indicate the correct position in their regard in the subsequent period.

^{††} Long-term liabilities represent book value of outstanding foreign business investments. (a) Lichade valuation changes arising from the devaluation of the rupee in June 1988, which are excluded from figures for 1987 (b).

Outstanding Long-term Foreign Business Investments: Long-term liabilities, which represented outstanding foreign business investments, increased from Rs. 995 crores in March 1965 to Rs. 1,070 crores in March 1966 and further to Rs. 1,231 crores in March 1967 (Table 3). The whole of the increase in investment witnessed during

the two years under review, was due to rupee companies, since branches in fact reduced their investments during the period. The share of the rupee companies in the total outstanding investments in this sector, therefore, increased from 74 per cent in March 1965 to 77 per cent in March 1966 and further to 80 per cent in March 1967.

[•] Cover (a) net assets in India of branches, representing the net claims on them by non-residents and (b) the equity holdings of investors in the country of control and their proportionate share in the free reserves of the FCRO. FCRO = Foreign Controlled Rupes Companies. † Represent ordinary shares to the extent these are held by the investors in countries other than the country of control. ‡ Represent non-resident holdings of preference shares and debentures of the rupes companies. § Suppliers' Credit for imports. (a) Include valuation changes arising from the devaluation of the rupes in June 1966, which are excluded from figures for 1967 (b).

The category-wise composition of investments revealed that direct investments at Rs. 655 crores in March 1967, accounted for 53 per cent of the total outstanding foreign investments in the private sector as against 59 per cent in March 1965 and 61 per cent in March 1965. The fall in the relative share of direct investments was due to a more rapid rise in portfolio investments during the period, which in turn stemmed from creditor capital obtained by the rupee companies which, at around Rs. 513 crores in March 1967, accounted for 42 per cent of total investments as compared to 33 per cent in March 1965.

Foreign Investment Flows

Long-term foreign business investments in the private sector went up by Rs. 74 crores in 1965-66 and by Rs. 161 crores in 1966-67. This was the result of a gross inflow of Rs. 119 crores and Rs. 232 crores; offset partly by an outflow of Rs. 45 crores and Rs. 71 crores, respectively in the two years.

The share of the utilisation of loans and suppliers' credits to the total inflow increased from 79 per cent in 1965-66 to 87 per cent in 1965-67. The share of direct investments declined correspondingly during the period. Share Capital inflow both direct and portfolio together accounted for about Rs. 17 crores in each of the two years. Nearly the whole of the outflow was due to repayments of oreditor capital.

Direct Investments

There was a deterioration in net inflow of foreign direct investments. These nearly halved to Rs. 22 crores in 1965-66 as compared with the previous year and continued around the same level in 1966-67. The deterioration in 1965-66 was mostly due to a fall in fresh capital coming in, which dropped steeply from Rs. 23 crores in 1964-65 to Rs. 3 crores in 1965-66. More than half the decline in the fresh inflow represented net disinvestment in branches which transferred funds to their head offices to the extent of Rs. 11 crores in 1965-66 as against an inflow of Rs. 2 crores in 1964-65. The disinvestment was mainly in petroleum and plantation industries.

The fall in foreign direct investments was accentuated by a reduction of about Rs. 7 crores in 1965-66 in the fresh inflow of equity share capital into rupee companies.

The small reduction of about Rs. 2 crores in retained earnings in rupee companies in 1965-66 as compared with the previous year was due to a special circumstance. A sum of about Rs. 7 crores, which represented a transfer of excess depreciation provision to free reserves was included under retained earnings during 1964-65. Although total earnings continued to be more or less of the same order during 1966-67 as in the previous year, dividends distributed were at a higher level (61 per cent as compared to 53 per cent in the previous year) and as a result, retained earnings showed a fall in 1966-67.

TABLE IV - Profits of Foreign Controlled Rupee Companies

(Rs. Crores)

			1964-65			1965-66			1966-67	
	Industry	Earned	Distri- buted	Retained	Earned	Distri- buted	Retained	Earned	Distri- buted	Retained

	Total .	 40.6	20.2	20.4	39-9	21.1	18-8	38-7	23-8	14-9

Note: Profits earned, distributed and retained represent the proportionate share of the country of control in the total of the same, net of taxes in India. • Includes Rs. 6.7 crores, representing transfer of excess depreciation to free reserves.

Portfolio Investments

The bulk of the portfolic investments during the two years under review was by way of foreign loans and suppliers' credits. Loans represented borrowings abroad by rupee companies either from parent companies or from financial or other agencies for purposes of imports while the suppliers' credits represented the liability incurred by rupee companies for imports on a deferred payment basis.

Gross inflow by way of loans and suppliers' credits in 1965-66 was more or less around the same level of Rs. 95 crores as in the previous year. It increased substantially to Rs. 203 crores in 1966-67. After taking into account repayments of loans/credits to the extent of Rs. 45 crores in the first year and Rs. 70 crores in the next year, the net inflow of creditor capital amounted to Rs. 50 crores in 1965-66 and Rs. 133 crores in 1966-67.

Total net portfolio investment during the two years, taking into account a small net inflow of equity share capital of Rs. 2 crores in 1965-66 and Rs. 6 crores in 1966-67, may be placed around Rs. 52 crores and Rs. 139 crores respectively. As a result, the outstanding foreign portfolio investments in the private sector moved up substantially from Rs. 385 crores in March 1965 to Rs. 576 crores in March 1967. More than one half of the total portfolio investment liability as at the end of March 1965 and 1967 (about 56 per cent or Rs. 220 crores and Rs. 325 crores, respectively) was owed to foreign private parties.

Country-wise Investments

The following table gives a country-wise break-up of the total outstanding foreign investments in the private sector in India.

TABLE V -

Private Sector: Long-term Foreign Business Investments (Country-wise)

(Rs. Crores)

⁽a) Include valuation changes arising from the devaluation of the rupee in June 1966, which are excluded from figures for 1967 (b).

Industry-wise Investments

About one half of the outstanding foreign investments in the private sector was in the manufacturing field. Of the total net inflow of Rs. 56 crores in 1965-66 and Rs. 95 crores in 1966-67 into the manufacturing sector, Rs. 25 crores and Rs. 59 crores respectively were into chemicals and allied products; outstanding investments in the industry amounted to Rs. 184 crores as at the end of March 1967 accounting for about 29 per cent of the total investments in the manufacturing field. Other prominent industries during the period under review were transport equipment (Rs. 7 crores in 1965-66 and Rs. 16 crores in 1966-67), electrical goods and machinery (Rs. 8 crores

and Rs. 10 crores), metals and metal products (Rs. 6 crores during each year) and machine tools (Rs. 6 crores and Rs. 2 crores). The bulk of the net inflow was by way of portfolio capital, largely comprising suppliers' credits. The major share of the total inflow was into transport and and utilities (Rs. 17 crores in 1965-66 and Rs. 46 crores in 1966-67), followed by financial activities (Rs. 12 crores & Rs. 15 crores). Investments in trading activities showed a net outflow of about Rs. 2 crores in 1966-66 mainly because of disinvestment by branches engaged in foods, beverages etc. The large inflow of Rs, 19 crores in 1966-67 was mainly on account of creditor capital into trading companies, including the State Trading Corporation.

OVERALL POSITION IN 1967-68

(Preliminary Trends)

The preliminary data available at present indicate that the country's net debtor position increased further by Rs. 946 crores from Rs. 4,805 crores in March 1967 to Rs. 5,751 crores (excluding the effect of the devaluation of the pound sterling in November 1967) in March 1968.

The bulk of the net indebtedness was on account of the official sector; it increased from Rs. 3,618 crores in March 1967 to Rs. 4,485 crores in March 1968. The rise of Rs. 867 crores in 1967-68 was the net result of an increase in gross liabilities by Rs. 953 crores, mostly by way of loans, during the year, and a rise of Rs. 86 crores in assets. The bulk of the rise in assets was on account of reserves (excluding gold hoardings) which went up from Rs. 296 crores in March 1967 to Rs. 356 crores in March 1968. The improvement reflected an easing of the strain on the country's payments position during this year which was the result of larger non-project external assistance, debt-reliof provided by some Consortium members, better

export performance, and net borrowings from the I.M.F.

The net capital inflow into the private sector amounted to Rs. 68 crores during the year; this was due to a rise in foreign long-term investments (Rs. 102 crores) and in short-term claims abroad (Rs. 34 crores). More than two-thirds of the net long-term capital inflow was by way of portfolio investments, mostly creditor capital, while the balance represented direct investments. The total outstanding net external indebtedness of the private sector amounted to Rs. 1,187 crores in March 1968. Gross liabilities amounted to Rs. 1,340 crores and assets amounted to Rs. 153 crores. Almost all of the liabilities represented long-term foreign investments while the bulk of the assets represented short-term claims abroad.

The net inflow of banking capital amounted to Rs. 13 crores during the year, being the net result of a fall in assets (Rs. 31 crores) as well in liabilities (Rs. 18 crores). The cutstanding net external indebtedness of the banking sector increased to Rs. 52 crores by the end of March 1968. The insurance sector's net liabilities declined by about Rs. 2 crores to Rs. 35 crores at the end of March 1968 mainly because of reduction in L.I.C.'s liabilities.

AUTOMOBILE INDUSTRY

THE historical background of automobile industry in India was given in the previous editions of the Directory.

MANUFACTURERS

The country had eight approved manufacturers of automobiles and/or engines by the end of 1955:

- Hindustan Motors Ltd., Calcutta:—Hindustan Cars and Studebaker trucks now replaced by Bedford trucks (now styled Hindustan vehicles).
- Premier Automobiles Ltd., Bombay:—Fiat Cars and Dodge and/or Fargo trucks.
- 3. Standard Motor Products of India Ltd., Madras :--

- 4. Ashok-Leyland Ltd., Madras :- Leyland Trucks.
- Mahindra & Mahindra Ltd., Bombay:—Willy's jeeps (now styled as Kaiser jeeps).
- Tata Locomotive & Eng. Co. Ltd., Bombay:—Tata-Mercedes-Benz Trucks (now styled Tata vehicles).
- 7. Simpson & Co., Ltd., Madras:—Perkins Engines.
- Automobile Products of India Ltd., Bombay:
 Meadows Engines.

The types and makes of vehicles to be developed were rationalised by the Government to only 3 passenger cars, 3 medium type trucks, one heavy truck, one jeep and one light truck in 1957.

Cars: Three manufacturers of cars:

1. Standard Ten. 2. Fiat 1100, 3. Hindustan Ambassador/Land Master.

Commercial Vehicles :--

- (a) One manufacturer of Light—1 ton: Dodge/Fargo (Petrol or Diesel).
- (b) Three manufacturers of Medium—3/5 tons: Dodge/Fargo (with petrol or diesel engine), 2. Mercedes Benz (now called Tata) with diesel engine, 3. Bedford (now called Hindustan).
- (c) One manufacturer of Heavy: Leyland Comet, Tiger/Titan. Diesel Engines (for medium commercial vehicles):—

Three manufacturers of: 1. Perkins—P/6, 2. Meadows—both suitable as original fitment for Dodge and Bedford vehicles, and 3. Tata Mercedes Benz.

Jeeps :-

One manufacturer of Kaiser Jeep (formerly called Willy's Jeep).

The range of products in the field of light commercial vehicles (trucks) was augmented in the year 1958 by the introduction of the Tempo Hanseat ½ ton three-wheeler commercial vehicle of Bajaj Tempo and, in the one-ton range, of the Jeep (truck), the Standard 20, the Tempo Viking and the Bedford in the years 1955, 1965, 1966 and 1967, respectively. Messrs. Ashok Leyland Ltd. introduced extra heavy duty trucks—the Beaver and the Hippo in the year 1966 and the Jumbo in the year 1968. Messrs. Houstan Motors Ltd. and Messrs, The Premier Automobiles Ltd. introduced the Hindustan J6 and the Dodge/Fargo Rocket 7½ ton trucks, respectively, in the year 1968. Messrs. Tata Engineering & Locomotive Co. Ltd. introduced 3-Axle 10-tonne dumper in the same year.

The Premier Automobiles Ltd. now manufacture Meadows engines and a percentage of their Dodge/Fargo diesel trucks is fitted with this make of engine. Simpson & Co. Ltd., Madras, commenced the manufacture of Perkins P6/354 diesel engine also trom the year 1966. Mossrs. Hindustan Motors have set up a plant in 1968 for the manufacture of Bedford diesel and petrol engines for fitment on Hindustan Commercial Vehicles.

Mesars. Standard Motor Products of India Ltd., Madras, now manufacture Standard Heralds instead of Standard '10.'

MANUFACTURE IN DEFENCE ESTABLISHMENTS

The Ministry of Defence also entered the field of manufacture through an agreement with the M.A.N. of West Germany in Sept. 1958 for the manufacture of multi-fuel medium trucks by the ordnance factories. The rate of output was then reckoned at 2,000 per annum.

The 'Shaktiman' truck, as the truck has been called, has advantages over other trucks which the Army have been getting like increased payload by 30 per cent, multifuel engine and other special features which will make it a sturdy cross-country vehicle more suitable than other kinds for military purpose.

The manufacture of Shaktiman trucks in India commenced in June 1959. The manufacture of Nissan 1-ton trucks commenced in the year 1961-62 and the manufacture of Nissan petrol jeep type vehicles commenced in 1962-63.

Only 803 Shaktiman trucks were manufactured in 1961.62, the third year of production of these trucks, as against the planned output of 2,000 nnits. The indigenous content was of the order of 50 per cent against an anticipated indigenous content of 70 per cent in the third year. The total production of tracked vehicles in the Ordnance factories in India in the year 1962-63 was 2,733. Of these, 621 were 3-ton Shaktiman trucks, 1,046 Nissan 1-ton trucks and 1,066 Nissan (Jonga) Jeops.

Early in 1964, a project report was drawn up for increasing the manufacture of Nissan jeep type vehicles and Nissan 1-ton trucks as these vehicles were expected to be useful for high altitude operation.

The target of production of Shaktiman trucks in the Ordnance factories was reduced from 2,000 to 1,500 per annum. Against this, the production during 1963-64 was 1,030 and during 1964-65, it was 1,094. The assembly of the truck is done at the gun-carriage factory. 1,350 trucks were produced in the year 1965-66 and the indigenous content at the end of the calendar year 1965 was reported to be 70 per cent.

Components and parts, both finished and semi-finished, for Shaktiman are imported from Germany whereas those for Nissan are imported from Japan. As the capacity of the Ordnance factories is utilised for vital items of high priority, Shaktiman and Nissan vehicles manufactured in the Defence Sector are having increasing quantum of components and parts produced in the civilian sector. 3,600 Nissan vehicles were produced in the year 1965-66 with an indigenous content of 38 per cent. 870 Shaktiman vehicles with an indigenous content of 77 per cent were produced during the year 1967-68. The indigenous content is now reported to have reached 80 per cent. The vehicle factory at Jabalpur for the manufacture of 6,000 shaktiman 3-ton trucks and 7,200 Nissan trucks and patrol vehicles per annum in due course, has been established and commenced work in mid-1969 in part of the buildings which are ready. The production schedule for the year 1969-70 for Nissan trucks and Nissan patrol vehicles is 200 and 100 Nos. per month respectively and their indigenous content in June 1969 was 45.46 per cent and 33.20 per cent respectively.

DEVELOPMENT COUNCIL FOR AUTOMOBILES

In 1959, the Government of India constituted a Development Council for Automobiles, Automobile Ancillary Industries and Transport Vehicle Industries. The Council is reconstituted once in every two years. The reconstituted Council of 1963 was entrusted with the additional responsibility of looking after tractor and earthmoving equipment industries. Subsequently, the road roller industry was also brought within the purview of this Council. The Council was last reconstituted in April 1968 and the industries entrusted to its care include Automobiles, Automobile Ancillary Industries, Transport Vehicle Industries, Tractors, Earth-moving equipment, Internal Combustion Engines and Road Rollers.

The Development Council for Automobiles, etc., had estimated that the total investment in the industry by the end of the Third Plan period would be Rs. 130 crores, Rs. 100 crores by the Main Manufacturers and Rs. 30 crores by the Ancillary Sector. The Council had estimated the total value of production at the end of the Third Plan period at well over Rs. 260 crores.

The targets laid down in the Third Five Year Plan and the production achieved in the final year of the Third Five Year Plan are given below:

Type of motor vehicle	Capacity Produc- target tion 1965-66 1965-66
Cars	
Jeeps	. 10,000 10,385
Commercial Vehicles	. 60,000 35,437
Motorcycles, Scooters and	d
Three-wheelers	. 60,000 42,823 (excluding
Ancillary Industries	. Rs. 250 Rs. 450 million million

There has been a considerable increase in the authorised capital, paid-up capital, number of units in the aucillary sector and investment in plant, machinery and buildings in the automobile and ancillary industries during the last five years.

A World Bank Mission toured India in 1963 and inspected the major establishments in the Automobile & Ancillary Industries with a view to deciding the nature and extent of assistance which the World Bank could render for the Automobile, Road Transport and Machine Building Industries. Based on the recommendations of this team, Automobile & Ancillary Industries were given assistance by the World Bank to the tune of 47 million dollars, i.e. about Rs. 23-4 crores. This assistance was confined to manufacture and maintenance of commercial vehicles i.e., to enable additional imports of (1) components and parts in c.k.d. and semi-finished form, (2) spare parts and (3) machinery by way of balancing equipment, all for commercial vehicles.

Similar assistance of a slightly higher order was made available by the World Bank in the second half of 1965 which was expected to go a long way to ensure a continuous flow of production till the end of 1965-66.

The World Bank Team toured India in November-December 1969 also and discussed with the representatives of the automobile and automobile ancillary industries various aspects of these industries.

Such surveys, on the spot studies for assessment of loan utilisation by representatives of the World Bank and assistance have now become a yearly feature.

The allocation of foreign exchange during the four years ending 1968-69 to the automobile and ancillary industries was as under:—

Rs. (in million) 1967-68 1968-69 1965-66 1966-67 Commercial Vehicles 188-14 230.07 178.54 127.94 Cars 40.00 29.75 26.00 22.69 4.6 Jeeps 16.50 3.20 15.60 11.06Motorcycles, Scooters, Mopeds Threeand 22.34 Wheelers 23.99 38.77 37.88 0.4 Automobile Ancillaries 78.32 254 - 66 $72 \cdot 30$ 70.60

The production of different makes of commercial vehicles per annum at the end of the Third Five Year Plan was: Tata Mercedes Benz 17,500 Nos.; Dodge/Fargo 8,011 Nos.; Hindustan 4,000 Nos.; Ashok Leyland 4,050 Nos.; Jeep vehicles 21 Nos.; Tempo 1,587 Nos; Standard Twenty 268 Nos.

Messrs. Premier Automobiles Ltd. and Messrs. Hindustan Motors Ltd. have been granted licences to manufacture their own make of diesel engines while, at the same time, Messrs. Simpson & Co. Ltd. have been granted a licence to manufacture a medium commercial vehicle chassis of their choice. The two projects appear to be still in the negotiation or blue print stage. Messrs. Hindustan Motors Ltd. have commissioned a new plant for manufacture of engines for cars and commercial vehicles.

INVESTMENTS AND CAPACITIES

The total investment by the eight main vehicle manufacturers was about Rs. 100 crores in mid-1968. The total investment in the Two-cum-Three Wheeler Industries was about Rs. 10 crores at the time. The investment in the ancillary industry was about Rs. 55 crores in the middle of the year 1968. There are at present seven units engaged in the production of commercial vehicles having a capacity of 63,000 nos. per annum. The production is still short of the capacity. A number of difficulties are attributed for not achieving the target. These include the acute foreign exchange position due to which the industry was unable to secure adequate quantum of raw materials, perticularly alloy, tool and special steels, and components, the shortage of certain categories of tyres, the stringent conditions prevailing in the money market and the crippling burden of taxation on road transport. This recessionary trend, which continued till the end of 1967, showed signs of abating in the year 1968.

PRODUCTION

The production figures of automobiles from 1961 onwards, year by year, are tabulated below:—

Produ	etion f	or the		Passenger Cars	Jeeps	Commer- cial Vehicles
1961	1.1		4.1	21,662	7,052	26,214
1962				23,326	7,597	26,894

The indigenous content at the end of the year 1969 had reached over 97 per cent in the case of most of the vehicles and the indigenous content of diesel engines was over 95 per cent.

AD HOC COMMITTEE ON AUTOMOBILES

Satisfactory progress: In 1959, the Government appointed an Ad Hoc Committee to review the progress of the automobile industry, to recommend the measures to be taken to reduce the cost to the consumer of the different vehicles and to examine the feasibility of producing a low cost car within the price range of Rs. 5,000 to Rs. 7,000. The Report of the Committee was received by the Government in the beginning of 1960. Reviewing the progress made by the automobile industry since the Tariff Commission's enquiry in 1956, the Committee has remarked that the decision to grant protection to the industry was a sound one, that the achievement of self-sufficiency regarding transport vehicles was of great importance to the economy and that even in regard to passenger cars the consumer would have been far worse off, if in the present difficulties regarding foreign exchange there had been no domestic industry. The Committee considered the progress of the automobile industry satisfactory on the whole and particularly in the last few years. It also observed that most of the automobile vehicles were expected to reach 80 per cent or more of indigenous content before the end of 1961. In regard to the production of the low cost car, the Committee were

of the view that its production was feasible. To examine further the development of the low cost car, the Government appointed an Expert Committee, who submitted the report in May, 1961. After mature consideration by expert committees, finance bodies and the Planning Commission, the proposal to manufacture a low cost car was kept in abeyance during the Third Five Year Plan period. This proposal envisaged by the Ministry of Industrial Development & Company Affairs to be taken up in the Public Sector during the Fourth Five-Year Plan does not appear to be feasible according to statements made by spokesmen of the Ministry of Finance and the Planning Commission.

The subject of the low cost car or the "people's cheap car" as it is commonly called is raised at frequent intervals during question hours in the Lok Sabha. There are at present as many as 15 proposals for the manufacture of the small car under consideration of the Government of India.

MOTOR CYCLES, SCOOTERS, THREE-WHEELER VEHICLES

There are now seven manufacturers, namely Mesars. Enfield for motor cycles and Automobile Products of India and Bajaj Auto Limited producing scooters and three-whoelers and four others which cover motor cycles, scooters, mopeds and three-wheelers. The Third Plan production target was 60,000.

Although the licensed capacity of the existing units (76,700) is now substantially in excess of the above target, the production achieved during 1961-69 unit-wise was as follows:—

	1961	1962	1963	1964	1965	1966	1967	1968	1969
Motor cycles: 150 cc 350 cc	8,636	7,640	9,456	13,858	21,364	25,040	23,338	29,411	34,477
Scooters: 150 cc Scooterette 48 cc	13,617	15,936	15,422	20,043	20,667	21,471	30,503	35,952	49,740
3-Wheelers: 150 cc 350 cc 400 cc	1,267	1,426	1,701	2,493	1,884	1,255	3,995	4,317	5,072
Total	23,520	25,002	26,579	36,394	43,915	47,766	57,836	69,680	89,289

The indigenous content as at the end of 1968-69 was as under:--

								Per	cent
Enfield		,							92
Jawa	e	s		P			6		87
		b		и	٠	** *	ė.		92
Lambretta	Ь		1.4	9	ø	* * *			95 95
Vespa	0	4		19	*	0.4	-	4.8	80

The average indigenous content of the two- and three-wheeler vehicles as well was nearing 97 per cent by the end of 1969.

The main difficulty experienced by the existing units in the two- and three-wheeler sector in stepping up production despite higher installed capacity was the paucity of foreign exchange and, consequently, the difficulties in securing raw materials and components. The Industry was recently included among the priority industries for which import licences on a liberalised scale have been issued. Further Bajaj Tempo three-wheelers are classified as commercial vehicles.

Transport capacity could be augmented by using truck-trailer combination. With this end in view, the manufacture of trailers has been strongly encouraged. There are at present 12 units manufacturing trailers of 2, 4 and 8 wheel types having a carrying capacity of upto 10 tons. The production of trailers since 1963-64 has been as under (in Nos.): 1963-64: 3,364; 1964-65: 8,763; 1965-66: 8,873; 1966-67: 4,191; 1967-68: 3,495; 1968-69: 3,065.

The trailer manufacturing industry is dependent upon imports to a limited extent, the imports being confined to special and alloy steels not produced in the country.

AGRICULTURAL TRACTORS

The production of agricultural tractors, unitwise, in the year 1969 was as under:

	Horse- power	Nos.
Eicher Tractors (India) Ltd	27	354
Escorta Ltd.	37	4,806
11000201120021	27	1,920
	47	1.840
Hindustan Tractors Ltd	50	1,139
210000000 10000000000000000000000000000	35	832
International Tractor Co. Ltd.	35	4,533
Tractors & Farm Equipment Ltd.	35	3,344
		18,768

The annual demand for tractors and the tractor population in 1974 are estimated to be 68,000 Nos. and 2,71,000 Nos. respectively.

ANCILLARIES

Items like tyres, tubes, battery, rubber parts, upholstery material and paints were all obtained from indigenous sources when the industry switched over from assembly to manufacture. There are at present, more than 170 firms borne on the books of the D.G.T.D., besides 60 firms approximately engaged in the manufacture of storage batteries, leaf springs, H.T. bolts and nuts and tyres and tubes which are not classified exclusively as automobile ancillaries. Substantial expansions have also taken place in several units. The items which

still remain to be satisfactorily developed are magnetos and carburettors for the motor cycle and scooter industry and the steering gear and axle box for commercial vehicles. The production of steering gears, rear axles and carburettors have commenced in a limited way.

In addition to the licensed units, there are a number of ancillary establishments in the cottage and small scale industries sectors.

By the end of 1967, capacity has been established for almost the entire range of ancillary items.

Some of the important ancillary items which have recorded significant progress in the year 1965 are wheels, brakes, radiators, steering wheels, tie rod ends, shock absorbers, clutch assemblies and brake linings, etc.

The production value of the ancillary industry since 1961-62 has been as follows (in Rs. crores): 1961-62: 17-8; 1962-63: 26·0; 1963-64: 37·4; 1964-65: 50·6; 1965-66: 61·4; 1966-67: 82·0; 1967-68: 84·2; 1968-69: 96; with the production in the small-scale sector, the total value of production in 1969 was expected to be over Rs. 115 crores. The Fourth Plan Working Group for Transport Equipment has estimated the value of production in 1973-74 to be of the order of Rs. 170 crores.

AUTOMOBILE PRICES

The relation between quantity of output and cost of production is more pronounced in the case of mass production industries like the automobile industry than in a majority of other industries. That is the main reason why the restricted volume of production has a direct impact on the cost of production in India. The ex-factory price of a vehicle in India is inclusive of direct and indirect taxes, particularly import duties and excise duties. The customer, in addition, is called upon to pay sales tax on the vehicles. The incidence of Government duties is so high that the purchaser of an automobile contributes anything from 30 to 40 per cent of the price paid by him towards the Government Exchequer.

The National Council of Applied Economic Research carried out a thorough study of the selling prices of the end products of the Automobile Industry and the incidence of taxes and duties in the prices to the consumer as in the first quarter of the year 1965. According to the NCAER, taxes and duties were as high as 42 to 49 per cent of the selling prices of vehicles, early in 1965.

The Indian automobile manufacturer is working under another serious handicap inasmuch as he is called upon to pay a high price for the capital plant and machinery installed in his works. In addition, he has to buy imported raw materials at a cost 50 per cent in excess of that paid by his counterpart in foreign countries.

EMPLOYMENT

The total employed directly in the automobile and ancillary manufacturing industries including those in the Small Scale Industry Sector is in the neighbourhood of 1,35,000. This figure, however, does not include the indirect employment this industry affords in various distribution, operation and maintenance centres, connected with it. It would not be an exaggration to say that the indirect employment figure would be about 20 times the figure of labour directly employed by the industry.

The National Council of Applied Economic Research conducted an enquiry in 1960 on the employment potential in road transport in India and came to the conclusion that the total number of persons who find employment in the road transport industry in its broad sense is about 2.40 millions.

Considering the increase in the vehicle population of the country and the progress of automobile and allied industries in the last seven years, it can be safely reckoned that about 3.5 million persons find employment now in the road transport and allied industries.

THE AUTOMOBILE INDUSTRY AND THE FOURTH PLAN

The Fourth Plan Working Group for Transport Equipment has recommended the following targets for the Fourth Five Year Plan to the Planning Commission:—

		1969-70	1970-71	1971-72	1972-73	1973-74
(a) (Commercial Vehicles	48.000	56,000	65,000	75,000	85,000
(b) (Cars	45,000	50,000	55,000	65,000	75,000
(e) d	Jeeps	11,000	12,000	13,000	14,000	15,000
(d) (i) Motorcycles, Scooters & Mopeds	1,00,000	1,25,000	1,50,000	1,75,000	2,00,000
(i	i) Autorickshaws	6,000	7,000	8,000	9,000	10,000

The above estimates do not cover the automobile industry in the Defence Sector.

The value of automobile and ancillary production is estimated to be Rs. 3,950 million during the year 1969-70 and the corresponding value in the year 1973-74 to be Rs. 7,700 million.

Export of Automobiles and Ancillaries

A start has been made in the export of Indian manufactured vehicles and automobile ancillary products to neighbouring countries. Vehicles of Indian origin now run on the roads of other countries, viz. U.A.R., Aden, Ceylon, Viet Nam, Cambodis, Tibet, Sikkim, Bhutan, Bulgaria, Kenya, Sudan, U.K., Yugoslavia, etc.

The value of exports of vehicles stood at Rs. 2 million and Rs. 4 million in 1962-63 and 1963-64 respectively. The Rs. 11 million mark was touched in 1964-65 and the exports were well over Rs. 15 million in 1967-68. Sizeable orders from other countries for Tata Mercedes Benz, Ashok Leyland Comet vehicles, jeeps and some orders for Hindustan and Dodge/Fargo vehicles were placed with the respective manufacturers during the year 1968-69. In 1968-69, the exports of vehicles were Rs. 18 million, auto-engines Rs. 1.57 million and auto parts Rs. 31.60 million.

The Fourth Plan Working Group for Transport Equipment has estimated that the exports of the automobile and ancillary industries which are Rs. 25 million at present

are expected to be in the region of Rs. 450 million by the end of the Fourth Plan.

AUTOMOTIVE RESEARCH ASSOCIATION OF INDIA

A research association for the Automobile Industry was registered in Bombay towards the end of the year 1966. It is understood that the research association is modelled on the lines of the Textile, Art Silk and Cement Manufacturers' Research Associations. The Governing Body of the Council of Scientific and Industrial Research have approved the Association, in principle, for receiving financial assistance from the C.S.I.R. The Association has formulated plan and programmes towards the end of the year 1968 for its immediate functioning. During the year 1969, efforts were under way for securing a suitable site in Maharashtra State for a Research Station and a Test Track and for the selection of a suitable person as Director of Research.

The Tariff Commission was requested by the Government of India to inquire into the prices of automobiles and automobile ancillaries and continuance of protection to the industry beyond 31st December, 1967. The Commission held public enquiries with the concerned automobile interests and went into the cost investigations of the automobile and automobile ancillary manufacturers' organisations. Their report was submitted to the Government in 1968.

Population of Motor Vehicles in different States of India as on 31st March 1968

State	8		Cars	Taxis	Jeeps	Buses	Lorries	Misc. Vehicles	2 & 3 Wheelers

CHEMICAL & PHARMACEUTICAL INDUSTRY

FOR purposes of industrial production, chemicals fall easily into one of two major groups: (a) Heavy Chemicals; and (b) Fine Chemicals.

According to the latest data, there are over 680 factories with a productive capital of nearly Rs. 640 crores and providing employment for about 1.72 lakh workers, The exports of chemical products touched an all time record of Rs. 1,272 lakhs in 1968-69 against Rs. 936 lakhs in 1967-68.

SULPHURIC ACID

The installed capacity and production of sulphuric acid since 1964 are shown below:

('000 tonnes)

roduction
679
685
674
804
973

The scheme for the mining of 2,40,000 tonnes of pyrites and the establishment of a 400 tonnes per day sulphuric acid plant at Sindri are under implementation. The total outlay on this project during 1966-67 and 1967-68 was Rs. 4-9 crores. During 1968-69, as against an outlay of Rs. 4-23 crores proposed by the Annual Plan for that year, the actual expenditure was Rs. 1-42 crores.

India imported sulphuric acid of the value of Rs. 1,21,690 in 1964-65, Rs. 47,867 in 1965-66, Rs. 37,295 in 1966-67 and Rs. 12,887 in 1967-68. There was no import of sulphuric acid during 1968-69.

Some exports are also taking place. India exported sulphuric acid worth Rs. 84,054 in 1964-65, Rs. 71,405 in 1965-66, Rs. 16,337 in 1966-67, Rs. 38,809 in 1967-68 and Rs. 2,30,872 in 1968-69.

ALKALI INDUSTRY

The alkali industry comprises the manufacture of soda sah and caustic soda, sodium bicarbonate, bleaching powder, benzene hexachloride, liquid chlorine and zinc chloride.

At the beginning of the Third Plan, production of soda ash was 1,48,000 tonnes. The estimated actual production in 1968-69 was 4,00,000 tonnes. The target for 1969-70 was 4,10,000 tonnes.

The trend of production of sods ash in tonnes is as under:--

1964: 2,82,408; 1965: 3,21,972; 1966: 3,49,608; 1967: 3,55,836; 1968; 3,98,628.

The figures of imports of soda ash during the last few years are given below;

Year				Q	V
1964-65				33.47	80-01
1965-66				35-60	78-65
1966-67		8.4		1.03	4.59
1967-68	4.5	4.4	4.0	4.05	13.55

Q: Quantity in million kilograms. V: Value in Rs. lakhs.

Imports during 1968-69 were negligible.

In 1968, the production in tonnes of hydrogen peroxide was 3,032 as against 2,676 in the previous year. During

1968-69, India imported 10,110 kilograms of hydrogen peroxide valued at Rs. 20,833. U.S.A. and Japan were the principal suppliers.

Caustic Soda,—There were at the end of 1968, 28 units manufacturing caustic soda.

Actual indigenous production of caustic sods and the associated chemicals has been as under:--

					(tonnes)
Year			Caustic Soda	Liquid chlorine	Bleaching powder
1964			1,84,020	50,580	7,932
1965			2,14,956	51,012	7.356
1966		* *	2,30,688	63,048	10.812
1967	• 1	0.0	2,51,376	78,132	9,252
1968		* *	3,15,992	1,00,416	10,508

Imports of caustic sods were: 1964-65: 67·12 million kgs. 1965-66: 74·21 million kgs.; 1966-67: 14·16 million kgs.; 1967-68: 8·07 million kgs. and 1968-69: 0·79 million kgs.

During the Third Five Year Plan, the installed capacity of the industry rose from 1,26,000 tonnes in 1960-61 to 2,77,000 tonnes in 1965-68, and actual production from 99,000 tonnes to 2,18,000 tonnes. The estimated installed capacity and production in 1968-69 were 4,00,000 and 3,10,000 tonnes respectively.

MISCELLANEOUS CHEMICALS

The progress of production of important miscellaneous chemicals during the period 1965 to 1968 is given below.

(matric tone)

			11000	,
Name of product	1965	1966	1967	1968
Bichromates	6,852	6,876	6,936	7,872
Copper Sulphate	3,252	3,600	2,664	1,797
Sodium Sulphide	3,432	3,720	3,660	1,465*
Hydrogen Peroxide	2,472	2,784	2,676	3,032
Potassium Chlorate	3,804	4,104	4,104	4,741
Sodium Bicarbonate	12,804	13,704	19,680	15,064
Hydrochloric Acid	32,268	29,016	33,084	41,375*
Nitric Acid	15,348	16,836	14,376	17,857
Sedium Sulphate	36,708	42,780	46,428	44,140
Sodium Aluminate	702	728	872	639
Nickel Sulphate	464	463	559	360*

. Data for 11 months of 1968 only.

In 1968 installed capacity and production in tonnes of Sodium Hydrosulphite stood at 7,812 and 5,703 respectively.

FERTILISERS

Nitrogenous Fertilisers

The following table shows the details of installed capacity of nitrogenous fartilisers as on 30-9-1969.

			(met	ric tons)
Ammonium sulphate			11	203,720
Ammonium sulphate nitrate		* 1	4.0	81,700
Calcium ammonium nitrate	* 4	0.0	6.1	200,000
Urea		0.0	4.6	515,110
Ammonium chloride	* 4	u +		16,410
Gra	and T	'otal		966,940

Source: Fertiliser Statistics, 1968-69.

The year-wise capacity and production of nitrogenous fertilisers are as under:

58	Ν.	-	88	3

Year					Capacity	Production
1964		8.4		* *	193,968	125,796
1965			* *		399,828	243,000
1966		4.7			503,880	255,756
1967	0.1	4.7	6.4		676,176	328,812
1968	* 1				794,781	456,085

Imports of nitrogenous fertilisers amounted to 14,11,470 tonnes in 1966-67, 15,54,601 tonnes in 1967-68 and 19,52,269 tonnes in 1968-69.

For details about public sector projects for the development of fertilizers see "Fertilizer Corporation of India Ltd." and "Fertilizers and Chemicals Travancore Ltd."

The following table shows the year-wise consumption of nitrogenous fertilisers:

('000 tonnes)

Year				Co	nsumption
1964-65	4.0			 	434
1965-66	b w			» 4	547
1966~67	4.0		4.4	 	839
1967-68			* 0	 4.1	1,040
1968-69 (es	tim.)	2.1	* 1	 	1,210

PHOSPHATIC FERTILISERS

The progress in the manufacture of phosphatic fertilisers is given below:

(Figures in tonnes of single superphosphate)

Year					Capacity	Production
1964					1,41,672	1,17,948
1965	**	**			1,47,480	1,14,924
1966		0.6	de ai	4.9	2,30,352	1,36,968
1967		* *	2.0	1.0	2,80,812	1,81,812
1968				6.6	2,95,507	1,82,440

The capacity of phosphatic fertiliser in India in 1968-69 was 4,21,000 tonnes. It was proposed to raise it to 4,29,000 tonnes in 1969-70.

Imported raw materials, rock phosphate and sulphur are used for the manufacture of single superphosphate. The following are the quantities and value of imported rock phosphate during the last few years:

Year			(°	Quantity 000 tonnes)	Value (Rs. crores)
1964-65	0.0			426.3	3.74
1965-66	m A			565-7	5.56
1966-67	4.7	D 0	4.5	857-1	13.17
1967-68	* *	2.2		604 • 0	9.33
1968-69	4.1	1.0	1.1	845-2	12 - 45

Potassic Fertilisers: Potassic fertilisers are produced indigenously in the small scale sector and the annual production is estimated to be around 2,000 tons as muriate of potash.

Imports of Potassic Fertilisers 1967-68 and 1968-69

(July - June)

Note: During 1967-68 and 1968-69, there were no imports of sulphate of Potash.

Source. F ridiser 8 atistic. 1968-69.

The production of ammonium sulphate: 1965: 88,020 tonnes; 1966: 85,212 tonnes, 1967: 81,816 tonnes, and 1968: 1,09,903 tonnes.

Though the production of nitrogenous fertilisers has been stepped up in recent years it has been necessary to import large quantities of nitrogenous fertilisers because of increasing demand. India imported nitrogenous fertilisers worth Rs. 20.5 crores in 1964-65; Rs. 31.80 crores in 1965-66; Rs. 68.97 crores in 1966-67, Rs. 75.93 crores in 1967-68 and Rs. 93.53 crores in 1968-69.

Imports of ammonium sulphate were: 1964-65: 453,140 tonnes; 1965-66: 839,860 tonnes; 1966-67: 998,899 tonnes; 1967-68: 879,648 tonnes; and 1968-69: 13,00,642 tonnes.

1		P	roduction

Benzene (thou- sand litres) 2	21,038	21,999	22,286*	Solvent.

Production for January-November period of 1968 only.

FINE CHEMICALS

The term "fine chemicals" is applied usually to substances such as photographic materials, drugs and pharmaceutical products, paints, pigments and varnishes, and dyestuffs. All the figures given below are in tons per annum except where otherwise stated.

Production of bromide and bromine respectively in '000 kgs, for the latest four years is as under: 1965: 12; 192; 1966: 84; 156; 1967: 36; 156; 1968: 129; 235.

Photographic Materials — The basic chemical required for the photographic industry are: (i) gelatin, silver halides and sensitizers in the coating of film, plate and paper base, and (ii) hypo-sodium sulphate metal, hydroquinone and chrome alum in the processing stages.

Hindustan Photo Films Manufacturing Co., Ltd., was incorporated in Nov. 1960, with an authorized capital of Rupees 5.5 crores (now being raised to Rs. 5.82 crores) to implement the project for the manufacture of raw films photographic films, X-ray films and other sensitized materials in collaboration with Messrs. Bauchet & Co., France. The total cost of the project is Rs. 11.6 crores. The factory has now commenced production.

Production during January-October 1968 was 0.88 million sq metres valued at Rs. 1.4 crores as aginst 0.31 million sq. metres valued at Rs. 44 lakks during the corresponding period of last year. Presently, the factory produces cine positive films, photographic bromide paper, medical X-ray film and roll film.

Trial production of cine sound and document paper is in progress and development work of cine negative, graphic arts, aerial films, etc. will be taken up in due course.

PAINTS AND VARNISHES

There are at least 200 factories manufacturing paints and varnishes, but nearly 150 of them are very small in size. The bigger ones are concentrated in Bombay and Calcutta.

The annual national loss due to corrosion of iron and steel is estimated at Rs. 60 crores.

A wide variety of products including different kinds of paints, varnishes, enamels, lacquers, and other types of surface coating materials are manufactured by the industry which uses mainly indigenous and some imported raw materials. The important raw materials used are zinc oxide, white lead, titanium dioxide, red lead, yellow and green chrome pigments, carbon black linesed oil, etc. The industry contributes substantially to the national exchequer in the form of taxes, exise duty, customs duty, etc.

The capacity of the paints, varnishes and enamels industry has recently been reassessed by the Development Wing of the Ministry of Industry at about 85,000 tons. The State-wise distribution of the reassessed capacity is as follows: the first figure indicates the number of factories and the second the annual capacity in tons: Maharashtra 23; 34,000; West Bengal 19; 39,500; Uttar Pradesh 5; 8,100; Tamil Nadu 3; 2,000; Delhi 2; 1,000; Andhra Pradesh 1; 300; Total 53; 84,900.

The production of paints, varnishes, zinc oxide, white lead, red lead and nitrocellulose lacquers including ancilluries from 1965 onwards is given below:

Year			Painta & Varnishes	White Lead†	Zinc Oxide	Red Lead	Nitrocel- lulose Lacquera	
				(a)	(b)	(a)	· (a)	(c)
965		0.0	 	5,889	643	785	198	179
966	4.4		 9.6	5,655	481	484	152	173
967			 	6,625	602	625	286	162
968			 	5,464	403	598	262	159

Note: Figures are monthly averages.

(a) Thousand kg.

(b) Tonnes.

(c) Thousand Latres.

† Annual production.

There has been a marked improvement in exports of Indian paints to Middle East and African countries. Exports of pigments, paints, varnishes and related materials amounted to Rs. 165 lakhs in 1967–68 and Rs. 239 lakhs in 1968–69.

DRUGS AND PHARMACEUTICALS

Drugs and pharmacenticals cover a large variety of products from simple extracts of vegetable drugs and glandular preparations to highly complex synthetic drugs and antibiotics.

There are nearly 2,800 production units producing pharmaceuticals and drugs, licensed under the Drugs Act. Out of these, only 125 large-scale units are licensed under the Industrial Development and Regulation Act.

The following are the principal fields in which progress has been remarkable: Penicillin, Streptomycin and Dihydrostreptomycin, Tetracycline, Chloramphenicol, synthetic drugs, vitamins, synthetic hormones, glandular products and vaccines and sera.

Most manufacturers in the organised sector have collaboration arrangements with well-known pharmaceu-

tical firms in England, America, Switzerland, Germany, Italy, the U.S.S.R., etc.

The total capital investment in this sector has sharply risen from Rs. 560 million in 1962 to ever Rs. 1,500 million in 1967. These units employ about 40,000 workers, ont of whom about 4,000 are technically trained.

Output of drugs and pharmaceuticals in 1968-69 was Rs. 235 crores as against Rs. 210 crores in 1967-63. During 1969-70, the output is likely to be of the order of Rs. 260 crores. In India the entire research expenditure on health problem is estimated at around Rs. 30 million including the governmental and private expenditure. Of this, a total of about Rs. 12 to 15 million is spent on research in the private and the public sectors.

Development in the Public Sector

See "Hindustan Antibiotics Ltd.," "Hindustan Insecticides Ltd.," Indian "Drugs and Pharmaceuticals Ltd.," and "Drug Research Laboratories" for more information on drugs.

Total exports of medical and pharmaceutical products in 1966-67 and 1967-68 were Rs. 3.77 crores and Rs. 3.33 crores respectively. Exports in 1968-69 amounted to Rs. 4 crores.

Production: The output of Penicillin and DDT in 1967 and 1968 are given below:

Year			Penicillin Ilion mega unita	D.D.T. (tonnes)
1967	* 4	* *	122	3,130
1968 (estimated)	N 4	4.4	113	3,200

Monthly average production of drugs during 1966, 1967 and 1968 is given below:

		Unit	1966	1967	1968*
1.	Liver Extract				
	(i) Injection	1000 cc.	3,788 - 1	3.053 - 1	3.065
	(ii) Oral	1000 kg.	16.0	15.7	16.4
2.	Anti-dysentery drugs	kg.	7,348-0	6,441.0	6,509
3.	Nikethamide	kg	553.0	379-0	235
4.	I. N. H	1000 kg.	4.7	3.3	2.7
5.	P. A. S	'000 kg.	26.8	20.0	22.0
6.	Vitamin A	MMU	1.7	2-1	2.5

Monthly average production of all drugs except vitamin 'A' based on production during January-November period for 1958.

The following table shows the imports of drugs and pharmaceuticals during 1967-68 and 1968-69.

Imports of Drugs and Pharmaceuticals 1967-68 and 1968-69.

		Rs.	lakhs
	Item	1967-68	1968-69
I.	Vitamins, Provitamins,		
	etc.	231.03	145.59
2,	Antibiotics (a) Aureomycin	1.97	1 00
	(b) Chioromycetin	48.83	1 · 32 25 · 78
	(c) Penicillin	70.76	12-16
	(d) Streptomycin	155.36	103.51
	(e) Terramycin	1.43	8-12
9	(f) Other antibiotics	70.48	84-23
3. 4.	Hormones	42.57	39-11
	etc.	34 - 88	33-13
5.	Modicaments	1,038-48	1,214.36
6.	Pharmaceutical Goods	21.94	55.09
7.	Opium alkaloides, Cocaine,	90 10	05.00
	Caffein etc	33 · 19	27-28
	Total	1,751.92	1,749-68

The exports of pharmaceutical products amounted to Rs. $506 \cdot 9$ lakhs in 1968-69.

D.D.T. and B.H.C. are the two of the most important insecticides. Hindustan Insecticides Ltd., a public sector undertaking went into production in March 1955.

The annual capacity and production of D.D.T. and B.H.C. are set out in the following table:

('000 tonnes)

Year						-	D	D.T.	В	.H.C.
							Capacity	Production	Capacity	Production
							(1)	(2)	(3)	(4)
1966-67		 	 	 **		+ 0	 2.8	3.1	9-2	8-1
1967-68 1968-69	* *	 	 * *	 4.0	**		 2.8	3·1 3·3	11·8 26·5	8·7 12·0

MINES AND MINERALS

THE total value* of mineral production in India during 1968 was Rs. 3,703 million as against Rs. 3,251 million in the previous year. Fuels constituting the leading group accounted for Rs. 2,985 million or 80.6 per cont of the total value of mineral production during 1968. The share of metallic minerals was Rs. 442 million and that of non-metallic minerals Rs. 276 million accounting for 11.9 per cent and 7.5 per cent respectively.

In terms of value of output during 1968 next to fuels were iron ore (Rs. 209 million), limestone (Rs. 172 million), manganese ore (Rs. 99 million), gold (Rs. 65 million), copper ore (Rs. 33 million), mica (Rs. 20 million) and dolomite (Rs. 18 million).

The quantity index of mineral production (base 1960 = 100) stood at 143.0 during 1968 as against 134.6 in the previous year. Coal mining constitutes as much as 69 per cent of the over all mining activity in the country followed by metal mining with 19 per cent and non-metallic mining 12 per cent. The index of coal mining registered 144.4 in 1968 in comparison with 136.9 in 1967. Metal mining index during 1968 was 134.9 as against 126.2 in the pre-

vious year. The index of non-metallic registered 147.6 in 1968 compared with 135.0 in 1967.

STATE-WISE ANALYSIS

Bihar occupied the leading position accounting for 32-33 per cent of the total value of mineral production in 1968 followed by West Bengal with 18-23 per cent and Madhya Pradesh with 13-32 per cent. The supremacy of these States is primarily due to the fact that these are the principal producers of coal in India accounting respectively for 45 per cent, 28 per cent and 16 per cent of the all-India output during 1968.

The production of iron ore in Gos during 1968 was 6-86 million tonnes registering a marginal increase of 2 per cent compared with the previous year. Output of manganese ore during 1968 at 51,000 tonnes indicated a rise of 20 per cent compared with 1967.

OVERSEAS TRADE

The value of export of ores and minerals from India (including Goa) during the year 1968 totalled Rs. 1,622

[•] Excluding (1) common sait, (2) minor minerals and (3) minerals declared as prescribed substances under the Atomic Energy Act, 1962 and, also the value of mineral production from Goa. The figures for July-December, 1965 exclude the value of natural gas (not available, negligible).

Note: The estimated value of per use an of minerals excluding atomic minerals and sait and of minor minerals for which data are not available was Rs. 3.991 million during 1969.

million as against Rs. 1,387 million in the preceding year showing an increase of about 17 per cent. Iron ore was the leading commodity accounting for Rs. 865 million or 53·3 per cent of the total value of mineral experts during 1968, followed by diamond of gem variety Rs. 242 million or 15 per cent, precious and semiprecious stones Rs. 147 million or 7·4 per cent, coal Rs. 26 million or 1·2 per cent,

In terms of quantity, the exports of iron ore during 1968 increased by 15·2 per cent to 15.635,000 tonnes, manganese ore by 7·3 per cent to 1,189,111 tonnes, mica (all varieties) by 4·7 per cent to 22,172 tonnes, coal 87·6 per cent to 469,000 tonnes and kyanite by 24·1 per cent to 50,465 tonnes compared to the exports during 1967. The exports of chromite at 108,822 tonnes showed a substantial increase of 40·9 per cent from that of 1967. Among other important minerals the exports of bauxite, ilmenite, salt and steatite increased while there was a fall in the case of barytes.

The foreign exchange earned by the exports of metals and alloys during 1968 amounted to Rs. 978 million registering an increase of Rs. 333 million or 51.8 per cent compared to the preceding year. Iron and steel accounted for 591 million or 60.5 per cent of the total value of metals exported during 1968, followed by pig and cast iron (Rs. 208 million or 21.3 per cent), aluminium (Rs. 69 million or 7 per cent) and ferro-alloys (Rs. 47 million or 4.8 per cent). The value of exports of iron and steel rose by 34.8 per cent to Rs. 591 million, pig and cast iron by 38.5 per cent to Rs. 208 million and that of aluminium by five fold to Rs. 69 million compared to 1967. The value of exports of silver and copper also increased to Rs. 35 million and Rs. 26 million in 1968 as compared to Rs. 35 million and Rs. 10 million respectively in 1967.

The value of imports of minerals into India during 1988, totalled Rs. 1,213 million as compared to Rs. 1,241 million during 1967. Petroleum was the leading commodity accounting for Rs. 558 million or 46 per cent of the total value of minerals imported during 1968, followed by sulphur Rs. 215 million or about 18 per cent, diamond of gem variety Rs. 163 million or 13-4 per cent, rock phosphate Rs. 125 million or 10-3 per cent, asbestos Rs. 48 million or 4 per cent.

The value of imports of metals and alloys declined sharply by 25 per cent to Rs. 1,709 million in 1968 as compared to Rs. 2,276 million in 1967. Iron and Steel accounted for Rs. 838 million or 49 per cent of the total value of imports of metals during 1968, followed by copper Rs. 326 million or 19·1 per cent, zinc Rs. 219 million or 12·8 per cent, tin Rs. 99 million or 5·8 per cent, load Rs. 67 million or 3·9 per cent, aluminium Rs. 60 million or 3·5 per cent and nickel Rs. 44 million or 2·6 per cent. The value of iron and steel in 1968 declined sharply by Rs. 306 million, aluminium by Rs. 164 million, copper by Rs. 121 million, tin by Rs. 13 million and lead by Rs. 5 million as compared to 1967. The value of the imports of zinc and ferro-alloys, however, increased by Rs. 49 million and Rs. 7 million respectively during 1968 compared to 1967.

The value of mineral production 1, 2, (Rs. '000) and percentage to the total respectively in each State for 1968 are as follows:

Bihar 1,197,099; 32·33; West Bengal 675,227; 18·23; Madhya Pradesh 506,464; 13·32; Gujarat 322,927; 8·72; Assam 288,132; 7·78; Orissa 182,043; 4·91; Andhra Pradesh 172,120; 4·64; Tamil Nadu 111,902; 3·02; Mysore 107,494; 2·90; Maharashtra 85,143; 2·29; Rujsthan 38,892; 1·05; Uttar Pradesh 5,462; 0·12; Kerala 4,317; 0·11; Haryana 3,902; 0·10; Himachal

Pradesh 738; —; Jammu & Kashmir 589; —; Delhi 274; —; Punjab 3; —; Total 3,702,728; 99.52.

- 1. Excluding the value of minor minerals and minerals declared as prescribed substances under the Atomic Energy Act, 1962 and also the value of output from the Union Territory of Gos. Daman and Diu.
- 2. The figures for July-December, 1968 also exclude the Value of natural gas.

PETROLEUM

The oil bearing regions are the tertiary formations primarily in the States of Assam and Gujarat. Oil and gas seepages have also been reported in some of the tertiary formations of Andhra Pradesh, Tamil Nadu, Punjab and Union Territories of Tripura, Naga Hills, Tuensang area in NEFA etc. According to the Ministry of Petroleum and Chemicals the total reserves of crude oil at the end of 1967 were 154 million tonnes (Assam 88 and Gujarat 66). The reserve of natural gas has been estimated at 69 million cubic metres (Assam 44 mill. cubic metres and Gujarat 25 mill. cubic metres).

The indigenous production of 5.67 million tonnes of crude petroleum is about 39 per cent of the total quantity refined in the country during 1967 as against the same percentage in the previous year. The exploration programme for search of petroleum has been considerably stepped up in all possible areas to meet the deficiency.

The trend in production and imports of petroleum (crude) for the last three years is given below.

	-			Import			
	Year	Production in '000 tonnes		Quantity in 1000 tonnes	Value (Rs. '000)		
1966			4,647	5,722	383,628		
1967	2.4		5,667	7,305	579,469		
1968	**	+ 4	5,853	6,130	557,600		

The total crude throughput of all refineries during 1969 was 17.51 million tonnes yielding 16.19 million tonnes of products. The crude throughput of the public sector refineries alone amounted to 9.5 million tonnes, i.e. 54.4 per cent of the total crude throughput.

BAUXITE

India can be considered to be self-sufficient in respect of bauxite, which is the chief raw material for aluminium metal. A sizeable quantity also finds outlet in export market after meeting the indigenous requirements. According to the sub-group on Aluminium and Magnesium of the Planning group on non-ferrous metals the all-India reserves of bauxite of all grades are placed at 160 million tonnes of which 67 million tonnes are of high grade analysing 50 per cent and above H₂O₃.

Yearly production and export of bauxite from 1964-68 in thousand tonnes: 1964: 593; 94; 1965: 707; 63; 1966: 750; 78; 1967: 801; 61; 1968: 936; 99.

During 1968, five aluminium smelters, all in the private sector with a total installed capacity of 117, 670 tonnes per annum located one each at Hirakud (Orissa), Alwaye (Kerala), Jayakanagar (West Bengal), Renukoot (U. P.) and Mettur (Tamil Nadu) produced a total of 120,100 tonnes of aluminium metal. Indian Aluminium Co's new smelter at Belgaum of 30,000 tonnes installed capacity is coming up shortly. Besides, two units under the public sector one each at Koyna, Maharashtra (50,000 tonnes capacity) and Korba, Madhya Pradesh (1,00,000 tonnes capacity) are proposed to be set up.

COAL & LIGNITE

The most important coal fields are Ranigan; in West Bengal and Jharia and Bokaro in Bihar. The best cooking coal comes from Giridih, Jharia and Raniganj. Other States in which coal is found are Madhya Pradesh, Orissa, Andhra Pradesh, Tamil Nadu, Maharashtra, Assam, Rajasthan and Kashmir.

The proved and inferred reserves of all types of coal are estimated at 16,796 and 130,782 million tonnes respectively by the Geological Survey of India.

The output of coal in million tonnes for the years 1964 to 1968; 1964 (62.44); 1965 (67.16); 1966 (67.97); 1967 (68.22); 1968 (70.81).

Value of production of coal during 1968 was Rs. 2,335 million.

India exported 28,732 tonnes of coke valued at Rs. 2·29 million in 1968 relative to 6,216 tonnes valued at Rs. 1·04 million in 1967. Coke exports to Burma which is the chief buyer, amounted to 5,749 tonnes valued at Rs. 1,005,000 in 1967. Coal exports rose from 250,000 tonnes valued at Rs. 15·11 million in 1967 to 469,000 tonnes valued at Rs. 25·55 million in 1968. Burma and Ceylon were the chief importers.

The multipurpose 'South Arcot Lignite Project' at Neyveli is planned to increase the mine output to 6 million tonnes per annum. During 1968, 4·12 million tonnes of lignite was mined in Neyveli.

Lignite also occurs at Palana and Khari in Bikaner District, Rajasthan, Nichahom in Jammu & Kashmir, Kutch and Broach Districts in Gujarat. During 1968, the entire output of lignite was from Madras, except 5,056 tonnes from Rajasthan.

During the year 1967 altogether 9 washeries with a rated capacity of 13.57 million tonnes per annum have washed a total of 6.81 million tonnes of coal.

IRON ORE

The production of iron-ore during 1968 totalled 20-56 million tonnes (excl. Goa) as against 19-01 million tonnes in the previous year. The output during January to Sept. 1969 was 22,38,000 tonnes.

India is one among the few countries endowed with large reserves of good quality iron ores which can meet the growing demands of the indigenous iron and steel industry and also sustain considerable export trade.

The production from Goa during 1968 was 6.86 million tonnes as against 6.75 million tonnes during 1967.

Among the producing States (excluding Gos) Orissa and Bihar each accounted for 28 per cent of the all India output in 1968 followed closely by Madhya Pradesh with 27 per cent.

Among the minerals exported from India, iron ore is the largest foreign exchange earner contributing 52 per cent of the total value of mineral exports during 1967. Japan contributed to be the leading buyer of Indian iron ore accounting for 81 per cent of the total exports in 1967 from India. The quantity of iron exported in 1968 was 13.66 million tonnes valued at Rs. 864.91 million as compared with 13.57 million tonnes valued at Rs. 726.78 million in 1967.

Production of iron-ore (excluding Goa) in thousand tonnes and value in thousand rupees respectively in brackets during 1965 to 1968 are: 1965 (17,154; 148,820); 1966 (20,084; 176,232); 1967 (19,068; 187,915); 1968 (20,577; 208,689). The production of iron ore in Goa during

1965-68 in thousand tonnes are 1965: 6,584; 1966: 6,718: 1967: 6,751: 1968: 6,856.

Export trade of iron-ore in thousand tonnes during 1965-68 and value in thousand rupees respectively are: 1965: 11,264; 3,95,078; 1966: 13,658; 586,397; 1967: 13,574; 7,26,778; 1968: 15,635; 8,64,910.

MANGANESE ORE

Extensive deposits of manganese ore occur in Madhya Pradesh, Orissa, Andhra Pradesh, Maharashtra, Mysore, Bihar, and Rajasthan.

The total reserves of manganese ore in the country according to the latest estimate made by the Geological Survey of India, are now placed at about 184 million tonnes including Goa. It is estimated that the deposits in the main belt of Nagpur and Bhandara in Maharashtra and Balaghat and Chhindwara in Madhya Pradesh alone contain reserves of the order of 144 million tonnes of which 48 million tonnes are of metallurgical grade. A major part of the output is exported at present.

Yearly output and exports †respectively of manganess ore in thousand tonnes from 1965—1968 are: 1965: 1,536; 1,147; 1966: 1,622; 1,249; 1967: 1,574; 1,108 & 1968: 1,551; 1,189. The production of manganese ore in 1968 in Goa including ferruginous manganese ore was 51,414 tonnes.

The export of manganese ore is now canalised through the Minerals and Metals Trading Corporation of India Ltd. The Manganese Ore India Ltd. is also allowed to export the ores produced by it or acquired by it in the course of its normal business operation.

There is only one ferro-manganese plant under public sector at Bhadravati in Mysore and six in the private sector, two each in Maharashtra and Orissa and one each in Andhra Pradesh and Mysore.

During 1968 the total production of ferro-manganess was 145,810 tonnes as against 130,467 tonnes in the previous year.

CRUDE PETROLEUM

The production of crude petroleum in 1969, was 6.7 million tonnes — a phenomenal growth of about 15 times of what it was in 1960. Similarly, natural gas, the production of which is expected to have reached 722 million cubic metres in 1969, grew by about five times compared to 1960. Crude petroleum accounts for about 46 per cent of the total value of current imports.

LIMESTONE.

Limestone is one of the most important industrial minerals required in the manufacture of cement, iron and steel, ferro-alloys, chemicals (for soda ash, caustic soda, bleaching powder, calcium carbide, etc.), fertilizer (calcium ammonium nitrate) and lime.

The cement grade limestone deposits are estimated at about 18,583 million tonnes.

The production of limestone in thousand tonnes and value in thousand rupees respectively in brackets during 1965-1968 are: 1965 (19,957; 126,359); 1966 (19,831; 142,364); 1967 (19,571; 152,414); 1968 (20,745; 171,863).

MICA

Mica is treated as a strategic mineral and India accounts for a big slice of the world trade in it.

The principal mica deposits are concentrated in Bihar, Rajasthan and Andhra Pradesh.

[†] During the calendar year 1969, 88,000 tonnes of Ferro-manganese, valued at Rs. 7.5 to Rs. 8.5 crores has been exported.

During 1968 Andhra Pradesh, Bihar and Rajasthan accounted for 29 per cent, 50 per cent and 21 per cent respectively of the all India output.

There are three mica insulation bricks manufacturing units, one each in Rajasthan, Bihar and Andhra Pradesh utilizing scrap or mica waste. There is also one major unit manufacturing different types of micanite in Bihar.

The production and export figures of Mica from 1965 to 1968 respectively in tonnes are: 1965: 23,840; 37,547; 1966: 22,915; 30,467; 1967: 18,152; 21,172; 1968: 17,667; 22,172.

CHROMITE

Chromite is an important strategic mineral of which India has moderate supplies.

The chief deposits are in the Singhbhum district of Bihar, Mysore and Hassan districts of Mysore State, Ratnagiri and Bhandara districts of Maharashtra, the Krishna district of Andhra Pradesh, the Salem district of Tamil Nadu, and Cuttack and Keonjhar districts of Orissa.

Production and exports respectively in '000 tonnes of chromite from 1965 to 1968 are: 1965: 60; 33; 1966: 78; 44; 1967: 114; 77; 1968: 206; 109.

Production of ferro-chrome during 1968 was 1,417 tonnes as against 138 tonnes in 1967.

MACNESITE

Large deposits of magnesite used in the manufacture of magnesium salts, metallic magnesium and refractory bricks are known to occur in Salem (Tamil Nadu), Hassan, Coorg and Mysore (Mysore), Almora (U.P.), small deposits are known in Dungarpur (Rajasthan) and Singhbhum (Bihar). The chief producing centres are Salem, and Mysore district.

Major part of the output is used in the manufacture of refractory bricks for steel works and some quantity is exported.

Production and export⁸ (in tonnes) of magnesite from 1965 to 1968 respectively are: 1965: 238,905; 53,099; 1966: 232,053; 34,228; 1967: 246,448; 19,912; 1968: 253,073; 22,309.

GYPSUM

Gypsum deposits are mainly found in Rajasthan (Jodhpur, Bikaner, Nagaur and Jaisalmer), Tamil Nadu (Tiruchirapalli and Coimbatore districts) and Jammu & Kashmir (Doda and Baramulla).

The total inferred reserves are placed at 1,130 million tonnes. Rajasthan accounts for more than 90 per cent of the Indian reserves.

Smaller deposits also occur in Gujarat (Halar, Bhavnagar, Porbander and Kutch), Andhra Pradesh (Nellore), U.P. (Tehri-Garhwal) and in Himachal Pradesh (Sirmur).

Production of gypsum in thousand tonnes from 1965 to 1968 are: 1965; 1,160; 1966: 1,294; 1967: 1,034; 1968: 1,321.

LEAD-ZINC ORE

Zawar is the only area producing lead and zinc ores. During 1968, 3,566 tonnes of lead concentrates and 12,839 tonnes of zinc concentrates were produced from Zawar mines in Udaipur district, Rajasthan.

The production of refined lead during 1968 was 1,649 tonnes as against 2,473 tonnes in 1967 from the Tundoo smelter, Bihar.

The present installed capacity of the plant is 6,000 tonnes per annum.

The zinc smelter at Debari in Rajasthan has gone into production in March 1968, having an annual capacity of 18,000 tonnes of zinc and 29,464 tonnes of sulphuric acid to be recovered per annum and converted in turn into 75,000 tonnes per annum of superphosphate. Besides, 76 tonnes of cadmium metal per annum will also be recovered.

Another firm viz. Cominco Binani Ltd. started production of their zinc plant based on imported concentrates, at Alwaye, Kerala, in July, 1967. It has a capacity of 20,000 tonnes of zinc per year and will recover 48,000 tonnes of sulphuric acid and 40 tonnes of cadmium metal per annum.

During 1968, the production of Zinc metal, was 20,699

The production of Cadmium metal for the first time in India commenced in March, 1968 and the total production during 1968 was 48 tonnes.

SULPHUR

The mineral pyrites is one source of sulphur. It is found in Amjore (Bihar), Ingaldhal, Kaiga (Mysore), Taradevi (Simla), Lashtial (Kashmir), Saladipura area (Rajasthan) and Polur (Tamil Nadu) of which Amjore and Ingaldhal deposits are of economic importance.

The Indian Bureau of Mines have estimated 391 million metric tons of pyrites in area covering 48 sq. miles at Amjor assaying 40 per cent sulphur.

The Pyrites, Phosphates and Chemicals Ltd. continued the implementation of two projects viz. (1) Mining of 0.24 million tonnes of pyrites per annum at Amjore and (2) setting up of a 400 tonnes per day capacity sulphuric acid plant at Sindri in Bihar.

Pyrites to the tune of 2.03 million tons assaying 20 to 30 per cent sulphur have been estimated to be available at Ingaldhal, Mysore State. A reserve of 115 million tonnes of pyrite/pyrrhotite containing about 22 per cent sulphur has been inferred down to a depth of 250 metres in Saladipura area, Sikar District of Rajasthan.

Substantial quantities of pyrites are associated with the gold deposits of Wynad in the Nilgiris District of Tamil Nadu.

Copper pyrites deposits are also a source of sulphur. Some of the Indian coal e.g. Assam coal and Rewa coal are high in sulphur.

The Pyrites, Phosphates and Chemicals Ltd. has been set up under the aegis of NIDC to exploit pyrites for production of sulphuric acid and other related products. The Company has initiated action on setting up a sulphuric acid plant at Sindri with a capacity of 400 tonnes per day based on Amjore pyrites.

The country's main requirements are met from imports.

Yearly import of sulphur from 1964-68 in tonnes are as follows: 1965: 283,893; 1966: 287,956; 1967: 592,978; 1968: 390,390.

COPPER

In India at present Indian Copper Corporation Ltd. is the sole producer of copper ore and metal at Ghataila, Bibar.

The production of refined copper was 9,286 tonnes in 1968 and 8,904 tonnes in 1967. This meets hardly 10 per cent of the copper requirements of the country.

Extensive investigations are being carried out throughout the country to locate promising copper bearing areas. The more important of these are Khetri, Madhan-Kudhan,

ь

¹ Crude Mica. The production of mica during 1969 declined by 4.7 per cent compared with that of 1967. consists of mostly calcined magnesite.

Kolihan, Akwali, Dariba and few other acctions of the Khetri Copper belt in Rajasthan; Rakha, Roam-Sideshwar, Ramchandrapahar and few other areas in Bihar; and in Agnigundala and Bellampalli in Guntur Dist. and Mailaram in Khammam district in Andhra Pradesh. The airborne geophysical surveys under "Operation Hard Rock" project were completed earlier in parts of Andhra Pradesh and over parts of Rajasthan and Bihar, West Bengal during 1968.

The integrated mine and plant at Khetri under the Khetri copper complex which is under construction will have a capacity of 31,000 tonnes of electrolytic copper metal annually. Besides 600 tonnes of sulphuric acid will be produced as a by-product which will be utilised for the production of 214,000 tonnes of triple super phosphate per annum.

Copper import in tonnes and value in '000 rupees respectively from 1965-68 are: 1965: 63,269; 357,601; 1966: 27,498; 282,491; 1967: 46,900; 447,118; 1968: 36,429; 326,203.

ASBESTOS

Naturally occurring fibrous minerals are called 'asbestos'. The commercial varieties fall into two groups, viz. the serpentine group found exclusively in the serpentine rooks and is commonly called chrysolite variety and the other amphibole group comprised tremolite, actinolite, anthophyllite, crocidolite and amosite varieties. The chrysolite variety is the most important one from the industrial point of view and is mainly limited to Pulivendla taluk of Cuddapah district, Andhra Pradesh, and the annual production is only 400 tonnes.

The bulk of the asbestos requirements of the country is met by imports on account of inadequate domestic production. The trend in the production and imports of asbestos for the last four years is shown in the table below:

					(In tonnes)
Yea	2			Output (amphibole & chrysolite)	Importa
1965	+ +	0.0		4,801	38,396
1966		**	8.6	7,596	29,955
1967		**		8,110	29,785
1968	4.4		**	9,073	25,924

In all there were 9 asbestos cement manufacturing units in 1967 with a total installed capacity of 451,200 tonnes per annum, against which the production was 249,752 tonnes.

KYANITE AND SILLIMANITE

Kyanite and sillimanite are the important refractory minerals having the same chemical composition (Al₂O₃ SiO₂). India has richest deposits of kyanite and sillimanite in the world, kyanite located at Lapsa Buru, Kharswan, in Singhbhum district, Bihar and sillimanite deposits of Khasi Hills at Sonapahar, Assam. The Indian sillimanite can be used as a refractory without calcination since it shows very little expansion. India occupies an important position both as a producer and an exporter of kyanite and sillimanite.

The trends of their output and exports for the last four years are shown in the following table:

				1)	n tonnes)
Year			anite	Silli	manite
2.001		Output	Export		
1965	**	37,481	31.144	11,276	Export 5.786
1966		63,820	35,726	10,286	6,332
1967		50,374	40,653	5,800	2,046
1968	* *	64,361	50,465	4,651	2,514

SALT

India produced 5.04 million tonnes of salt during 1968 of which Gujarat produced 55.3 per cent, Tamil Nadu 16.0 per cent, Maharashtra 8.9 per cent, Rajasthan 10.5 per cent, Andhra Pradesh 6.7 per cent and Orissa, Mysore, West Bengal, Himachal Pradesh, Goa and Kerala together 2.5 per cent. The production in 1967 was 4.49 million tonnes.

Besides being self-sufficient, India exports a sizable quantity of salt. India exported 6.17 lakh tonnes in 1968 as against 4.49 lakh tonnes in 1967. The country has reached a production capacity of nine million tonnes.

The average number of labourers employed per day in the salt industry in 1968 was 34,736 as against 33,700 in 1967.

To combat endemic goitre in the Sub-Himalayan belt, iodised salt, manufactured with financial help from UNICEF, is being supplied to the Goitre affected areas of Himachal Pradesh, Haryana, Punjab, U.P., Bihar, West Bongal etc.

The Government of Rajasthan installed a Plant in December 1965 for the recovery of Sodium Sulphate from sub-soil brine available at Didwana. Its present capacity is 16.50 tonnes of Sodium Sulphate per day.

The following quantities of important bye-products were recovered during 1967 and 1968.

(Figures in Tonnes)

Yea	æ	Gypsum	Magne- sium sulphate	Magne- sium Chloride	Sodium Sulphate	
1967		31,475	137	5,426	3,958	
1968		49,647	50	6,573	1,921	

RARE METALS

Investigations carried out by the Atomic Energy Department showed that the deposit of radioactive minerals in India had over 3.3 million tons of ore containing 300,000 tons of thorium of 10 per cent concentration and 10,000 tons of uranium of 0.03 to 0.04 per cent concentration.

The deposits also contain about 80 million tons of ilmenite. The production of ilmenite during 1967, was 41,609 tonnes.

Ilmenite is recovered from the beach sands of Kerala State contributing nearly 93 per cent of the total production and the Manavalakuruchi area in Tamil Nadu. It is mainly exported to U.S.A. and U.K.

Beach sands of Kerala and Tamil Nadu also contain a very useful radioactive mineral monasite. It contains 8 to 10.5 per cent of thoria, 0.3 per cent of uranium oxide, 20 to 31 per cent of cerium, 1 to 1.5 per cent of ultrium and 21 to 30 per cent rare oxides. Thorium oxide forms an important source of atomic fuel. The total reserve of combined rare earth oxides in beach sands has been estimated at 400,000 tonnes.

Uranium bearing ores have also been discovered in the Himalayan region of H.P. and U.P. and are being presently

Uranium mine at Jaduguda in Singhbhum District treats about 1,000 tonnes of mine per day worked by Uranium Corporation of India, a Govt. of India Undertaking.

India's total reserves of uranium are currently reckoned at 15,000 tons and of thorium at 500,000 tons.

The reserves of uranium in India can support about 5-10 million KWs of generating capacity over the life time of the stations.

¹ Including Goa (b) Including imports of precious and semi stones by parcel post. Excluding imports of diamond, emerald and feldspar which are given separately.

MISCELLANEOUS INDUSTRIES

DIESEL ENGINES: Towards the end of 1968 there were 24 units in production of stationary type of diesel engines and 2 units for vehicular types. The position of diesel engine manufacturing industry from 1965 onwards is shown below:

(Numbers)

Year	Diesel l (Vehicula	Engines r Types)	Diesel Engines (Stationary Types)			
X GPL	Installed capacity	Produc- tion	Installed capacity	Produc-		
1965	 9.000	8,676	48,612	70,128		
1966	 9,000	7,032	72,312	87,876		
1967	 9,000	3,288	69,084	1,14,900		
1968	 9,000	2,436	64.038	1,16,148		

The exports of diesel engines and parts amounted to Rs. 125.52 lakhs in 1967-68 and Rs. 210.41 lakhs in 1968-69.

Machine Tools: The number of units licensed for the manufacture of machine tools (metal working) in the country at the beginning of 1969 was 70.

By the end of the Third Plan (1965-66), the actual capacity and production of machine tools (organised sector) including accessories were Rs. 30 crores and Rs. 26 crores respectively. The capacity at the end of 1968-69 was placed at Rs. 56 crores and production at Rs. 21 crores.

Production and Imports of Machine Tools

Year				Production (Rs. crores)	Imports (Rs. crores)
1965	**			25.48	34 · 93
1966		2.0		28.48	42.99
1967				25.47	39.40
1968	9.4	0.0	* *	20.63	86-25

About 50 per cent of the output of machine tools in India comes from the State-owned Hindustan Machine Tools.

Bicycles: India produced 15,40,000 bicycles by the end of the Third Plan. The production in 1968-69 was 19:30 lakhs.

The installed capacity and production respectively during the year 1965 to 1968 are as follows:

1965 (16,78,992; 15,48,096); 1966 (16,78,992; 16,70,496), 1967. (16,39,992; 17,04,336); 1968 (21,75,000; 19,18,620).

The industry can practically meet all internal requirements. It is the one industry where all the components are indigenously produced.

Indian cycles have been successfully introduced, on a commercial scale in some foreign countries. The exports of bicycles and parts amounted to Rs. 1.4 crores in 1966-67, Rs. 2.2 crores in 1967-68 and Rs. 3.8 crores in 1968-69.

Apart from bicycles, an overseas market on a small-scale has also been built up for Indian tricycles.

Textile Machinery: By the end of the Third Plan (1965-66) the actual capacity and production of cotton textile machinery stood at Rs. 40.0 crores and Rs. 24.2 crores respectively. In 1968-69 the estimated production was only Rs. 17 crores.

PRODUCTION DATA

(Numbers)

Year				alico, semi- and automatic)		Complete Ring Spinning Frames		Carding Engines (Revolving flat cards)		Shuttle	
				Capacity	Production	Capacity	Production	Capacity	Production	Capacity	Production
1965		• •		8,124	3,108	1,680	2,292	1,080	1,812	1,32,000	1,23,600

1967	4.1	6.0	* #	8,736	1,884	1,680	1,140	1,080	504	1,32,000	95,040
1968	4 +			7,368	N.A.	1,932	N.A.	1,080	N.A.	1,32,000	N.A.

Sewing Machines: At the beginning of 1969 there were five units manufacturing sewing machines with an annual capacity of 397,000 machines.

Capacity and Production respectively of Sewing Machine Industry, 1965-68: 1965 (4,41,996; 4,21,452); 1966 (4,69,992; 4,10,940); 1967 (4,69,992; 3,65,808); 1968 (3,97,000; 4,16,000).

The output of the sewing machine industry during the first three Plans and during 1968-69 was as follows: 1955-56:1,11,000;1960-61:3,03,000;1965-66:4,30,000;1968-69:4,23,000.

India exported sewing machines and parts worth Rs. 56 lakhs in 1967-68 and Rs. 54 lakhs in 1968-69,

Electric Fans: The electric fan industry has made rapid progress during the past two decades.

PRODUCTION OF ELECTRIC FANS IN INDIA

Year	1963	1964	1965	1966	1987	1968
Nos. ('000s)	1,138	1,085	1,449	1,293	1,381	1,474

According to the Annual Survey of Industries (1965), there are 33 units in this industry which employs over 12,300 workers and produces goods worth about Rs. 23 crores.

EXPORT OF ELECTRIC FANS FROM INDIA

Year				1966-67	1967-68	1968-69
Value	(Re.	in	lakhs)	163	169	187

By the end of the Third Plan, the output of electric fans rose to 1.5 million from 1.1 million in 1960-61. The output was 1.35 million in 1967-68 and 1.50 million in 1968-69.

Electric Motors: By the end of the Third Plan the capacity and production of electrical motors (below 200 h.p.) were 1-75 million horse-power each. The capacity and production in 1967-68 and 1968-69 were as under (in million h.p.):

Electric motors (below 200 h.p.): 1967-68: 2.24; 2.08; 1968-69: 2.55; 2.00.

Electric motors (above 200 h.p.): 1967-68: 0.55; 0.10; 1968-69: 1.00; 0.50.

Both the capacity and production of electric motors have for obvious reasons showed a marked increase in recent years as shown in table below:

Year		Capacity h.p.	Production h.p.
1965	**	 13,52,400	17.01.600
1966		 13,58,400	19,84,800
1967		 14,16,000	20,74,000
1968		 22,17,600	19,00,400

Electric Cables and Wires: The country is more or less self-reliant in most types of electric wires. The following table gives the installed capacity and production of some major items in 1967 and 1968:

Item	Unit	1	967	190	38
100111	OHIU	Capacity	Production	Capacity	Production
1. VIR & PVC Cables	K/M Tonnes Tonnes K/M Tonnes K/M	8,60,633 89,205 20,042 8,360 14,427 10,410	3,64,910 70,161 8,902 2,788 851 14,016	8,09,942 89,713 22,316 8,360 14,427 11,210	3,70,000 70,000 9,200 2,500 1,000 9,500

India's exports of electric cables and wires amounted to Rs. 120 lakhs in 1966-67, Rs. 168 lakhs in 1967-68 and Rs. 774 lakhs in 1968-69.

Electric Lamps: According to the Annual Survey of Industries (1965), there are 29 units engaged in the manufacture of electric lamps and their total output is placed at Rs. 8.9 erores. By the end of the Third Plan, the estimated production of G.L.S. and other lamps was 70 million and that of fluorescent tubes was 4.4 million.

Production of GLS lamps, was 73.7 million in 1967 and 77.0 million in 1968.

India has made a small beginning in the exports of electric lamps, bulbs and fluorescent tubes. The value of exports was Rs. 11.60 lakhs in 1967-68 and Rs. 21.92 lakhs in 1968-69.

Production of Electric Transformers

Year	1964	1965	1966	1967	1968
Production in million K.V.A	3-3	4.3	4.8	<i>5</i> ⋅3	4.8

During 1968-69 India imported transformers and parts worth Rs. 5.88 crores. Exports during that year amounted to Rs. 51 lakhs.

Soap: The organised sector contains some 41 units with an installed capacity of 2.3 lakh tonnes per annum, though all of these are not in actual production, while the cottage sector contains over 3,000 units, scattered throughout the country. There is a concentration of these small factories in those areas were oil-seeds are available in plenty. For example, the Punjab, U.P. and Gujarat have each an annual production of over 40,000 tons of soap while Andria State produces just 3,000 to 10,000 tons a year. The following figures give the production in lakh tonnes in the organised sector from the year 1962, 1962: 1.5; 1963: 1.6; 1964: 1.6; 1965: 1.6; 1966: 1.7; 1967: 1.8; 1968: 1.9.

It is estimated that the tonnage of oil required for soap alone will grow by 40 per cent every five years and that after twenty years the total annual requirements of oil and fat for all products will have to be increased from about 1.8 million tons to 6.3 million tons.

The item-wise data on the exports of soap from India are shown in the table below:

(Rs. lakhs	
	м
	ш

Item		1966-67	1967-68	1968-69
Household and Laun	dry			••
Soap		19.02	23 · 80	15-45
Medicated Soap		1.99	2-08	1-91
Toilet Scap	0.0	24 - 38	22.66	34 - 36
Others	4.1	2.48	5.59	20.00
Total		47.87	54-18	71.72

Agricultural Tractors: The production of agricultural tractors during 1967 was 10,526 and 13,838 in 1968.

There are at present five companies engaged in the manufacture of tractors with a licensed capacity for 30,000 tractors of which the installed capacity during 1968 was 24,500.

The total availability of wheeled type farm tractors for recent years is given below:

Year	Indigenous Production No.	Imports (No.)	Total (No-)
1966-67 1967-68	5,796 8,816 11,394 15,470	1,989 2,591 4,038 2,508	7,785 11,407 15,432 17,978

Recently, the sale of agricultural wheeled tractors was brought within the ambit of the Essential Commodities Act, 1955 and selling prices of various agricultural tractors were fixed on a statutory basis.

RAYON INDUSTRY

Rayon, Synthetic Fibres, and Cellulose Film

ODAY there are eight units producing rayon L filament yarn, with a total production capacity of 36,000 tons per annum; three rayon tyre cord plants with a total capacity of 19,800 tons per annum; two rayon staple fibre producing units (capacity 60,000 tons per annum), one accetate filament and staple producing unit with a capacity of 2,000 tons per annum, five nylon producing units with a capacity of 5,700 tons per annum, and one polyester fibre producing unit, with a capacity of 4,700 tons per annum. Production of nylon tyre cord and acrylic fibre has also started in the country. With the increasing demand on the one hand, and the planned production of various chemical raw materials for synthetic fibres on the other, the production of all kinds of manmade fibres is bound to rise in the near future. This increase is likely to be more significant in synthetic fibres than in the cellulosic fibres, like rayon and acetate. In rayon itself, the rise in production would be more in case of staple fibre than in the case of filament yarn. This trend in India is keeping with world trends.

Gwalior Rayon were the first to manufacture rayon grade pulp from indigenous resources—such as Bamboo, Eucalyptus and other woods, as early as 1963 and the production of rayon grade pulp for the last four years has been as under: 1965-66: 49,500 tonnes; 1966-67: 53,000 tonnes; 1967-68: 58,100 tonnes and 1968-69: 60,900 tonnes. Other rayon grade pulp manufacturers are Travancore Rayons and S. I. Viscose.

Apart from staple fibre, we are now producing polyester fibre.

There are as many as 1,03,000 power looms with a production capacity 1,000 million metres of artsilk fabrics on 1.75 shift basis. In the next five years, an additional 40,000 power looms have been planned. There are nearly four lakh handlooms working on man-made fibres.

According to an estimate, out of the requirements of 1,10,000 tonnes (corresponding to the targeted capacity of 61 million kg. for viscose filament yarn and 42 million kg. for staple fibre) our present productive capacity is about 60,000 tonnes. Obviously we would have

to rely on imports.

The above difficulty may be partly overcome if expansion of viscose rayon capacity is allowed on the staple side at present to the extent desired by the planning subgroup. Besides, the following considerations further support this expansion: (a) rayon can never be regarded an outmoded fibre and still the same has plenty of life in it; (b) rayon is most widely used and least expensive of all fibres - its quality and processability in staple form being superior to any other synthetic and natural fibre; and (c) the newer synthetic fibres are not its primary competitions except in certain specific market.

VARIETY-WISE CONSUMPTION

(i) Viscose Rayon Filament Yarn :

The production capacity of viscose rayon filament varn shot up from 262 lakh kg. in 1962 to 360 lakh kg. in 1968 an increase of 37 per cent. During this time the imports of viscose yarn dwindled from 88 lakh kg. to nil. This is significant since the man-made textile industry now entirely depends on the indigenous production of viscose rayon filament yarn for its requirements. Another revealing thing is that the popularity of viscose rayon filament yarn has not increased as compared with the non-cellulose fibres.

(ii) Acetate Rayon Filament Yarn:

The production of this type of yarn increased in the country from 14 lakh kg. in 1962 to 15 lakh kg. in 1968. The imports of this type of yarn dropped from 13 lakh kg. to nil. The imports were partly replaced by the indi-genous production and partly due to fall in demand. The Table on next page shows the production, imports and availability of man-made fibres in India from 1965 to

Requirements of Raw Materials: The chief raw materials for the viscose process of filament and staple fibre, are rayon grade pulp, caustic soda and sulphur. The requirements of these raw materials for the production of 96 million lb. of viscose filament, 64 million lb. of staple fibre and 32 million lb. of acetate filament and acetate staple fibre are estimated as follows :-

Rayon grade pulp	82,000 tons 80,000 ns
Caustic Soda Sulphur (including carbon disulphide)	60,000 ,,
Alcohol	6-4 million gallons
Cotton linters (for acetate process only)	13,000 tons

In addition, small quantities of copper sulphate, ammonia, sodium hydroxide, cotton linters and sulphuric acid will be required for the manufacture of cuprammonium and phenol and ammonia for the manufacture of caprolactum.

The entire requirements of rayon grade pulp are at present met by imports. A number of schemes for the manufacture of rayon grade pulp with a total annual capacity of about 270,000 tons have, however, been licensed or recommended for licence under the Industries

The Fourth Five Year Plan envisages the production of various fibre and man-made fibre fabrics in the following quantities:

Industry	Unit 1960-61		1965-66	196	1973-74 Production	
Industry	OUT	Production	'Production	Capacity Production		(Target)

The Planning Commission has fixed a target of 1,500 million metres for the production of rayon and synthetic textiles during the Fourth Five Year Plan. The present annual output is about 1,000 million metres which is to be raised by 50 per cent to attain the target. The expan-sion planned for fabrics output will call for substantial increase in the requirements of raw materials. The Fourth Plan provides for stepping up production of both rayon and synthetic yarn and fibre.

There are 243 units manufacturing cellulosic man-made fibres in the world of which 84 are in Western Europe,

60 in East Europe and China, 29 in North America, 22 in South America and 48 in Africa, Asia and Oceania. In India there are eleven units manufacturing cellulosic man-made fibres and yarn including Shriram Rayons which manufacture only rayon tyre cord. The world capacity for cellu-losic man-made fibres in March 1969 was 4-12 million tonnes. The total installed capacity in India is 0.10 million tonnes or 2.4 per cent of the world capacity. The details of unit-wise installed capacity, production and percentage utilisation for the years 1965, 1968 and 1969 are given below.

ART SILK

The art silk weaving industry is an important one in Punjab which leads all the other States of India in the development of small industries. Amritsar and Ludhian are the two important centres where this industry is concentrated. Amritsar has about 1,200 weaving units with an installed capacity of about 9,000 power looms while about 5,000 looms are installed in Ludhians in over 650 factories. The Punjab, therefore, has a total of 14,000 looms installed which account for nearly 18 per cent of the total loomage in India.

The present orisis in the industry is the result of the two-month labour strike in 1965, followed closely by the Indo-Pak war. Crippled already by these blows, the industry received another set-back at the time of devaluation, when all the export promotion schemes were suspended. Another difficult problem for the industry is the aver increasing price of art silk yarn which has registered a rise of no less than 75 to 80 per cent.

SHIPPING INDUSTRY

SINCE independence India has taken rapid strides in the fields of shipping and shipbuilding. On the day of independence India had only 59 merchant ships (mostly coastal) of a total 0·19 million GRT. At the end of March, 1969, it had increased to 252 ships of 2·23 million GRT. The Government has decided to purchase 31 ships during 1969-70, for which a provision of Rs. 20·52 crores has been made.

The expansion of Indian maritime fleet since independence is given below (No. of ships & G.R.T. in lakhs respectively) as on: 15-8-1947 (59; 1-92); 1-4-1951 (94; 3-72); 1-4-1956 (126; 4-80); 1-4-1961 (172; 8-58); 1-4-1966 (221; 15-40); 1-4-1969 (252; 22-28); 1-3-1970 (258; 23-28).

Expansion of the Mercantile Marine:

On 31-3-1966, the merchant fleet of India consisted of 221 ships of 1,540,476 GRT. The changes that have taken place since then up to 1-3-1970 are indicated below:—

	CO	COASTAL		ERSEAS	TOTAL		
	No.	g.r.t.	No.	g.r.t.	No.	g.r.t.	
As on 31st March 1966 (end of Hird Pla	n) 99	322,761	122	1,217,715	221	1,540,476	
As as let Assil 1000	. 89	335,050	149	1,601,627	238	1,936,677	
Acquisition	. 2	14,428	15	152,658	17	167,068	
orappings	. 5	19,281			5	19,281	
ls on 31st January 1969	. 86	330,197	164	1,754,285	250	2,084,482	
As on 1st March 1970	. 81	307,015	177	2,021,645	258	2,328,660	

The freight and passenger earnings of Indian ships operating in overseas trades increased from Rs. 108 crores in 1967-68 to Rs. 121-29 crores in 1968-69 and the overall share of Indian shipping in the overseas trades also increased from 15-60 per cent to 18-45 per cent.

The additional tonnage ordered during the year included ten multi-purpose dry cargo ships of 15,000 DWT each to be built in Rumania against rupee payment.

SHIP BUILDING

The country has two shipbuilding yards in operation and one under construction; all of them are in the public sector. Hindustan Shipyard at Visakhapatnam in the eastern coast of Andhra Pradesh and Mazagon Dock at Bombay are in operation and the Cochin Shipyard is still to be completed.

The Hindustan Shipyard has built 40 ocean-going ships, since 1947. During 1968-69, 3 cargo ships of 12,500 DWT each were built in the yard. Six other ships are under construction. Target for 1969-70 is 3 ships totalling 38,700 DWT. In the immediate future, the Hindustan Shipyard is expected to attain a capacity of building 6 ships as against the present 2.

The Mazagon Dock caters mostly to the needs of the Indian Navy. It launched a leander class frigate in 1968 and a second one on May 6, 1970. Four other ships were also launched during the year. It has a subsidiary etc. Goa Shipyard Ltd., which builds launches, tugs, etc. and also does ship repairing.

Garden Reach Workshop mainly carries out ship repairing. Recently a plant for the manufacture of diesel engines (marine) has been erected.

Foreign Assistance

Foreign assistance in ship building has mostly come from Yugoslavia. Yugoslavia and Poland were the first European nations to help India in shipbuilding. Recently GDR and Rumania have also become ship suppliers to us. During 1959-69, the Yugoslavian ship builders have supplied a total of 700,000 DWT (i.e. almost one-third of the Indian fleet). Supply of Yugoslavian vessels to India may not continue after fulfilling the present orders. The Yugoslav Government has hitherto been providing loans to be repaid in 10 years with 2 per cent interest. Now Yugoslavia is pressing for a revision of this system to a 6 years' repayment period and 5 per cent interest.

The Cochin Shipyard gets technical and financial assistance from Messra. Mitsubishi & Co., Japan. The project comprises a dock for building ships of 66,000 DWT and a repair dock for ships upto 85,000 DWT.

With the completion of the Cochin Shipyard, the capacity for indigenous production will increase to 2,25,000 DWT per year from the present 40,000 DWT.

DEVELOPMENT

A significant step taken during the Second Plan period was the establishment of a non-lapsing shipping development fund for grant of loans to shipping companies for the acquisition of tonnage.

The 10-year-old Shipping Development Fund's contribution to the growth of shipping tonnage works out to about one lakh GRT a year on an average.

Another significant step taken in the field of shipping was the establishment of a Shipping Co-ordination Committee in the Department of Transport. The Committee is intended to bring about better liaison between various

Ministries of the Government of India and other Government organisations which have eargoes requiring transport, on the one hand, and the Indian shipping companies, on the other, so as to ensure the maximum utilisation of the available Indian tonnage.

An All-India Shipping Council has been constituted for discussing and negotiating freight and shipping problems with conferences and shipping companies.

The Union Government set up a 17-member standing committee for ship-building, ship repairs, and ship ancillaries in June 1968.

Shipping Companies:

The major shipping companies operating from India are the Shipping Corporation of India, the Mogul Lines (in the public sector) and Jayanti Shipping (taken over by the Govt.) and Scindia Steam Navigation, India Steam Shipping, Chowgule Shipping, Malabar Steamships, South India Shipping Corporation, Great Eastern Shipping, Ratnakar Shipping and Dempo Steamships.

Together they carried 18.3 per cent of Indian overseas trade in 1968-69. It showed an improvement from 15.6 per cent in 1967-68 and 13.3 per cent in 1966-67.

Shipping Corporation of India is the largest maritime company in India and it owned 61 ships of a total of 550,416 GRT at the end of March 1969. According to reports, two tankers (total 173,000 GRT) have joined its fleet recently. It started 6 new liner services in 1968-69 and the company's total income during the year was Rs. 42.25 crores.

Scindia is the largest shipping company in the private sector and the company owned 45 ships of a total of 370,063 GRT on November 15, 1969. The company has placed orders for a number of vessels with various shippards both inside and outside the country.

Expansion:

According to newspaper reports 9 ships of a total of 518,501 GRT have been added to the Indian maritime fleet in 1969. Some of the likely additions in the immediate future are as follows:—

A bulk carrier (106,400 DWT) for the Great Eastern Shipping at a cost of Rs. 9 crores; Scindia is to receive 4 ships from GDR (cost Rs. 24 crores); SCI has signed contracts with GDR for the purchase of 6 ships, with Yugoslavia for 3 bulk carriers of 85,000 DWT each and with Rumania for buying 10 ships on credit (cost Rs. 24 crores). Further, SCI has booked the entire ship building capacity available with the Hindustan Shipyard and Mazagon Dock.

Shipping Act:

The Merchant Shipping Act, 1958 provides for the establishment of a National Shipping Board and a Shipping Development Fund. It also provides for the safety and the efficiency of the merchant marine and the welfare of seamen and passengers. An important provision is about the definition of au Indian ship.

There is a National Welfare Board for Seafarers to advise Government on welfare problems.

Merchant Navy Training:

The Merchant Navy Training Board advises the Government on all matters pertaining to the training of Merchant Navy Personnel. The Board is reconstituted every two years. The Transport Minister is the President, the D.G. of Shipping is the Chairman and the Deputy D.G. is the Vice-Chairman.

The Government of India have set up six training establishments for the training of merchant navy officers and ratings. The Training Ship 'Dufferin' provides pre-sea training course of two years for navigating cadets. The Directorate of Marine Engineering Training provides a four years' course for engineering cadets. The present intake is 100 cadets per annum. But efforts are being made to increase it to 150. The Lal Bahadur Shastri Nautical and Engineering College provides post-sea instructional courses for both navigating and engineering cadets and apprentices who are preparing for Ministry of Transport Certificate of Competency examinations. There is no limitation as to the intake of this institution. The Training Ships 'Bhadra', 'Mekhala' and 'Nau Lakshi' are ratings training establishments. These institutions provide a three months' course for deck, engine and saloon ratings.

In order to make the training scheme for ratings more comprehensive, the syllabus has been revised and the training period also extended from 3 to 4 months with effect from 1st April 1967. The maximum age limit has been reduced from 25 to 22 while the minimum qualifications have been raised from IV to VI standard.

There is a Trust for the award of 8 Loans Scholarships of Rs. 100 each per month to the poor and deserving cadets of the T.S. 'Dufferin' and the 'Directorate of Marine Engineering Training'. The Trust will be financed by contributions from Shipping Companies.

During the year 1968-69, 80 navigating officers and 95 marine engineer cadets passed out of the T.S. 'Dufferin', Bombay and D.M.E.T., Calcutta respectively.

The training ship 'Dufferin' is 65 years old now and has outlived the life of the average ship. Therefore it will be replaced by a new ship which is nearing completion at Visakhapatnam. This new ship will have facilities for training 250 cadets as against Dufferin's 100. It will be commissioned in 1971.

Sailing Vessels:

The Sailing Vessels Committee emphasised that if the industry were to survive, the owners of sailing vessels should be encouraged to mechanise their vessels. Government have, therefore, approved a scheme for the grant of loans for this purpose. Under the scheme, loans are being granted for mechanisation of sailing vessels of 100 tons and over upto a maximum of 75 per cent of the cost of auxiliary machinery, provided the vessels in question are considered seeworthy and suitable for installation of machinery.

Maritime Freights Commission:

A high level Commission known as the Maritime Freights Commission is in existence since 1962 to advise Government on matters relating to freight rates.

The capacity of the major ports is given below :--

The shipping conferences operating to and from the Indian coast have revised their freight rates upwards in October: (1) India-U.S.A.-Atlantic route by 5 per cent (aggregate increase since 1965 is 32.5 per cent); (2) Japan-Spain lines by 7.5 per cent; (3) Bay of Bengal-Japan-Bay of Bengal lines by 7.5 per cent (20 per cent since 1966); (4) Lines operating in Singapore and Malaysian ports to India by 7.5 per cent.

It is reported that the freight increases would have been much higher but for the persistent protests from the Government of India. However, the Indian shippers are disorganised and are not in a position to fight against the international shipping conferences.

It is soring to note that in the case of freight rates India has been discriminated against. Manganese ore exports from India to U.S.A. cost \$9 to \$10.75 per unit whereas it is much lower from Brazil (\$4.1), West African countries (\$6.15), South Africa (\$7.35) and Australia (\$2.25). Despite the fact that South Africa is farther from Japan than India is, it pays only \$4.97 (per unit) for exporting iron ore to Japan as against \$5.40 to \$7.58 India is paying. Examples of this kind are too many and cover almost all fields. As a result, our goods become coatlier in the world markets making it difficult to compete with the products from other countries.

Freight Investigation Bureau:

The Freight Investigation Bureau continued to render assistance to shippers and shipping lines in sorting out space and freight problems. To meet the spot requirements of the shippers in the Southern region, a Branch Office of the Bureau was opened in Madras in December, 1967.

At the instance of the F.I.B., the Indian Council of Arbitration has recently set up a Marine Panel of Arbitration. The Bureau is now directing its efforts towards making the shipping lines introduce a suitable clause in the shipping documents to permit arbitration of shipping disputes relating to exports from India to be conducted in India according to the Indian Arbitration Law.

The work of the Freight Investigation Bureau, had a restraining effect on the Conferences and a number of nontraditional items was accorded apecial treatment. The Bureau was also instrumental in obtaining adjustments in rates in about 500 cases during 1967-68, and 160 cases in 1968 69, assisting a number of new items of export like railway wagons, concrete mixers, motor vehicles, asbestos pipes to get a footing in traditional and new markets.

Indian Ports:

India's major ports are Calcutta, Paradip, Visakhapatnam, Madras, Cochin, Mormugao, Bombay and Kandla.

_								Capacity (in million tonnes)
	Name						Beginning of the 3rd Plan	End of the 3rd Plan	Beginning of the 4th Plan

	TOTAL				s +		 37 - 77	54.20	63 · 80

Expansion programmes are under implementation in most of the major ports. A number of minor ports are also being developed and expanded.

WOOLLEN INDUSTRY

THE capital investment in the industry including combing units has been estimated at Rs. 97 crores.

The Indian woollen industry comprises an organised sector and a wide range of decentralised sectors. The latter one represents the traditional handicraft skills in design and execution as a domestic industry and the former one represents the modern sophisticated production techniques and management.

India's 40 million sheep produce annually about 70 million lbs. of raw wool. In terms of productivity, the average yield of sheep in India works out at about 1.9 lbs. as against over 9 lbs. in Australia. Even with the modest improvement in yield, India's raw wool production can be stepped up to 90 million lbs. by 1974. About 50 per cent of the raw wool produced in India is below 40s count and a substantial part of this low quality is exported and the rest is used for the manufacture of coarser apparel and floor covering, etc.

There are combing units and spinning mills. There are composite units, in which all the three processes are carried on. There are small units in the decentralised sector using hosiery machines, powerlooms and handlooms.

In order to make adequate wool tops available from indigenous sources and save foreign exchange on imports the Indian Government issued licences for establishing wool combing units in the country. The first of such unit, the Wool Combers of India Ltd. established their combing plant in Calcutta under their original name Issac Holdens (India) Ltd. At present there are 10 commissioned wool combing units in the country with a licensed capacity of 38.8 million lbs. besides a few non-commissioned combers who are combing for self consumption. The following is the year-wise production@ of wool tops in million lbs. in the country since 1961. 1961: 5.5; 1962: 9.2; 1963: 13.4; 1964: 9.9; 1965: 11.1; 1966: 10.12; 1967: 18.18.

The major concentration is in the northern region of India. There are 96 organised units in the Indian Woollen industry. Of the 96 units, 44 units are composite mills and 52 units are spinning mills. Of the total of 96 units, 51 units are located in Punjab, representing 65 per cent of the total.

The uptodate figures of the industry's capacity are: woollen spindles 66,260; shoddy spindles 21,821; worsted spindles 140,880; and looms (including decentralised sector) 3,600.

The production figures were as follows:

Year			Woollen worsted yarn (million kgs.)	Woollen worsted fabrics (million metres)	Woollen fabrics non- wearables (million kgs.)
1965	• • •	8.3	 18-13	9-87	4.08
1966			 16.59	9.39	3-94
1967			 16.65	8.92	8.33
1968	4.4		 18.55	11.84	3.35

The index of production of woollen textile (base: 1956 = 100) which had declined from $136 \cdot 4$ in 1965 to $122 \cdot 5$ in 1967, rose to $144 \cdot 2$ in 1968.

@ Source: Wool and Woollens of India.

With a view of making the country independent of import, investigations to regenerate wool from human hair and other materials such as coarse/waste wool, were undertaken at the Defence Research Laboratory (Materials), Kanpur. The total capital outlay capable of producing 100 kg, of wool per day is estimated at Rs. 27 lakks.

EXPORTS

The total wool and woollen products which India exported stood over Rs. 26.2 crores, in 1968-69, recording an increase of 22.3 per cent over 1967-68. Exports of hosiery items jumped up from Rs. 6.20 crores to Rs. 8.99 crores. Evaluating the performance against the export target set for the year, raw wool, yarn, shoddy wool and tops have kept far from being anywhere near the targets, whereas hosiery goods, worsted and mixed fabrics and carpets have fared well in achieving well in the targets. In the case of hosiery, exports have exceeded the target.

Against this aspect, it may be pointed out that there has been a fall in the exports during the nine months period of 1969-70, (April to Dec.). Exports in this period have amounted to Rs. 17-8 crores compared with Rs. 18-2 crores during the same period in the previous year. The trend in the exports of woollen goods is indicated in the table below.

Name of the Commodity	1966-67 Value in Rs. lakhs	1967-68 Value in Rs. lakhs	1968-69 Value in Rs. lakhs
Raw Wool Woollen/worsted	683 · 09	577-54	487.58
yarn and knitting wool Shoddy wool and	1.20	0.43	1.20
Wool tops (including re-exports)	12.50	1.39	12.35

druggets and Nu-	807-45	965-85	1.065-14
mdahs			200.00
TOTAL	1,930-67	2,143.00	2,622-13

IMPORT POLICY

The production performance of woollen industry is heavily dependent upon imported raw wool and wool tops. The allocation of foreign exchange to the woollen industry, which was considerably reduced during the years 1962-66 was raised during 1966-67. The industry was allotted Rs. 10 crores of foreign exchange during 1966-67 for import against Rs. 2 crores in 1965-66. However, the industry supplemented its raw material requirements by way of National Defence Remittance licences and export promotion entitlements.

Certain policy changes in regard to wool and woollen textiles were announced in November, 1967. All imports of wool either for domestic consumption or for export purposes will be canalised through the State Trading

e

Corporation. The 20 per cent share earmarked for the worsted sector will be distributed to mills in the organised sector on the basis of their installed and recognised spindleage. The balance of 80 per cent will be distributed to various sectors in the proportion of 55 per cent for weaving, 27 per cent for hosiery and 18 per cent for knitting. Units in the decentralised sector will get a direct allotment of wool.

The trend in imports of raw wool during 1966-67 to 1968-69 is as below (Figures in Rs. crores): 1966-67: 11-49; 1967-68; 11-82; 1968-69; 11-23.

Export duty on degreased raw wool which was at the rate of 10 per cent ad valorem has been withdrawn in the 1969-70 budget and the excise duty on wool top has been levied for the first time to ensure better revenue collection.

FOURTH FIVE-YEAR PLAN

There was some increase in the production of livestock during the Third Plan. Wool production increased from 32.55 million kgs. in 1961 to 35.66 million kgs. in 1966.

The clip of Indian sheep is coarse. To produce quality stud rams of important indigenous breeds of sheep and superior exotic breeds, the programme envisages eight large sheep breeding farms with flock strength of 5,000 to 155,000 sheep, expansion and reorganisation of 15 state farms, establishment of five sheep farms, 50 sheep and wool extension centres besides the expansion of 80 such centres.

The targets of production set for the woollen cloth for the Fourth Plan period are given below:

Year	1	Million Metres
1960-61	Production	14
1965-66	Production	10-1
1968-69	Capacity Production estimated	34·6 10·0
1973-74	Production	25

PAPER INDUSTRY

INDIA ranks 20th among the paper producing countries in the world. But the per capita consumption at 3 lbs. is one of the lowest in the world.

According to the Annual Survey of Industries, paper industry in India employed productive capital of Rs. 100

crores in 1964 and the number of persons employed was 42,000. In 1968-69 the productive capital employed in this industry was estimated at about Rs. 160 crores.

The number of existing units and the proposed expansion is given below:

Media and Liner Paper)

State-wise Distribution of existing units with present and proposed capacity

States						No. of existing units	Present installed capacity (Tonnes)	No. of existing units proposing expansion	Proposed capacity for expansion
West Bengal			* *			9	122,280	4	41.996

							(6 months)

The internal demand for paper and paper products is estimated to go up to nine lakh tonnes by the end of the Fourth Plan. Accordingly the target of production has also been set up at 9.6 lakh tonnes (including the 0.6 lakh tonnes export demand) in the Fourth Plan.

Our exports have been improving steadily during the last three years and the export of paper board and other products (excluding publications) amounted to Rs. 4-7 crores in 1968-69.

NEWSPRINT

In the case of newsprint about 70 per cent of our requirements are being met by imports which costs the

country about Rs. 8 crores every year. The main supplying countries are Canada, Finland, Norway, Sweden, Poland and U.S.S.R. Internally, the newsprint is being supplied by the National Newsprint and Paper Mills Ltd. (a public sector undertaking), which is the only newsprint unit now in full production. This unit expects to enhance its production capacity from the present 30,000 tonnes to 75,000 tonnes by the end of 1970-71. The government also intends to establish two large units under the Paper and Pulp Development Corporation of India. Besides it has been proposed to start one newsprint factory in the private sector in U.P. near Gola Gokkaram Nath with a capacity of 30,000 tonnes per annum.

PETROLEUM INDUSTRY

TODAY, there is hardly an industry which does not use some kind of petroleum product. Some of the main products have the following uses.

Kerosene is used as an illuminant and a cooking fuel. Motor Spirit and Aviation Spirit are used as fuel by automobiles and aircraft respectively. High Speed Diesel Oil is used by trucks, buses and tractors. Furnace Oil is used in various industrial units including power generation. Mineral Turpentine is used as a base in paints and varnishes. Wax is used for manufacturing candles, Lubricants are used for lubricating machines. Bitumen is used in roadmaking and for insulation. Chemicals produced from petroleum sources and generally known as petrochemicals are used for industrial and agricultural purposes.

Crude oil is processed in a unit called a refinery for obtaining various products. There are hundreds of products manufactured from crude oil.

The demand for petroleum products in India has been steadily growing with the years. Between the years 1948 and 1968, the total inland demand has increased from 2.24 million tonnes to 15.81 million tonnes, representing an annual average growth rate of about 10.25 per cent.

Individual petroleum products have been showing a rise in consumption over the years. Marked increases have been registered in the consumption of products like high speed diesel oil, furnace oil and naphtha.

The per capita consumption of petroleum in India is very low. The per-capita consumption of some selected countries are given below: U.S.A. 3·38 K.L.; Australia 1·65 K.L.; Ceylon 0·122 K.L.; Burma 0·04 K.L.; India 0·03 K.L.

India's production of crude oil was about 5.67 million tonnes during 1967 and it rose to about 5.9 million tonnes in 1968. In order to bridge the gap between indigenous availability and the demand, India has to import crude oil from various countries.

During 1967 the crude throughput in refineries in India was 14-43 million tonnes. This rose to 16-1 million tonnes in 1968. A little over a third of this throughput will be based on indigenous crude. By the end of 1973, the refining capacity is expected to be about 27-3 million tonnes per annum.

OIL EXPLORATION AND PRODUCTION

At present oil exploration and production in India are undertaken by three agencies: The Assam Oil Company, The Oil India Ltd., and the Oil and Natural Gas Commission.

The sedimentary areas in India exist to some extent in practically all States of the Indian Union and the area covers about 1.04 million square kilometres. The sedimentary regions also exist in the off-shore regions of India such as off Cambay and Kutch; off parts of Gujarat & Maharashtra States, off the Coromandel coast, Palk Straite and the Gulf of Mannar and areas around the mouths of Ganges and Mahanadi rivers; areas off the Kerala coast and the Andaman and Nicobar Islands. The Assam Oil Company and the Oil India Ltd., operate within the areas allotted to them in Assam State while the Oil and Natural Gas Commission is responsible for exploration over the remaining parts of the country. Technical training institutes have been set up by the Commission to train personnel required by its Directorates and Projects, In addition, the Commission has a Research and Training Institute

at Dehra Dun. The activities of the three producing companies are briefly described below:

Assam Oil Company: The Assam Oil Company was formed as a result of the merger of the Assam Railway and Trading Co. and the Assam Oil Syndicate. Details of the above two Companies were given in the 1965-66 Directory. The current throughput of the Digboi Refinery is 0.5 million tonnes per year.

Assam Oil Company has drilled nearly 1,000 wells so far out of which nearly 600 are in operation now. The present rate of production of Assam Oil Company is of the order of 0.13 million tonnes.

Oil India Ltd.: The headquarters of the Company is at Duliajau in Upper Assam.

Oil India Ltd. has an authorised capital of Rs. 50 crores, divided into 500,000 shares of Rs. 1,000 each. In terms of an agreement signed in 1961, the Govt. of India and the Burmah Oil Company became equal partners in Oil India Ltd.

Oil India Ltd. has drilled upto Dec. 1968, 273 wells out of which 219 are oil or gas producing.

Oil India Ltd. proposed to drill 11 wells during 1969. This Company has already discovered crude oil reserves capable of sustaining an annual production of three million tons. This quantity of oil is committed for supply to Gauhati in Assam and Barauni in Bihar owned by I.O.C. and the Digboi refinery owned by A.O.C. in Assam.

OIL AND NATURAL GAS COMMISSION

The Oil and Natural Gas Commission has its Hqrs. at Dehra Dun. About 20,000 persons are employed on its staff. The Commission has eight Directorates — Geology, Geophysics, Drilling, Production, Inspection of equipment, Administration, Finance, Stores and Purchase and separate Departments of Mech., Civil and Transport, Research and Training Institute, Hind Oil Design Institute and Planning and Control Division.

Geological and geophysical surveys are carried out by the Commission in various parts of the country—Jammu & Kashmir, Punjab and U.P. foot-hills and plains, Bihar, Assam, West Bengal, Gujarat, Kutch, Rajasthan, the Cauvery basin in Tamil Nadu, the Godavari basin in Andhra Pradesh and coastal regions of Kerala and Andaman & Nicobar islands.

On the basis of results of geological and geophysical surveys, drilling has been in progress in a number of States of the Indian Union, particularly in Gujarat and Assam. As a result of this drilling, oil and gas have been found in a number of areas of which the most important are at present the Cambay gas field, the Ankleswar, Kalol and Nawagam oil fields in Gujarat, and the Rudrasagar and Lakwa oil fields in Assam. In Gujarat, commercial reserves of oil and gas have been proved and the same are being produced. In Assam the Rudrasagar and Lakwa fields, also have commercial reserves and after further drilling and testing will be put on commercial production. Up to Jan. 1969, a total of 525 wells have been drilled in Gujarat and it is estimated that these fields are capable of producing about 3.8 million tonnes of crude per annum. Based on these reserves, a refinery at Koyali, in Gujarat has been constructed which is owned by the I.O.C. and is at present operating at a throughput of about 2.75 million tonnes. Oil has been discovered by the ONGC in commercial quantity in two structures in Assam at Lakwa and Rudraeager. Trial production from Rudrasagar and Lakwa fields has commenced. 107 wells have been drilled in Assam on ONGC's Structure by January 1969.

The Oil and Natural Gas Commission produced 2.78 million tonnes of crude during 1967 and 3.08 million tonnes in 1968-69. It earned a profit of Rs. 12.78 crores during 1968-69.

The Commission entered into an agreement with the National Iranian Oil Company for exploration and production of oil in certain off-shore areas in the Persian Gulf in collaboration with AGIP of Italy and Phillips of U.S.A. Drilling is still in progress. As a result of the drilling, oil has been struck on Rustam structure and ONGC's share after production is stabilised will be about 0.75 million tonnes per year.

PRIVATE SECTOR REFINERIES

The Digboi Refinery of the Assam Oil Company produced a total of 485,615 tonnes of petroleum products in 1968. Its annual throughput during 1968 was 0.52 million tonnes.

The two private sector refineries owned by Burmah-Shell and Esso are located at Trombay near Bombay while the Caltex refinery is at Vishakapatnam. The throughput of these refineries are: Burmah-Shell 3.77 million tonnes; Esso 2.55 million tonnes; Caltex 1.54 million tonnes during 1968.

PUBLIC SECTOR REFINERIES

The first public sector refinery at Gauhati was commissioned in January 1962. The refinery produced 0.83 million tonnes in 1968. The Rumanian Government have provided the necessary technical and financial assistance for the refinery.

The second public sector refinery at Barauni in Bihar was commissioned in the second half of 1964. The initial capacity of two million tonnes has been expanded to three million tonnes since Jan. 1969.

The foreign exchange cost and technical assistance for the Barauni refinery is being met out of the Soviet credit.

The third public sector refinery has been constructed at Koyali near Barods in Gujarat and was commissioned in October 1965. Its initial capacity was two million tonnes and has been increased to three million tonnes since February 1967. The technical assistance and financial assistance has been supplied by the Soviet Union.

Cochin Refinery.—This is a participatory refinery project in the public sector, the principal collaborators with the Government being Messra. Phillips International, U.S.A. It was commissioned on 23rd Sept. 1966.

The Refinery has been designed to produce annually 2-5 million tonnes of petroleum products.

The expansion programme of the refinery is expected to complete by the middle of 1972. This programme envisages increasing the processing capacity from 50,000 barrels per stream day to 70,000 barrels. The present investment is Rs. 28 crores.

Indian Oil Corporation Ltd.—This Corporation was formed by the merger of Indian Refineries Ltd. and the Indian Oil Company Ltd. A separate division of the Corporation called the Refineries Division is looking after the two public sector refineries at Gauhati and Barauni. With effect from April 1, 1965, the ownership of the Gujarat Refinery has also been transferred to the Indian Oil Corporation Ltd. (Refineries Division) from the Oil and Natural Gas Commission.

In order to meet the additional demand for petroleum products it has been decided to increase the refining capacity to about 27.3 million tonnes by the end of 1973. The additional Refineries to come up are the Madras Refineries (commissioned in 1969 with a capacity of 2.5 million tonnes) which is a participatory project with Messrs. National Iranian Oil Co. and the American International Oil Co. while the Haldia Refinery will be built in collaboration with French and Rumanian agencies for which agreements have been signed in September 1967.

Lubrizol India Ltd.—With the growth and expansion of the petroleum industry, the demand for additives rapidly increased in the country. In order to meet this increasing demand and at the same time to conserve foreign exchange, the Government of India decided that additives should be manufactured indigenously. With this objective in view, negotiations were concluded with the Lubrizol Corporation of Cleveland, U.S.A. and on December 2, 1965 a Formation Agreement was signed. On July 20, 1966 Lubrizol India Ltd. was duly registered as a limited company. In the equity capital of the company, the Government of India holds 51 per cent and rest 49 per cent is held by the other partner.

The plant was commissioned in November 1968.

PIPELINES

Gauhati Product Pipeline.—This pipeline which is designed for the transport of petroleum products from Gauhati Refinery, was completed and commissioned in November 1964. The foreign exchange cost has been met out of ENI credit from Italy.

Barauni Kanpur/Haldia Pipeline.—This pipeline has been constructed for the transport of petroleum products from the Barauni Refinery to areas of consumption. The foreign exchange cost will be met out of ENI credit from Italy.

Gujarat Pipeline System.—The following pipelines for the transportation of crude oil, gas and products have been constructed: Cambay-Dhuvaran Gas Line; Ankleshwar-Uttaran Gas Line; Ankleshwar-Baroda Gas Line; Ankleshwar-Koyali Crude Line; and Koyali-Ahmedabad Product Pipeline. The foreign exchange cost was met out of ENI credit from Italy.

DISTRIBUTION

The consumption of petroleum products in 1968 was about 15.8 million tonnes which has been distributed through a wide distribution net-work in all parts of India.

At present the major oil distributing companies are Indian Oil Corpn. (wholly owned by the Government), Burmah-Shell, Esso, Caitex and the Assam Oil Company. These companies obtain their products from the refineries in India and also import certain amount of products for distribution.

With an annual turnover of about Rs. 400 crores, at present, the Corporation has become the largest oil marketing organisation in India. Its market participation in 1968 for major products was 43 per cent. During 1968-69 the sales of I.O.C. are estimated at about 8 million kilo litres.

Export of Petroleum Products

Export touched a new peak of 738,862 tonnes during 1969, accounting for a foreign exchange earning of Rs. 10.76 errores. Out of this, the Indian Oil Corporation Ltd. exported 456,164 tonnes of the value of Rs. 6.26 crores.

Prices

The price formulation adopted with effect from lat February 1966 on the Report of the Working Group on Oil Prices, as notified from time to time, continued to govern the pricing of petroleum products during 1969 also. A Committee set up by the Government under the chairmanship of Mr. Shantilal H. Shah, M.P., to examine and report on the pricing arrangement to be adopted in replacement of the existing arrangement, submitted its report to the Government on Nov. 1, 1969. This is under Government's examination. A new scheme of prices of petroleum products based on location of refineries was approved by the Union Cabinet on April 30, 1970 on the basis of the recommendations of the Shantilal Shah Committee. States like Assam and Bihar, situated far away from ports and now paying a higher price than coastal areas, would be the major beneficiaries of the new price arrangement.

MISCELLANEOUS

A joint committee of the Government and representatives of the private oil industry known as Oil Advisory Committee was set up by the Government of India to study problems of supply, distribution and future demand of POL products in relation to indigenous production and refining capacity. In this way, a machinery has been set up for close and continuous consultation between the private and public sectors on matters of common interest. Representatives from the Government and oil industry are associated with the working of this Committee.

DESERVICE

Research is being conducted in all phases of the petroleum industry. The ONGC has set up a Research and Training Instt. at Dehra Dun with the help of the U.N. for research and training in the exploration and production phases of the industry. The Indian Instt. of Petroleum in Dehra Dun was set up under the control of the Council of Scientific and Industrial Research to conduct research and training in the refining and marketing phases of the industry.

BURMAH-SHELL REFINERIES LTD.

Burmah-Shell Refineries Ltd. commenced operating a petroleum oil refinery at Trombay on January 30, 1955.

The crude oil intake of the Refinery is at present about 3.75 million metric tons per annum; the crude oil comes from the Persian Gulf area.

The Refinery manufactures motor spirit, kerosene, aviation turbine fuel, high speed diesel oil, light diesel oil, jute batching oil, fuel oil, bitumen, liquefied petroleum gas and special boiling point solvents.

The total cost of the Refinery was about Rs. 26 crores and the total number of employees engaged in the various categories at present is around 1,875.

Residential quarters for key operating staff have been provided at a short distance from the refinery, and in addition, Burmah-Shell Refineries Ltd. have paid Rs. 40 lakhs to the Maharashtra Government for the provision of houses for Refinery labour employees and their families in the Chembur-Ghatkopar ares. Other employee amenities include a modern canteen with mobile services, a medical contre and an employee sports club.

CALTEX OIL REFINING (INDIA) LTD.

The Caltex Oil Refinery is located at Visakhapatnam. Its products include petrol, Aviation Jet Fuel, Liquofied Petroleum Gas, Mineral Turpentine, Kerosene, Diesel Oils and Fuel Oils from the Refinery's flexible two-stage orude oil distillation unit, the fluid catalytic cracking unit with gas recovery facilities, the propane decarbonisation unit and treating and blending plants. Other products like Petroleum Naphtha and Asphalt are also made available.

The Refinery is capable of processing over 1.5 million tonnes of crude oil per annum.

ESSO REFINERY

The Refinery is situated on Trombay island, near Bombay, costing about Rs. 17.5 crores. The refinery is capable of running 62,000 barrels of crude oil per stream day nearly 3.1 million tons a year of crude oil.

Initially the Refinery was designed to process 25,000 B/CD of crude from the Middle East. Besides stepping up refining capacity, new products such as bitumen, jute batching oil, solvents and liquefied petroleum gas were introduced to meet the growing needs of the country and save foreign exchange. The Esso Bombay Refinery saved foreign exchange of over Re. 102 crores during its fourteen years of operation.

LUBE INDIA LIMITED

Administration Building, Corridor Road, Mahul, Bombay-74 AS.

Lube India Limited, jointly owned by Esso Standard Eastern, Inc. and the Government of India on a 50-50 basis, was formed under the terms of the Lube Refinery Agreement of September 15, 1965, with the purpose of setting up a refinery for the manufacture of lubricating oil base stocks.

The authorised capital of the Company is Rs. 5.5 crores, and the issued and subscribed capital is Rs. 4.8 crores.

The Lube Refinery will manufacture 164,000 tonnes per annum of lubricating oil base stocks including 17,000 tonnes per annum of transformer oil base stocks.

The lube base stocks and the transformer oil base stocks will be distributed as follows:—

- Fifty per cent of the lube base stocks will be sent to Esso Blending Plant at Mazagaon, Bombay.
- The remaining fifty per cent of the lube base stocks will be sent to Indian Oil Blending Limited, Bombay.
- The transformer oil base stock will be sent to the neighbouring Special Oils Refinery of Power Cables.

When in full operation, the Lube Refinery will save for the country foreign exchange to the extent of approximately Re. 6-3 crores per annum.

Chairman: M. L. Gauba; Managing Director: E. D. Gray.

PLASTICS INDUSTRY

THE principal plastics producing countries are the U.S.A., Britain, Germany, Japan, France, Italy and the U.S.S.R. The Indian plastics industry was developed after the Second World War and it is centred mostly in the areas of Bombay, Amritsar, Bangalore, Delhi, Kanpur and Madras. There are over 200 organised units in addition to numerous smaller units in the small-scale and cottage industries sector.

A major part of the processing section of the plastics industry is in the small-scale sector. Its contribution towards exports has also been considerable. In fact, in the first seven months of 1968-69 (April-October), the small-scale sector accounted for one-third (Rs. 1-07 crores) of the total value of exports of Rs. 3-04 crores.

The articles now manufactured, cover a wide range of household consumer and utility items, electrical accessories, telephone equipment, packing materials, spectacle frames, hand-bags, gramophone records and wide varieties of other such items. One of the sensational uses of plastics was made in the world's first colour-printed plastic news-sheet which appeared on Italian news-stands.

In spite of the impressive growth of the plastics industry, the per capita consumption of plastics in India has been meagre. At 0.1 kg. it compares very poorly with that of 32.8 in West Germany, 29.5 in the United States, 16.7 in Japan, 16.4 in France, 15.8 in Britain and 14.6 in Italy.

India, also occupies a low rank in the production of plastics and resins in the world (Table I below).

TABLE I PRODUCTION OF PLASTICS AND RESINS

(in '000 metric tons)

Year		U.S.A.	U.K.	U.S.S.R.	Italy	India	France	Germany, Fed Re- public of	Germany Eastern	World Total
1958	* 1	 2,113-3	397-9	258-0	181.7	3+4	231+6	622.2	99-5	4,660

Source: Statistical Year Book (U.N.O.-1967).

† Data not strictly comparable with previous year.

Note: The data refer to the production of the thermoplastic and thermosetting resins and plastic materials obtained by chemical transformation of natural organic substances or by chemical synthesis.

Production of plastics during the Third Plan, though envisaged to reach 74,000 tonnes, amounted to only around 37,000 tonnes due to many unfavourable reasons, such as armed conflicts with Pakistan and China, failure of the monsoon, etc. The production of plastic raw materials which amounted to 17,628 tonnes in 1962 increased to 37,189 tonnes in 1965 (20,328 tonnes in 1963, and 29,307 tonnes in 1964). A break-up of the production of plastic raw materials during 1966, 1967 and 1968 is shown below:

(Production in tonnes)

Raw material	1966	1967	1968 (Estimated)
P. F. Moulding Powder U. F. Moulding Powder	3,823 1,127	3,750 1,342	4,700 1,500
Melamine formalde- hyde powder	60	51	60

In tonnes

Raw material		1966	1967	1968 (Estimated)
Polystyrene		5,791	5,591	6,500
L. D. Polyethylene		14,129	9,751	17,000
H. D. Polyethylene		-		5,000
P. V. C. Resin		10,796	13,611	14,000
C. A. Acetate	9.4	692	1,000	900
Total		36,418	35,096	49,660

The plastics industry contributes in a large way to the exchequer by way of excise duty which at Rs. 1.6 crores in 1962-63 was expected to reach Rs. 14 crores in 1968-69. It amounted to Rs. 10.5 crores in 1967-68 (Table below):

Rs. lakhs

	Year	9		Excise Duty Collected
1961-62				 111-0
1962-63	4.1			 157.7
1963-64				 249-5
1964-65		1.0	1.1	 540-1
1965-66			0.1	 584 - 2
1966-67	4.4		4.9	 666-7
1967-68				 1,050-0
1968-69 (estimated)		• •	* *	 1,400.0

The import policy for the year 1968-69 continued to be need-based and production-oriented. The import of plastic raw materials since 1962-63 is given below:

		Imported					
Y	ear	Quantity tonnes	Value (Rs. lakhs)				
1962-63		 19,506	6-48				
1963-64		 12,704	4.71				
1964-65		 16,305	6 · 10				
1965-66		 14,593	5.80				
1966-67		 11,795	6-27				
1967-68	P 4	 32,158	13 · 16				
1968-69		 29,652	13.54				
11 month	a)						

Plastic goods exported from India include fountain pens, spectacle frames, combs, beads, bangles, poly-line jute

bags, PVC products, PVC rubber cloth, etc. A trend in the exports of plastic goods is given below:

		Yea	r			Plastic goods exported (Rs. erores)
1965-66			4.6	d 2	of 10	2.7
1966-67		0.4	- 1	4 0		3.8
1967~68	0.0		4.0		4.1	3.3
1968-69	44 1	4.4	6.0		4.1	6.2
1969-70		1.4	* *			4.5
six mont	hs)					
1970-71		ted)				12.0
1973-74	39	,				20.0

Capital Investment: It is estimated that, at the beginning of the new Fourth Plan, capital investment in raw materials section will be of the order of about Rs. 80 cores and in the processing sector about Rs. 25 crores. In order to build up an additional capacity of 1,40,000 tonnes by 1973-74, an investment of about Rs. 70 crores may be necessary, of which about Rs. 20 to Rs. 25 crores may be in the form of foreign exchange. Proportionate expansion in the processing sector may need additional investment of about Rs. 20 to Rs. 25 crores.

Consumption and Demand: Consumption of plastics in India, compares very poorly with other leading plastics producing countries in the world. Consumption of plastics in 1968-69 has been estimated at 76,000 tonnes against 52,000 tonnes in 1966. The licensed capacity of raw materials (1969) stood at 1,08,490 tonnes against the installed capacity of 1,57,870 tonnes.

Demand for plastic raw materials by 1973-74 is expected to reach 2,34,200 tonnes per annum (Table below):

3	Name of selected raw	Demand (tonnes per annum)			
	materials —	1968-69	1973-74		
1.	P. F. Moulding powder	4,000	7,000		
2.	U. F. Moulding powder	1,800	4,000		
3.	U. F. Resins	5,500	8,000		
4,	Phenolic resins (includ-	,

STEEL INDUSTRY

THE Indian Steel industry consists of basic producers who convert iron ore into steel and re-rollers who manufacture finished steel from billets or scrap. The main producers in the country are (1) Hindustan Steel, (2) Tata fron and Steel, (3) Indian Iron and Steel and (4) Mysore Iron and steel.

The steel works of TISCO commenced operations at

Sakchi in 1908. Later in 1918, Indian Iron and Steel started operations at Haripur. In 1921 Mysore Iron and Steel came into existence at Bhadravati. The largest steel producing unit in India viz., Hindustan Steel was established in 1954, in the public sector.

Rapid strides have been taken in the field of steel production in recent years.

Notable success has been achieved in the exports of iron and steel and this is the largest foreign exchange earner among the non-traditional items. India exports for an and steel to as many as 55 countries. Exports in 1966-67 amounted to Rs. 20 crores, in 1967-68 Rs. 52·5 crores and in 1968-69 it was about Rs. 70 crores.

Imports of iron and steel and ferro alloys in 1966-67 amounted to Rs. 77.8 crores and in 1967-68 Rs. 92.7 crores. In 1968-69 it was expected to be around Rs. 70

Details of the major iron and steel manufacturing units are given below:

The demand, production and availability (at 90% capacity utilisation) for the end of 4th and 5th Plans are as follows:

(Million tonnes)

Hindustan Steel: Hindustan Steel is the largest corporate unit in India. Total assets at the end of March 1968 amounted to Rs. 1,098 ereres. Equity capital was Rs. 502 ereres and Government leans Rs. 521 erores.

HSL owns three main steel plants at Rourkela, Bhilai and Durgapur, an alloy steel plant at Durgapur, a fertilizer unit at Reurkela and coal washeries (For more details see article "Government Industrial Undertakings.")

Tata Iron and Steel: The factory and township are situated at Jamshedpur in Bihar. Total assets of the company at the end of March 1969 aggregated Rs. 175 crores. The present installed capacity is for the production of 20 lakh ingot tennes (i.e. about 15 lakh tennes of saleable steel). The total production of saleable steel in 1968-69 was 14.7 lakh tennes. The company is expanding its coal raising facilities. The production of clean coal is expected to reach 3 lakh tennes soon.

Indian Iron and Steel: The works are situated at Burnpur and Kulti in Asansol district, West Bengal. The Burnpur township is also owned by the company.

Total assets at the end of March 1969 amounted to Rs. 116 crores. The installed capacity is for 10 lakh ingot tonnes. Expansion schemes are under way for raising the capacity to 13 lakh tonnes. Production of saleable steel in 1968-69 was 6-4 lakh tonnes.

[·] Provisional as the production of the units which have not supplied data has been estimated.

BOKARO STEEL

Bokaro Steel plant is situated at Maraphari in Dhanbad district, Bihar. (See under article "Government Industrial Undertakings" for details).

NEW PLANTS

The Prime Minister, Mrs. Indira Gandhi announced in Parliament on April 17, 1970 that three new steel plants would be set up in the South—one each in Andhra Pradesh, Mysore and Tamil Nadu. The Andhra Pradesh and Mysore plants will be located in Vishakapatnam and Hospet respectively and will produce mild steel, while the Tamil Nadu plant to be set up in Salem, will produce special steel. Work on all the three plants will start during the Fourth Plan period and these will be based on Indian designing and will be built wholly by Indian engineers.

Re-rolling Industry

The steel re-rolling mills are a complement to the main steel works which produce iron and steel in basic shapes and sizes. The re-rolling mills shape these products further into new sections by rolling. For this purpose they take in billets. There are also re-rollers who use re-rollable scrap. The production range of re-rolling industry includes bars, high structurals, re-inforcement rods, wire-rods, hoops, window bars, railway equipment and electric furnace special steels.

There are at present nearly 250 billet or scrap-based re-rolling mills in the country, of which 15 are in the organised sector. Production of these units in 1967-68 came to 6.55 lakh tonnes. In addition to this, there are about 300 units in the small sector.

The annual capacity of the re-rolling mills on two-shift basis is 469 lakh tonnes, comprising 276 lakh tonnes billet re-rollers, 73 lakh tonnes scrap re-rollers and 120 lakh tonnes other mills.

A technical committee appointed by the Government in 1966 had reported that, taking the overall capacity in the country as a whole, there was no scope for creation of new re-rolling capacity. Government has accepted this recommendation. However, proposals to set up new mills in deficit areas are considered on merits.

Wire Drawing Industry: In order to promote the development of the indigenous wire drawing industry for the production of special and thin wires hitherto imported, it has been decided to delicense the manufacture of special wires of all gauges and other wires thinner than 16 gauge. Indigenous capacity is now available for the production of both dry and wet type wire drawing machines. The availability of high carbon wire rods has also increased with the commissioning of the Bhilai Wire Rod Mill.

Ingot/Billets: The production of ingot/billets from scrap by using electric furnaces, together with or without continuous casting units has been delicensed. Raw materials as well as equipment are available indegenously.

Pig Iron: There are about 2,500 ferrous foundries in the country working mostly on single shift basis with an aggregate capacity of 240 lakh tonnes of castings.

During 1967-68, 122 lakh tonnes of pig iron was produced for sale exports amounting to 6.27 lakh tonnes. During the first nine months of 1968-69, total production was 109 lakh tonnes and exports 8.0 lakh tonnes. The demand for pig iron in 1969-70 was expected to be 113 lakh tonnes. As against this, the approved capacity stood at 396 lakh tonnes, the integrated steel works accounting for 191 lakh tonnes.

Iron Casting

(i) Malleable Iron Castings

The present licensed capacity in the organised sector of the industry is 1·22 lakh tonnes, of which a capacity of 23,800 tonnes has been installed. In addition to this, a capacity of 46,070 tonnes has been covered by foreign exchange allotments.

The main items produced by the established malleable iron foundries are automobile castings, pipe fittings, railway components, insulators and jute mill spare parts.

(ii) Grey Iron Castings

Demand for grey iron castings is quite high, forming 95 per cent of the total demand for iron castings. However, production is comparatively low.

The total licensed capacity is 6.86 lakh tonnes of which a capacity of 6.24 lakh tonnes has been installed. Production of iron castings in 1967 was 2.83 lakh tonnes and in 1968, two lakh tonnes.

DEMAND FOR IRON CASTINGS IN 1970-71

('000 tonnea)

			,	OOO COMINOR
Non-pipe castings				
Grey iron castings	4.0			2,257
Ductile and alloy iron		8.6	4.6	8
Malleable iron castings	**	**		25
Total	**	4.0	• •	2,290
Pipe castings				
Cast iron spun pipes	**			220
Vertically-cast pipes		* 1	* +	180
Total	0.0	4.6	p 0	400
Grand Total			4.4	2,690

Eight major steel pipe manufacturing companies are (1) Ambika Steel Tubes, (2) Bharat Steel Tubes, (3) Gujarat Steel Tubes, (4) Indian Tubes, (5) Jayant Tubes, (6) Jindal Tubes, (7) Kalinga Tubes and (8) Zenith Steel Pipes. The home demand is estimated to be 175,000 tonnes, while the capacity has shot up from 225,000 tonnes to 350,000 tonnes.

The Century Spg. & Mfg. Co. proposes to manufacture seamless steel pipes. The project is estimated to cost Rs. 15 crores with an annual capacity of 88,000 tonnos. The plant is to be set up in two stages. In the first stage, the plant will have a capacity of 44,000 tonnos.

Alloy, Tool and Special Steel

The present production of alloy and special steels is far from satisfactory. In 1968-69 only 43,000 tonnes of alloy and special steels (excluding electrical steel) were produced (against a target of 2 lakh tonnes). Production of electrical steel sheets was about 28,000 tonnes during the year. The ordnance factories also produced certain quantities of alloy steels.

The present licensed capacity for manufacturing alloy steels (excluding electrical steel) is 4.33 lakh tonnes, of which only 0.5 lakh tonnes have been installed. The targets for the capacity and production in 1973.74 have been estimated at 2.94 lakh tonnes and 2.70 lakh tonnes, respectively.

Stainless Steel

The alloy steel plant at Durgapur is the main producer of stainless steel. During 1967-68 the plant produced

1,000 tonnes stainless steel. The output was expected to reach around 20,000 tonnes in 1969-70. This will be raised to 42,000 tonnes after the completion of the second stage of the plant's expansion. Madras Stainless Steels Ltd., a private sector firm has been recently given licence to manufacture 7,000 tonnes per annum.

There are at present over 400 units producing stainless steel articles, in the country. They are principally the manufacturers of utensils, dairy machinery and scientific and surgical instruments.

The estimated demand for stainless steels in 1970-71 is 21,000 tonnes.

Electrical Steel

Total production of electrical steel sheets in 1968-69 was 28,000 tonnes.

Capacity for dynamo grade electrical steel sheets at the TISCO works is being expanded from 30,000 tonnes to 42,000 tonnes. A capacity of 50,000 tonnes of hot rolled electrical steel sheets has also been established at Rourkela.

Raw Materials

Iron-ore is the chief raw material from which steel is produced. Coking coal and lime stone come next in importance. The quantity of the principal raw materials required per tonne of finished steel is given below:

Raw material		Quantity (tonnes)			
Coking Coal					1.565
Iron Ore	* *				1.913
Maganiferous ore an	d mar	ganese	ore	4.6	0.130
Blast furnace flux			P 9	* 1	0.509
Open hearth flux	4.0		4.0	2.0	0.057
Ferro alloys	0.0				0.017
Raw dolomita		4.0			0.090
Burned manganite	0.0	4.6			0.009
Refractory bricks				4.0	0-026
Other refractories					0.017
Steam coal				4.1	0-368

India has a large supply of these raw materials. There are about 25,000 million tonnes of good quality iron-ore deposits. Another advantage is that most of these raw materials are available in the same belt and naturally most of the steel plants have come up in the same area. Although the reserves are quite high, the quality of many of the raw materials is not satisfactory.

TEA INDUSTRY

TEA is the second largest single item exported from India. With a production of 401.5 million kg. in 1968 and an expected production of 415 million kg. in 1969, the country is the leading producer of tea in the world. Also, in terms of area and yield, India ranks first among any other tea producing country. Table I below gives various details pertaining to the industry.

Despite higher production each year, total foreign exchange earnings from tea has declined steeply on account of a fall in the unit value of exports. The table below gives a trend in the export performance since 1964:

Year	Quantity exported (Million kg.)	Value in Rs. crores	Unit value per kg. in Rs.	
1964	210-5	124 · 90	5 ⋅93	
1965	199-4	114-97	5.77	
1966	179-2	137 - 52 (98 - 84)	7 · 67 (5 · 52)	
1967	213.7	189-04 (120-02)	8.85 (5.62)	
1968	208-4	186-48 (105-70)	7.99 (5.07)	
1969	176-0*	130-00*	7.50	

Note: - Figures in brackets relate to values in pre-devaluation Rupees. * Estimated.

On financial year basis also exports of tea have registered a decline during 1968-69. The total quantity of tea exported during 1968-69 was 200-8 million kg. compared to 203-3 million kg. in 1967-68 and 190-4 million kg. in 1966-67. The foreign exchange earnings during 1968-69, 1967-68 and 1966-67 in pre-devaluation rupees were Rs. 99-37 crores, Rs. 114-41 crores and 102-26 crores respectively. The shortfall in exports during 1968-69 is thus much smaller than on the calendar year basis. In terms

of money, India earned about Rs. 15 crores (pre-devaluation) less in both calendar year as well as financial year basis but the decline in quantum of exports on the financial year basis has not been as steep as the decline in foreign exchange earnings.

During 1968-69 there was a big set-back in our exports to the U.K. and U.A.R. As against this, exports to other countries were maintained at a satisfactory level (Table below).

Countries			exported 00 kg.)	Value in	Rs. ereres
		1967-68	1968-69*	1967-68	1968-69*
U.K		1,06,491	95,526	99-81	76 - 46
U.S.S.R.		20,029	20,964	19.80	19-38
U.A.R		14,222	10,459	9 · 20	6.32
U.S.A	. 4	8,302	7,834	6.83	5.66

TOTAL		2,03,333	2,00,824	180-19	156-51

^{*} Subject to revision.

The internal and external prices during 1967, 1968 and 1969 are given in the following table:

		Ann	ual average price	Annual average prices in sh. and pence per kg.							
		Cale	ntta	Cochin		North India		South India		Tota	l India
Yea	r	Leaf	Dust	Leaf	Dust	Sh.	d.	Sh.	d,	Sh.	d.
1967 1968 1969*	**	5-98 5-47 6-68	4·86 5·03 5·16	5·79 5·26 5·16	5·04 4·67 4·70	9 8 6	10·48 11·28 10·30	7 7 5	9·85 9·17 6·79	8	8·19 9·89 n.a.

[·] Prices are upto September 19, 1969 for Calcutta and Cochin markets, and as at the end of July 1969, for London auctions.

Budget Proposals

Among the various budget proposals for 1970-71, export duty on tea, has been abolished altogether. Excise on loose and package tea has been raised, with ad hoc rebate on exports at rates varying with price. Abolition of export duty will result in a loss of Rs. 9-75 crores for the financial year 1970-71.

The excise duty on tea is being raised in order to release larger quantities for export particularly of quality teas. There will be no increase in the duty on loose tea produced in Zone one and only a marginal increase of 10 paise per kilo on tea produced in Zone two. For other zones, the increase varies from 45 paise to one rupee per kilo. After allowing for the rebate on export, there will be an additional revenue of Rs. 7.87 crores which will be more than offset by the loss in revenue from abolition of the export duty on tea.

Internal Consumption

Internal consumptior of tea in India has been steadily rising since 1953-54, although, there has been a decline in 1967-68. Internal consumption in million kgs. during 1953-54 to 1968-69: 1953-54 (82·7); 1962-63 (135·7); 1963-64 (140·7); 1964-65 (149·0); 1965-66 (166·0); 1966-67 (185·4); 1967-68 (180·7) (provisional); 1968-69 (192·8) (estimated).

On calendar year basis also, home consumption increased from 128·2 million kgs. in 1960 to 197·8 million kgs. in 1968. Thus, if we take a conservative estimate of 6 per cent rise in internal consumption, the following increases in internal consumption in million kgs. can be estimated over the coming years: 1960-70 (204·4); 1970-71 (216·6); 1971-72 (229·6); 1972-73 (243·3).

TEXTILE INDUSTRY

THE cotton textile industry is the largest single industry in the country. India holds the third place among the countries of the world in its capacity for yarn and cloth based on mechanical equipment and stands second on the basis of cotton consumption.

In addition to providing means of livelihood for nearly 10 million handloom weavers, the mill industry provides direct employment to nearly 7,59,000 workers.

The total number of mills in the country in June 1969 was 650, the number of spindles installed 17-52 million,

of looms 2,07,867. The average number of workers employed daily in all shifts was 7,43,131 and the consumption of raw cotton (in bales of 180 kg. each) was 5,13,757.

The paid up capital is estimated at Rs. 190 crores and the annual value of the output amounts to Rs. 800 crores.

FOURTH FIVE-YEAR PLAN

The Planning Commission has decided that the Fourth Five-Year Plan is to start from 1969 and the draft has been approved with certain modifications.

[†] As on 31st March of each year.

The fellowing table gives details about the distribution of mills in India as in June 1969.

State/ Union Territory			No. of mills in existence	Spindles installed	Looms installed	Average No. of workers employed daily in all shifts	Consumption of raw cotton (In bales of 180 Kgs.)

PRODUCTION

The actual production of yarn and cloth by the mills sector is as follows:-

	Von	Year		Yarn in			Cloth in '0	00 metres		
	7.002		'000 kg.	Coarse Medium B		Medium A Fine		Superfine	Total_	
1965				9,39,236	8,02,623	14.04.025	18,40,351	2,19,540	3,20,927	45,87,466
1966				9,00,980	7,19,592	11,30,587	18,61,860	2,08,867	3,17,977	42,38,883
1967				8,96,417	6,82,844	11,44,077	17,68,139	1,70,198	3,32,278	40,97,536
1968			• •	9,60,912	7,08,852	12,74,299	18,22,157	2,07,858	3,52,925	43,66,091

The year saw lower production both in cotton cloth and yarn—the former dropping 3.9 per cent from 4,366 million metres in 1968 and the latter by 1 per cent from 961 million kg.—in contrast to the rise during 1968 over the previous year of 269 million metres in cloth production and 65 million kg. in yarn manufacture.

Despite the lower production, cloth stocks with the mills at the end of 1969 stood at only 11,000 bales lower than the 1968 end figure of 2,68,800 bales and yarn stocks fell to 85,800 bales from 1,28,100 bales during the same period.

The cotton yarn exports in 1969 had leapt from 165.4 lakh kg. valued at Rs. 10.68 crores to a record 338.3 lakh kg. valued at Rs. 24.39 crores.

Cotton piece-goods exports fell from 4,751 lakh sq. metres to 4,127 lakh sq. metres, bringing in Rs. 4·12 crores less than in 1968 despite better price realisation. British and Indonesian imports declined. But European countries, especially West Germany, France, the Scandinavian countries and the East European countries purchased more Indian cloth.

During 1968, the cotton consumption by mills was $62\cdot21$ lakh bales of 180 kgs. each of which, Indian cotton accounted for $64\cdot59$ lakh bales and foreign cotton for $7\cdot62$ lakh bales.

Unsold stock of cloth with the mills at the end of 1968 was 403 million metres equivalent to about 34 days' production. The stock shows a fall from the level of 384 million metres at the end of 1967.

Third-Shift Working: The daily average number of spindles worked in each of the 3 shifts during 1966 to 1968 are as shown in the table given below.

					f)	III WILLIAM
				lat Shift	2nd Shift	3rd Shift
1965				13.3	13-4	10.0
1966	- 1		4.0	13.3	13.2	9·9 11·1
1967 1968				13·9 13·5	14·0 13·9	11-1
1900	6.7	8.9	1.7	10.0	,,00	

So far as looms are concerned the shift-wise working is given in the table below:

Daily average number of looms worked in

			lat Shift	2nd Shift	3rd Shift
1965 1966 1967 1968	* * * * * * *	a o	1,84,822 1,81,474 1,82,008 1,75,306	1,80,326 1,76,478 1,77,753 1,71,856	61,599 63,396 66,242 70,123

COMMITTEE FOR COTTON TEXTILE INDUSTRY*

The Government of Maharashtra has appointed a Committee under the chairmanship of Mr. S. V. Kogekar, in October 1967 to make a comprehensive enquiry into the present situation of the Cotton Textile Industry in the State.

The terms of reference of the Committee are: (i) To examine fully the present situation of the Cotton Textile Industry in the State in all its aspects; and (ii) To make a report to the Government on: (a) Reasons for its present state; and (b) Measures to be taken to put it on an even keel.

The work of the Committee is over and its report has been submitted to the State Government.

CENTRAL WAGE BOARD

The majority recommendations of the second wage board for the cotton textile industry have been accepted by the Union Government.

It has been decided that the wage board's recommendations should remain operative for five years, with effect from January 1, 1969. During this period, there should be no claim for a revision of matters covered by the recommendations in those establishments which implement these fully. Agreements for implementation of the recommendations of the Wage Board are reported to have been arrived at in Gujarat, Maharashtra, Tamil Nadu and West Bengal where the bulk of the industry is located.

COTTON

The statistical position of cotton in India during the season 1966-67 is summed up in the following table:---

(In lakh bales)—(Bales of 180 kg.)

tocks carried ove	er fro	m the	Dre-	
vious year (India				10.85

EXPORTS

The following table gives the sea-borne export trend of all cloth:—

	Twist a	nd Yarn	Cloth		
Year	Million Kgs.	Ra. in crores	Million mts.	Rs. in orores	
1965 (Jan. to Dec.)	12.76	6.03	506.8	46.76	
1966*	16-20	8-69	424-33	49-14	
1967 (Do.)	12.39	8-15	409-56	59-37	
1968 (Do.)	16-71	10-92	475-10	66.76	

[•] Value is expressed in terms of devalued Rs. from June 1966.

Cotton Textiles Export Promotion Council: The Cotton Textiles Export Promotion Council is an autonomous body incorporated under the Companies Act. The Council is a non-profit making organisation and was set up in 1954 for the promotion of exports of mill-made cotton yarn and piece-goods, cotton manufactures and all hosiery and ready-made garments.

VEGETABLE OIL INDUSTRY

I NDIA is one of the most important producers of oilseeds in the world and is consequently a large producer of vegetable oils as well as an exporter of oils and oilseeds.

The following figures show the average production of different varieties of oilseeds in recent years along with their share in world production:—

	Average Indian Production (lakh tons)	As percent- age of world Production
Groundnut	 43.54	34
Castor seed	 0-98	15
Linseed	 4-10	13
Sesamum	 2.88	34
Rape and mustard	 13-80	12

The following table gives the yield in thousand tonnes—of oilseeds during the seasons 1963-64, 1964-65, 1965-66, 1966-67, 1967-68 and 1968-69:

		1963-64	1964-65	1965-66	1966-67	1967-68	1968-69
Groundnut		5,298	5,888	4,230	4,411	5,829	4,476
Castorseed		102	108	80	110	107	111
Linseed	4.5	379	503	335	260	398	352
Sesamum		439	493	425	416	422	415
Rapeseed and Mustard	+ 4	915	1,466	1,276	1,228	1,482	1,572
Total		7,133	8,458	6,346	6,425	8,238	8,926

Between 1966 and 1969, the acreage under groundaut increased by just two per cent due to a sharp fall in the area under this important cash crop in 1968-69. Average production of groundaut during the three years ending 1968-69 showed a modest decline compared to the average production in the Third Plan mainly because of a sharp fall in output in 1966-67 and 1968-69. Per hectare yield of groundaut was the highest at 828-3 kgs. in 1958-59 and the lowest at 604-3 kgs. in 1966-67. The main groundaut producing states are Gujarat, Tamil Nadu, Maharashtra, Andhra Pradesh and Mysore.

The All-India Final Estimate of Groundnut for 1966-

67 has put the area under the groundaut crop at 7,299 thousand hectares.

The all-India first estimate of 1967-68 put the area under groundnut crop at 7,553.5 thousand hectares. This shows an increase of 4.9 per cent over the previous year.

The increase in the area under groundnut during the year 1967-68 has been mainly in Andhra Pradesh, Punjab and Rajasthan and is attributed to favourable climatic conditions at the sowing time. This increase in area has, however, been offset to some extent by a small decline reported from Madhya Pradesh and Maharashtra.

ESTIMATED PRODUCTION OF OIL FROM THE FIVE MAJOR OILSEEDS

('000 Tonnes)

		1960-61	1961-62	1962-63	1963-64	1964-65	1965-66
. Groundnut		1,091	1,156	1,093	1,190	1,369	910
Rape and Mustard	4 4	416	416	399	271	456	391
. Sesamum		99	116	148	126	153	127
Linseed		117	138	128	111	150	95
. Castor		37	38	35	36	38	25

The oilseed crushing industry (excepting cottonseed oil industry) continued to be on the banned list in view of the large installed idle capacity in the country and to safeguard the interest of the village Ghani Industry.

In March 1956, there were 2,097 oil mills registered under the Factories Act. The total crushing capacity of the mills in the country was estimated at 56 lakh tons per annum in terms of oilseeds.

There were, besides, about four lakh village ghanis in the country with an annual crushing capacity of about seven lakh tons of oilseeds. Thus the total crushing capacity was estimated at 63 lakh tons in terms of oilseeds. The total output of oilseeds in recent years has been of the order of 65 to 70 lakhs tons.

The capital invested in the organised industry is estimated at Rs. 24.4 crores and the number of workers at 43,580. The most important oilseeds consumed in large quantities for the production of oils are groundnut, linseed, rape and mustard, castor seed and sessmum

seed. Small quantities of cottonseed, mohwa, and copra are also crushed.

The Feurth Plan target for oilseeds was put at 10.5 million tonnes as against the Third Plan target of 9.8 million tonnes and the actual output of 6.53 million in 1960-61.

IMPORTS AND EXPORTS

The following table shows the total value of imports and exports of oil of some varieties:

(Value Rs. lakks)

			(10,000	
	-		1967-68	1968-69
4.2		* *	14.7	14.8
* *	* *	* *	_	
		6 B	15.5	2.6
4.9	* *		0 1	989-0
1.5	* *	* *	22.0	204 -
	**	** **		

The consumption of edible oils and vanaspati was said to have gone up during the Second Plan. Assuming the higher consumption at 8.8 lb. the total requirements

of vegetable oils and vanaspati for 400 million people had touched about 1.62 million tons by 1960-61.

PER CAPITA AVAILABILITY OF EDIBLE OILS

(Kgs. per year)

						Groundnut oil	Rape and Mustard oil	Occonut oil	Sesamum oil	Total
962-63	2.0					2-34	0-84	0-50	0.31	3-99
963-64		4.5	4.4		p 4	2.40	0.57	0-45	0-29	3-71
964-65				4.5	4.1	2-87	0.91	0.41	0-31	4-50
965-66			4.1		++	1-94	0-77	0-39	0-25	8-35

Pins Oil: The first pine oil factory in the country has been started at Hoshiarpur in the Punjab. It produces pine oil, dipentine and pine tar. This factory is claimed to have resulted in the saving of foreign exchange to the tune of Rs. 30 to 40 lakhs annually.

Palmarosa Oil: India ranks first among nations producing Palmarosa oil, and is the chief supplier of this important raw material for perfumery manufacture, earning foreign exchange worth Rs. 30 lakhs annually by way of its export alone.

To ensure quality control, Government have established a special laboratory at Bombay for AGMARK grading and have banned the export of ungraded Palmarosa oil.

COTTONSEED

Special efforts are being made to develop the cottonseed oil industry on modern lines. From eight units equipped with delinting and debulling machines in 1955, the number has grown to 20 units in 1965 with an annual installed capacity of 3 lakh metric tons in terms of seeds. The production in 1964 was 25,000 metric tons in terms of extracted oil. Among the steps taken to increase the consumption of cottonseed oil by vanaspati factories is a reduction of excise duty. Export of cottonseed oil as well as decorticated cottonseed oilcake was licensed freely. The policy of not licensing new mills or expansion of existing oil mills has been continued. The services of a T.C.M. expert were made available to the crushing industry to advise the crushers on the production and grading of cottonseed linters.

In regard to solvent extraction of oilcakes, there are at present 32 units, with an annual capacity of 547,500 tons in terms of oilcakes.

The rise in output was due to the commencement of operations by three more units. Considerable foreign exchange is already being earned by this industry by export of deciled meal to U.K. and other countries.

Decorticated cottonseed cake has an export angle. Efforts are being made by the Government to increase its production and necessary assistance is being rendered to this industry. Manufacture of compound feeding stuffs is being encouraged. It is expected that there will be significant increase in the production of compound feeding stuffs as a result of the steps taken to increase this industry.

The following table gives the record of production achieved by the industry

	Year		Cotton seed oil in tonnes	Decorticated Cake Extrac- tions in tonnes	Undecorticated cake in tonnes	Linters in tonnes	Value in crores		
1966					57,500	1,41,500	88,000	5,000	34 · 52
	* 1		* *	* *	67,000	1,35,000	1.69.000	5,600	32-88

VANASPATI

The Vanaspati Industry though a minor branch of the Vegetable Oil Industry is one of the most highly organised and efficient industries.

In 1959, there were 58 factories with an annual production capacity of about 446,220 tons. Out of these, one is the Government Hydrogenstion Factory at Kozhikode having an installed capacity of 3,000 tons per annum. Besides, there are seven factories with an annual rated capacity of 33,000 tons. It is the Government's policy not to permit any further expansion of the industry as the present capacity is adequate to meet all the requirements of 4 lakh tons. However, limited expansion of capacity is being allowed to small and uneconomic units

for enabling them to function more economically. Additionally, the setting up of a few units in the cooperative sector is also being considered.

In February 1966 the Government had curbed the production of Vanaspati at 80 per cent of the output in 1965. The control was removed on Sept. 5, 1967, but control on prices of Vanaspati continued. The removal of price control in June 1968 was short-lived and the statutory control was reintroduced on Sept. 6, 1968. Apart from mobilising internal supplies, the Government has decided to import 52,000 tonnes of soyabeans from U.S.A. If the present trend of production is allowed to continue the production in 1970 will not be more than three lakh tonnes against 4.82 lakh tonnes in 1969.

		Quantity (Tennes)	Value (Rs. lakhs)
1960-61	 	 66	103
961-62	 	 33	56
962-63	 	 30	45
963-64	1 P	 41	62
964-65	 	 <u>—</u>	19

The ban on export of vanaspati and refined vegetable oils, as of all other edible vegetable oils, imposed in June 1964 continues, but limited exports of branded vanaspati have nevertheless been permitted as a special case in small instalments so as to minimise dislocation of our normal markets to the extent possible. Thus, only 391 tonnes of vanaspati were exported during 1967 mainly to the Middle Eastern markets, as against the export of 956 tonnes in 1966.

The net capital invested in the industry is about Rs. 22 crores. Bosides 10,000 workers directly employed, the industry provides indirect employment for nearly 60,000 workers.

Edible oils constitute the chief raw material of the industry.

The table below summarises the programme of development in the Third and Fourth Plans:

(Tona)

				1960-61	1965-66	1968-69	1973-74
Installed Capacity				434,000	550,000	650,000	
Production	* *	0.0	* *	340,000	401,000	450,000	60,000

With a view to augmenting supplies of raw oils for the vanaspati industry, imports of 36,20,869 kgs. of soyabean oil from the U.S.A. under P.L. 480 were arranged during the period April 1967 to March 1968. 6,000 tonnes of sunflowerseed oil were received as a free gift from the U.S.S.R. in 1967 and the proceeds thereof were earmarked for the relief of people in the drought-affected areas.

Lemongrass Oil: Lemongrasa is chiefly grown in Kerala. India exports about Rs. 2 crores worth of lemongrasa annually to countries like the U.K., West Germany, U.S.A., Switzerland, Japen and Italy. Lemongrass oil is mainly used for the manufacture of synthetic vitamin 'A' and as a base for some perfumes for the soap-making industry.

IMPORT AND EXPORT TRADE

General Indices of Exports and Imports (1958 = 100)

w-rid		1966-67*	1967-68	196869
Quantity Ind	ex:			
Exports		119	122	142
Importa	9.6	149	166	151
Price Index:				
Exports		169	169	166
Imports	4.5	150	136	141

*These indices are based on the averages of index numbers for the ten months from June 1966 to March 1967. Consequent to devaluation of the Indian rupee on June 6, the figures for April and May have not been taken into account as they are not comparable with the post devaluation figures.

BALANCE OF PAYMENTS

India's balance of payments position has been described in the Report on Currency and Finance (1968-69) of the Reserve Bank of India as follows:

Over the year 1968-69 the foreign exchange reserves increased by Rs. 38·1 crores, after repurchasing Rs. 58·5 crores from the I.M.F. and refunding Rs. 11·3 crores of the special deposits placed by the I.B.R.D. under the debt relief arrangement, Last year, on the other hand, reserves, which had shown a rise of Rs. 60·2 crores, had benefited from a net purchase of Rs. 24·4 crores from the I.M.F. and special deposits of Rs. 34·6 crores by the I.B.R.D. towards debt relief. Exclusive of these transactions and the depreciation of sterling assets, following

the devaluation of the pound in 1967, the increase in reserves during 1968-69, would amount to Rs. 107-9 crores as against a rise of Rs. 11-8 crores last year. The marked improvement in reserves during 1968-69 was the result of both a sizeable reduction in the free foreign exchange outlay on imports, particularly the outlay on foodgrain imports, and an increase in exports. The improved domestic supply position, following the better performance in agriculture helped reduce the outlay on imports of foodgrains and agricultural raw materials and increase the export availabilities of important agriculture-based exports.

Overall Trends: The discussion in the following paragraphs relates to trends during the calendar year 1968, as detailed balance of payments data for the financial year as a whole are not yet available. The foreign exchange reserves moved up by Rs. 14.8 crores during the year, while they had increased by Rs. 40.9 crores in 1967. However, if transactions with the I.M.F. and I.B.R.D. and the depreciation in sterling assets in 1967 are excluded the reserves would show a rise of Rs. 87.4 crores in 1968 as compared with a fall of Rs. 38-9 crores in 1967. The favourable swing in the external payments position between 1967 and 1968 was mostly a reflection of the narrowing down of the trade deficit; this was due to both a reduction in imports and an increase in exports. A sizeable part of the fall in imports resulted from the decline in aid-financed imports but there was a noticeable reduction in the free foreign exchange outlay as well. This together with the marked increase in exports, particularly to countries other than East European rupee payment countries, helped to relieve the pressure on the reserves. External assistance, comprising grants, loans and com-modity assistance, continued to be a contributory factor in alleviating the pressure on the reserves; the quantum of aid utilised, however, was less than in the previous year.

Over the year 1968, the deficit on current account narrowed by Rs. 342.8 crores to Rs. 498.2 crores and the entire improvement reflected the sharp reduction in the adverse trade balance from Rs. 850.4 crores to Rs. 476.5 crores. Invisible transactions, including official transfer payment transactions, on the other hand, resulted in a deficit of Rs. 21 · 7 crores as against a surplus of Rs. 9 · 4 crores last year. The net outflow by way of unidentified transactions (covered by "errors and omissions") also increased over the year by Rs. 50 5 orores to Rs. 143 6 crores. Nevertheless, taking the current account together with the "errors and omissions", the total deficit at Rs. 641.8 crores, was smaller than that recorded last year by Rs. 292.3 crores. As in the preceding year, the total deficit was more than matched by the net inflow from capital transactions, which amounted to Rs. 656.6 crores. However, as the net inflow was on a much smaller scale than before, the accretion to the reserves amounted only to Rs. 14.8 crores as against Rs. 51.6 crores last year.

IMPORTS

Following the increase in the domestic output of foodgrains and agricultural raw materials, mainly raw jute, raw cotton and vegetable oils during 1967-68, there was a reduction in the import of these items. In addition, imports of machinery and transport equipment, iron and steel, non-ferrous metals and chemicals also declined reflecting in part the impact of the rise in the rupee costs of imports following the devaluation of the rupee and in part the progress made in the field of import substitution. Imports of fertilisers and mineral oils, however, registered a rise offsetting in part the fall in the other items. On balance, the aggregate import bill at Rs. 1,826.2 crores was lower than last year by Rs. 254.8 crores or 12 per cent.

Sector-wise, imports on both private and Government accounts declined, with the former accounting for a little more than 60 per cent of the aggregate fall. A sizeable part of the decline in the aggregate import bill reflected the fall in aid-financed imports, particularly import of foodgrains. On private account, barring imports of mineral oil, which increased by Rs. 4-9 crores, practically all the other items registered a fall, the more significant among them being machinery and transport equipment (Rs. 33.6 crores), raw jute (Rs. 31.9 crores), non-ferrous metals (Rs. 26.4 crores), chemicals (Rs. 25.1 crores), vegetable oils (Rs. 19.2 erores), iron and steel (Rs. 18.5 erores) and raw cotton (Rs. 4.4 crores). On Government account, while import of foodgrains declined by Rs. 97.8 crores, the other imports taken together increased by Rs. 11.8 crores due to the rise in imports of fertilisers (Rs. 16.6 erores) and communication stores (Rs. 13.9 crores), which was offset in part by the fall in other items.

EXPORTS

Exports, which had registered a rise in 1967, increased further by Rs. 119-1 crores or 10 per cent in 1968 to Rs. 1,349-7 crores. The spurt in exports reflected larger domestic availabilities, the stimulus derived from various promotional measures taken by the Government and the vigorous efforts made by industrialists and business men for gaining access to markets abroad. An encouraging feature of the performance during the year is that while exports to both East European rupee payment countries and the other countries showed rise, the increase in regard to the latter accounted for about 75 per cent of the overall rise in exports.

Commodity-wise, practically the entire rise in exports was brought about by non-traditional items, mainly engineering goods (Rs. 34.4 corors), fron ore (Rs. 26.0 crores), iron and steel (Rs. 27.8 crores) and other miscellaneous items (Rs. 28.2 corors). Exports of traditional items in the aggregate, continued to be around the levels attained last year but as between the different items there were noticeable changes. There was a decline in the exports of tea (Rs. 19.7 crores) and jute manufactures (Rs. 25.9 crores) which was mostly offset by the increase in a few other items, particularly, cashew kernels (Rs. 15.9 crores), cotton manufactures (Rs. 9.8 crores), old cakes (Rs. 6.4 crores) and vegetable oils (Rs. 6.9 crores).

DEVELOPMENTS IN TRADE POLICY

The trade policy remained broadly unchanged though suitable modifications were introduced to expand and diversify exports. The import policy while liberalising imports of spares and raw materials for priority industries linked the issue of import licences to export performance.

With a view to imparting a competitive edge to Indian exports, the export duties on a number of items including those on iron ore, tea, mica loose splittings, jute hessian and sacking were reduced; duties on jute wool-sacks, cotton bagging, tea packed in metal containers, light and pinhoad black pepper, raw wool and certain other commodities were computely abolished. The basic principle of cash assistance for selected non-traditional exports remained unchanged. The scheme of recognition of export houses by the Government was extended to cover business houses handling traditional products. The recognised export houses would be eligible for Government assistance from the Marketing Development Fund for a wide range of their activities; the scale of assistance was also liberalised. The Government agreed to grant loans amounting

to Rs. 5 crores to equip the jute industry for modernisation and diversification. With a view to promoting exports of capital goods and machinery on deferred payments basis, the Industrial Development Bank of India announced a scheme for providing direct financial assistance in association with commercial banks. The Union Budget for 1969-70 provided for the inclusion of cotton and jute textile industries in the list of priority industries for the purpose of development rebate at a higher rate of 35 per cent. Important indigenous raw materials required for the export production of engineering and plastic goods were made available at international prices.

Besides extending the coverage of quality control and pre-ahipment inspection, steps were taken to strengthen the inspection system and to create quality consciousness among exporters by introducing in-process quality control for certain categories of engineering goods and chemical products. During the year, the items brought under the purview of the scheme include, among others, solid woven impregnated cotton belting, vacuum flasks, sodium citrate, expanded metal steel sheet, stainless steel utensils, bicycles and their components, human hair and hair products, all types of coir door mats and specified varieties of jute cloth and bats. The preliminary work for the introduction of compulsory quality control and preshipment inspection scheme for a number of items such as curry powder, crude drugs and medicinal plants, cortain seeds, specified types of goat skins and chemicals was completed.

In conformity with the export promotion policy and consistent with the needs of the economy there was progressive relaxation during the year of the control over exports of some items like HPS groundnut kernels and HPS groundnuts in shell, potatoes, chilly powder, jute caddies, etc., while several other items, such as, synthetic musk, raw human hair, cement knitwear (woollen and

mixed) were brought under control.

The Board of Trade, reconstituted in January 1968, held four meetings during the year. It reviewed the progress of exports during the post-devaluation period and recommended a series of steps to arrest the downward trend of exports following devaluation. The other subjects discussed by the Board included: (i) export of non-traditional items - measures, performance and targets relating to engineering goods, chemicals and allied products, (ii) expansion of trade with other developing countries with special reference to Tripartite Arrangement, (iii) role of Export Houses, (iv) problems of textile industry and (v) performance of State Trading Corporation. In addition to the two committees set up on Micro-Macro Planning and on Export Policy Resolution, referred to in the last year's Report, two committees were set up on Development of Export Possibility of Agricultural Products and on Export Packaging. The draft report of the committee on Export Policy Resolution is under consideration of the Government; the work of the other committees is in progress.

The Indian Institute of Foreign Trade pursued vigorously its activities in the sphere of training, general research and marketing research. The year 1968-69 witnessed a considerable expansion in its training and research activities. The Institute organised a number of training programmes at various centres in India to impart intensive training in subjects like 'Foreign Trade', 'Export Technique', 'Overseas Salesmanship', etc.

The Institute also conducted a special training programme in International Marketing for Senior Officers of Indian Industry and Trade and nominees of developing countries of Asia and Africa. In the field of general research,

two projects viz., (i) joint industrial ventures and (ii) customs valuation techniques in selected developed and developing countries were completed while work on other projects was in progress. Apart from organising a number of seminars the Institute undertook overseas market surveys, commodity studies and export potential surveys of some of the States.

The State Trading Corporation (STC) continued to play an important role in the diversification of the country's export trade, exploring new markets, promoting long-term exports of new items, while maintaining exports of traditional items, and generally assisting private trade in exporting difficult-to-sell items. The total trade handled by the S.T.C. in 1968-69 aggregated Rs. 167 crores as against Rs. 141 crores in 1967-68. The export turnover of the STC was substantially higher at Rs. 49 crores as compared with Rs. 24 crores during the last year.

Exports by the STC fell broadly under railway equipment, agricultural products, chemicals and mineral products, engineering goods and consumer goods. The Corporation secured fresh orders for railway equipment valued approximately at Re. 11 crores from Hungary, Ceylon, Thailand, South Korea, Burma, Nigoria and Ghana. A protocol was also signed with Messrs. Machinoimport, of the USSR in March 1968 for supply of 54,000 wagons to the USSR during the period 1969-70. Among agricultural products, the Corporation made a break-through into Japan for bananas with a trial order and developed a now market in West Germany for mango pulp and mango alice. Assistance to small industries was continued to enable them to market their products abroad. On the import side, the Corporation handled imports of various items of engineering goods, chemicals, copra, soyabean oil and edible tallow. Imports of the three major commodities canalised through the Corporation viz., newsprint, art silk yarn and raw wool were being handled effectively to ensure regular supplies during the year at competitive

The Minerals and Metals Trading Corporation (MMTC) expanded its trading activities during the year. The total export turnover of the MMTC during 1968 was Rs. 77 crores as against Rs. 69 crores in 1967. Exports of iron ore by the Corporation during the year amounted to 8.6 million tonnes valued at Rs. 57 crores compared to 8.5 million tonnes valued at Rs. 54 crores in 1967. Although the closure of the Suez Canal was a major handicap to exports of manganese ore to Europe, the MMTC still maintained its exports at 1-1 million tonnes valued at Rs. 11 crores during 1968 Exports of ferro manganese showed a substantial increase during the year, from 18,000 in 1967 to 63,000 tonnes. A three-year longterm contract was concluded in August 1968 for the export of 2.6 lakh tonnes of coal and coke to Burma during 1969. The Corporation also imported steel, pig iron and non-ferrous metals

like copper, zinc, tin, etc.

The import policy for the year 1968-69 announced on April 1, 1968, while continuing the liberalised scheme for the import requirements of priority industries, linked the issue of import licences to export performance. Industrial units* exporting 10 per cent of their production in 1967-68 were given facilities to import their requirements from sources of their own choice; moreover, their applications for expansion of production capacity and for imports needed to effect such expansion were to be considered favourably. Further, an obligation was imposed on 10 specified priority industriest with export potential to export at least 5 per cent of their production. Failing this they were likely to forfeit the facilities of preferred sources of supply for imported inputs and of expansion of pro-

[•] Excluding (1) Fertilisers, (2) Pesticides. (3) Industrial and Mining Machinery, (4) Cement, (5) Tea, (6) Jute textiles, (7) Coffee, (8) Sugar and (9) Cotton Textiles

⁽⁹⁾ Cotton Textiles.

† (1) Bicycles, (2) Certain parts of bicycles, (3) Diesel engines — stationary type, (4) Certain small tools, (5) Coated and bonded abrasives.

(6) Storage and dry batteries, (7) Wire ropes, (8) Certain automobile ancillaries, (9) Drug and pharmaceuticals and (10) Paints, varnishes and enamels.

duction capacity. They would also face a probable cut in their import replenishments. The policy aimed at controlling inventory building by strengthening the link between inventories, consumption of inputs and import licensing. Priority industries were to be issued import licences for replenishment of raw materials and components consumed by them during a period of three to six months preceding their applications for import. Fresh import licences were to be issued only if the unutilised value of licences on hand was less than the replenishment claimed on the basis of consumption. Industrial units wanting to import plant and equipment of the value of more than Rs. 7-5 lakhs and steel castings and forgings of the value of Rs. 50,000 or above were required to advertise their requirements in detail in the Indian Trade Journal before they applied for import licences. Imports of 260 items were banned in view of their indigenous availability, while imports of 197 items were allowed on a restricted scale to actual users. Quotas of established importers were reduced in respect of 12 items.

Imports of sulphate of potash, sodium nitrate and raw films (35 mm. excluding sound negative) were canalised through the STC. Subsequently, imports of sulphur and X-ray films were canalised through the STC, in May and August 1968, respectively.

An open general licence was issued in September 1968 for the imports of (i) cashew-nuts, (ii) wattle extract, wattle and other bark for tanning and (iii) hides and skins, raw or salted, where the value of hides and skins was more than that of wool/hair thereon, from any country except South Africa/South West Africa, Rhodesia and Portugal for shipment on or before March 31, 1969. Other dyeing and tanning substances allowed under the earlier open general licence were not covered under this new open general licence; in November 1968 actual users were allowed to import these items.

In December 1968 licensees for capital goods were allowed to import restricted spare parts required for the maintenance of machinery against licenses for such machinery, for the value not exceeding 5 per cent of the license of Rs. 20,000 whichever was less. In addition, the initial validity period of CG/HEP licenses, other than those issued against tied credits or foreign aid was reduced from two years to twelve months.

The Union Budget for 1969-70, raised the import duties on motor cars, imported and completely assembled, from 60 per cent ad valorem to 100 per cent ad valorem and on lubricating oil from 15 per cent to 27.5 per cent ad valorem. The duty on dry fruits and seedless dates was changed from a specific to an ad valorem basis.

Tariff Commission: In 1968-69, the Tariff Commission completed† three tariff inquiries pertaining to continuance of protection to (i) automobile industry, (ii) dyestuff industry and (iii) aluminium industry, and two price inquiries relating to (1) caustic soda and allied products and (2) agricultural tractors.

The Government accepted the Commission's recommendation that the automobile industry should continue to remain under protection through quantitative restrictions on imports and that the progress of the automobile industry should be reviewed again by the Tariff Commission, after a period of five years, i.e., in 1973. The Government however, ereserved the right to license a new unit of economic size for the manufacture of passenger cars so as to introduce an element of competition which would result in improvement in quality and/or reduction in price.

As regards the aluminium industry, the Government accepted the Commission's recommendation that protection granted to ingots, bars, sheets and circles, strips and foils, etc. should be continued at the existing rates of duty for a further period of three years ending December 31, 1971.

Regarding protection to dyestnff industry, the Commission recommended that protection granted to finished dyestuffs need not be continued beyond December 31, 1968; however, since quantitative control over imports is likely to continue, the industry may be deemed to be protected and therefore be subjected to periodical reviews. The Commission further recommended that its proposed scheme of protection for intermediates should be kept in force upto December 31, 1971 subject to half yearly reviews. The Government has accepted these recommendations.

In connection with the price inquiry relating to caustic soda and allied products the Government held that as the prevailing market prices corresponded more or less to the fair selling prices recommended by the Commission, it was not necessary to control prices at this stage. As regards agricultural tractors, the Government did not accept the Commission's recommendation that the ex-factory selling prices of tractors should be fixed for each of the producers and that freight from factory to the dealers' point, together with packing, forwarding and insurance charges should be charged separately to customers. The Government held that selling prices should be fixed on an f.o.r. destination basis as before and not on an ex-works basis; further, the Government held that there should be uniform price for a particular make of tractor throughout the country so that the consumers residing at places far away from the producing centres are not placed at a disadvantage. As regards the basis for the fixation of fair ex-works prices, the Government did not accept the recommendation of the Commission to provide a return of 15 per cent on the capital employed as against the normal practice of allowing a return of 12 per cent. The Government also considered that replacement ratio adopted by the Commission for expected deletions of components of CKD packs was higher than the average replacement ratio already effected by all the manufacturing units. In the case of manufacturing units importing components and raw materials from the U.K. some adjustment in the prices was necessary because of the change in the exchange rate following the devaluation of the pound sterling. In the light of these factors, the Government fixed the maximum selling prices f.o.r. destination (rail head) different from those recommended by the Commission.

TRADE AGREEMENTS AND TRADE AND PAYMENTS ARRANGEMENTS

Trade agreements and trade and payments arrangements continued to play a significant role in expanding India's foreign trade and forging closer economic ties.

A trade agreement was signed with Thailand for the first time. The existing agreements with France and Greece were renowed and the annual trade arrangements with Iran and Iraq were finalised. The trade agreement with Indonesia which was signed on December 28, 1966 was ratified by both the Governments and would now be valid upto October 25, 1970.

Fresh trade and payments arrangements were finalised with Democratic People's Republic of Korea, Bulgaria, German Democratic Republic, Poland and Socialist Republic of Rumania. The existing trade and payments arrangements were renewed with Socialist Federal Republic

[†] An inquiry is considered to be complete only after Government decision on the report is published.

of Yugoslavia, Czechoslovak Socialist Republic, North Viet Nam and Sudan. Annual trade plans, in accordance with the existing trade and payments arrangements were signed with Afghanistan, Democratic People's Republic of Korea, United Arab Republic, Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Rumania, Union of Soviet Socialist Republics and Yugoslavia.

A Development Credit Agreement was signed in September 1968, with Norway, under which Norway has agreed to provide credit for procurement of machinery, equipment, spare parts for vessels and shore installations to further the development of the Indian fishing industry.

DEVELOPMENTS IN EXCHANGE CONTROL

The major developments in the sphere of exchange control during the year related to export promotion, pursuit of studies abroad, investments by non-residents of Indian origin, booking of passage for travel abroad and delegation of powers to authorised dealers. In keeping with the objective of liberalising exchange facilities for export promotion, (i) the nummum annual export turn over prescribed for the issue of blanket exchange permits was reduced, (ii) registered Export Houses, irrespective of their past performance, were made eligible for the grant of blanket permits, (iii) the purpose for which blanket permits could be utilised was liberalised, (iv) the conditions governing release of exchange for export promotion tours to new firms entering the export field were relaxed. As regards studies abroad, (i) exchange facilities were granted for post-graduate diploma courses in non-technical subjects and for courses in Management or Administration by B.So. and engineering graduates, (ii) the minimum marks stipulated were relaxed in the case of students with teaching or research experience and (iii) the validity period of the foreign exchange permits was changed from one year to the total duration of the course. Non-residents of Indian origin were permitted to invest in public or private limited companies irrespective of whether the companies are engaged in industry, trade or business. Further, as an experimental measure, for a period of three years, they were also permitted to invest in partnership and proprietorship concerns subject to certain conditions. Airline/steamer companies were allowed to book passages in the case of certain categories of travellers without prior permission of the Bank. As an experimental measure, P form clearance facilities were granted in certain cases, provided the host abroad agreed to meet the total cost including passage both ways. Powers were delegated to authorised dealers for undertaking certain types of transactions so as to minimise the inconvenience and delay. These developments are detailed below.

Export Promotion: In April 1968, the minimum annual export turnover prescribed for the issue of blanket exchange permit to exporters was reduced from Rs. 20 lakhs to Rs. 5 lakhs in the case of non-traditional goods. For traditional goods, the separate minimum annual turnover prescribed earlier for tea and jute goods (Rs. 100 lakhs) and all other items (Rs. 50 lakhs) was abolished and a uniform minimum annual turnover of Rs. 25 lakhs was made applicable to all traditional goods. The registered Export Houses were also made eligible for the grant of blanket exchange permits irrespective of their past performance. Further, the purpose for which the exchange authorised under blanket permits could be utilised was liberalised in that it could now be used not only for travel abroad but also for a few additional purposes, such as, conducting market studies, advertising abroad, participation in overseas exhibitions, trade fairs etc. For meeting

these additional requirements, the value of blanket permits has been enhanced by 50 per cent. In view of the difficulties experienced by exporters in raising funds locally for export financing, they have now been permitted to receive advance remittances from overseas buyers/agents provided the rate of interest payable does not exceed 8 per cent and that the shipments are effected within one year from the date of receipt of the advance.

In keeping with the objective of liberalising exchange facilities for export promotion tours, the official recommendation required to be furnished by new firms, entering the export field, in support of their applications for release of exchange was discontinued in May 1968 and these firms are now required to produce evidence to show that the proposed visit abroad is likely to result in new or additional exports.

Education: The minimum marks prescribed for the release of exchange to holders of engineering degree proceeding abroad for taking up degree courses in engineering or other technical subjects was raised from 55 per cent to 60 per cent in April 1968. Engineering graduates with 60 per cent marks were also made eligible for the grant of exchange facilities for taking up diploma courses in technical subjects. Beginning with September 1968, however, the minimum marks stipulation was dispensed with in the case of candidates who have secured the first or second rank in their degree examination.

The foreign exchange facilities granted hitherto to students with 60 per cent marks in Honours or Master's degree examination for taking up degree courses in non-technical subjects were extended in April 1968 to cover post-graduate diploma courses in non-technical subjects at any university or institution. The minimum marks stipulation was, however, dispensed with in May 1968, in the case of students who had secured the first or second rank in the Honours or Master's degree examination. The requirement of 60 per cent marks was further relaxed again in May 1968 in the case of all students, whether technical or non-technical and whether it leads to a degree or diploma, provided the candidates have secured 50 per cent marks in their degree examination and have at least two years' teaching or research experience or five years' experience in an industry related to the proposed course of study abroad.

In July 1968 the foreign exchange facilities for taking up degree courses in Management or Administration, which were hitherto granted to candidates with 60 per cent marks in Honours or Master's degree examination, were extended to B.Sc. degree holders and engineering degree holders with 60 per cent marks. Holders of diplomas, which have been recognised as equivalent to a degree for recruitment to Central Government services, were made eligible in March 1969 for grant of foreign exchange facilities on lines similar to those extended to corresponding degree holders.

In order to avoid inconvenience to parties making remittances against permits issued to students for their studies abroad, it was decided in January 1969 to discontinue issuing permits valid for one year at a time and instead issue permits valid for the total duration of the course. Authorised dealers were empowered to effect remittances during the validity period of the permit provided the necessary documentary evidence in regard to progress made by the student is furnished by the remitter.

Investments by non-residents of Indian origin: In May 1968 it was decided to permit withdrawals from the National Defence Remittance Scheme Special Accounts held by non-residents of Indian origin for purposes of extending loans to or for investment in interest bearing deposits with public or private limited companies on the following conditions, namely, (a) the rate of interest payable on the loan or deposit does not exceed 12 per cent per annum and (b) the borrowing company would give an undertaking to the effect that the interest and principal amount will be credited back to the respective Special Accounts and that the loan or deposit will not contravene the requirements notified from time to time by the Non-Banking Companies Department of the Bank.

Hitherto, investments by non-residents of Indian origin in public or private limited companies were permitted only in those companies which are engaged in industry and not in trade or business. This stipulation was with-drawn in November 1968 and investments are now permitted irrespective of whether the companies are engaged in industry, trade or business; the restriction on the repatriation of dividends and sale proceeds of investments would, however, continue. In December 1968, it was decided to permit, as an experimental measure for a period of three years, investments by non-residents of Indian origin in partnership and proprietorship concerns subject to the condition that neither the capital invested nor the profits earned would be allowed to be repatriated abroad and that this would be credited to the non-resident blocked account of the investor until such time he takes up Indian citizenship. This facility was also extended to funds held in National Defence Remittance Scheme Special Accounts -- subject to the same conditions except that profits and sale proceeds will have to be credited to the respective Special Accounts.

Booking of Passage: Airline/steamer companies and Travel Agents were authorised in June 1968 to book, without obtaining prior approval of the Bank, passages in respect of certain categories of travellers, such as (a) wife and children proceeding abroad to join the head of family employed abroad provided the passage fare has been paid abroad, (b) Indian nationals employed abroad returning to their country of employment after a visit to India, provided passage fare has been paid abroad, (c) members of families of airline/steamship company staff who are posted for duty abroad for at least one year, (d) persons holding letters of appointment from foreign Governments provided Prepaid Ticket Advice has been received from abroad in respect of the passage and (e) employees posted for duty at overseas branches of Indian banks and insurance companies and members of their families.

In March 1969 it was decided to grant, as an experimental measure, depending on the bonafides of the case, 'P' form clearance for visits abroad based on hospitality extended by persons who are not close relatives and by friends provided the host abroad not only agrees to meet the cost of the stay abroad but also remits the cost of passage both ways. The 'P' form clearance under this arrangement would be restricted to one month and to the country in which the host is residing.

Delegation of Powers: With a view to minimising inconvenience and delay, further powers were delegated to the authorised dealers in September 1968 for undertaking certain types of transactions without obtaining the prior approval of the Bank. Accordingly, the amounts upto which they could make remittances, without prior approval for payment of subscriptions or membership fees by firms or companies and other corporate bodies and for meeting legal expenses in connection with dishonoured export bills were raised from £15 per annum to £100 per annum and from Rs. 500 to Rs. 1,000 respectively. Authorised dealers were also allowed to effect remittances not exceeding £15 towards foreign university admission fees and a similar amount on account of examinations held in India for securing admission in foreign institutions. They have also been permitted to grant loans or overdrafts upto Rs. 20,000 to their non-resident constituents who are Indian nationals or persons of Indian origin provided the advances are fully secured by deposits or rupee securities acquired by the constituents out of their remittances from abroad.

Others: The other developments during the year were the following: (a) North Korea, which was excluded from the list of bilateral account countries in 1964, was again included in the bilateral account group in April 1968 following the extension of the trade agreement with that country for a period of two years beginning with January 1968, (b) The forward sales of exchange against imports on a deferred payments basis, which were hitherto subject to the condition that deliveries should correspond to the instalments falling due under the relative letters of credit or guarantees approved by the Bank, were liberalised in June 1968 and authorised dealers were permitted to make forward sales for the aggregate amount of the payments to be made under the relative letters of credit or guarantees, (c) In order to meet rising cost of living in foreign countries the scales at which exchange is released. for business travel abroad were revised upward in June 1968. These revised scales were also made applicable to journalists proceeding abroad and others going abroad for conferences or on study tours. (d) Following the introduction of the Import Deposit Scheme in the U.K., the period of realisation of 50 per cent of the involce value of goods exported from India to the U.K., which come under the purview of the Scheme, was extended, as a temporary measure in January 1969 to eight months so as to enable the exporters to grant oredit facilities to U.K. importers for a period longer than usual; the remaining 50 per cent is to be received within the stipulated six month period. Authorised dealers were permitted to purchase sterling represented by the 50 per cent value covered by this relaxation for delivery upto eight months forward. To enable the authorised dealers to offer this facility the Bank agreed to buy sterling from them for delivery within eight months at the same rate as applicable to purchases for delivery within six months.

MONEY SUPPLY

HE rate of expansion in money supply with the public which had gone down continuously since 1965-66 from 11 per cent in 1965-66 to 9·3 per cent in 1966-67 and 8.1 per cent in 1967-68, declined further to 8.0 per cent in 1968-69. In absolute terms, money supply with the public expanded by Rs. 429 crores in 1968-69, as compared with Rs. 400 crores in 1967-68 and Rs. 421 crores in 1966-67. Unlike in the past few years the expansion was more marked in the currency component (Rs. 306 crores) than in demand deposits (Rs. 123 crores). The expansion in total monetary resources (comprising currency with the public and aggregate deposits with banks) at Rs. 846 crores was, however, substantially larger than in the previous year (Rs. 644 crores) reflecting a considerably larger increase of Rs. 416 crores in time deposits with banks as compared with the increase of Rs. 244 crores in the previous year.

The rate of expansion in monetary resources during 1968-69 at 11·3 per cent was higher than the rate of growth in real national product and towards the end of the year there was some pressure on prices. In the previous year this rate of monetary expansion had slowed down to 9·4 per cent from 11·1 per cent in 1966·67 and with the spurt in real national income a considerable easing of the pressure on prices was witnessed.

The sharp increase in time deposits at the rate of 19.7 per cent during 1968-69 as against 13.1 per cent, 16.3 per cent and 13.1 per cent in 1967-68, 1966-67 and 1965-66, respectively, is partly attributable to the vigorous branch expansion programmes of the commercial banks in compliance with the targets indicated by the Reserve Bank. The efforts of the banks to attract new classes of depositors and to encourage the spread of the banking habit also contributed to the accelerated growth of time-deposits.

The constituents of money supply variations and the principal factors accounting for the variations during 1968-69 are indicated in the following table.

VARIATIONS IN MONEY SUPPLY—FINANCIAL YEAR

(Crores of Rupees)

Item .	1966-67	1967–68	1968–69

§ Comprising mainly capital and reserves and the differences between other liabilities (mainly bills payable, accraed profits, etc.) and other assets (such as premises, debit balances under branch adjustments and items in course of collection).

SEASONAL TRENDS

The contraction in money supply at Rs. 130 4 crores in the 1968 slack season (May-October) was twice as much as in the slack season of 1967 (Rs. 63 erores). This larger slack season contraction during 1968 came about mainly because of the contraction of Rs. 174 crores in net bank credit to private sector which, in turn, reflected a larger accretion of Rs. 230 crores to banks' time deposits (as against Rs. 133 erores in the 1967 slack season). The increase in net bank credit to Government was also much smaller at Rs. 36 crores as against Rs. 105 crores in the 1967 slack season. But in the busy season of 1968-69 (November-April) the expansion in money supply was as large as Rs. 606 crores (Rs. 546 crores in the previous busy season), consisting of an increase of Rs. 410 crores in currency with the public and Rs. 196 crores in deposit money. The main factor responsible for the expansion was the sharp increase of Rs. 324 crores (as against Rs. 66 crores in the previous busy season) in net bank credit to Government, The volume of commercial and co-operative bank credit to the private sector increased by Rs. 461.9 crores in 1968-69 busy season as against Rs. 517.9 crores in the previous busy season. But consequent on the larger accretion to banks' time deposits (Rs. 200.1 crores in the 1968-69 busy season as against Rs. 105.9 crores in the 1967-68 season), the expansionary effect of bank credit to the private sector on money supply was only Rs. 261.7 crores in the 1968-69 busy season as against Rs. 412.0 crores in the last busy season. The other expansionary factors were (1) a rise of Rs. 117

crores in net foreign exchange assets of banks; (excluding the effect, as explained earlier, of the formal revaluation of gold held in the Issue Department of the Reserve Bank) and (2) increase of Rs. 32 crores in Government's net currency liabilities to the public. The increase of Rs. 131 crores in net non-monetary liabilities of the banking system during the same period, however, moderated the expansionary effect of the above mentioned factors.

NATIONAL INCOME

A CCORDING to tentative estimates, the real national income of India (at 1960-61 prices) advanced by 1.8 per cent to Rs. 165 billion in 1968-69 from Rs. 168 billion in 1967-68.

The per capita real income decreased by 0.6 per cent in 1968-69.

The real national income has risen by 26.5 per cent between 1960-61 and 1968-69.

The national income at current prices was of the order of Rs. 27,922 crores in 1967-68 which is higher by 18·1 per cent over the corresponding estimate of Rs. 23,647 crores for 1966-67. Between 1960-61 and 1967-68 the national income at current prices has risen by 109·9 per cent.

The per capita income at current prices was Rs. 542.9 in 1967-68 as against Rs. 471.2 in 1966-67, showing a gain of 15.2 per cent which is due partly to the general rise in the price level.

According to rough estimates the real national income is expected to rise by about 6 per cent in 1969-70 over

the previous year. The rise in real per capita income for 1969-70 should be roughly 3.5 per cent.

In 1967-68 (current prices) share of agricultural sector as a whole was nearly 53·1 per cent of the income originating in all sectors together. The mining and manufacturing sector with a share of 18·2 per cent made the second biggest contribution. The services sector accounted for as much as 14·1 per cent and the trade, transport and communications for 14·6 per cent.

The pattern of incomes generated in different sectors has not changed significantly over the years.

During the post-independence period as a whole, the annual growth rate of the Indian economy has been of the order of 3.5 per cent allowing for the population growth rate of 2 per cent per annum on an average, the long-term rate of increase of real per capita income works out at about 1.5 per cent per annum.

Table below shows the gross national product and net national product (i.e. national income) at current and constant (1960-61) prices.

POSTS AND TELEGRAPHS

THE Indian Posts and Telegraphs Department comes under the administrative control of the Government of India, in the Department of Communications. The Secretary of the Department holds charge of the office of the Director-General, Posts and Telegraphs as also that of the Chairman of the Posts and Telegraphs Board. The Posts and Telegraphs Board and the Director-General, Posts and Telegraphs Board and the Director-General, Posts and Telegraphs between them exercise all the powers of the Department of Communications in administrative matters. The P. & T. Board is responsible for the development, maintenance and expansion of Postal, Telegraph, Telephone and Wireless Communications throughout the country. In addition to the work relating to wireless licences it discharges also certain agency functions like the work of Government Savings Bank, National Savings Certificates and Postal Life Insurance Policies, and collection of customs duty on postal articles on behalf of other Departments of the Government of India.

BUDGET ESTIMATES (1970-71)

Revised Estimates for 1969-70 (Rs. crores): Revenue receipts 232.31; Working expenses (net) 212.46; Net receipts 19.85; Dividend to General Revenues 12.96; Surplus 6.89; Appropriation to Revenue Reserve Fund 6.89; Appropriation to Capital Reserve Fund 6.89.

Budget estimates for 1970-71 (Rs. crores): Revenue receipts 256.82; Working expenses (net) 229.88; Net receipts 26.94; Dividend to General Revenues 14.80; Surplus 12.14; Appropriation to Revenue Reserve Fund 10.98; Appropriation to Capital Reserve Fund 1.16.

STAFF

The total staff (including Audit & Accounts) employed in the Posts and Telegraphs Department on March 31, 1969 was 534,302 (including 181,287 extra departmental employees and 3,505 Gazetted Officers). The strength of women employees was 16,608.

TRAFFIC STATISTICS

Estimated postal traffic for 1969-70: Postal articles (excluding money orders) (millions) 6,045; Registered articles (millions) 181.8; Money orders (millions) 94.5; Savings Bank transactions (millions) 74.6; Telegrams 49.9 million; Trunk calls 77.2 million; STD calls 43.2 million (excluding TAX); Value of money orders issued Rs. 577.3 crores; Telephones ('000) 1,219.

COMPLAINTS

The no. of complaints received during 1969 was 6,58,219. This works out to 0.0108 per cent of the total traffic against 0.0114 per cent in 1968. The number of complaints disposed of during the year was 6,74,934.

POSTS

Post Offices: There were 1,03,410 post offices at the close of December 1869. During Jan. to end of March 1970 it was proposed to add about 1,760 new post offices, mostly in rural areas. A post office, at present, serves on an average, an area of 11.69 sq. miles and a population of 4,270 compared to 57 sq. miles and a population of 16,134 on the eve of independence. During the period from April to Dec. 1969, 292 branch offices/extra departmental sub-offices have been upgraded and 603 offices were likely to be upgraded before the end of March 1970. Sixteen mobile post

offices are now functioning in all "A" class and "B" class cities.

Delivery of Mails in Rural Areas: As on Dec. 31, 1969, 337,655 villages were receiving delivery of mails compared to 320,311 villages at the end of 1968.

Letter Boxes: There are 98,028 outside letter boxes (Dec. 31, 1969) of which 61,004 are installed in rural areas. During 1969, 6,085 additional letter boxes were provided in the country.

Postal Life Insurance: Proposal relating to 22,169 policies for Rs. 8,21,70,500 were accepted during April to Dec. 1969 as against 19,064 policies for Rs. 6,85,17,800 during the corresponding period in 1968.

Liberalisation of Loan Scheme: Loans are now advanced in respect of Endowment Assurance policies which are in existence for three years instead of five years as before.

Night Post Offices: During 1969, orders for the opening of 19 night post offices were issued out of which 16 have already started functioning. The remaining three were expected to start from functioning before the end of March 1970.

Village Post Offices with Savings Bank powers: During the year 1968-69, 10,649 branch post offices were vested with savings bank powers. It had been decided to vest 6,000 more branch post offices with savings bank powers during 1969-70.

Replacement of Runners' Lines by More Expeditious Moder of Consequence: In pursuance of the policy of providing more expeditious service in rural areas, 1,030 runners' lines covering a total distance of 23,028 kms. were replaced during the year ending March 31, 1969, by quicker modes of conveyance as given below: (No. of lines converted and kms. converted respectively): Mail Motor Service: 270; 11,111; Horse drawn vahicles 37; 4,217; Camels, Mules, etc. 7; 84; Bicycles 447; 5,135; Other means, i.e., Boats, Steamers, etc. 269; 2,481; Total 1,080; 23,028.

Commemorative Stamps: The following postage stamps have been issued during 1969-70. Name, denomination and date of issue respectively: 1) Rafi Ahmed Kidwai, Author, All-Up-Airmail Scheme; 20 P; 1-4-1969; 2) International Labour Organisation (50th Anniversary) 20 P; 11-4-1969; 3) Jalianwala Bagh (50th Anniversary); 20 P; 13-4-1969; 4) Kasinadkum Nageswara Rao Pantulu (102nd Birth Anniversary); 20 P; 1-5-1969; 5) Ardeseer Curse tjoe Wadia; 20 P; 27-5-1969; 6) Seramporo College (150th Anniversary); 20 P; 7-6-1969; 7) Dr. Zakir Husain; 20 P; 11-6-1969; 8) Laxmanrao Kirloskar (Birth Contenary); 20 P; 20 6-1969; 9-12) Mahatma Gandhi*; Rs. 2; Rs. 5; 75 P ard 20 P; 2-10-1969; 13) Inter-Governmental Maritime Consultative Organisation (IMCO); 20 P; 14-10-1969; 14) 57th Conference of Inter-Parliamentary Union; 20 P; 30-10-1969; 15) Man on the Moon; 20 P; 19-11-1969; 16) Guru Nanak Day (500th Birth Anniversary); 20 P; 23-II-1969; 17) International Union for the Conservation of Nature and Natural Resources; 20 P; 24-II-69; 18) Sadhu Vaswani (90th Birth Anniversary); 20 P; 25-11-1969; 19) Thakkar Bapa (Birth Centonary); 20 P; 29-11-1969; 20) Plenary Assembly of International Radio Consultative Committee (CCIR): 20 P; 21-1-1970; 21) C. N. Annadurai (1st Death Anniversary); 20 P; 3-2-1970; 22; Munshi Nawal Kishore; 20 P; 19-2-1970; 23) Swami Shradhanand (Patriot); 20 P; 30-3-1970.

^{*} Birth Centenary.

Night Air-mail Service: An inland night air mail service links the principal cities—Bombay, Calcutta, Madras, Delhi and Nagpur. All inland letters, letter cards, post cards and money orders are carried by air without any surcharge.

Philatelic Deposit Account Scheme: This scheme introduced in four philatelic bureaux viz., Bombay, Calcutta, Delhi and Madras with effect from Aug. 1, 1965, proved popular. Under this scheme philatelists open account with an initial deposit of Rs. 50.

Savings Banks: The post office savings bank is the largest people's bank. It has almost twice as many depositors as all the commercial banks put together. There were 80,655 post offices doing savings bank transactions (March 31, 1969) and total amount in deposit including Savings Certificates, stood at Rs. 16,790 million. The amount under cumulative time deposit scheme was Rs. 787 million during 1968—69.

Unit Trust: The sale of Unit Trust 'Units' has been authorised with all the post offices and sub-post offices in the country with effect from July I, 1966.

TELEGRAPH SERVICES

There are over 14,594 telegraph offices (including licensed offices) in the country. Majority of them are in the rural areas.

Conversion of large combined posts and telegraph offices into departmental telegraph offices is being undertaken in order to improve the telegraph service. The total number of such departmental telegraph offices on December 31, 1969 stood at 234.

Phonogram Service: This facility provides a quick and convenient means to the telephone subscriber for sending and receiving their telegrams by telephone. During 1969-70 (up to Dec. 31, 1969) this service was introduced at 16 new centres bringing the total number of such stations to 1.887.

Teleprinters: The total number of teleprinters in use as on Dec. 31, 1969 was 12,001. This includes 600 teleprinters with the Devnagri keyboard.

International Telex: The most important development in the subscriber to subscriber transmission of printed messages was the commissioning of teleprinter exchanges at important cities on June 24, 1963. This service has now been extended to Coimbatore, Kanpur, Ahmedabad, Bangalore, Hyderabad, Nagpur, Madurai, Patna, Secunderabad, Poona, Gauhati, Tiruchy, Ranchi, Lucknow, Srinagar, Vijayawada, Jaipur, Ernakulam, Amritsar, Rajkot and Vasco-da-Gama.

The capacity of the telex network of different centres in India was 5,980 lines on March 31, 1969. This was expected to be increased to 6,680 lines by the end of March 1970.

International Telex Service from India is available to 70 countries.

TELEPHONES

Telephone facilities are provided at tehsil and equivalent headquarters, block headquarters, Police stations and at places with population of over 5,000.

The total number of telephones in the country as on Dec. 31, 1969 was about $11 \cdot 70$ lakhs.

The registered number of persons in the waiting list as on Dec. 31, 1969 was about 4,50,000.

The total number of connections given under O.Y.T. scheme upto Nov. 15, 1969 was 145,477 and the revenue

accrued from the subscribers under the scheme was Rs. 36,75,82,252.

Subscriber Trunk Dialling: In this system, a subscriber can himself directly dial the number of the distant exchange subscriber thus eliminating the need for booking and putting through of calls by operators. This facility is now available on the following routes, viz., Lucknow-Kanpur, Delhi-Agra, Delhi-Jaipur, Agra-Kanpur, N. Delhi-Kanpur, N. Delhi-Lucknow, N. Delhi-Patna, N. Delhi-Jullundur, N. Delhi-Meerut, Madras-Bangalore, Kanpur-Varanasi, Delhi-Simla, Delhi-Ahmedabad, Delhi-Jammu, Delhi-Srinagar, Srinagar-Jammu, Madras-Tiruchirapalli, Srinagar-Baramulla, Srinagar-Anantnag, Srinagar-Sopro and Bombay-Ahmedabad.

Coaxial Cables: In order to provide a large number of high grade circuits between important cities in the country, the laying of control trunk cable was taken up in 1958. This scheme continued to make further progress over the year 1969-70.

National Subscriber Dialling: The National Subscriber Dialling network is being planned to permit subscribers of automatic exchanges of one city to directly dial and obtain subscribers of other cities in the country. These facilities are already available on a point to point basis between certain cities. In the National Dialling Plan these facilities will be extended to cover more important stations and provide transit dialling facilities which are not available in the existing point to point scheme.

Under the National Dialling Scheme Trunk automatic exchanges have been commissioned at Madras, Bombay and Delhi.

Microwave: By the beginning of 1968-69 microwave communications had been established on (1) Calcutta-Asansol-Katihar-Darjeeling-Siliguri-Cooch Behar-Shillong-Gauhati-Tejpur-Jorhat-Dibrugarh; (2) Calcutta-Kharagpur; (3) Jullunder - Dalhousie - Pathankot - Udhampur-Jammu-Srinagar; (4) Ambala-Chandigarh-Simla. This accounted for a total of 2,270 kilometres.

WIRELESS

New Departmental Wireless Stations/Links opened during 1969-70: (1) Diskit-Leh H. F. Radio Telephone link; (2) Nyoma-Leh H. F. Radio Telephone Link; (3) Siliguri-Gangtok H. F. Wireless Telephone Link; (4) Dibrugarh-Khonsa VHF Radio Telephone Link.

Sizeable number of VHF links with ultimate capacity of 48 telephone channels are under advanced stages of installation.

Twelve wireless links were leased during 1969-70 and three were closed down.

Wireless Network: Wireless stations: 230 (Coastal stations 12; Monitoring stations 6; Other wireless stations — Departmental 74; Leased 138).

No. of wireless circuits: 266 (Radio Telegraph Circuits — Departmental 62; Leased 53; International (—); Radio Teleprinter Circuits — Departmental 16; Leased 4; International 8; Radio Telephone Circuits — Departmental HF & VHF 23; Leased HF & VHF 65; International 2; Marine Circuits — MF W/T 12; MF short range R/T 12; HF long range R/T 3; VHF Ship to Shore R/T 3).

Telecommunication Factories: During 1968-69 the telecommunication factories produced line and equipment stores worth Rs. 621-63 lakhs mainly for the use of the Department as against Rs. 596-06 lakhs during 1967-68 The production achieved during the first eight months of

1969-70 was Rs. 363.08 lakhs and it was expected that at the end of the year 1969-70 the production would be able to achieve the target of Rs. 633 lakhs fixed for the year.

Postal Rates (India): Letters (ordinary) upto the first 15 grams 0.20 p. and every additional 15 grams or part 0.15 Paise; Post Cards (single) 10 p. and reply 0.20 paise; Book Post (50 grams) 15 p. and every additional 25 grams or part, 0.10 paise; Book Packets containing printed books only (upto 100 grams) 0.10 p. and per 50 grams thereafter or part 0.05 p.; Registered Newspapers: (i) In the case of a single copy of registered newspaper: up to 60 grams 2 p.; up to 100 grams 5 p.; up to 250 grams 10 p.; per 250 grams thereafter 5 p. (ii) In the case of more than one copy of the same issue of a registered newspaper contained in a packet: up to 100 grams 5 p.; per 150 grams thereafter 5 p.; Registration fee 75 p.; Parcels (per 400 grams) 0.80 p.; Registration fee 0.90 p.; for a weight not exceeding 400 gms.; and 90 p. for exceeding 400 gms. and fraction thereof. Acknowledgement fee 0.15 p.; Certificate of Posting fee (per 3 articles) 0.10 p.; Insurance fee (upto Rs. 100) 0.50 p.; per Rs. 100 thereafter upto Rs. 5,000, 0.30 paise (on each Rs. 100) and per Rs. 1,000 upto Rs. 10,000, 100 p.; Money Order Commission; 20 p. for every Rs. 10 or part up to Rs. 100 and thereafter 40 p. for every Rs. 20 or fraction thereof, (Cost of M.O. form 0.05 p. adjustable towards Commission); Telegraph money order supplementary fee will be 50 paise per TMO; Postal Orders Commission 10 p.; (per postal order); Value payable article - Posting fee (not exceeding Rs. 25) 0.10 p. and exceeding Rs. 25, 0.20 p.; Express Delivery fee (unregistered article) 0.20 p.

The registration fee on inland postal articles, postal articles to Nepal and Pakistan and postal articles other than parcels to Ceylon, will be 95 paise.

The phonogram fee per inland or foreign telegrams booked on telephone will be 40 paise.

The charges for local calls in measured rate exchanges beyond 750 calls per quarter will be 20 paise per call. These rates are also applicable to STD (Subscriber Trunk Dialling) calls.

Foreign: Letters (upto 20 grams) 0.75 p. and for 20 grams thereafter 0.45 p.; Post Cards (single) 0.45 paise, Reply paid 0.90 p.; Printed papers (upto 50 grams) 0.40 paise, and per 50 grams thereafter 0.20 p.; Book, Pattern and Sample packets 0.20 p. for the first 50 gms. and for every additional 25 gms. or fraction thereof in excess of 50 gms 0.10 p.; Registered Newspapers (upto 50 grams) 0.20 p.; and per 50 grams thereafter 0.10 paise; Insured Boxes (upto 250 grams) Rs. 3.00 per 50 grams thereafter 0.60 p.; Registration fee (bulk bags) Rs. 3.00; Acknowledgement fee 0.50 p.; (surface mail & 0.60 for air mail).

Foreign Air Mail Rates: Ceylon, Pakistan—Post Cards 0.20 p.; Aerogram 0.25 paise; To Afghanistan and Burma Post Cards 0.50 p. and Aerogram 0.65 p.; others: Post Card 0.75 p., Aerogram 0.85 p.

Telegraphs (Inland): The charges of ordinary and express telegraph respectively (non-press telegraphs) for the first eight words Rs. 1.20 and Rs. 2.40 and each additional word 0.10 p. and 0.20 p.

The charges for the first eight words of ordinary inland greetings telegrams will be Rs. 1.40.

THE PRESS

THE 13th Annual Report of the Registrar of Newspapers for the year 1968 shows that there were 10,019 newspapers and periodicals in 1968 compared to 9,315 in 1967. There were 2,434 periodical publications in non-included categories in 1968, besides the 10,019 newspapers. During 1968 the Press in the country had registered a numerical gain of 7.6 per cent. Newspapers in the country were published in 49 languages (15 principal languages and 34 other languages).

Among the principal languages, the largest number of newspapers (2,381) were in Hindi, followed by English (2,074), Urdu (902), Bengali (642), Gujarati (573), Marathi (572) and Tamil (439).

Periodicitywise there were in 1968, 636 dailies, 51 tri-weeklies and bi-weeklies, 2,892 weeklies, 1,101 fort-nightlies, 3,997 monthlies, 855 quarterlies, 351 tri-monthlies and half-yearlies etc. and 136 annuals. Languagewise Hindi published the largest number (2,381 including 182 dailies), followed by English (2,074 including 68 dailies), and Urdu (902 including 88 dailies), Bengali (642 including 53 dailies), Tamil (439 including 36 dailies), Malayalam (377 including 52 dailies), Telugu (328 including 12 dailies), Kannada (231 including 38 dailies), Punjabi (214 including 15 dailies), Oriya (105 including 5 dailies), Sindhi (68 including 4 dailies), Assamese (32 including 2 dailies) and Sanskrit (29). There were 772 bilinguals (including 17 dailies), 165 multilinguals (including one daily) and 115 'Other' language papers (including 10 dailies). No daily was published in Sanskrit.

Maharashtra had the largest number of newspapers and periodicals (1,516), followed by Uttar Pradesh (1,433), Delhi (1,155), West Bengal (1,130), and Tamil Nadu (781).

During the year, 1,293 new newspapers commenced publication (against 1,202 in 1967) and 357 newspapers ceased publication.

CIRCULATION

The comparative circulation data for 1967 and 1968 reveal a nominal increase (1.9 per cent) in circulation during 1968. The gain in circulation of dailies was, however, higher (3.2 per cent) than that of periodicals (1.4 per cent).

The total preliminary circulation in 1968 of all papers for which circulation data were available, was 234.57 lakhs. Menthlies accounted 75.42 lakhs (32.2 per cent) followed by dailies 70.41 lakhs (30 per cent) and weeklies 61.53 lakhs (26.2 per cent).

Newspapers in the English language had the largest circulation 60·02 lakhs (25·6 per cent) out of a total circulation of 234·57 lakhs, followed by Hindi 43·59 lakhs (18·6 per cent), Tamil 20·24 lakhs (11·2 per cent), Malayalam 18 lakhs (7·7 per cent), Gujarati 15·95 lakhs (6·8 per cent), Marathi 15·53 lakhs (6·6 per cent), Bengali 12·89 lakhs (5·5 per cent), Urdu 10·47 lakhs (4·5 per cent).

Among dailies, English newspapers had the largest circulation of 18·77 lakhs (26·7 per cent), followed by Hindi 10·09 lakhs (14·3 per cent), Tamil 7·77 lakhs, Malayalam 7·41 lakhs and Marathi 6·83 lakhs. Sindhi and Assamese dailies continued to have the lowest circulation among the principal languages.

Hindi 13.46 lakhs (21.9 per cent) circulation among weeklies in 1968, claimed the highest followed by Tamil 10.64 lakhs (17.3 per cent), English 9.12 lakhs and

Gujarati 4.61 lakhs. English periodicals (other than weeklies) with a circulation of 32.13 lakhs claimed the top position in the circulation of such periodicals. Hindi periodicals diaimed the next largest share with a circulation of 20.04 lakhs.

The total circulation of 4,412 common newspapers and periodicals in 1967 and 1968 was 204-12 lakhs and 208-06 lakhs respectively showing a small increase of 1.9 per cent in 1968 over 1967.

The highest increase in circulation was reported in Malayalam papers (7.3 per cent) followed by Marathi (6.9 per cent), Oriya (5.4 per cent), Punjabi (5.3 per cent) and English (3.5 per cent).

Readership: The number of newspapers per lakh inhabitants rose to 1.9 in 1968 from 1.8 in 1967. The circulation of newspapers per thousand inhabitants based on the revised circulation for 1966 and 1967 and preliminary circulation for 1968 was 50.6, 50.6 and 44.8 respectively.

The highest newspaper circulation per thousand inhabitants in 1968 was shown by Malayalam (88.7), followed by Tamil (72.0).

OWNERSHIP

At the end of 1968, there were 64 common ownership units publishing 217 dailies and news-interest weeklies as against 62 such units owning 209 such newspapers in 1967. The share of newspapers owned by common ownership units in the total circulation of all papers was a little less in 1968 (24.9 per cent) than in 1967 (26.6 per cent).

The total number of dailies and news-interest weeklies published by common ownership units recorded a slight increase during 1968 from 209 in 1967 to 217 in 1968. The number of dailies published by such units was 165 in 1968 as against 159 in 1967. The number of weeklies of news-interest was 52 in 1968 (against 50 in 1967).

Ownership Pattern: Out of a total number of 10,019 newspapers and periodicals published in the country in 1968, individuals owned 5,945 papers (or 59·4 per cent) as compared to 5,551 (59·6 per cent) out of 9,315 newspapers in 1967. Societies and Associations owned 1,996 newspapers (19·9 per cent) followed by Firms and Partnership and Joint Stock Companies owning 656 and 482 respectively. More than half of dailies (57·1 per cent) and monthlies (51·9 per cent), more than four-fifth of weeklies (81·3 per cent) and nearly three-fourth of fortnightlies (72·0 per cent) were owned by individuals in 1968. Joint Stock Companies was the second largest ownership group publishing dailies (18·0 per cent) followed by Firms and Partnerships (14·1 per cent).

The newspapers owned by joint stock companies although only 4.8 per cent of the newspapers in India, claimed the largest share in circulation (38.3 per cent) in 1968.

The next largest share, in circulation (29·1 per cent) was shared by newspapers owned by individuals in 1968. Newspapers belonging to firms and partnerships and societies had a share of 12 per cent and 11·6 per cent respectively.

Circulation under Common Ownership

The circulation of news interest weeklies under common ownership registered a slight decline from 8.55 lakks in 1967 to 8.42 lakhs in 1968. The circulation of common ownership dailies rose from 49.66 lakhs in 1967 to 49.88 lakhs in 1968. The circulation has been steadily rising from year to year since 1963, having recorded an overall

increase of 30.7 per cent during the quinquennium ended 1968.

Bigger Units and News-Interest Papers

The largest number of news-interest papers owned by a single common ownership unit in 1968 was 21 (including 14 dailies) by the Express Group of Newspapers, commanding an overall circulation of 8·17 lakhs in 1968. The Bennett, Coleman & Co. Ltd. (11 papers) commanded the second largest circulation of 7·18 lakhs in 1968, which included eight dailies claiming a circulation of 4·70 lakhs. The third largest was the Thanthi Group with 12 newspapers (all dailies) having a circulation of 4·08 lakhs.

The eight dailies belonging to the Bennett, Coleman & Co., commanded a higher circulation than the 12 dailies of the Thanthi Group. Similarly, circulation of the three dailies of the Ananda Bazar Patrika Ltd. (2·75 lakhs) and of the five dailies of Amrita Bazar Patrika Ltd. (3·00 lakhs) was higher than the circulation of six dailies of the Hindustan Times Ltd. (2·61 lakhs).

In 1968 the combined circulation of 140 dailies belonging to the 64 common ownership units (for which data were available) constituted 70.8 per cent of the total circulation of all dailies published in India as compared to 74.3 per cent shared by 142 dailies owned by 62 units in 1967

Papers owned by Political Parties: The total number of newspapers owned by political parties numbering 17 was 82 in 1968. The combined circulation of the papers was 1·19 lakhs. The Communist Parties of India had the highest circulation (75,000) amongst the newspapers published by political parties followed by the Indian National Congress which commanded a circulation of 24,000.

The Indian National Congress owned 30 papers, the Communist Parties of India 26, the P.S.P. with a circulation of 4,000 copies. The remaining 21 belonged to other political parties.

The total number of dailies published by various political parties was 11 including one bi-weekly in 1968. Five were brought out by the Indian National Congress, two by the Communist Parties of India and four by other parties (one each by the Socialist Party, D.M.K., J and K National Conference and Khasi Jaintia Conference.

Government Publications: There were 391 newspapers in 1968 published by the various Government Departments (including autonomous bodies functioning under the Government). Out of these, Central Government published 221 and State Governments/Union Territory Administrations 170. The total circulation of Government publications in 1968 was 7-19 lakhs compared to 6-79 lakhs in 1967.

NEWSPAPERS

At the end of 1968, there were 10,019 newspapers and periodicals including 687 dailies (including 51 tri-weeklies and bi-weeklies), 2,892 weeklies, 1,101 fortnightlies, 3,997 menthlies, 855 quarterlies, 351 bi-monthlies and half-yearlies etc. and 136 annuals as against 9,315 newspapers and periodicals comprising 646 dailies, 2,697 weeklies, 961 fortnightlies, 3,772 monthlies, 799 quarterlies, 316 bi-monthlies, half-yearlies etc. and 124 annuals in 1967.

Besides the 15 principal languages, newspapers were also published in 34 other languages in 1968 against 32 other languages in 1967. A newspaper each appeared for the first time during the year in Awadhi and Vaiphei

languages. The Indian languages include Konkani, Manipuri, Maithili, Lushai (Mizo), Santhali, Khasi, Rajasthani, Garo, Thado/Kuki, Bhojpuri, Kashmiri, Paite, Angami Naga, Hmar, Hindustani (Persian script), Tangkhul Naga, Dogri, Zou, Kabui, Awadhi, Vaiphei, Harauti and Bundelkhandi.

The foreign languages in which newspapers were published are Arabic, Burmese, Chinese, French, Indonesian, Pushto, Tibetan and Swahili.

Besides the above languages, the following other languages figured in bilingual and multilingual newspapers: Halabi, Syriac, Italian, Latin, Magahi, Pnar, Spanish, Pali, Oraon, Kharia, Sadani and Munda.

Languagewise in 1968, Hindi published the largest number of newspapers (2,381 including 182 dailies), followed by English (2,074 including 68 dailies), Urdu (902 including 88 dailies), Bengali (642 including 14 dailies), Gujaratı (573 including 39 dailies), Marathı (572 including 53 dailies), Tamil (439 including 36 dailies), Malayalam (377 including 52 dailies), Telugu (328 including 12 dailies), Kannada (231 including 38 dailies), Punjabi (214 including 15 dailies), Oriya (105 including 6 dailies), Sindhi (68 including 4 dailies), Assamese (32 including 2 dailies) and Sanskrit (29). There were 772 bilinguals (including 17 dailies), 165 multilinguals (including one daily) and 115 other language papers (including 10 dailies). No daily was published in Sanskrit.

The circulation of dailies* languagewise in 1968 was as follows: English 18.77 lakhs (26.7 per cent), Hindi 10.00 lakhs (14.3 per cent), Tamil (7.7 lakhs), Malayalam (7.41 lakhs) and Marathi (6.83 lakhs). Sindhi and Assamese dailies continued to have the lowest circulation among the principal languages.

Metropolitan Press: A little more than one-third of the Press (3,435 newspapers out of a total of 10,019 or 34·3 per cent) appeared from metropolitan cities. However, the numerical concentration of daily and weekly sections of the Press were relatively less pronounced than that of periodicals (other than weeklies) with 18·9 per cent of dailies and 18·5 per cent of weeklies appearing from metropolis against 43·0 per cent of the periodicals (other than weeklies).

Languagewise the greatest degree of concentration of newspapers was found in English with 68.9 per cent of newspapers in the language appearing from metropolises. Besides, there was a marked degree of concentration of Bengali Press (57.3 per cent) in Calcutta. About one half of the Tamil Press was located in Madras. Press in Hinds, on the other hand, was more dispersed, a little more than one-third of Hindi newspapers being brought out from cities with population below one lakh and 37.1 per cent from cities with population one lakh and above (excluding motropolises and State Capitals). Malayalam Press was also widely dispersed with a little more than one half of such newspapers appearing from smaller towns.

Languagewise study of concentration of newspapers in 12 big cities having 100 or more publications establishes that a large number of English newspapers (79.0 per cent) were published from these big cities. On the other hand, only 30.8 per cent of Hindi newspapers appeared from big cities.

DAILIES

The number of dailies enjoying a circulation of above one lakh was 16 in 1968, 16 in 1967 and 14 in 1966. The names of such dailies with the centres of publication & circulation in 1968 according to the languages are given below;

English:	1	Circulation 1968
The Hindu (Madras)		1,42,511
The Times of India (Bombay)		1,38,333
Statesman (Calcutta)		1,37,721

Multi-Edition Dailies: In 1968 there were 28 multi-edition dailies with 71 editions compared to 25 such dailies with 69 editions in 1967. The percentage of share commanded by the circulation of such dailies in the total circulation of the entire daily Press in India which had improved from 36.9 per cent in 1966 to 38.7 per cent in 1967 declined to 36.9 per cent in 1968.

The Indian Express continued to have the largest number of editions, enjoying the highest total circulation among the newspapers of the category under reference.

A list of multi-edition dailies in existence in 1968 commanding a circulation of over one lakh copies along with comparative data for 1967 within brackets is given below: The names of the centres of publication are given within brackets immediately after the names of the papers: Indian Express (Ahmedabad@, Bangalore, Bombay, Delhi, Madras and Vijayawada) 4,08,476 (3,94,486); Thanthi (Coimbatore, Madras, Madurai, Tiruchirapalli and Tirunelvely) 2,64,659 (2,68,501); Mathrubhumi (Calicut and Ernakulam) 2,20,541 (2,12,642); Malayala Manorama (Calicut and Kottayam) 2,09,005 (1,95,943); The Times of India (Ahmedabad@, Bombay and Delhi) 1,88,628 (1,61,179); Nav Bharat Times (Delhi and Bombay) 1,68,827 (1,61,179); Statesman (Calcutta and Delhi) 1,68,835 (1,66,105); Dinamani (Madras and Madurai) 1,41,849 (1,34,735); Amrita Bazar Patrika (Calcutta and Cuttack) 1,21,831 (1,12,140).

PERIODICALS

The total number of periodicals increased by 7.7 per cent from 8,669 in 1967 to 9,332 in 1968. The preliminary circulation of periodicals in 1968 was 164.16 laklus as against the final circulation of 186.87 laklus in 1967. The total number of periodicals increased by 28.8 per cent in 1968 as compared to 1963. The number and circulation of menthlies was the highest, weeklies forming the next largest group. Of the total number of 9,332 periodicals published in 1968, 3,997 were monthlies and 2,992 were weeklies. Of the total circulation of 164.16 laklus of periodicals in 1968, monthlies had 75.42 laklus and weeklies 61.53 laklus.

In 1968, periodicals in English numbering 2,000 commanded the largest circulation (41·25 lakhs) followed by Hindi with 2,180 periodicals (33·50 lakhs), Tamil with 403 periodicals (18·47 lakhs), Malayalam with 325 periodicals (10·59 lakhs), Gujarati with 530 periodicals (10·26 lakhs).

Increase in the number of periodicals in 1968 was highest in Malayalam (22.2 per cent) followed by Hindi (8.2 per cent), English (5.8 per cent) and Tamil (7.5 per cent). The number of periodicals in Sanskrit and Kannada registered nominal decreases.

Statewise distribution of these periodicals and their circulation reveals that Maharashtra continues to lead both in number (1,423) and in circulation (39·36 lakhs), followed by Uttar Pradesh I.320 periodicals, Delhi 1,126 periodicals and West Bengal 1,094 periodicals. Tamul Nadu published 739 periodicals with a circulation of 28·93 lakhs. The circulation of periodicals from Delhi was 20·74 lakhs, West Bengal 14·88 lakhs and Uttar Pradesh 14·37 lakhs.

The various State Governments and the Central Government published a total number of 390 periodicals at the end of 1968 comprising 192 monthlies, 101 quarterlies, 35 weeklies, 29 fortnightlies, 23 bi-monthlies, half-yearlies etc. and 10 annuals. English continued to have dominant position with 191 periodicals followed by Hindi (82), bilingual 26, Bengali (10), Tamil (8), Marathi (7), Malayalam, Punjabi and Multi-lingual (six each), Telugu (5), etc.

Out of the total of 390 Government periodicals, data were available only for 190. Tetal circulation of Government periodicals in 1968 was 7·19 lakhs or 4·4 per cent of the total circulation as against the final circulation of 11·00 lakhs during 1967.

Numes of periodicals having a circulation of over 50,000 in all languages and their circulation. The centre of publication is given within brackets:

[†] Includes newspapers published by autonomous bodies under the Central Govt. under State Governments.

NEWSPRINT

The total import of newsprint in 1968-69 was of the order of 1,20,000 tennes as in 1967-68. An additional quantity of about 30,000 tennes produced by Nepa Mills in 1968-69 was also available for distribution. With the commissioning of the New Plant at Nepa Nagar, the full capacity of 75,000 tennes is likely to be reached by the end of 1970-71. Plans for setting up more newsprint mills are being contemplated both in the public and private sectors.

Since the level of imports and indigenous production are insufficient to meet the requirements of newspapers, a certain quantity of white printing paper is being allocated since 1965-66 to daily newspapers free of excise duty under the Newsprint Allocation Policy.

Newsprint is imported mainly from USSR, Canada, U.S.A. and Scandinavian countries under commercial purchase, rupee account and 'Aid' allocations.

The entitlement of newspapers under the Newsprint Allocation Policy for 1968-69 worked out to 1,84,048-24 tonnes (up to January 31, 1969). The total number of newspapers covered during that period was 1,318 — 324 dailies and 994 periodicals. The largest share 87-48 per cent went to dailies followed by 9·12 per cent for weeklies, 2·42 per cent for monthlies and 0·73 per cent for other periodicals.

CIRCULATION CLAIMS

During 1968, circulation claims of 428 newspapers and periodicals involving newsprint allocations of the order of 60,000 tonnes of the value of Rs. 7 crores, were verified. The circulation teams visited 34 different publishing centres in the country. The exaggeration in circulation claims detected covered 3,46,648 copies per publishing day.

The refixation of circulation of newspapers and periodicals following the circulation probes during 1968 and the consequent reduction in their newsprint quota resulted in an approximate national saving of Rs. 10-93 lakhs in foreign exchange. The total such foreign exchange savings since 1962 to end of 1968 amounted to Rs. 107-66 lakhs.

PRESS LAWS

In general the laws which affect the Press in India today are Press and Registration of Books Act, 1867; the Indian Official Secrets Act No. XIX of 1923; Sections 124-A, 153-A, 171-G, 255, 292, 293, 294-A, 295-A, 489-A, 499-502 and 505 of the Indian Penal Code; Sections 99-A-99-G and 108 of the Criminal Procedure Code; Sections 81, 84 and 87 of the Indian Evidence Act No. I of 1872; Sections 11, 12, 44, 52 of the Customs Act No. III, 1962; Sections 19, 20, 26, 27-A-27-D of the Indian Post Office Act No. VI of 1898; Section 5 of the Indian Telegraph Act No. XIII of 1885; Sections 40, 52 and 53(1)(6) of the Patents and Designs Act No. II of 1911; the Police

[;] Includes newspapers published by local bodies

(Incitement to Disaffection) Act, 1922; Section 69 of the Trade Marks Act No. V of 1940; the Contempt of Courts Act, 1952 (Act XXXII of 1952); The Indian Post Office (Amendment) Act LH of 1960; Article 19(1)(a) and (g) and Clause (2) and (6) of the same Article of the Constitution of India. The amendment to Article 19 (1) (a) reads: Nothing in Sub-clause (A) of Clause 1 (the Citizen's Right to Freedom of Speech and Expression) shall affect the operation of any existing law or prevent the State from making any law in so far as such law imposes reasonable restrictions on the exercise of the right conferred by the said sub-clause in the interest of the sovereignty and integrity of India, the security of the State, friendly relations with foreign States, public order, decency, morality, or in relation to contempt of court, defamation or incitement to an offence (Arts. 105 and 194 of the Constitution of India); the Tax on Newspapers (Sales and Advertisements) Repeal Act No. XXVIII of 1951; S. 7 of the Collection of Statistics Act (XXXII of 1953); the Press and Registration of Books (Amendment) Act No. 55 of 1955.

The Delivery of Books (Public Libraries) Act 27 of 1954.

The Drugs and Magic Remedies (Objectionable Advertisements) Act 21 of 1954. This Act controls the advertisement of drugs in certain cases and prohibits the advertisement for certain purposes of remedies alleged to possess magic qualities.

The Criminal Procedure Amendment Act contains a section (198B) which empowers the Government to prosecute a newspaper for defamation of public servants.

The Working Journalists (Industrial Disputes) Act (No. 1 of 1955). The Act extends the provisions of the Industrial Disputes Act, 1947 to working journalists.

The Parliamentary Proceedings (Protection of Publication) Act (No. 24 of 1956). It protects the publication of a substantially true report of any proceedings of either House of Parliament.

Section 11 of the Prize Competitions Act (Act 2 of 1955) contains rules regarding printing and publishing tickets, coupons, etc. in connection with prize competitions.

The Working Journalists Conditions of Service and Miscellaneous Provisions Act (Act 45 of 1955) regulates conditions of service of working journalists.

The Punjab Special Powers (Press) Act was passed on 5th September 1955. It empowers the authorities to control the irresponsible activities of the press indulging in and fostering communal disharmony, dissemination of 'violent' news and pernicious propaganda of a communal nature.

The Newspaper (Price and Page) Act 45 of 1956.

The Young Persons (Harmful Publications) Act No. 93 of 1956.

The Copyright Act 14 of 1957.

The Indian Post Office (Amendment) Act No. 7 of 1958. The Working Journalists (Fixation of Rates of Wages) Act 29 of 1958.

The Press and Registration of Books (Amendment) Act No. 26 of 1960.

The Newspaper (Price and Page) Continuance Act No.

The Indian Penal. Code (Amendment) Act No. 41 of 1961 and No. 36 of 1969.

The Drugs and Magic Remedies (objectionable advertisements) Amendment Act No. 42 of 1961.

Defence of India Act No. 51 of 1962.

The Working Journalists Amendment Act No. 65 of 1962.

The Press and Registration of Books (Amendment) Act No. 16 of 1965 and 29 of 1968.

The Press Council Act No. 34 of 1965.

The Press Council Amendment Act 27 of 1969.

The Criminal Law and Election Laws Amendment Act No. 35 of 1969.

1. All-India Radio, 2. Press Information Bureau, 3. Publications Division, 4. Films Division, 5. Directorate of Advertising and Visual Publicity, 6. Research and Reference Division, 7. Directorate of Field Publicity, 8. Song and Drama Division.

PRESS INFORMATION BUREAU

The Press Information Bureau functions as a link between the Government of India and the public through the medium of the Press. It provides to the Press factual information about the activities of the Government and keeps the Government informed about public reactions, as expressed in the Press, to Government's policies and performance.

The Bureau has its offices in Srinagar, Jammu, Jullundur, Jaipur, Bhopel, Lucknow, Varanasi, Patna, Calcutta, Gauhati, Cuttack, Hyderabad, Bangalore, Madras, Cochin, Trivandrum, Poona, Bombay, Nagpur and Ahmedabad.

The Bureau's news, feature and reference services are provided in the following languages:

English, Hindi, Urdu, Gujarati, Marathi, Tamil, Bengali, Telugu, Malayalam, Assamese, Oriya, Punjabi and Kannada.

A news-letter is also being issued in Kashmiri language.

Besides issuing hand-outs, Press Notes and Press Communiques, the Bureau releases news photographs, articles and illustrated features. It also conducts tours of Press representatives to development projects and other centres of interest.

Principal Information Officer: M. L. Bhardwaj.

DIRECTORATE OF ADVERTISING AND VISUAL PUBLICITY

The Directorate of Advertising & Visual Publicity functions as the central organisation for the press advertising and visual publicity campaigns of the Ministries of the Government of India (excepting Railways), their attached and subordinate offices and a number of autonomous undertakings of the Government of India.

The Directorate has an Exhibition Division which, through its central and regional units, organises exhibitions depicting progress of the Five-Year Plans, Family Planning and other themes of national importance.

Director: Brig. R. Streenivasan.

Wage Boards for Working Journalists and Non-Journalists

Details of the Constitution and the recommendations of the Wage Boards, for Journalists and Non-Journalists were given in the 1968 Directory.

After the 57-day old strike by the newspaper employees for the implementation of the Non-Journalists' Wage Board Award, the Government of India referred on September 17, 1968, the dispute to a National Tribunal presided over by Mr. Justice B. N. Banerjee, a retired judge of the Calcutta High Court for adjudication.

Pending adjudication the employers had agreed to pay to employees in addition to their existing emoluments 75 per cent of the difference between the existing emoluments and the emoluments payable under the Wage Board recommendations. They had also agreed to protect the total emoluments so payable in fixing the pay of workers in the pay scales determined by the tribunal. At the time of writing this, the adjudication was continuing,

The recommendations of the Wage Board for Journalists have been practically implemented.

PRESS COUNCIL

The Press Council Bill was passed in Nov. 1965. The President has given his assent. The object of the Council shall be to preserve the liberty of the press and maintain and improve the standards of newspapers in India.

The Press Council was set up in Nov. 1966 with Justice J. R. Mudholkar as Chairman and 25 members.

The Press Council started functioning from the middle of November 1966, when the full complement of its membership was notified. The new Chairman Mr. N. Rajagopala Ayyangar took over on May 4, 1968. The Press Council's first annual report was presented to the Parliament on Aug. 30, 1968 by the Minister for Information and Broadcasting.

The report said the present undefined state of the law of privileges had placed the press in an unenviable position in the matter of comments on the proceedings of Parliament,

In the opinion of the council, there might be no great difficulty in separating the issue of privileges concerning the press from the entire question of Parliamentary privileges.

The report also suggests legislative measures to facilitate honest and fair comment as well as faithful and accurate reporting of the proceedings of legislatures.

SOCIAL WELFARE IN INDIA

AT present there are 26 Schools of Social Work in India. There is also an Association of Schools of Social Work. The alumni from the schools of social work have formed a professional association namely the Indian Association of trained social workers. Most of the schools provide post-graduate training programme.

The Indian Council of Social Welfare is an apex voluntary organization which brings together voluntary and professional workers, national and state welfare agencies either in the state or private sector. The Council has 17 branches all over India.

There are the Ministry of Social Welfare at the Central Government level and the State Department of Social Welfare.

Social Welfare generally covers the following fields, viz. Community Welfare Services; Family, Child and Youth Welfare Service; Public Welfare Administration; Social Security Services; Services for the Maladjusted and Handicapped Groups; Social Defence and Correctional Administration; Social Legislation and Social Action; Social Research; Training in Social Work; Tribal Welfare and Rural Reconstruction; Social Work Research; Programme for Economic Uplift of Weaker Sections of the Community etc.

A number of all India agencies organise all India, regional or state meetings to discuss specialised topics. The Indian Council of Social Welfare holds a biennial conference and a biennial seminar with all India participation. In 1969 a seminar on "Role of Social Welfare at Local Authority Level" was held at Delhi in February-March 1969 in collaboration with the Delhi School of Social

Work and Indian Council of Social Welfare. In November 1969, it organised national conference on Policies and Programmes for the welfare of the weaker sections of the community with stress on eradication of untouchability.

Funds for research in social work are available from the Research Programmes Committee of the Planning Commission, the Dept. of Social Security and the University Grants Commission, as well as other foreign bodies such as the U.S.A.I.D. The Indian Council of Social Welfare completed two research projects (i) Survey of Employment Positions and Functions of Professional Social Workers and (ii) Evaluation of Institutional Programme in relation to After Care of Released Children under the Bombay Children Act (1948). A third project on "Rehabilitation of Children other than Delinquent under the Bombay Children Act (1948) has been carried out, with the help of U.S. Health, Education and Welfare Department. The Indian Council of Social Welfare has started a Volunteer Bureau to recruit volunteers willing to do social work and to find suitable agencies which can absorb these volunteers.

SOME ALL-INDIA ACTS

The Special Marriage Act, 1954; The Hindu Marriage Act, 1955; The Hindu Succession Act, 1956; The Hindu Adoption and Maintenance Act, 1956; The Hindu Minority and Guardianship Act, 1956; The Maternity Benefit Act, 1961; The Children Pledging of Labour Act, 1933; The Employment of Children Act, 1938; The Reformatory Schools Act, 1897; The Lepers Act, 1898; The Indian Lunacy Act, 1912; The Untouchability Offences Act,

1955; Suppression of Immoral Traffic in Women and Girls Act, 1956; The Women's and Children's Institutions Licensing Act, 1956; The Orphanages and other Charitable Institutions Supervision and Control Act, 1960; The Probation of Offenders Act, 1958; The Union Territories Children's Act, 1960.

FAMILY AND CHILD WELFARE

At the end of the Third Plan, there were 264 welfare extension projects for women and children functioning in coordination with community development, 306 welfare extension centres run by recognised voluntary organisations and 1,472 welfare extension services run by registered Mahila Mandals. There were also 17 integrated child welfare projects in progress in the States. About 6,000 voluntary organisations have received grants-in-aid through the Central and State Social Welfare Boards for providing specific welfare services to women and children and to handicapped persons. About 625 condensed courses in education and 75 production units were instituted in urban areas for the benefit of women. The Central Social Welfare Board also set up 66 urban welfare extension projects. A number of night-shelters were also organised. Programmes in moral and social hygiene and after-care services were started at 16 institutions. For the rehabilitation of handicapped persons 27 training-oum-home centres were established.

Traffic in Women

The Suppression of Immoral Traffic in Women and Girls Act, 1956 applies to the whole of India.

From the time the Act was enforced on May 1, 1958 to March 1960 the Central Social Welfare Board set up 68 protective homes in the country.

The Central Social Welfare Board appointed an Advisory Committee to study the problem of social and moral hygiene in the country. The recommendations of the committee were accepted and institutions were set up on the pattern described below.

At the State level: (i) One home for rescued women needing a fairly long period of adjustment prior to rehabilitation. (ii) Two homes for the aftercare of persons discharged from correctional institutions. (iii) Two short-term rehabilitation homes for those discharged from non-correctional institutions. (iv) Strength of each Home not to exceed 100. At the District level: (i) One shelter temporarily housing persons needing aftercare (maximum period 3 months). (ii) One reception centre for temporary stay of women rescued from moral danger.

The Association for Moral and Social Hygiene in India, 4, Rouse Avenue, New Delhi, has got fourteen State Branches with a number of Dist. Branches.

The Association runs a Student Counselling Centre in the University of Delhi. Centres for Family Counselling and Marriage Guidance are established in the other parts of the country. It also conducts periodical research.

Children

Children's Acts in relation to delinquency are in force in the States of Andhra Pradesh, Gujarat, Maharashtra, Tamil Nadu, Mysore, Punjab, Kerala, U.P., West Bengal and all Union Territories. Reformatory Schools Act of 1897 is in force in all other States.

The Borstal Schools Acts, which are slightly different in scope, are in operation in the States of Andhra, Gujarat, Madhya Pradesh, Maharashtra, Tamil Nadu, Mysore, U.P., West Bengal and Kerala.

The problem of juvenile delinquency is mainly the concern of State Governments.

The Central Bureau of Correctional Services was established in August 1961 with the aim of developing and co-ordinating a uniform policy to standardise the collection of statistics on a national basis. It exchanges information with foreign governments and the United Nationa Agencies. It promotes research, training and stulies and surveys in the field of prevention of crime. The Central Government have sponsored a care programme under which assistance is given to the States. At present, there are 50 Government and 53 Voluntary Remand Homes, 48 Government and 63 Voluntary Certified Schools, 9 Borstal Schools and 15 Boys' Clubs and some Probation Hostels in different States in the country.

The Children Act, 1960 provides for establishment of Child Welfare Boards and Juvenile Courts. The child welfare board deals with destitute and neglected children while the juvenile courts are expected to deal with the delinquents. But this procedure is not being followed in all the States. In Maharashtra there is a comprehensive Children Act. In all the States, where the Children Act is applied, Remand Homes, Certified Schools and After-Care Hostels are established. In some States, Remand Homes are also termed as observation homes. Under preventive programme, Juvenile Aid Police Units are established through the Police Departments and Boys' Clubs are also run. Pilot programme for the prevention of Juvenile Vagrancy is recently undertaken.

Under the Children's Act, more children come under its purview as a result of destitution than delinquency.

A new trend in Child Welfare is the development of foster family homes, which provide emotional and social security for children in need of such home on a temporary basis. This is being promoted by the Central Social Welfare Board, through voluntary welfare agencies in Bombay, Madras and Delhi. Families caring for such children are usually given a small sum for maintenance of the children. Here are many important associations working for children on an all India level namely, the Indian Council for Child Welfare, the Balkan-ji-bari and others. These have State units. They promote the welfare of children in various ways. Another recent development is the India Sponsorship Committee which work in cooperation with the International Union for Child Welfare. Foreign sponsors, largely from U.S.A., U.K. & Canada, sponsor certain children through the International Union for Child Welfare and the India Sponsorship Committee. These children receive quarterly instalments of money, which is used chiefly as a means of educational scholarship and also for other needs of the child. Chiefly intelligent children from the lower economic groups are selected. The idea of this movement is to bring about bonds of friendship between the children and the sponsors who take a personal interest in the children's development. This movement helps to develop an Indian Sponsorship Programme in other welfare agencies also. The programme aims at helping the children stay with their families and is family oriented.

BEGGARS

The Criminal Procedure Code treats vagrants and vagabonds alike and provides penalties under Sections 55 (i)(b) and 109(b).

Special Acts have been passed by most of the States to prohibit begging in public places. In others, the municipal and police Acts provide measures against begging.

The Government of India set up a committee in 1968 to study the problem of kidnapping and maining children for purposes of begging under the chairmanship of the

Director, Central Bureau of Correctional Services. The Committee submitted its report with necessary recommendations to deal with the problem more sternly. There are at present 47 Govt. and 14 voluntary Beggar Homes in the country.

SOCIAL SERVICE AGENCIES

The groups of voluntary social work in India largely fall under the following heads: Administrators; Professional social workers; Missionaries; The Gandhian social workers; and voluntary social workers belonging to the various private agencies.

Schools of Social Work

The Tata Institute of Social Sciences, Sion-Trombay Road, Chembur, Bombay-71; The Delhi School of Social Work, University of Delhi, 3, University Road, Delhi 7; The Madras School of Social Work, Casa Major Road, Egmore, Madras 8; Faculty of Social Work, M. S. University of Baroda, Fatchgunj, Baroda-2: Department of Social Work, Lucknow University, Lucknow; Institute of Social Sciences, Kashi Vidyapith, Varanasi; The Indian Institute of Social Welfare & Business Management, College Square West, Calcutta 7; The Institute of Social Service, Nirmala Niketan, 38 New Marine Lines, Bombay 1; The Bombay Labour Institute, Dadabhai Chamarbaughwala Road, Parel, Bombay 12; The P. S. G. School of Social Work, Peelamedu P.O., Coimbatore; The National Institute of Social Sciences, 24 Willington Road, Richmond Town, Bangalore; The Institute of Social Services, School of Social Work, Mangalore; St. Xavier's Institute of Labour Relations, Jamshedpur; Institute of Social Sciences, University of Agra, Agra; The Department of Sociology and Social Work, Andhra University, Waltair; Department of Labour and Social Welfare, Patna University, Patna; University School of Social Sciences, Gujarat University, Ahmedabad; The School of Social Work, Indore Christian College, Palasia, Indore; The Udaipur School of Social Work, Saletia Ground, Udaipur; The Department of Social Work, Sacred Heart College, Thevara, Ernakulam 3, Kerala ; The Xavier Institute of Social Services, St. Xavier's College, Ranchi, Bihar.

Schools for teaching Social Work at the undergraduate level, are slowly opening up—such as the Karve Institute of Social Services in Poona; Andhra Pradesh School of Social Work, Red Hills, Hyderabad at the undergraduate level—by the Andhra Pradesh State Branch of Indian Council of Social Welfare; Tripude Institute of Social Work, Civil Lines, Sadar, Nagpur; and Visva Bharathi Palliseksha Sadam, Sriniketan P.O., District Birbhum, West Bengal.

An association of schools of social work has been formed which is setting up criteria for accredited schools of social work. Over and above the professional schools of Social Work, there are various other training centres run by voluntary bodies for training welfare workers. Training schemes for training workers for particular programmes are also being undertaken by the Govt. in cooperation with voluntary welfare agencies.

Voluntary Agencies on National Level

Child Welfare: Balkan-ji-Bari, Juhu Road, Santa Cruz (West), Bombay 54; Indian Council for Child Welfare, Room No. 14-15, Block 'A', 'B' Barracks, Queensway, New Delhi; Indian Council for Child Education, Sumanas, 39, Edward Elliots Road, Madras 4.

Youth Welfare: Y.M.C.A. (5, Russel Street, Calcutta 16); Y.W.C.A. (Parliament Road, New Delhi); Bharat Scouts and Guides Association (Regal Building, Parliament

Street, New Delhi); Bharat Sevak Samaj (27-A, Theatre Communication Buildings, Connaught Place, New Delhi); Youth Hostels Association (2, East Park Road, New Delhi 5); All India Boys Scouts Association (7, Jungpura—E—Mathura Road, New Delhi 14).

Women's and Family Welfare: All India Women's Conference (C/o Family Planning Association of India, Metropolitan House, Dadabhoy Naoroji Road, Bombay I); National Council of Women in India (Town Hall, Bombay I); Kasturba Gandhi National Memorial Trust (Kasturba Gram, P.O. Indore, Madhya Pradesh).

Health: Tuberculosis Association of India (20, Red Cross Road, New Delhi 2); Indian Red Cross Society (20, Red Cross Road, New Delhi 2); All India Cancer Prevention Society (Tata Memorial Hospital, Parel, Bombay 12); Hind Kusht Niwaran Sangh (Red Cross Road, New Delhi); Akhil Bharat Sharirik Sikshan Maha-Mandal (Tilak Road, Nagpur, Maharashtra); Indian Medical Association (Hanging Bridge, Daryagan), Delhi 7).

Rebabilitation of the Handicapped: Convention of the Teachers of the Deaf in India (50, Bondel Road, Ballygunj, Calcutta); All India Lighthouse for the Blind (89, Elliot Road, Calcutta); National Association for the Blind (Jehangir Wadia Building, Mahatma Gandhi Road, Bombay 1); All India Blind Relief Society (11-F, Lajpatnagar, New Dolhi); The Fellowship of the Physically Handicapped (Hornby Vellard, Haji Ali Park, Bombay-34); The Indian Council for Mental Hygiene (Cumbatta Chambers, Eros Building, 42, Queen's Road, Bombay).

Rural Welfare: Sarva Seva Sangh (K33-4, Golghar, Varanasi, U.P.); India Village Service (I.V.S. House, Marhera, Dist. Etah, U.P.).

General Social Welfare: Servants of India Society (Poona 4); Ramkrishna Mission (Belur, Dist. Howrah); Gandhi Momorial Fund (5, Mansingh Road, New Delhi); Salvation Army (Moreland Road, Bembay 8); Friends' Service Unit (1, Upperwood Street, Calcutta 16); All India Seva Samiti (Seva Samiti Building, Allahabad).

Rural Women's Welfare & Bharatiya Grameen Mahila Sangh (9/104 Jamnabar Hutments, Block II, Mansingh Road, New Delhi 11).

Relief and Rehabilitation: United Council of Relief and Welfare (Rashtrapati Bhavan, New Delhi).

Social Education: Indian Adult Education Association (17-B, Indraprastha Marg, New Delhi); Jamia Milia (Okhla, Delhi); Literacy House (Lucknow).

Welfare of Under-Privileged Groups: Harijan Sevak Sangh (Kingaway, Delhi); Bhartiya Adimjati Sevak Sangh (Kingaway, Delhi 9).

Co-ordination: The Indian Conference of Social Work (Central Office: 117, D. N. Road, Bombay 1).

International Welfare Agencies in India: The following are some of the International agencies and organisations working in the country: International Council on Welfare (Regional Office for South East Asia and Western Pacific, 175, D. N. Road, Bombay 1); Asia Foundation (Post Box 149, New Delhi); Ford Foundation (32, Ferozeshah Road, New Delhi); World Health Organisation (S.E.A. Office, Patiala House, Hardinge Avenue, New Delhi); Rockefeller Foundation (20/20, Diplomatic Enclave, Kautilya Marg, New Delhi); International Labour Organisation, Indian Branch (Mandi House, New Delhi); International Union for Child Welfare (Consultant for Far East Asia, Room Nos, 14 & 15, Block A, Barracks

B, Queensway, New Delhi): United Nations International Children's Emergency Fund (UNICEF House, 11, Jor Bagh, Delhi); United Nations Educational, Scientific and Cultural Organisation (Old Mill Road, New Delhi); Food and Agricultural Organisation, UNO (21, Curzon Road, New Delhi); Cleveland International Programme for Youth Leaders and Social Workers Inc. (12, Hailey Road, New Delhi); The American Peace Corps in Delhi (61, Sundar Nagar, New Delhi-11).

Other Agencies Functioning in India: Youth Welfare Association, 29-24 Shakti Nagar, Delhi-6; Gyan Prakash Yuvak Sangh, 653, Chuna Kankar, Mathura, U.P.; Social Service League, Indraprastha College, Alipur Road, Delhi, Society for the Education of the Crippled (Child and Adult), Chunilal Mehta Hut, Mahatma Gandhi Road, Bombay-1; Association of Moral and Social Hyglene, Barrack No. 4, Dinsha Wacha Road, Bombay 1. All India Mass Education Society, Gonda.

Bhoodan Movement: Special mention must be made of the Bhoodan Movement initiated by Acharya Vinoba Bhave, one of the ablest disciples of Gandhiji. He is effecting a silent but nevertheless remarkable social revolution within the country by the voluntary gift of land (Bhoodan), wealth (Sampattidan), labour (Shramadan) and life (Jeevandan).

CENTRAL SOCIAL WELFARE BOARD

The Board has its Central office in New Delhi. There are 25 State Social Welfare Advisory Boards—one in each State/Union Territory (except Kerala)—which advise and assist the Central Board in the formulation of its policies and interpretation and implementation of its programmes to voluntary organisations.

The main objectives of the Board (the Company) include the study of the needs and requirements of Social Welfare Organisations, evaluation of its programme, coordination on social welfare activities of various Ministries of Central and State Governments, promotion and setting up of social welfare organisations in places where no such organisations exist, rendering technical and financial assistance to deserving institutions for promoting welfare activities viz., welfare of the family, women, children, the handicapped and assistance in cases of unemployment, under employment, old-age, sickness, disablement and other cases of un-deserved want, training in social work, Pilot projects and emergency relief in cases of calamity—national, natural or otherwise.

A sum of Rs. 194.97 lakhs was released by the Board in 1968-69 in the form of grants to registered voluntary welfare institutions all over the country. The implementation of the programmes of the Board is supervised by the Members of the Central Board, State Boards and Field Inspectors and Welfare Officers.

Programmes

General Grant-in-aid Programmes: The Board has been giving grant-in-aid to voluntary welfare institutions working for the welfare of women, children handicapped, aged and the infirm, leprosy and T.B. patients and for persons released from correctional services.

During the year 1968-69 the Board has released Rs. 35.71 lakhs to 2,819 institutions, under general grantin-aid.

From its inception upto the end of March 1969 the Board had sanctioned nearly 36,943 grants amounting to about Rs. 840.49 lakhs under its general grant-in-aid programme. These grants cover services for children,

women and the handicapped groups of persons in voluntary welfare institutions.

Welfare Extension Projects and Mahila Mandals, in rural areas: The activities include Balwadi (a combination of creche and pre-primary school), Craft Centres for women, Maternity Services, Social Education for adult women, General Medical Aid, etc.

- (a) Welfare Extension Project (Original Pattern): Only 8 Welfare Extension Projects of Original Pattern with 40 centres continued to function in remote, hilly and backward areas. These are run by the Project Implementing Committees. A sum of Rs. 2.75 lakhs was released for these projects in 1968-69.
- (b) Mahila Mandals: The activity of Welfare Extension Project (Original Pattern) in rural areas of the country were, in 1961, handed over to voluntary organisations or newly formed Mahila Mandals. These are being assisted by the Central Beard to the extent of 75 per cent of their estimated expenditure. During 1968-69 a sum of Rs. 28·39 lakhs was released to 541 voluntary organisations/Mahila Mandals for conducting activities in 1,472 centres.
- (c) Welfare Extension Project (CD): To avoid duplication with the activities carried out by the Community Development Blocks it was decided that Welfare Extension Projects be started only in Community Development Blocks and be run by a specialised agency like the Contral Social Welfare Board and by pooling the resources of the voluntary organisations for a common goal.

During 1968-69 a sum of Rs. 53.02 lakhs was released for 224 projects conducting activities in 2,297 centres.

Family and Child Welfare Programmes: The Family and Child Welfare schome for the welfare of women and children in rural areas was launched on November 14, 1967. The programme attempts to deal with the family as a unit. By the end of 1968-69, 117 Family and Child Wolfare Projects have started functioning throughout the country. By the end of 1968-70, 175 projects may be functioning. A sum of Rs. 29-49 lakks was spent on this programme during 1968-69.

For the training of field staff and supervisors of this programme, six Family and Child Welfare Training Centres have been established so far at Sriniketan (West Bengal), Gandhi Gram (Tamil Nadu), Baroda (Gujarat) and Allahabad (Naini) (U.P.), Indore (M.P.) and Jamia Milia (Delhi).

710 field workers were trained during 1968-69 at a cost of Rs. 4.09 lakhs.

Welfare Extension Projects (Urban): The activities provide community welfare centres, creches, balwadit, ante-natal and post-natal advisory services, welfare health centres, hobby clubs, vocational guidancs and other services. A total expenditure of Rs. 1.84 lakhs was incurred on 30 Projects functioning during 1968-69 benefiting about 13,500 families.

Socio-Economic Programme: Under this scheme, grants are given to voluntary welfare institutions for setting up production units of small industries, units as ancillary to large industries, handloom training-cumproduction units, handlorafts training, procurement and production units, etc. Towards the end of 1968-69 the Board had sanctioned about Rs. 55 lakhs for 114 units. By the end of March 1969, 102 such units were functioning.

Condensed Courses of Education for Adult Women: Adult women of the lower income group are prepared for middle school or matriculation examinations in condensed courses of two years duration. Up to the end

of March 1969, the Board had sanctioned 1,108 courses in different parts of the country, benefiting about 25,750 candidates at a cost of Rs. 236.38 lakhs.

Holiday Camps for Children: This scheme enables children of low income groups to be taken to holiday camps at hill stations or other summer or sea resorts, outside their home towns, during vacation free of cost. Maximum financial assistance of Rs. 3,000 is made available for each camp. Proposals are under consideration for organising Inter-State Camps and also to set up Holiday Homes where such camps can be held. A sum of Rs. 6.25 lakhs was released during 1968-69 and some 250 camps have been organised benefiting about 12,500 children.

Special Child Welfare Programmes: Demonstration projects of integrated child welfare services for meeting the total needs of children in the age group 0 to 6 were set up by the Government of India, during the Third Five Year Plan. The Board was to organise the Balwadis in these projects. Over 405 balwadis have been set up in 12 projects. The other special child welfare schemes which the Board took up during the Third Plan Period include training courses for Balsevikas (Child Welfare Workers) required for Child Welfare Services.

Welfare Work in Border Areas: Welfare Centres were organised on the lines of the Original Pattern Projects in the border areas of NEFA, Leh, in Jammu and Kashmir, Lahaul and Kinnaur in Himachal Pradesh, Chamoli, Uttar Kashi and Pithoragarh in Uttar Pradesh and Kutch and Banaskantha in Gujarat. The expenditure on these projects is shared in the ratio 2:1 by the Central and the State Governments. There are, at present, 17 projects in these areas with 63 centres. During the year an amount of Rs. 2:90 lakhs has been released as grants for these projects. Apart from running these projects, the Board continues to give grants to voluntary organisations under its grant-in-aid programme for conducting welfare services in the border areas.

Integrated Pre-School Projects in Urban Areas: This programme seeks to provide basic amenities necessary for the growth and development of children in slum areas predominantly populated by the low-income groups. Nine such projects functioned during this year in the States of Assam, Gujarat, Kerala, Madhya Pradesh, Rajasthan, Uttar Pradesh, West Bengal and the Union Territories of Chandigarh and Delhi. About 800 children are benefited from this programme daily.

FOURTH FIVE YEAR PLAN

In addition to the existing programmes the following schemes are also proposed to be implemented by the Board during the Fourth Five Year Plan (1969-74).

- (a) Special Child Welfare Schemes: (i) Publication of pictorial Literature; (ii) Toy Industry; (iii) Subsidy for preparation of educational and recreational equipment; (iv) Seasonal creche in rural Balwadi; (v) Creche for children of working mothers; (vi) Day Care centres for children of working mothers; (vii) Permanent Holiday Homes; (viii) Creche/Balwadi at sites of Public works not covered under Factories Act; (ix) Recreation Centres for vagrant boys; (x) Model Homes for Children; (xi) Aid to Dependent mothers; (xii) National Centres for Child Welfare and Children Bureau; (xiii) Research Projects on special child welfare problems.
 - (b) Field Counselling Services;
- (c) Revised Scheme of Urban Welfare Extension Projects;
 - (d) Non-student Youth Programme;

Publicity: The Board brings out two monthly journals "Social Welfare" in English and "Samaj Kalyan" in Hindi.

Bulletins in regional languages are also brought out by the State Boards. The Board continued to bring out the monthly pamphlet 'Parivar Kalyan' giving activities carried out under Family and Child Welfare Programmes.

A documentary "Life Begins anew" highlighting Board's programmes of "Condensed Courses of Education for Adult Women" and the scheme of "Training-cum-Production Units" under its Socio-Economic Programme to provide work and wages to needy women and handicapped was released in January 1969.

Research & Evaluation: During the year, study notes entitled (i) 'Analysis of the courses of Imbalance in grants released by the Board;' and (ii) 'Schemes of Non-Student Youth welfare for implementation during the Fourth Five Year Plan' were undertaken and completed.

The Board collaborated in the publication of a three Volume Encyclopaedia of Social Work in India brought out at the instance of the Planning Commission.

A guide book on Family and Child Welfare Programme was also brought out in April 1968.

FOREIGN AID TO INDIAT

THE total amount or external assistance available during 1968-69, comprising aid in the pipeline (Rs. 2,070 crores) and fresh authorizations including aid in the form of debt rescheduling/postponement (Rs. 804 crores) amounted to Rs. 2,874 crores. This was considerably less than Rs. 3,271 crores available during 1967-68 and reflected the tapering of aid in the pipeline due to a sharp drop in fresh commitments during 1967-68. Fresh authorizations during 1968-69 at Rs. 804 crores were even lower than the authorizations of Rs. 900 crores in 1967-68. If, however, food and PL 480 assistance are excluded, authorizations for 1968-69 amounted to Rs. 623 crores as compared to Rs. 582 crores in 1967-68. The increase was due to an IDA non-project credit of Rs. 94 crores (\$125 million) and U.S. assistance for the Trombay fertilizer project and for the purchase of two jumbo jets.

Preliminary data show that Rs. 157 crores (\$209 million) of non-project aid including debt relief was authorized up to the end of January 1970; project aid of Rs. 180 crores (\$240 million) has also been authorised.

The pipeline (amounts authorised less amounts disbursed) of project and non-project assistance declined by Rs. 82 crores during 1968-69 from Rs. 1,899 crores at the end of 1967-68 to Rs. 1,817 crores at the end of 1968-69 comprising Rs. 1,200 crores of project assistance and Rs. 617 crores of non-project assistance.

The aid utilised during 1968-69 amounted to Rs. 896 crores, which was lower by Rs. 298 crores than in 1967-68. A decline in food assistance from Rs. 330, crores in 1967-68 to Rs. 186 crores in 1968-69 accounted for Rs. 144 crores. The balance was accounted for by a decline in non-food aid

[†] Source: The Government of India Economic Survey for 1969-70 and Explanatory Memorandum on the Budget of the Central Government for 1970-71, Part II.

from Rs. 364 crores in 1967-68 to Rs. 710 crores in 1968-69. Disbursement of non-project aid in 1968-69 amounted to Rs. 411 crores while project aid was Rs. 272 crores.

Total debt service charges rose from (post-devaluation) Rs. 143 crores in 1961-62 to (post-devaluation) Rs. 227 crores in 1965-66. These payments increased further to Rs. 333 crores in 1967-68 and Rs. 375 crores in 1968-69. Debt service payments will continue to be heavy during

the next few years and are estimated to be around Rs. 412 crores during 1969-70. Due to the increase in debt service payments and reduction in authorisations the net aid received during 1966-67 and 1967-68 amounted to Rs. 860 crores and Rs. 861 crores respectively. In 1968-69 it was only Rs. 521 crores. If allowance is made for specially large food imports during the past years, net aid excluding food aid drops sharply from Rs. 531 crores in 1967-68 to Rs. 355 crores in 1968-69.

Note: - Figures in brackets represent amounts authorised/utilised during the predevaluation period i.e. from April 1 to June 5, 1966.

LOANS

India has received assistance in the form of loans and grants from friendly foreign countries and international organisations. The first statement shows the amounts of loans authorised and the sums drawn against them and the second statement shows the repayments in respect of each loan.

[@] Provisional Information regarding grants is incomplete.

In the case of P.L. 480 assistance, the amount authorised represents the value of commodities payable in rupees and the term utilised represents the value of rupee deposits made against the commodities imported. PL 480 assistance repayable in convertible currency is included in the loans repayable in foreign currency.

In addition to the above figures, debt relief of Rs. 82·1 crores in the form of rescheduling/postponement was provided by Japan, Canada, U.S.A. and I.B.R.D. Debt relief in the form of refinancing credits or grants is included in the figures of authorisation and utilisation.

The authorisations are not of cancellations/de-obligations. In the case of PL-480, a sum of Rs. 107.6 crores remained unutilised at the end of the Third Plan after taking into account a sum of Rs. 87-5 crores for which no imports were expected. A further sum of Rs. 7-0 crores was not drawn at the end of 1967-68.

^{*} Includes a U.S. loan of Rs. 168.8 crores which was committed for 1967-68 but for which agreement was signed in 1968-69.

N.B.—Figures of aid authorised based on commitments made may not tally with those on the basis of agreements signed.

GRANTS

L Assistance under the Colombo Plan

Assistance is received from the Commonwealth countries under the Colombo Plan in the form of equipment, materials, etc. and services of experts. This includes grants in kind in the shape of raw materials for industry, equipment for dairy development, equipment for College of Engineering, Delhi, Toa Research Association, Central Mechanical Engineering Research Institute, Tata Momorial Centre, Post Graduate Institute of Medicine, Chandigarh, Indian Institute of Technology, non-project non-commodity imports for private sector, etc. An amount of Rs. 6·19 lakhs was received from New Zealand Government for the Bombay Milk Scheme, Groasy wool was received from Australia to facilitate production and export of hosiory, fabrica, etc.

II. Assistance from the Govt, of U.S.A.

(a) Assistance under PL.480.—Grants under PL. 480 are expected to amount to Rs. 10 crores this year and Rs. 16.40 crores next year. A sum of Rs. 5 crores this year and Rs. 7.40 crores next year will be paid back to A.I.D. to meet the local cost of experts.

(b) Assistance under Technical Co-operation Programme.—The Indo-U.S. Technical Co-operation Programme agreement of 1952 provides for funds to be made available by the U.S. Government for mutually agreed projects and includes development loans and grants. Grants have been made in such fields a Agriculture and Natural Resources, Industry and Training, Transport and Communications, Health and Sanitation, Education and Public Administration. The grants are in the form of materials and equipment.

III. Assistance from the Govt. of Norway for Fisheries Development

Since 1952, Norway has been assisting this country in the development of fisheries. The project inter alia aims at raising the standard of living of the fishermen through an increase in the return for their activity by improvement of fishing methods, efficient distribution of fresh fish and improvement of fish products. The activities of the project, which were formerly confined to the State of Kerala, have now been extended to the States of Tamil Nadu and Mysore also.

IV. Other Assistance

Foreign assistance is also received from international philanthropic organisations like the Rockefeller Foundation and the Ford Foundation for schemes in the field of education, public health, agriculture, social uplift, community development, etc. Assistance is also received from certain specialised agencies of the United Nations Organisation such as United Nations Technical Assistance Admn., United Nations Special Fund, United Nations Children's Emergency Fund, Food and Agricultural Organisation, W.H.O., World Meteorological Organisation, etc.

Food Aid from Australia, Canada, Federal Republic of Germany, Denmark, France and European Economic Community in the form of wheat grants is estimated at Rs. 28 crores this year and Rs. 20 crores next year.

In addition, fertiliser is expected as aid from certain countries like Austria, Federal Republic of Germany, Sweden, etc. and milk powder from the Dairy Boards of Australia and New Zealand.

U. S. AID TO INDIA

NITED States economic assistance to India commenced in 1951 with a loan of \$189.7 million (Rs. 142.28 crores) to purchase two million tons of wheat. Since then the United States has extended support to many aspects of India's development programme. U.S. aid through December 1969 totals \$9,340.2 million (Rs. 7,005.15 crores), and consists of both grants and loans.

U. S. Economic Assistance to India June 1951-December 1969: The first figure is in million dollars and the figure in brackets the rupee equivalent at current rate of exchange in crores: 1. USAID Mission's Technical Co-operation Programme: (a) Development Grants (not repayable) 422.5 (316.88); (b) Loans (repayable in rupees or dollars) 154.1 (115.8); 2. USAID Development Loans: (a) repayable in dollars 2,320.2 (1,740.15); (b) repayable in rupees 515.6 (386.70); 3. Public Law 480, Title I (grants and loans repayable in rupees) 4,637.0 (—*); 4. Public Law 480, Title II (donations, not repayable) 620.5 (465.38); 5. Emergency Flood & Famine Relief grants (not repayable) 5.5 (4.13); 6. U. S. Export-Import Bank Loans (repayable in dollars) 475.1 (356.32); 7. Wheat Loan of 1951 (repayable in dollars) 189.7 (142.28); Total 9,340.2 (7,005.15).

Categories of Aid: The first figure is in million dollars and the figure in brackets the percentage of total: 1. Grants (not repayable) 1,887·4 (20·2); 2. Loans repayable in dollars 2,985·0 (32·0); 3. Loans repayable in rupees convertible to dollars at the option of the U.S. Government 312·2 (3·3); 4. Local currency repayments (these include loans repayable in rupees or dollars at the option of the Government of India; the Cooley Fund for loans to private enterprise and amounts under PL-480, Title I, agreements reserved for U.S. Government uses 4,155·6 (44·5); Total 9,340·2 (100·0).

DOLLAR-RUPEE CONVERSIONS

For the sake of uniformity and simplicity all dollar figures included in this Fact Sheet are shown with conversions in Indian currency at the current rate of Rs. 7.60 to the dollar. Prior to June 5, 1966 the rate of exchange was: \$1 == Rs. 4.76.

In regard to loans repayable in dollars, this Fact Sheet lists the equivalent of the entire loan amount in Indian currency at the current rate of exchange. However, in many cases a part of the loan has already been repaid at the old rate. Loans repayable in rupees fall in two categories. In the first category are loans extended by the former U.S. Development Loan Fund (U.S.D.L.F.), and under the U.S.A.I.D. Mission's Technical Cooperation Programme. The loans provided foreign exchange in dollars, and the loan agreements included clauses providing that repayment would be based on the official rate of exchange at the time repayment was made. Thus devaluation had the effect of changing the outstanding balance in terms of rupees, though not in dollars.

In the second category are loans to the Government of India and to private enterprises from P.L. 480 funds. These loans are intended for purchasing supplies and services available in India. Devaluation does not affect the repayment terms. The borrower's liability is limited to the amount of rupees specified in the loan agreement.

American assistance to India is at present extended through the following three agencies.

U.S. AGENCY FOR INTERNATIONAL DEVELOPMENT (U.S.A.I.D.)

This new Agency created on November 2, 1961 is in charge of activities previously administered by the International Cooperation Administration, which was represented in India by the Technical Cooperation Mission (TCM), the Development Loan Fund, the Public Law 480 Programme in its relation with other countries, and other staff and related functions. A USAID Mission functions in New Delhi. Both grants and loans are extended by the Agency.

Dollar Grants: Technical cooperation: For the Technical Cooperation Programme, USAID extends grants and, at the request of the Government of India, makes available the services of American specialists. Support has been extended to malaria and smallpox eradication, agricultural and technological universities, the development of high-yielding cereals, dairy development, the training of craftsmen, community development and many other nation-building activities.

Amount: Dollar grants since the beginning of the programme total \$422.5 million [Rs. 316.88 crores].

U.S. specialists: Since 1951, 2,825 American specialists have served in India, sharing their skills and experience with their Indian colleagues. The figure includes 205 who are presently in the country. The specialists, whose services are made available at the request of the Government

^{*} It is estimated that PL-480 deposits under existing agreements will total approximately Rs. 2,550 erores, which is considerably less than the rupes equivalent of \$4,637.0 million at the current rate of exchange.

of India, belong to many different disciplines such as agricultural education, agronomy, engineering, entomology, family planning, labour relations, malaria eradication, mineral exploration, mining, nutrition, plant breeding, public administration, science education, soil and water management, technological education, and transportation. They work with government departments, educational institutions, and other organizations.

Indian participants: Another important aid activity concerns the provision of advanced training in the United States to Indian officials, teachers, engineers, health specialists and other personnel and facilitating visits by Indian specialists to the United States and other countries to enable them to observe developments in their fields of work. The total number of these Indian participants now stands at 5,406. This includes 331 who are still undergoing training in the United States.

Dollar Loans: Loans extended to India by USAID and its predecessor organizations are of two kinds: (1) those repayable in rupees and (2) those repayable in dollars.

Loans repayable in rupees: Loans extended to India by the Development Loan Fund (now absorbed into USAID) are repayable in rupees. These loans total \$515.6 million [Rs. 386.70 crores].

Loans repayable in dollars: USAID has extended 47 loans repayable in dollars. They total \$2,320.2 million [Rs. 1,740.15 crores].

Terms: Repayment is scheduled over 40 years, with no payments of principal during a grace period of the first 10 years.

Interest: Recont loans bear an interest rate of 2 per cent per annum during the grace period and 3 per cent thereafter.

U.S. PUBLIC LAW 480

(Food for Peace Programme)

India has been the largest recipient of U.S. agricultural commodities under Title I, P.L. 480. The law has been extended to December 1970.

P. L. 480 Title I

Under this title the United States sells agricultural commodities to developing nations on concessional terms. India concluded the first PL-480 agreement on August 29, 1956. Since then nine additional agreements and 34 supplemental agreements have been signed—the latest on October 13, 1969.

The value of commodities covered by all PL-480 agreements is \$4,637.0 million (including some ocean transportation costs).

India pays for PL-480 supplies in rupees.

For \$4,324.8 million, the bulk of PL-480 proceeds, the agreements specify that 80.5 per cent should be returned by the United States to the Government of India in grants and loans for economic development (19.4 per cent as grants; 61.1 per cent as loans). A sum equivalent to 6.5 per cent of the total is reserved for loans to private enterprise; and 13.0 per cent is reserved for U.S. Government uses, but a substantial part of this amount, too, is utilized to promote a number of activities beneficial to India. PL-480 grants and loans have helped finance a great deal of development work undertaken by the Government of India.

The remaining \$312.2 million provided in the PL-480 agreements is repayable in rupees convertible to dollars at the option of the U.S. Government. This portion of

the agreements is covered by a 40-year loan with the same provisions relating to interest rates and grace period as USAID loans repayable in dollars.

Under the terms of the PL-480 agreements, the Government of India deposits in the U.S. Government's account with the Reserve Bank of India rupees equivalent to the dollars paid to U.S. suppliers of agricultural commodities. These rupee deposits are made at the rate of exchange prevailing at the time of the dollar disbursements. The major portion of the rupee deposits had been made before the devaluation of the rupee in June 1966. It is estimated that the total PL-480 rupee deposits will amount to approximately Rs. 2,550 crores, which is considerably less than the rupee equivalent of \$4,637.0 million at the current rate of exchange.

Title II

This title provides for donations of agricultural commodities to help meet famine or other urgent or extraordinary relief requirements and to combat malnutrition, especially in children. In India commodities are distributed through voluntary agencies such as CARE (Cooperative for American Relief Everywhere), Catholic Relief Services, Church World Service and Lutheran World Relief. During the American fiscal year (ending in June 1970) it is planned to distribute nearly 500,000 tons of food valued at \$97-2 million (Rs. 73 crores) under this title. The food includes wheat milk protein foods and vegetable oils.

Ninety-one per cent of the total Indian programme is directed towards raising the level of nutrition of 12.2 million school children and 3.4 million pre-school children. About 1.4 million workers engaged in a number of development projects receive the food supplies as part payment for the work done.

Besides, some 150,000 people in miscellaneous categories, such as institutional feeding, health cases, etc., benefit from the donated supplies.

THE EXPORT-IMPORT BANK

The Bank authorizes loans, guarantees and insurance to facilitate the foreign grade of the United States. The Bank has authorized 28 loans to India totalling \$475.1 million (Rs. 356-32 crores). Its loans are in dollars and repayable in dollars. In determining interest rates, the Bank considers its own cost of borrowing money. The current standard interest rate is 5.5 per cent per annum.

GRANTS FROM U.S. PUBLIC LAW 480 SALE PROCEEDS

Figures in crores of rupees: Agriculture 38.33; Industry and Mining 6.61; Transportation 19.60; Labour 39.46; Health 123.83; Education 100.18; Total grants 328.51.

Loans to the Indian Government from U.S. P.L. 480 Sale Proceeds

Figures in crores of rupees: Agriculture 282,50; Industry 613,46; Labour 48.02; Health 94.38; Education 73.66; Community Development 64.08; Transportation 24.15; Total 1,300.25.

COOLEY FUND

The Cooley Amendment to U.S. Public Law 480 provides that a portion of the local currency proceeds from the sale of American agricultural commodities shall be made available for lending in the private sector to two categories of borrowers:

- American firms or their subsidiaries operating in the host country (India) or indigenous (Indian) firms having an affiliation with an American firm;
- Indigenous firms of the host country with no American affiliation but which facilitate the disposal of American agricultural products, e.g. local private warehouses storing grain or flour mills processing grain.

Loans amounting to Rs. 969,568,100 have been extended from the Cooley Fund.

U.S. ASSISTANCE FOR POWER DEVELOPMENT IN INDIA

India has received substantial assistance from the United States for power development. The U.S. has extended foreign exchange assistance totalling \$445.5 million (Rs. 334.13 crores). In addition Rs. 349 crores in Indian currency from the sale proceeds of U.S. agricultural commodities have been extended in loans and grants for power development. Of the 16-million kilowatt total of power-generating capacity now available in India, as

much as one-third is accounted for by the 30 power projects aided by the United States. When all of them reach their targeted output, they will be generating 6.5 million kilowatts.

Under an agreement signed on March 24, 1970 the United States Government has extended a loan of Rs. 60-5 crores to India to finance a part of the expenditure on various development activities.

U.S.-Uses Rupees

PL-480 agreements between India and the United States provide for a sum of approximately Rs. 300 crores to be reserved for U.S. uses. U.S. owned Rupees are used to meet the expenses of the U.S. Government in India. A considerable share of U.S. owned rupees is being apent on programmes which are of direct benefit to India. These include Educational Exchange, Low-cost Textbooks, Procurement of Indian books and periodicals, American Studies in India and Research. Expenditure from U.S. uses Rupees through December 31, 1969 amounted to Rs. 233·14 crores*.

U. S. Technicians

U.S. Technicians assigned to India by field of activity as of June 30, 1969 are given in the table below:

PUBLIC FINANCE

SOURCES OF REVENUE AND EXPENDITURE

THE principal sources of Central revenue are: customs duties, excise duties levied by the Central Government, corporation tax, income tax (excluding taxes on agricultural income), wealth tax, estate and succession duty, the earnings from the mints, terminal taxes on goods or passengers carried by railway, sea or air, taxes on railway fares and freights, taxes (other than stamp duty) on transanctions in stock exchange and future markets, stamp duty on bills of exchange, cheques, bills of lending, letters of credit, insurance policies, transfer of shares, etc.

The railways and the posts and telegraphs contribute to the Central revenues. There are also the profits on the Government industrial undertakings.

About as much as 80 per cent of the revenue is derived from the customs, excise duties, corporation and incometaxes.

† As presented to the Parliament on Feb. 28, 1970.

The two biggest items of expenditure of the Central Government are outlay on development programmes (capital account) and defence.

Then there is public debt which consists of rupee loans, sterling loans and loans received from other countries. The rupee debt may be divided into three classes, long term loans and money market liabilities, the unfunded debt which includes provident funds, postal deposits, saving certificates, and last the deposits.

1970-71 BUDGET †

The Prime Minister Mrs. Indira Gandhi presented to the Parliament on February 28, 1970, the budget for 1970-71. The fresh tax proposals seek to raise an additional revenue of Rs. 170 crores (including Rs. 45 crores of State's share). With the bigger tax effort, the total public sector plan outlay has also been increased to Rs. 2,637 crores i.e. an increase of about Rs. 400 crores over the outlay of Rs. 2,239 crores in 1969-70. The Centre's Plan outlay at Rs. 1,411 crores will be 15 per cent higher than the 1969-70 level.

@ Poes not include States' share.

Main Features

The budget makes special provision for a number of schemes which combine an element of social welfare with future growth potential. The programme includes schemes for benefitting the weaker and more vulnerable sections of the rural population. An attempt has been made to make the farmer more viable and a variety of schemes have been incorporated to deal with the problems of dry farming and rural works programmes.

TAX PROPOSALS IN BRIEF Direct Taxation

(1) The marginal rate of income-tax is increased to 93.5 per cent in the slab over Rs. 2 lakhs as against 82.5 per cent in the slab over 2½ lakhs at present.

Other direct tax proposals relate to a raising of the wealth tax rate. At present, these rates vary from 0.5 per cent to 3 per cent. They will now vary from 1 per cent at the lowest slab to 5 per cent at the highest slab. Provision has been made for a uniform personal exemption of Rs. 5,000 and a unified deduction of Rs. 3,000 for income from units, Indian companies and other specified savings. No change is proposed in the corporate tax system, except for non-allowance of entertainment expenditure for tax purposes. The rates of gift tax have been revised to bring them more in line with the rates of estate duty and the present exemption limit of Rs. 10,000 in respect of gifts made during a year is being lowered to Rs. 5,000.

The total yield from direct tax measures in a full year would be Rs. 36 crores. But in 1970-71, the net addition to the Centre's resources from these changes would be Rs. 5 crores only and the States will gain to the extent of Rs. 10 crores in 1970-71.

Indirect Taxation

A major part of the additional tax revenue is to be obtained through indirect taxes and here the Prime Minister has cast her net wide. Total tax revenue from indirect taxes is placed at Rs. 155 crores i.e. Rs. 135 crores from excise and Rs. 20 crores from customs. After transferring the States' share, Rs. 120 crores will accrue to the Central Government by way of indirect tax measures.

Some of the Important Indirect Tax proposals:

Custome:

- (a) The duty on jute canvas, jute webbings, jute tarpaulin cloth and manufactures thereof is being reduced from Rs. 500 to Rs. 200 per metric tonne.
 - (b) Export duty on tea is abolished altogther.

(c) The import duty on machinery has been raised from 27½ per cent to 35 per cent ad valorem. The import duty on motor vehicles parts, pharmaceutical chemicals and non-electrical instruments, apparatus and appliances is increased by 10 per cent ad valorem. The duty on certain plastic materials and nichrome and other electrical resistance wires is also raised from 60 per cent to 100 per cent ad valorem. The duty on whisky, brandy, gin and wines is also increased.

The net gain in customs revenue after adjusting export duty loss will be Rs. 20 crores.

Excise .

A 10 per cent ad valorem excise duty is imposed on a number of new items including office machines, metal containers, sparking plugs, stainless steel blades, slotted angles, iron safes and safe deposit vaults. The levy on office machines covers items like typewriters, calculating machines, cash registers, cheque-writing machines, computers and intercom devices. The duty on metal containers is confined to those intended for the packaging of goods for sale, including casks, drums, cans, gas cylinders and rigid containers. The additional revenue from these new duties will amount to Rs. 10-40 crores.

Among chemical products, duty at the rate of 10 per cent ad valorem has been levied on calcium carbide, bleaching powder and sodium hydrosulphite and the present duty of 5 per cent on soda ash and caustic soda is raised to 10 per cent. An excise duty of Rs. 300 per metric tonne is also levied on synthetic rubber. These changes will bring in an additional revenue of Rs. 5•30 crores.

Levy is also imposed on products such as vegetable juices, synthetic syrups and sherbats, de-hydrated peas, malted foods, instant coffee, instant tea, jelly crystals, custard and ice-cream powders, biscuits, coccapowder, drinking chocolate, pasteurized butter, processed cheese, branded aerated waters, glucose and dextrose. These proposals will yield an additional revenue of Rs. 8-68 crores.

The duty on sanitary ware and glazed titles of porcelain is raised from 15 per cent and 10 per cent respectively to 25 per cent. The duty on room air-conditioners is raised from 40 per cent to 53½ per cent and a similar increase is made in respect of larger refrigerators with a capacity exceeding 165 litres. The duty on parts of refrigerators, air-conditioning plants and machinery is raised from 53½ per cent to 66½ per cent. The exemption in favour of television sets is withdrawn and a duty of 20 per cent ad valorem is imposed. The gain in revenue from these measures will be Rs. 2·24 crores.

In the case of aluminium the existing specific duties are being replaced by ad valorem duties which will bring an additional revenue of Rs. 4-70 crores. The rationalisation of the duty on rigid plastic boards will yield an additional revenue of Rs. 96 lakhs.

The basic excise duty on polyester fibre of 2 deniers or less is increased from Rs. 21 to Rs. 25 per kilogram with a corresponding increase in special excise duty. The present nominal duty of 7.8 paise per sq. metre on artificial silk fabrics which include rayon, nylon, terylene, terry and terrywool fabrics is replaced by ad valorem duty ranging from 3 per cent to 10 per cent. This will yield a revenue of Rs. 13.78 crores.

The duty on motor spirit is increased by 10 paise per litre, on superior kerosene and furnace oil by 2 paise each; the total additional yield by these measures will be Rs. 39.56 crores.

The duty on cigarettes is enhanced from 3 per cent to 22 per cent ad valorem, which will bring an additional revenue of Rs. 13-50 crores.

There will be no increase in the duty on loose tea produced in zone one and only a marginal increase of 10 paise per kilo on teas produced in zone two. For other zones, the increase varies from 45 paise to one rupee per kilo. After allowing for the rebate on export, there will be an additional revenue of Rs. 7.87 crores which will be offset by the loss in revenue from the abolition of the export duty on tea.

The duty on free market sugar is increased from the present level of 23 per cent to 37½ per cent ad valorem. In the case of levy sugar which accounts for 70 per cent of the total, there would only be a marginal rounding off of the present rate from 23 per cent to 25 per cent. The tariff rate of duty on khandsari sugar is also raised from 12½ per cent to 17½ per cent. The net additional revenue from sugar is estimated at about Rs. 28.50 crores.

The statutory rate of duty on tin plates has been raised from Rs. 375 to Rs. 400 per metric tonne. Some relief is also given in the case of straw boards and mill boards by revising the excise duty exemption at certain levels of production. These measures of relief in excise duty will involve a loss in revenue of Rs. 43 lakhs.

Posts and Telegraphs:

Charges for telephone calls beyond the first 750 calls in a quarter have been proposed to be increased to 20 paise per call. This change will yield Rs. 8.22 crores in a full year.

CAPITAL RECEIPTS AND DISBURSEMENTS

Capital account shows the capital requirements of Government and how these are financed. Among the principal sources for meeting these requirements first there is the revenue surplus. Secondly, regular loans are floated in the market. Thirdly, funds accrue to Government through small savings, annuity deposits and State Provident Funds, and through miscellaneous deposits and advances. Lastly, there are external borrowings. To the extent receipts from these sources fall short of the capital requirements the deficit is made good by the issue of treasury bills and drawal from each balance.

The statement below gives a summary of the capital transactions:

Capital Receipts

DEBT POSITION

The mounting debt burden of the Government of India shows more than a seven-fold rise since the inception of planning. As seen from the table below, public debt obligations of the Union Government have increased from Rs. 2,565 crores in 1950-51 to Rs. 6,544 crores in 1960-61 and are likely to be Rs. 17,845 crores and Rs. 18,855 crores at the end of 1969-70 and 1970-71 respectively.

RAILWAYS

THE total route kilometrage of all the Railways in India on March 31, 1969 was 60,014.42. The total electrified route kilometrage was 3,247.32.

The total route kilometrage is made up of the following: Government Railways: 59,553.02.

Non-Government Railways: 461-40.

The total capital at charge of Government Railways on March 31, 1969 was Rs. 2.923-08 crores.

There are three kinds of gauge, broad (1.676 m.), metre (1.000 m.) and narrow (0.762 m.). There is also a light gauge usually laid on the mountains (0.610 m.). An example of the last one is the Howrah-Amta Light Railway lines.

The total route kilometrage by gauge was as follows:

Broad gauge: 29,219.84.

Metre gauge : 25,726 · 80.

Narrow gauge: 4,106.04.

There are in all 7,929 railway stations. This includes 1,797 non-block stations.

The total number of employees, permanent and temporary, on Government Railways (including non-Government Railways) and in the office of the Railway Board and other offices attached and subordinate thereto as well as staff employed on construction works at the end of 1968-69 was 1,358,857 compared to 1,367,615 (revised) at the end of 1967-68. Of this the non-Government Railways accounted for 4,586. The Railways have a fleet service of approximately 11,555 locomotives, 29,288 coaching vehicles and 365,299 wagons or freight cars. The non-Government Railways have 95 locomotives, 302 passenger coaches and 1,440 goods wagons.

ZONAL ADMINISTRATION

The entire Government Railway system is now grouped into nine administrations (Headquarters within brackets): Southern Railway (Madras); Western Railway (Bombay); Central Railway (Bombay); Northern Railway (Delhi); Eastern Railway (Calcutta); South-Eastern Railway (Calcutta); North-Eastern Railway (Gorakhpur); North-East Frontier Railway (Pandu); South Central Railway (Secunderabad).

Some of these Railways comprise smaller systems.

There are six non-Government Railways. The route kilometrage is given in brackets after the name:—

Arrah-Sasaram Light (104.86); Dehri-Rohtas Light (66.75); Futwah-Islampur (43.45); Howrah-Amta Light (70.31); Howrah-Sheakhala Light (27.16); Shahdara (Delhi)-Saharanpur Light (148.87).

They are all narrow gauge (0.762 m.) except the two Howrah-Amta and Howrah-Sheakhala which are light gauge (0.610 m.).

The highest administrative authority for the Railways is the Railway Board.

There are a number of Committees which have been associated with the Railway Administration: Standing Finance Committee, Central Advisory Council, Railway Rates Tribunal, Indian Railway Fuel Committee.

There are also a number of standardization Committees such as for bridges, structure, track, signalling and inter-locking, building, Iocomotive, carriage and wagon, electrical, specifications.

There are also Railway Users' Consultative Committees at the zonal, regional and national level. There is a Time

Tables Committee, Suburban Railway Users' Consultative Committee, Passenger Amenities Committee, Catering Supervisory Committee, Book-Stall Committee. A Public Co-operative Committee consisting of members from National Railway Users' Consultative Council and Members of Parliament was formed to combat crime. Zonal Parliamentary Committees have been constituted which meet the respective General Managers of the Zonal Railways in company with the Railway Minister and the Railway Board.

There are Railway Service Commissions in Bombay, Calcutta, Allahabad and Madras.

There is a training college for Railway officers and staff at Baroda and 50 Training Schools.

There is a Railway Testing and Research Centre at Lucknow and a sub-centre at Chittaranjan mainly to help in the promotion of self-sufficiency in Railway Stores.

STATISTICS*

The principal statistics for the year 1968-69 are given below. The first column shows the position for all Railways, the second only for Government Railways:

All	Railways	Government Railways
Capital-at-charge (Rs. crores) Route kilometrage (March	3,107 · 77	2,923.08
31)	60,014 · 42	59,553.02

Net earnings per mean route k.m. worked (Rs.)	26,415 - 00†	26,618 - 00†

^{(1) &#}x27;Gross earnings' represent the true earnings in an accounting period irrespective of whether the amounts have been realised or not. They include earnings from Mormugao Harbour and also carnings awaiting realisation. (2) 'Working expenses' are the administrative figures of railway accounts representing true expenses of the railway system in an accounting period irrespective of whether the expenses have been disbursed. These are accordingly the sum total of the ordinary working expenses and the appropriation to the Depresiation Reserve Fund (and the Pension Fund from its April, only); the amount of suspense and 'payments to worked lines' are not included (*) 'Operating ratio' shown here represents the percentage

[·] Source : Railway Board Report for 1968-69.

740 · 13 k.m.

of working expenses to gross earnings as defined in explanations at (*) & (*) above, (*) Freight tonnes originating includes the tonnage of railway stores and materials carried in material, ballast trains on open lines for railway constructions project authorities, stock owned or hired by them for independent railway project works. These statistics were not taken into account in earlier years. (*) 'Earnings from carriage of goods' exclude carnings from demurrage wharfage, etc. (*) 'Net earnings' represents gross earnings minus working expenses, as defined in explanation (*) and (*) above. (*) 'Capital-at Charge' includes the capital outlay on worked lines but excludes that on railway manufacturing units and miscellaneous independent projects such as the Chittarahian Locomotive Works, the Integral Coach Factory, the Diesel Locomotive Works, the Dandaksranya-Balangir-Kriburu Railway Project, the Railway Electrification Project, etc.

† Includes the element of tax on passenger farcs.

‡ During 1968-69 the contribution to the Depreciation Reserve Fund was Rs. 95 corres as against a like sum in the previous year.

2 During 1968-69 the contribution to the Depreciation Reserve Fund was Rs. 95 crores as against a like sum in the previous year. 4 Excludes 0.75 million tonnes iron ore for export originating on the D. B. K. section during 1st April, 1968 to 31st October 1968 when the line was still under construction.

MAIOR ACCIDENTS IN 1968-69

The following were the four major Railway accidents which took place during 1968-69: (1) At 00.50 hours on 18th April 1968 a collision took place near Meghnagar station on Godhra-Ratlam double line section of the Western Railway. After goods train No. 768 Up had started moving at 00.50 hours, diesel goods train No. 846 Up came from behind and collided with the rear of the former. As a result of this accident 12 persons were killed and five injured. The cost of damage to railway property was estimated at approximately Rs. 6,93,500. (2) On May 28, 1968 at about 3.45 hours, Goods train No. DD 27 Down ex-Melapakam to Nandalu, was approaching Renigunta Station on the Arkonam-Raichur section of the Southern Railway, it entered Road No. 5 and collided with the stationary rakes of passenger train No. 418 Up

[†] Excludes miscellaneous goods earnings like demurrage, wharfage etc.

267

Renigunta-Madras and 93 Down Renigunta-Raichur.
As a result 14 persons were killed and 51 injured.
The cost of damage was estimated at approximately
Rs. 1,06,500. (3) On 7th August 1968, at 14.57 hours,
the third coach from the engine of train No. 2FTD Delhi-
Tundla-Farrukhabad Passenger, which left Maripat
Station was noticed to have caught fire. As a result of
fire and the passengers jumping out, 18 persons were
killed and 43 injured causing damage to the tune of
Rs. 55,000. (4) On Feb. 4, 1969, No. 114 Up Madurai-
Madras Janata Express with a number of unauthorised
ticketless passengers travelling on the engine, footboards
and roof tops proceeding to Madras to attend the funeral
of Shri Annadurai, the late Chief Minister of Tamil Nadu,
passed through Vallampadugai Station, and while passing
over bridge No. 685 at Km. 251/7-8, some of the roof
travellers were struck by the overhead bracing of the
girders. As a result 37 persons were killed and 38 injured.

REVIEW OF 1968-69 Goods and Passenger Traffic

During 1968-69, the passenger traffic of Govt. Railways registered a drop of 1.98 per cent in terms of passengers originating and 0-21 per cent in terms of passenger Kilometres. Revenue earning goods traffic in terms of tonnes originating and net tonne Kilometres, showed an inprovement of 5.21 per cent and 6.93 per cent respectively.

The gross earnings of Indian Railways, including non-Government Railways were Rs. 902.7 crores in 1968-69 against Rs. 823.1 crores in the previous year. The gross traffic receipts of Government Railways including worked lines accounted for Rs. 898-84 crores against Rs. 818-14 crores in 1967-68.

After meeting all charges including Rs. 97.40 crores contributed to the Depreciation Reserve Fund, Rs. 150.67 crores paid to the General Revenues including payment in lieu of tax on passenger fares, and an expenditure of Rs. 7.67 crores on open line works (Revenue) net revenue fell short of dividend payable to General Revenues by Rs. 7-86 crores against the short fall of Rs. 31-53 crores during the previous year.

New Lines

New lines totalling 740.13 kms. were opened to public traffic during 1968-69. Lines totalling 1,017.24 kms. were under construction and surveys for new railway lines conversions were ordered for 2,106.55 Km. during the year. Lines totalling 259.90 Km. were doubled and opened to traffic. The conversion of 326.15 kms, of metre gauge to broad gauge between Poona and Miraj (279.00 kms.) and Miraj and Kolhapur (47.15 kms.) on the South Central Railway was in progress.

Bridges

The total number of bridges (including road over and under bridges and irrigation over head channels which do not serve as water-ways) on Government Railways was 103,379 as on March 31, 1969. Of this, the number of bridges having water-ways was 102,246. There were 8,325 major bridges. The work of regirdering, strengthening, rebuilding, extension, replacement and renewals, etc. was completed on 484 bridges and work on 147 bridges was in progress during the year.

Electrification

During the year progress was maintained on the extension of 25 KVAC electric traction on various sections of the Central, the Eastern and the South Eastern Railways. Work was completed on 351 route kilometres. With the energisation of the above lines the total route length of railway line electrified on the 25 KVAC system was 2,889 route kilometres. The total route length including 358 route kilometres which already existed on 1,500 V DC system of traction on the Central and the Western Railways aggregated to 3,247 route kilometres as on March 31, 1969.

Commercial Advertisement

From Commercial advertising on the Railways, an amount of Rs. 64,61,367 was earned during 1968-69 as compared to Rs. 57,46,249 during the previous year.

Complaints

There were 2,138 complaints pending disposal at the beginning of the year and 40,184 complaints were received during the year as against 45,201 in the previous year. Of the total of 42,322 complaints, 40,371 were disposed of in the course of the year leaving a balance of 1,951.

Claims, Compensations

During the year the Railways had to deal with a total of 820,898 compensation claims including 59,047 unsettled claims at the close of the preceding year. The number of claims settled during the year was 705,865 leaving 55,033 claims outstanding at the close of the year. The net amount paid as compensation for goods and parcels lost or damaged was Rs. 9.30 crores as against Rs. 7.22 crores in the previous year.

Applications numbering 189,609 for refund of overcharges in respect of goods and parcels were received against 159,329 during the previous year.

Ticketless Travel

Number of passengers detected travelling without tickets or with improper tickets: 8.47 million; Amount of fare and excess charges realised: Rs. 304.34 lakhs; Number of passengers prosecuted 0.32 million; Number of cases of unbooked and partially booked luggage: 1.84 million; Amount realised from unbooked and partially booked luggage cases: Rs. 60-12 lakhs.

Fourth Plan

The draft of the Fourth Five Year Plan commencing from April 1, 1969 was brought out by the Planning Commission in March 1969. The Railways Fourth Five Year Plan* envisages an outlay of Rs. 1,575 crores to be spent during the five year period 1969-70 to 1973-74.

In addition a sum of Rs. 50 crores has been allotted, outside the Railway Plan for providing mass transit facilities in the metropolitan cities of Bombay, Calcutta, Madras & Delhi.

Security Measures

The Railway Protection Special Force rendered useful service in providing security measures and protecting vital railway installations.

They also assisted the ticket checking staff on zonal Railways in organising drives against ticketless travel.

During 1968-69, 6,374 persons were arrested for thefts of public property and railway materials and equipment as against 4,595 persons in 1967-68. The number of cases of theft of railway materials and equipment came down to 29,960 against 30,038 cases in the previous year. The value of property stolen also came down to Rs. 32.08 lakhs from Rs. 35.83 lakhs. Thefts of booked consignments from running trains, yards, goods-shede, parcel offices and platform declined from 2,655 to 1,964 and cases of pilferage also came down from 6,825 to 5,021 in 1968-69.

The Railway Property (Unlawful Possession) Act, 1966, came into force from April 1, 1968 empowering the R. P. F. to investigate and prosecute cases in which case if any one is found or is proved to have been in possession of any railway property reasonably suspected to have been stolen or unlawfully obtained. During the year 1968-69, 966 cases were registered under this Act, and property worth Rs. 13-41 lakhs was recovered. A total of 12,262 persons including 1,768 railway employees were arrested. Of these 2,160 persons were convicted, 184 acquitted and the remaining were under trial.

Staff and Labour Welfare

Relations with organised labour suffered a set back due to the token strike on September 19, 1968. Consequently, as a general policy of the Government, it was decided that the Unions/Associations which participated in the strike should be derecognised. But the affiliated Unions of the All-India Railwaymen's Federation on the Central, the Western and the South Central Railways continued to enjoy recognition. The scheme of joint consultation and compulsory arbitration for Central Government employees including railway servants continued to function satisfactorily. The machinery provides for meetings of Joint Councils at the National and the departmental levels on the railways. The joint council at the departmental level, known as the Departmental Council, was formally inaugurated on July 10, 1968.

Railway Schools: The Government have provided as a staff welfare measure, a number of railway schools at places where educational facilities are not available. In 1968-69 the railways were running 749 schools—two intermediate colleges, 48 high/higher secondary schools, 33 middle schools and 666 primary schools. The pupils who attended these schools were 145,105 in 1968-69.

RAILWAY BUDGET 1970-71

The Railway Budget presented on February 23,1970 by the Railway Minister Mr. Gulzarilal Nanda, shows a surplus of 22.38 crores. Fairly steep increases were announced in passenger fares for all classes of travel and

* Final document.

in freight rates for all categories, of goods to boost the rail-ways' earnings by Rs. 39 crores in 1970-71. The Minister pleaded that he had no alternative but to tap every available source of revenue to raise additional resources of Rs. 329 crores in the Fourth Plan to finance Railway programmes. Even the existing fare concessions for travel by airconditioned chair except the concession admissible to children below 12, have been withdrawn. Travel by A. C. chair car will cost about Rs. 6 more than the enhanced second class fare.

The increase in passenger fares works out to seven per cent for first class.

Before the Parliament took up the railway budget for discussion on March, 4, Mr. Nanda announced the withdrawal of the proposed increases in third class fares, sleeper charges, price of platform tickets and freight rates for food grains and parcel charges for milk. This would decrease the expected rise through higher fares and freight rates of Rs. 39 crores to Rs. 26 crores in 1970-71.

The all-round increase in fares will hit passengers travelling by any class other than 3rd class on mail, express or passenger trains and monthly season ticketholders on the suburban lines in Bombay, Madras and Calcutta.

It is estimated that the increase in freight rates will bring in an additional revenue of Rs. 25.5 crores in 1970-71.

Parcel rates have also been adjusted to yield an additional revenue of Rs. 2 crores.

Earlier, the Minister reviewed the performance of the railways in the current year and said that, against an anticipated increase of nine million tonnes in goods traffic, the increase at the end of the year might be no more than 5.5 million tonnes.

By raising the fares and freight rates Mr. Nanda has attempted to close this gap and show a surplus of Rs. 22.38 crores after providing for the payment of a dividend to general revenues.

Outlining the prospects for 1970–71, Mr. Nanda said that allowing for a normal increase of 3 per cent in passengers and 2 per cent in other coaching Traffic and an increase of the order of 7.6 million tonnes in originating goods traffic, the gross traffic receipts, without the proposed rationalisation of the freight and fare structure should total up to Rs. 983 crores — an increase of about Rs. 32½ crores over the current year. As against this, ordinary working expenses would go up by Rs. 17.94 crores, appropriation to depreciation Reserve Fund and Pension Fund would each go up by Rs. 5 crores and the dividend would go up by Rs. 8.66 crores.

Works Programme

A provision of Rs. 280 crores has been made for works expenditure in the 1970-71 budget, Rs. 37 crores more than the revised estimates for 1969-70. There is a provision of about Rs. 124 crores for rolling stock and fresh orders are proposed to be placed for over 15,000 wagons against the 1970-71 programme. Among the important new projects to be taken up in 1970-71, Mr. Nanda announced the construction of a new Broad Gauge line from Tornagallu to Madukulapenta in Mysore and electrification of Waltair-Kirandul section, both of which will add to the Railways' capacity for moving iron ore export.

Fourth Plan

The Working Group on Rail Transport set up under the auspices of the Planning Commission has assessed the freight traffic in 1973-74, the last year of the Plan, at about 265 million tonnes. Non-suburban passenger traffic is

expected to increase during the Plan period by 23 per cent. The increase in suburban passenger traffic expected is somewhat more.

The Plan expenditure for achieving the proposed targets has been placed at Rs. 1,525 crores. This includes Rs. 620 crores for rolling stock, Rs. 15 crores for plant and machinery, Rs. 200 crores for track renewals, Rs. 28 crores for bridge works, Rs. 82 crores for electrification, Rs. 315 crores for the line capacity works, Rs. 30 crores for workshops and sheds, Rs. 40 crores for signalling and safety works, Rs. 45 crores for staff quarters and welfare, Rs. 20 crores for passenger amenities, Rs. 10 crores for investment in road services and Rs. 83 crores for new lines. The balance of Rs. 37 crores is intended for certain miscellaneous expenses and inventories.

Relations with the Staff

Relations with organised labour continued to be cordial during the year. The cases of nearly 5,000 railway employees out of those who were suspended or discharged as a result of the strike of certain sections of Central Government employees in September 1968, have been sympathetically considered. Orders were being issued that Class III and Class IV staff of all grades, who have been at the maximum of their pay scales for two years or more, should be allowed a personal pay equivalent to the amount of the increment last drawn by them in the scale. Staff who have been at the maximum of the scale of Rs. 450-575 for two years and over will be granted a personal pay of Rs. 30 a month.

The findings of the Miabhoy Tribunal are awaited. Certain items on which agreement would not be reached in the Departmental Council for Railways of the Joint Counsultative Machinery have been referred to a Board of arbitrators.

For medical and health services for railway employees, 205 general beds and 42 beds for tuberculosis patients were added in 1969 in the 95 hospitals, 541 health units and 67 chest clinics functioning on the Railways.

GOVERNMENT INDUSTRIAL UNDERTAKINGS

IN the following pages we give short notes on Government industrial undertakings.

The total investment in the public undertakings at the end of March 1969, stood at Rs. 3,533 crores.

Six major undertakings—The Hindustan Steel Ltd., the Heavy Engineering Corporation Ltd., Bharat Heavy Electricals Ltd., Heavy Electricals (India) Ltd., the Mining and Allied Machinery Corporation Ltd., and Hindustan Aeronautics Ltd.—accounted for an investment of Rs. 1,719 crores.

The overall performance of 61 Central undertakings in operation during 1968-69 shows a net loss of about Rs. 27 crores against the net loss of Rs. 35 crores in the previous year.

Thirty-five undertakings made a total net profit of

Rs. 65-36 crores (against Rs. 49 crores in 1967-68 by 39 of them) while 26 other undertakings, including the Hindustan Steel Ltd., and the Heavy Engineering Corporation incurred a net loss of Rs. 92-23 crores (against the loss of Rs. 84 crores by 28 of them in 1967-68).

The Hindustan Steel Ltd. incurred a loss of Rs. 39.42 crores against Rs. 38.77 crores and the Heavy Engineering Corporation Ltd. a net loss of Rs. 14.12 crores against Rs. 13.44 crores.

Other undertakings whose losses increased during 1968-69 included Indian Drugs and Pharmaceuticals Ltd. (Rs. 9.07 crores), the Mining and Allied Machinery Corporation (Rs. 6.39 crores), National Mineral Development Corporation, Hindustan Machine Tools, National Instruments Ltd., and National Small Industries Corporation Ltd.

ASHOKA HOTELS LIMITED

50-B, Chanakyapuri, New Delhi.

India's only 5-star de luxe hotel. It is fully airconditioned and has private swimming pool, refrigerator, telephone and bath for every room.

No. of rooms 491; No. of beds 798. The highest and lowest charge per day: Re. 325 to Rs. 70.

ATOMIC REACTORS

(Trombay, Bombay 71)

(See under "Research")

BHARAT ALUMINIUM COMPANY LIMITED

(Under the Ministry of Petroleum & Chemicals and Mines and Metals)

Registered Office: F-41, N.D.S.E., Part I, New Delhi-49.

Objects: Constructing, managing and operating the Korba (Madhya Pradesh) and the Koyna (Maharashtra) Aluminium Projects and to undertake allied activities. Brief details of the two Aluminium Projects are given below:—

Korba Aluminium Project: It consists of a 200,000 tonnes per annum Alumina Plant, a 100,000-tonnes per annum Smelter for production of aluminium metal and facilities for manufacture of aluminium semis. The project has the technical assistance from Messrs. Chemokomplex of Hungary up to the Alumina stage and the technical and financial assistance from Messrs. Tsvetmetpromexport of the U.S.S.R. for the Smelter and Fabrication facilities.

Construction is in progress.

Royna Aluminium Project: The project which is planned to produce 50,000 tonnes of aluminium metal per annum is being implemented with the assistance of Hungarian firm, Messrs. Chemekemplex.

BHARAT EARTH MOVERS LTD. Hindustan Aircraft Post, Bangalore-17.

The Bharat Earth Movers Ltd. manufactures wheeled heavy earth moving equipment and broad gauge rail coaches of various types. The Railcoach factory in Bangalore supplies to the Railcoach factory in Bangalore supplies to the Railcoach factory in Bangalore supplies to the Railcoach factory in Bangalore rail coaches of various models in addition to parcel vans and postal vans. The factory at KGF manufactures wheeled earth moving equipments like C scrapers, Motor Graders, Rear dumps and Crawler Tractors like Bharat D80-8, D120-18, and D50 with a progressively increasing indigenous content.

BHARAT ELECTRONICS LTD. Jalahalli P.O., Bangalore—13.

At present BEL produces a wide range of electronic equipment and components which include a variety of transmitters, communication receiver and transreceivers for static and mobile roles using latest transmission/reception techniques. Measuring Instruments and Test Instruments like VTVM., Portable Oscilloscope, Harmonic Generator, Electro Cardiographs, Clinical Audio Meter, L.C.R. Bridge, Breakdown Tester, Transistorised Frequency Counter, RF Output Meter, Af Oscillator, etc.

Components like, Receiving Valves, Silicon and Germanium Transistors and Diodes, Piezo Electric Crystals, Mica and Ceramic Capacitors, Transmitting Tubes and X-Ray Tubes. Plans are also on hand to manufacture Monolithic Silicon Integrated Circuits, T.V. Picture Tubes and Microwave Tubes.

BEL's production during 1968-69 was Rs. 20-83 crores compared with Rs. 15-84 crores in 1967-68. Sales rose to Rs. 27 crores against Rs. 19-55 in 1967-68. The gross profit for 1968-69 was Rs. 4-34 crores prior to taxation compared with Rs. 3-81 crores.

The factory employs over 10,000 workers.

BHARAT HEAVY ELECTRICALS LTD.

Regd. Office: 5, Parliament Street, New Delhi-1.

The company has under it the following four manufacturing units:—(1) Heavy Electrical Equipment Plant, Ranipur, near Hardwar (U.P.); (2) Heavy Power Equipment Plant, Ramachandrapuram, Hydorabad (A.P.); (3) Switchgear Unit, Ramachandrapuram, Hyderabad (A.P.); and (4) High Pressure Boiler Plant, Tiruverumbur, Tiruchirapalli (T.N.).

The Ranipur Unit is designed to produce 1.5 million kW of steam turbines and turbo-alternators, 1.2 million kW of hydro turbines and generators and 0.5 million kW of medium and large sized AC and DC motors.

The Ramachandrapuram Unit is designed to manufacture steam turbines, turbo-alternators and certain power station auxiliaries like condensate pumps, feed water pumps and circulating water pumps etc. The output capacity planned is about 0.8 million MW, comprising mainly unit sizes of 60 MW and 110 MW. This factory also manufactures turbo-blowers, turbo-compressors and backpressure turbines for industrial use.

The Switchgear Unit is designed to manufacture Air blast circuit breakers for transmission lines of 110 KV, 132 KV, 220 KV and 400 KV and also Minimum oil circuit breakers for 25 KV, 33 KV, 66 KV, 110 KV and 132 KV lines.

Tiruverumbur Unit manufactures high pressure boilers complete with mills, high pressure valves and fittings and other boiler house auxiliaries. The annual output in the first stage of development is sufficient to match a power generating capacity of 750 MW. This factory also manufactures package boilers for industrial use.

All the plants have gone into production and the power generating equipment is being manufactured for various important thermal and hydro power stations viz. Harduaganj, Ennore, Badarpur, Delhi, Kothagudem, Pathratu, Obra and Bhatinda thermal power stations and Giri Hydel, Chenani, Vaitarana, Bhatgar, Subernarekha, Yamuna Stage IV and Maneri Bali hydro electric projects.

BHARAT HEAVY PLATE AND VESSELS LTD.

Post Box No. 100, Visakhapatnam 1.

(Under the Ministry of Steel & Heavy Engineering, Department of Heavy Engineering).

The factory has gone into production of comparatively simpler items of equipment from April 1969 and is expected to go into substantial production by 1972.

The equipment proposed to be manufactured will include light, medium and heavy columns for absorption, distillation etc., tanks and pressure storage vessels, heat exchangers, pipe fabrication, vessels with agitators and mixers, technological structures etc.

BOKARO STEEL LTD.

Bokaro Steel City, Dt. Dhanbad (Bihar).

An agreement was signed on 25th January, 1965 between the Government of India and the Government of USSR for co-operation in the construction of an integrated iron and steel works at Bokaro.

Bokaro stage 1 is estimated to cost Rs. 671 crores.

The detailed Project Report for Bokaro had been prepared for a capacity of four million tonnes to be built in two stages — Stage I for the production of 1.7 million tonnes of ingot steel and 830,000 tonnes of foundry iron and Stage II for the production of four million tonnes of ingot steel. Stage I is being implemented now. A provision of Rs. 1,240 million has been made by Government in the Fourth Five Year Plan for execution of Stage II of the Plant.

CHITTARANJAN LOCOMOTIVE WORKS

Head Office & Works: Chittaranjan, Dt. Burdwan, West Bengal.

Branch Office: 4, Chittaranjan Avenue, Calcutta-13.

Ownership & Control: Govt. of India, Ministry of Railways, Railway Board, New Delhi.

Products: Broad-Gauge steam and elec. locomotives and Diesel Shunters.

Upto the end of March 1969, 2,254 steam locomotives, 217 electric locomotives and 19 diesel shunters had been manufactured and delivered to the various zones of the Indian Railways. Under the Fourth Plan, production of steam locomotives will give way to electric and diesel production. Production in mid-1969 is running at the rate of 5 steam, 5 electric and 3 diesel shunting locomotives per month.

COCHIN REFINERIES LTD.

P. Bag 1751, Cochin-16.

Object: Refining of crude petroleum with a design capacity to refine 50,000 barrels of crude oil each stream day and with an excess built in capacity upto 70,000 barrels a day.

DIESEL LOCOMOTIVE WORKS

Varanasi.

The Diesel Locomotive Works at Varanasi, is one of the three production units of the Indian Railways directly under the Railway Board manufacturing both broad gauge and metre gauge diesel electric locomotives.

Upto October 1969, the DLW has produced 278 BG and 20 MG locomotives. In addition, 21 diesel electric Shunters and 30 BO shunters have also been turned out.

The indigenous content on the last main line BG diesel electric locomotive turned out was 80 per cent.

ELECTRONIC CORPORATION OF INDIA LTD.

3-5-822, Hyderguda, Hyderabad-I (AP).

The Company is under the Department of Atomic Energy.

Main activities: To manufacture and sell electronic components and instruments and to fabricate and supply instrumentation and control equipment to various atomic power reactors and other nuclear plants. The important products of the Company are the various nuclear and allied instruments required for industrial, medical, agricultural and research purposes; carbon film and metal film resistors and tantalum capacitors, multi-turn potentio meters; semiconductor products like zener diodes, germanium power transistors, rectifiers, instrument cooling fans, thermo-electric cooling modules; glass-to-metal seals and zone refined germanium crystals; servo control equipments and devices like synchros, motor drive assemblies, Tesistor temperature detectors, servo motors and manufacture of digital and analog computers for a wide variety of scientific application.

ENGINEERS INDIA LTD.

Allahabad Bank Bldg., 17-Parliament Street, New Delhi-1.

The company provides complete consultancy services such as techno-economic studies, process design, engineering procurement, construction supervision, etc. for the public and private sectors, especially in petroleum, petro-chemical, chemical, fertilizer and allied fields. Port and Harbour work is also undertaken.

THE FERTILIZERS AND CHEMICALS, TRAVANCORE LTD.

Udyogamandal, Kerala.

The Fertilizers and Chemicals Travancore Limited, popularly known as FACT, produces ammonium sulphate and, a variety of other products like ammonium phosphate, superphosphate, ammonium chloride, sulphuric acid, anhydrous ammonia, liquid sulphur dioxide, ultrafos, sodium fluoride, calcium silicates, synthetic cryolite and dry ice.

The Company's factory at the Udyogamandal now has an annual production capacity of 70,000 tonnes of Nitrogen and 33,000 tonnes of P_2O_5 .

At the end of the fourth stage expansion programme which is expected to be completed by 1970, the factory will have a capacity of 90,000 tonnes of nitrogen and 45,000 tonnes of P_2O_3 .

The new expansion activity of the company is in the form of setting up another Rs. 450 million fertilizer factory at Cochin with an annual production capacity of 330,000 tonnes of urea. This unit was expected to go into production in the middle of 1970.

The company has built a wide network of distribution system in the States of Kerala, Tamil Nadu, Andhra Pradesh and Mysore.

FERTILIZER CORPORATION OF INDIA LTD.

F-43, South Extension, Part I, Ring Road, New Delhi-3.

(Under the Ministry of Petroleum and Chemicals).

The constituent units of the Corporation are the five operating fertilizer factories, namely, Sindri in Bihar, Nangal in Punjab, Trombay in Maharashtra, Gorakhpur in Uttar Pradesh and Namrup in Assam. They produce nitrogenous and phosphatic fertilizers.

Besides the five operating units there are two projects under implementation—Durgapur in West Bengal and Barauni in Bihar. After all the above projects are completed by 1971-72 FCI's production capacity for nitrogen will be over one million tonnes and P_1O_6 1·60 lakh tonnes.

Nangal: During 1967-68 this unit produced 77,665 tonnes of nitrogen.

Sindri: The production of fertilizers during the year 1967-68 was 79,435 tonnes in terms of nitrogen.

Trombay: The production of fertilizers in terms of Urea was 68,508 tonnes (1968-69), Nitrophosphate 22,355 (1967-68) and Suphala 1,08,388 (1968-69). The N_2 and P_1O_5 during 1967-68 were 44,128 tonnes and 17,036 tonnes respectively.

Namrup: The Namrup factory is designed to produce 45,000 tonnes of Nitrogen per year in the form of 1,00,000 tonnes of Ammonium Sulphate and 55,000 tonnes of Urea. The Namrup Expansion Project is designed to produce 1,51,800 tonnes of nitrogen per annum in the form of 3,30,000 tonnes of Urea. It is expected to go into production in 1970-71.

Gorakhpur: The Gorakhpur factory is designed to produce 80,000 tonnes of Nitrogen in the form of 1,73,920 tonnes of Urea per year.

Durgapur: The Durgapur Fertilizer Project (1st Phase) is designed to produce 140,000 tonnes of nitrogen in the form of 305,000 tonnes of Urea per year. The factory is expected to go into production in 1970.

Barauni: The Barauni fertilizer factory has been designed to produce 151,800 tonnes of nitrogen in the form of 330,000 tonnes of Urea. It is expected to go into production in 1970-71.

GARDEN REACH WORKSHOPS LTD.

43/46, Garden Reach Road, Calcutta 24.

The Company has its main workshops at Garden Reach, and a branch unit at Baranagore, both in Calcutta.

The Company has 5 slipways and 2 dry docks. It is one of the major ship-building and ship-repairing yards in India and is fully equipped to undertake all types of marine repairs to sea-going vessels as well as inland and harbour crafts. It builds all types of inland and harbour crafts and the smaller coastal vessels, and is specialising in the building of dredgers.

Garden Reach Workshops Ltd. also manufactures electrical overhead travelling cranes, deepwell turbine pumps, marine haulages and conveyors, air compressors and diesel road rollers.

They are now building a Marine Diesel Engine Manufacturing Plant at Ranchi.

The company now employs over 6,000 men. It has a well organised training scheme for apprentices.

HEAVY ELECTRICALS (INDIA) LTD.

(Piplani, Bhopal)

(Under the Ministry of Industrial Development and Company Affairs)

The factory manufactures the whole range of steam turbines, generators, condensers and feed heating equipment for thermal power stations, water turbines and generators for hydro power stations, butterfly valves for general hydraulic systems, power transformers and switchgear for sub-stations, electric traction equipment for freight and passenger trains, industrial rectifiers, power capacitors, motor controlgear and large A.C. & D.C. motor controlgear and large A.C. and D.C. motors for coment factories, rolling mills, mines and other applications.

Services: The factory offers general engineering services in respect of thermal power stations, expertise in sub-stations for 132 kV and 220 kV systems and also handles composite contracts in industrial and electrical drives for rolling mills.

The company offers consultancy services and is in a position to meet the requirements of all varieties of heavy electrical equipment.

Production: The production has increased from Rs. one crore in 1961-62 to Rs. 27-2 erores in 1968-69.

HEAVY ENGINEERING CORPORATION LTD.

Administrative Building, Plant Plaza Road, P.O. Dhurwa, Ranchi.

The Corporation is now engaged in establishing the following projects:—

1. Heavy Machine Building Plant at Ranchi in collaboration with U.S.S.R.; 2. Foundry Forge Plant and 3. Heavy Machine Tools Plant at Ranchi in collaboration with Czechoslovakia.

Heavy Machine Building Plant, Ranchi: The plant has a production capacity of 80,000 tonnes of machinery items and 25,000 tonnes of structural steel items per year.

The plant has produced over 23,852 tonnes of plant and equipment during 1968-69. HMBP has a programme of producing 27,000 tonnes during 1969-70.

Foundry Forge Plant: This plant will have the following production per year from its main production shops: Grey Iron Foundry (shaped castings) 33,345 tonnes; Steel Foundry (shaped castings) 40,182 tonnes; Non-Ferrous Foundry (castings) 700 tonnes; Forgings 50,000 tonnes; Grey Iron Steel and Forged Rolls 31,310 tonnes. The plant has produced 16,641 tonnes of heavy castings and forgings during 1968-69. FFP has a target of producing 45,384 tonnes of grey iron and steel castings and forgings during the financial year 1969-70.

Heavy Machine Tools Plant, Ranchi: This plant will have an annual production capacity of 10,000 tons of certain diverse items of heavy machine tools,

The plant has gone into production of items like Radial Drilling Machines, Central Lathes, Double Column Planning Machines etc.

Training Programme: At Ranchi, the Corporation has set up a Central Training Institute, complete with workshop facilities, including foundry and smithy shop to provide training to workmen, supervisory staff and engineers.

HEAVY VEHICLES FACTORY

Avadi, Madras 54.

The Heavy Vehicles Factory is designed as an integrated unit for the manufacture of all major assemblies of the tank including the engines, gear box and the suspension units. The first Vijayanta medium tank produced in this factory rolled out on 29-12-65 as scheduled and since then, regular production of tanks has been established. The planning of the factory has been done in a manuer that manufacturing capacity is available not only for the manufacture of tracked vehicles but also for other items of heavy engineering required for military as well as civilian purposes.

The employment potential of the factory is of the order of 5,000. The factory has afforded considerable fillip to the ancillary industries in India.

HINDUSTAN AERONAUTICS LTD.

(Bangalore Division)

(Hindustan Aircraft P.O., Bangalore 17, Mysore)
Tel. & Cable address: "Aircraft", Bangalore.

Hindustan Aeronautics Ltd., is a combination of Hindustan Aircraft Ltd., and Aeronautics India Ltd.—a Company formed to undertake the MIG manufacturing projects at Koraput, Nasik and Hyderabad and also manages the Aircraft Manufacturing Depot, Kanpur.

This factory manufactures the following aircraft, HT-2 the All-Metal Basic Trainer Aircraft, Vampire Jet Aircraft, Gnat, HF-24 a supersonic fighter aircraft, Pushpak an ultra-light two-seater aircraft, Krishak a light four seater aircraft, Basic Jet Trainer HJT-16 a single engined aircraft for basic pilot training, HS-748 aircraft and HJE-2500 a turbo-jet engine for the Basic Jet Trainer aircraft. The first phase of producing helicopters has commenced.

Other Development Work: Other development work includes the design of a Pneumatic Starter for the starting of turbo-jet engines of 5,000/10,000 lbs. thrust

range and installation of the Orpheus 701 engines as an auxiliary jet pack for the Fairchild Packet aircraft for high altitude flying.

HINDUSTAN ANTIBIOTICS LIMITED

(Pimpri, Poona-18)

(Under the Ministry of Petroleum and Chemicals).

Produces antibiotics like penicillin, streptomycin, hamycin etc. The present capacity of production of penicillin is about 84 m.m.u.

The Streptomycin plant is of 80 tons capacity.

Another important development is the discovery of antifungal antibiotic hamyoin and other new antibiotics useful in plant disease control and veterinary practice by the Research Division of the company.

HINDUSTAN CABLES LTD.

(P.O. Hindustan Cables, Rupnarainpur Rly. Station).
Burdwan Dt., West Bengal.

The company produces dry core distribution cables, coaxial cables and plastic group of cables and wires.

During 1967-68, the factory produced 6.43 lacs conductor Kms. of dry core distribution cables, 2,317 tube Kms. of 2 core and 4 core of large tube and small tube coaxial cables and 27,888 core Kms. of plastic group of cables. In terms of value the production was to the tune of Rs. 9-11 crores.

HINDUSTAN COIR

Kalavoor P.O., Alleppey Dist.

It is the powerloom factory under the Coir Board (Govt. of India) for the production of coir mattings—first of its kind under public sector. Started production for commercial sale on 1-1-1969. Best quality coir mattings in attractive designs are being produced in the factory.

HINDUSTAN COPPER LIMITED

Under the Ministry of Petroleum & Chemicals and Mines & Metals (Department of Mines & Metals).

Regd. Office: P.O. Khetri Nagar, Dist.: Jhunjhunu (Rajasthan).

Object: To give concentrated attention to the development and production of copper and other base metals in the country. HCL tool over the following projects and feasibility areas from the National Mineral Development Corporation Ltd.: Khetri Copper Project, Rajasthan, Rakha Copper Project, Bihar, Agnigundals Copper-Lead Project (a feasibility study), Andhra Pradesh, and Daribo Copper Project (a project in exploratory stage), Rajasthan

The company has also been assigned Sukinda Nickel deposits in Orissa.

Khetri Copper Project:—Is under construction and is estimated to cost Rs. 87.97 crores. The project envisages:

(i) A mine and plant for the production of 31,000 tonnes of copper metal of electrolytic grade per annum;

(ii) A plant for the production of about 600 tonnes of sulphuric acid per day from the smelter gases;

(iii) A plant for the production of fertilizer using the sulphuric acid produced at Khetri.

Some quantity of gold and silver would also be obtained as by-products in the electrolytic plant.

A production of 2,000 tonnes of ore was programmed to commence from January, 1970.

Rakha Copper Project:—Located in District Singhbhum of Bihar, comprises three blocks (1) Rakha Mine Block; (2) Roam Sideshwar; and (3) Tama Pahar. Government has approved a scheme for developing Rakha Copper Project Phase I for the production of 1,000 tonnes of ore per day which will yield 3,500 tonnes of copper metal per annum.

Agnigundala lead-copper Project:—The Agnigundala copper and lead mineral belt located in Andhra Pradesh has three areas of mineralization viz. (a) Bandalamottu (lead-copper) deposits; (b) Nallakonda (copper) deposits and (c) Dhukonda (copper-lead) deposits. A feasibility scheme for developing one of these areas namely, Bandalamottu Block has been prepared by the Company and is at present under consideration of the Government.

HCL at present employs about, 4,000 persons.

HINDUSTAN HOUSING FACTORY LIMITED

(Jangpura, New Delhi 14)

(Under the Ministry of Health, Family Planning, Works, Housing and Urban Development)

Main products of the Hindustan Housing Factory are as under:—

Prefabricated components for multistoreyed buildings; Prestressed concrete transmission line poles; Prestressed concrete street light poles; P.C.C. Beams for industrial sheds with sheeted roofs; P.C. Beams for industrial sheds; P.C. Beams for composite constructions; Reofing and flooring components with prestressed concrete beams; Precast R.C.C. cladding panels; Precast window frames; Hollow blocks for roofing; Hollow blocks for walling; Overhead concrete tanks for residential uses; Large panels for large panel house construction; Precast concrete flooring slabs; Prestressed concrete railway sleepers; R.C.C. railway sleepers; Precast vibrated pipes for drains; Precast vibrated Porous Pipes; Reinforced foam concrete panels; Foam concrete blocks for cold storage and air-conditioned buildings; Foam concrete blocks for multistoreyed buildings; Machine-made doors and window frames and shutters; Flush doors; Seasoning and chemical treatment of timber.

Production during 1968-69 was Rs. 193-13 lakhs.

HINDUSTAN INSECTICIDES LIMITED

Regd. Office: C-255, Defence Colony, New Delhi-3.

Hindustan Insecticides Ltd., has factories at Delhi and Alwaye in Kerala State for manufacture of DDT, and has installed additional plants for manufacture of DDT and BHC.

The combined output of both the factories during the year 1968-69, of Tech-DDT, the primary product, was 2,976-31 tonnes against the rated capacity of 2,688 tonnes. Bye-products like hydrochloric acid, sulphuric acid, ohloral hydrate, ethyl chloride, para and ortho dichlorobenzine were also produced during the year.

Expansion schemes:—At Delhi the 1,400 tonnes per annum plant went on stream in June 1969. The BHC project at Alwaye for the manufacture of 3,000 tonnes BHC per annum has also made substantial progress.

New Projects:—The Company has been authorised by the Govt. for setting up a 5,000 tonnes DDT Plant and the work relating to it is in progress. The Company proposes to set up a DDT Formulation Unit of 7,000 tonnes per annum capacity at Rasayani in Maharashtra.

HINDUSTAN LATEX LIMITED

Nirodh Project, Percorkada, Trivandrum 5.

Registered Office: Room No. 243, Nirmal Bhavan, Maulana Azad Road, New Delhi.

(Under the Ministry of Health and Family Planning).

The Company set up with Japanese Collaborators, manufactures 3,000 gross of Nirodh (Rubber condoms) per day.

HINDUSTAN MACHINE TOOLS LIMITED

(H.M.T. P.O., Bangalore 31).

(Under the Ministry of Industrial Development and Company Affairs, Govt. of India).

This is located in Jalahalli, Bangalore, with five machine tool factories at: (I & II) Bangalore in Mysore; (III) Pinjore in Haryana; (IV) Kalamassery in Kerala and (V) Hyderabad in Andhra Pradesh and one watch factory in Bangalore.

The factory produces a wide range of machine tools like Milling Machines, Radial Drilling Machines, General Purpose Lathes, Turret Lathes, Grinding Machines, Special Purpose Machines, all Electric Heavy Duty Programme Controlled Milling Machines, Gear Shapers, Gear Hobbers, Single Spindle Automatics, Surface Grinders, Pilote Copying Lathes, "Fay" Automatics, Multi-Scient, Burnard Charles, Automatics, Dans Turret, Dans Tur Spindle Bar and Chucking Automatics, Drum Turret Lathes, Horizontal Boring Machines, Heavy Duty Centre-Lathes, Precision Lathes, Turret Type Milling Machines and Multi-Tool Lathes.

The Company employs 12,682 skilled and semi-skilled workers (in all its factories).

Till the end of March 1969, the factory turned out 18,323 machines valued at Rs. 87.30 crores.

Production during 1968-69 by the various factories at: Bangalore in Mysore: 969 machines valued at Rs. 509 lakhs; Pinjore in Haryana: 452 machines valued at Rs. 258 lakhs; Kalamassery in Korala: 322 machines valued at Rs. 179 lakhs; Hyderabad in Andhra Pradesh: 41 machines valued at Rs. 153 lakhs.

Export

During 1968-69 HMT exported machines valued at Rs. 97 lakhs as against Rs. 29 28 lakhs in 1967-68. HMT has opened sales-cum-service centres in New York, Frankfurt, Melbourne and Los Angeles and few more are likely to to be opened in the near future.

New Designs

HMT has designed and developed aix new machines namely (G9) Cylindrical Grinding Machine, (GT) Tool Grinding and Lapping Machine, (G. 13) Cylindrical Grind-ing Machine, (L. 45) Heavy Duty Lathe, (FB) Fine Boring Machine, and (Chucker) Short Piece Turning Machine. HMT has been continuously striving to develop the existing machine tools and to design new ones. A prototype hydraulic chucker has been designed and built by the company. Protetype of heavy duty multi-spindle drilling machine, designed and built by HMT is under testing. Protetype of AZ9 Horizontal Boring Machine, built in collaboration with Messrs. Pegard of Belgium is also under testing.

Watch Factory

The HMT Watch Factory in Bangalore, turned out 3,00,000 watches during 1968-69 against 2.5 lakh watches in 1967-68. It currently produces nine types of watches—six varieties of Gents' watches, viz., Citizen, Janata, Janata Luminous, Pilot, Sona and Tareeq; two varieties of Ladies' watches, viz., Sujata and Nutan and Tarun for Students.

During the Fourth Plan period, the Company plans to expand the watch factory in Bangalore, raising its production capacity from 3.6 lakhs to 5 lakh watches per annum.

Upto end of March 1969, over 2,700 watches have been exported. The factory sold 3-02 lakh watches in 1968-69 against 2-46 lakh watches in 1967-68.

HINDUSTAN ORGANIC CHEMICALS LTD.

P.O. Rasayani, Dist. Kolaba, Maharashtra, (Under the Ministry of Petroleum, Chemicals, Mines and Metals)

The company's production programme includes a number of organic intermediates like Benzene Hexachloride, Chlorobenzene, Formaldehyde, Aniline, Meta-Amino-Phenol, Acetanilide and a range of Nitro Compounds based on Benzene and Toluene. The manufacture of Sulphuric Acid/Oleum and Hydrogen is also envisaged.

HINDUSTAN PHOTO FILMS MFG. CO. LTD.

Indu Nagar, Octacamund.

The factory manufactures various types of sensitized photographic materials.

When the factory goes into full production, it is expected to turn out annually 6.15 million sq. m. of photographic film and photographic paper. As an adjunct to the main plant, a Silver Nitrate Plant for producing Silver Nitrate, a Silver Sludge Recovery plant for recovery of silver from factory wastes, and a unit for synthesizing organic chemicals, have also been set up.

The value of sales during the year 1968-69 was Rs. 2-29 crores. The factory has already established production of Cine Film Positive (Black and White), Medical X-ray Film, Bromide Paper, Cine Film Sound and Roll Film. 35 mm. Negative Film, Portrait Film and Document Copying Paper are the additional items that were being taken up for manufacture during 1969-70.

HINDUSTAN SALTS LTD.

Badnor House, Bhagwan Das Road. P. Box No. 146, Jaipur.

(Under the Ministry of Industrial Development, Internal Trade & Company Affairs)

The salt source at Kharaghoda (Gujarat) and the salt mines at Mandi (Himachal Pradesh) are under the sdministrative control of the Company.

Production during the fiscal year ending 30th September, 1969, are as follows:-

Common Salt 98,002 M. Tonnes; Rock and Pan Salt 3,371 M. Tonnes.

The Sambhar Salts Ltd., a subsidiary of Hindustan Salts Ltd., produced 72,000 M. tonnes of salt during the fiscal year ending September 1969. In addition to common salt, the Company produced 224 M. Tonnes of dairy salt, 36 M. Tonnes of table salt, 85 M. Tonnes of Sodium Sulphate and 245 M. tonnes of Burkeite during the year ending September, 1969.

HINDUSTAN SHIPYARD LIMITED

(Visakhapatnam 5, Andhra Pradesh) (Under the Ministry of Transport and Shipping)

The shippard has four building berths with a capacity of 15,000 DWT each, besides a fifth berth for the construction of minor craft. The capacity of the dry dock now under construction will be 57,000 DWT.

Hindustan Shipyard has so far built 49 ships of different sizes and types aggregating more than 4,12,900 DWT.

The second shippard would be located in Cochin.

HINDUSTAN STEEL LIMITED

P. O. Hinoo, Ranchi.

(Under the Ministry of Steel, Mines and Metals)

Hindustan Steel Ltd. has four steel plants the Rourkela Steel Plant, Bhilai Steel Plant, Durgapur Steel Plant and Alloy Steels Plant. Production in January 1970: pig-iron 380,000 tonnes, ingot steel 315,000 tonnes and saleable steel 221,300 tonnes. Despatches amounted to 108,000 tonnes of pig-iron and 245,000 tonnes of saleable steel.

Hindustan Steel has on its rolls 1,19,234 employees.

PRODUCTION

During the year 1968-69 Hindustan Steel's production of important items is given below:-

(In thousand tonnes)

Product			Bhilai	Durgapur	Rourkela	HSL	Alloy Steels
Pig iron			1,935	1,148	1,243	4,326	_
When I Was I I			591	375	147	1,113	_
Steel ingots		1.1	1,735	823	1,162	3,720	39.8
Saleable steel	4.1		1,344	500	1,162 773	2,617	23-8*
C.A.N	4.4	2.4	_	-	236	236	_

[•] Out of this 3.5 is forged bars and billets, 9.8 b list mill products, 9.6 bar mill products, and 0.8 sheet mill products,

Rourkela Steel Plant

Rourkela lies 413 kilometres west of Calcutta, on the South-Eastern Railway line between Calcutta and Bombay. Almost all the expansion units of Rourkela Steel Plant have been commissioned. At the 1.8 million tonne stage, the plant is rated to produce 280,000 tonnes of wide and heavy plates, 284,000 tonnes of H.R. sheets, narrow light plates and coils, 260,000 tonnes of C.R. sheets, 50,000 tonnes of hot dipped tin plates, 150,000 tonnes of electrolytic tin plates, 160,000 tonnes of galvanized sheets and 50,000 tonnes of electrical steel sheets. It produces high silicon steel sheets and ERW pipes including Line-pipe and High test Line-pipe carrying the API monogram. Its fertilizer plant is rated to produce 580,000 tonnes of Calcium Ammonium Nitrate annually.

Bhilai Steel Plant is located on the main railway line between Calcutta and Bombay, 260 kilometres east of Nagpur. At its present 2.5 million tonne stage Bhilai is rated to produce 315,000 tonnes of blooms and billets for sale, 500,000 tonnes of merchant products, 250,000 tonnes of heavy structurals and crossing sleepers, 500,000 tonnes of heavy rails and 400,000 tonnes of wire rods, besides 327,000 tonnes of pig iron for sale.

Further expansion of Bhilai to 4.2 million tonnes is phased in two stages, the first stage of Sixth blast furnace complex being already under construction. The plant's coke consumption has been reduced to 767 dry kgs. per tonne of hot metal. Bhilai has one of the largest rail mills in the world and manufactures 80 per cent of heavy structurals made in India. It has also the most modern were rod mill with capacity of 400,000 tonnes of wire rods.

Durgapur Steel Plant

Durgapur is closest to Calcutta and lies on the main line of the Eastern Railway between Calcutta and Delhi. Durgapur Steel Plant has its own coal washery. The plant has been expanded to produce 1.6 million tonnes of ingot steel. Durgapur Steel Plant provides light structurals and construction materials. The new skelp mill rolls out flat sheets in coils for the tube industry. The plant makes pig iron for foundries and billets for re-rollers and has by-products units processing crude tar, ammonium sulphate and crude benzol from the coke oven gas. At its 1.6 million tonne stage Durgapur Steel Plant is rated to produce 370,000 tonnes of forged blooms and billets, 240,000 tonnes of merchant sections, 200,000 tonnes of light and medium sections, 75,000 tonnes of pressed steel sleepers, 93,000

tonnes of wheels and axles and 250,000 tonnes of skelp besides 300,000 tonnes of pig iron for sale.

Alloy Steels Plant at Durgapur is rated to produce 2,250 tonnes of high speed steels, 3,600 tonnes of alloy, tool and die steels, 9,500 tonnes of carbon tool steels, 26,650 tonnes of constructional steels and 18,000 tonnes of staeless steels. After the expansion the plant will produce 300,000 tonnes.

Coal Washeries

The Company has four coal washeries at Dugda, Bhojudih and Paterdih. Dugda is 30 miles and Paterdih 10 miles from Dhanbad in Bihar. Bhojudih in West Bengal is about 20 miles from Dhanbad. The Dugda I washery had a capacity of 2.4 million tonnes of raw coal input per year, Bhojudih two million tonnes of raw coal input and Paterdih two million tonnes of raw coal input washeries supply washed coal to Bhilai and Rourkela Steel Plants and also to TISCO and IISCO steel plants.

Central Engineering & Design Bureau functions as technical advisors to the Government of India and Hindustan Steel on matters connected with steel industry. In this capacity it has been assisting the Ministry of Steel & Heavy Engineering in the formulation of plans for the expansion of Bokaro Steel Plant from 1.7 to 4.00 million tonnes capacity during the Fourth Five-Year Plan. The CEDB has also been engaged in the location studies in connection with the setting up of new steel plants during the Fourth and Fifth Five Year Plans.

The CEDB has 400 engineers and 200 other supporting technical staff.

Sales

Gross sales amounted to Rs. 3,271.60 million during 1968-69 as against Rs. 2,573.30 million in 1967-68. Stockyard sales increased from 1,73,000 tonnes in 1967-68 to 3,40,000 tonnes in 1968 69. Distributors were appointed for the company's fertilizer, Sona, in Andhra Pradesh, Orissa, Assam, West Bengal, Bihar and Uttar Pradesh and regional offices were established at Secunderabad, Vijayawada, Cuttack, Varanasi and Kanpur and a programme of educating the farmers, dealers, block development officers regarding the use of fertilizers was started.

During the year Hindustan Steel earned Rs. 415.5 million through exports as against Rs. 309.6 million in 1967-68. The highlights of exports were: 5,65,700 tonnes of pig iron exported to Japan and 25,300 tonnes to South

Korea. Two contracts were finalised for supply of 93,000 tonnes of rails to the Iran State Railways. The export of 1,38,000 tonnes API pipes from Rourkela to New Zealand was successfully completed during the year. The contract with the USSR for supply, during 1968, of 2,00,000 tonnes of steel materials consisting of angles, beams and channels was completed. A similar contract for supplies during 1969 was signed.

Hindustan Steel has branch sales offices and stockyards in Calcutta, Delhi, Bombay, Madras, Cochin, Bangalore, Ahmedabad, Secunderabad, Kanpur, Jullundur, Indore, Dhanbad, Cuttack, Gauhati and Visakhapatnam. Hindustan Steel has a branch office at Apollo House, 58, New Bonds Street, London W-1.

THE HINDUSTAN TELEPRINTERS LTD.

Guindy, Madras-32.

The factory manufactures tape and page models of teleprinters, printing reperforator attachment, transmitter attachment, independent automatic tape transmitter and Devnagari teleprinters. It produced 5.010 unit machines in the year 1968-69.

HINDUSTAN ZINC LIMITED

(Under the Ministry of Petroleum & Chemicals and Mines and Motals)

11/221, Hospital Road, Udaipur (Rajasthan).

The units administered by this Company are: (i) the Zawar Mines. At present the mine produces about 700 tonnes of ore containing both lead and zinc. The ore is processed in a mill to produce 5,000 M.T. of lead concentrates and 10,000 tonnes of zinc concentrates annually. (ii) Tundoo Lead Smelter near Katrasgarh, Dhanbad with a capacity to produce 500 M.T. of pig lead per month. The lead concentrates from Zawar Mines are smelted here to produce pig lead of 99.99 per cent purity. A little quantity of silver is recovered as by-product. (iii) An electrolytic Zinc Smelter has been commissioned at Debari. The Zinc Smelter has been designed to produce 18,000 tonnes of zinc metal, about 29,000 tonnes of sulphuric acid to be converted into 80,000 tonnes of single superphosphate fortilizer and 70 to 75 tonnes of cadmium to be recovered as by-product annually.

INDIA GOVERNMENT SILVER REFINERY

(Ministry of Finance, Dept. of Economic Affairs) 47, Strand Road, Calcutta 7.

This refinery has been installed for the extraction of silver and copper from the Q.A. coins minted during the World War II. Nickel Sulphate and Nickel Silver (an alloy of Cu, Ni, and Zn) are obtained as by-products. The refinery employs 497 persons.

THE INDIAN DRUGS AND PHARMACEUTICALS LTD.

N-12 & 13, South Extension (Part I), Ring Road, New Delhi-3.

(Under the Ministry of Petroleum and Chemicals)

The Indian Drugs & Pharmaceuticals Ltd. has been set up for the manufacture of and trading in drugs, antibiotics surgical instruments and appliances. It has three plants under its control, Antibiotics Plant at Rishikeah, Synthetic Drugs Plant at Hyderabad and Surgical Instruments Plant at Madras. The plants have been set-up with the help of the Government of U.S.S.R. The company and plants have 6,500 employees.

Antibiotics Plant at Rishikesh (Uttar Pradesh) has been set up to produce penicillins (sodium & procaine salt), streptomycin, tetracycline, oxytetracycline, chlortetracycline and nystatin at an estimated cost of Rs. 25 crores. It is already in the market with its products.

The Synthetic Drugs Plant at Hyderabad set up at a cost of Rs. 23 crores synthesises about 826 tonnes of 15 types of drugs starting from basic stages. It serves the prime needs of the country with regard to synthetic drugs.

Surgical Instruments Plant, Madras: The plant manufactures various types of surgical instruments of high quality and is a pioneer in serving the needs of surgical instruments for family planning programmes in the country.

INDIAN OIL CORPORATION LIMITED

Regd. Office: 254-C, Dr. Annie Besant Road, Prabhadevi, Bombay-25 DD.

The Indian Oil Corporation comprises two divisions viz. Refineries Division and Marketing Division.

Refineries & Pipelines Division, (Indianoil Bhavan, Janpath, New Delhi) is responsible for the management of the three public sector Refineries at Gauhati in Assam, Barauni in Bihar and Jawaharnagar in Gujarat. Another refinery is under construction at Haldia near Calcutta. Also manages Gauhati-Siliguri, Haldia-Barauni-Kanpur and Jawaharnagar-Ahmedabad Pipelines.

Marketing Division with its headquarters in Bombay is responsible for distribution of petroleum products produced by three refineries of Indianoil and two other public sector refineries at Cochin and Madras.

INDIAN PETROCHEMICAL CORPORATION LIMITED

P.O. Jawahar Nagar, Dist. Baroda (Gujarat)

Corporation's first Petrochemicals operations near Baroda will consist of the Gujarat Aromatics Project—site-work for which is already in progress—and the Gujarat Olefins Project. The above two projects will be located adjacent to the Gujarat Refinery, and will provide basic materials for the manufacture of large number of consumer products. The aromatics project will produce 21,000 tonnes per annum of orthoxylene, 24,000 tonnes per annum of dimethyl terephthalate and 2,500 tonnes per annum of mixed nylenes. The Olefins project will produce ethylene, propylene, benzene and butadiene.

The Corporation's authorised capital is Rs. 30 crores.

INDIAN RARE EARTHS LIMITED

Pil Court, 111, Maharshi Karve Road, Bombay 20.

This Company functions under the administrative control of the Department of Atomic Energy.

- (1) The Rare Earths Division of the Company at Alwaye has a capacity to process 3,600 tonnes of Monazite per annum. Rare Earths Chloride, Trisodium Phosphate, Cerium Oxide, Cerium Nitrate, Rare Earths Fluoride, Rare Earths Oxide and Lanthanum Nitrate are produced in this Division. Lanthanum Oxide, Cerium Hydrate, Didymium Carbonate, Ceric Ammonium Sulphate, Ceric Ammonium Nitrate, Ceric Acetate, Ceric Oxalate, Praseodymium Oxide, Praseodymium Concentrates and Cerium Naphthenate are also produced in small quantities.
- (2) The Minerals Division of the Company with its office at Quilon, Kerala, and factories at Manavalakurichi and Chavara produces large quantities of Ilmenite, Rutile, Zircon, Monazite, Sillimanite, Leucoxene and Garnet from beach sands. Zirconium salts are also produced at Manavalakurichi (Tamil Nadu). Tirconium Opacifier in various mesh-sizes will also be available from a plant being set up at Chavara (Kerala State).

(3) The Company also operates the Thorium Plant of the Government of India at Bombay where thorium compounds are manufactured from thorium hydroxide obtained at the Alwaye Plant. Thorium Nitrate and Thorium Oxide are the more important chemicals made in this plant.

INDIAN TELEPHONE INDUSTRIES LIMITED

(Under the administration and jurisdiction of Dept. of Communications, Govt. of India).

(Dooravani Nagar, Bangalore 16, Mysore State)

Regional Offices, Sales & Service: 62/63, "Advent", 12-A, Foreshore Road, Bombay 1; 22, Chittaranjan Avenue, United India Life Assurance Bldgs., Calcutta 13; 12-B, Netaji Subbash Marg, Daryaganj, Delhi 6; Agurchand Mansions, No. 35, Mount Road, Madras 2.

The factory manufactures all kinds of telecommunication equipment, all kinds of telephones, transmission equipment, testing equipment, automatic road signalling equipment, etc.

The turnover of the company for the year 1968-69 increased to Rs. 21·2 crores from Rs. 20·3 crores in the previous year. Sales to the Posts & Telegraphs Department constituted 81 per cent of the turnover amounting to Rs. 16·73 crores.

The net profit for the year 1968-69 was Rs. 172 lakhs as compared to Rs. 154 lakhs in the previous year.

Production

Transmission Division: The production of long distance electronic transmission equipment was Rs. 4-51 crores, an increase of about Rs. one crore over the provious year. Production included a number of 960 channels of coaxial equipment, microwave equipment, and a new type of coaxial system of 300 channel capacity capable of expansion to 800 channels for three main routes.

The manufacture of switching equipment for the Indian Earth Station for Satellite Communication is in progress. Transmission equipment required for the ASCOM Project for establishment of a satellite station were supplied during the year.

Strowger & Telephones Division: The value of Strowger automatic exchanges and telephones produced reached Rs. 1,169 lakhs as against Rs. 1,106 lakhs during the previous year. The number of Telephone Instruments of all types produced was 2,57,145 as against 2,32,282 in the previous year.

Crossbar Division: The value of production of Crossbar Division amounted to Rs. 408 lakhs. The manufacture of switching equipment for the Indian Earth Station System (ASCOM) is in progress.

Electronic Measuring Instruments Division: The Instruments Division designed, developed and produced measuring instruments of various types, power supply units and battery chargers. The value of sales was Rs. 43 lakhs as compared to Rs. 45 lakhs in the previous year.

Research & Development

The design and development of an electronic exchange, pulse code modulation equipment, computer-controlled trunk exchange and automatic error correcting equipment, multiplexing equipment for the Railways are also under design and development. The main effort has been to develop equipment for increasing traffic carrying capacity of the main trunk routes which now comprise large tube and small tube coaxial cable systems.

New Telephone Instruments: During the year, three new types of telephones were developed. The manufacture of one of the types has been undertaken.

Import Substitution: Intensive drive in the field of import substitution has resulted in an annual saving of Rs. 71·25 lakhs recurring during the year 1968-69 as compared to Rs. 56·59 lakhs during the provious year. The total recurring foreign exchange saving during the last four years amounted to Rs. 2·27 crores.

The savings that accrued by methods improvement amounted to over Rs. 4 lakhs.

Exports: The total value of the exports during the year exceeded Rs. 72 lakhs as compared to Rs. 52 lakhs in the previous year.

Ancillary Units

The total production of ancillary units set up under its guidance amounted to Rs. 8 lakhs during 1968-69.

INSTRUMENTATION LTD.

(Ministry of Industrial Development & Co. Affairs.)

Kota 5 (Rajasthan)

The company produces industrial process control instruments comprising a variety of transmitters, indicating and controlling pyrometers, single and multi-point electronic recorders for measurement of temperature, pressure, flow, level and other process variables.

The company also provides complete turn key service for thermal power stations, steel plants, fertilizer plants and other process industries.

INTEGRAL COACH FACTORY

Perambur, Madras 38.

(Under the Ministry of Railways)

The factory consisting of two divisions, Shell & Furnishing, meets over 50 per cent of the requirements of passenger coaches of the Indian Railways. During 1968-69, 640 shells and 635 coaches were manufactured, consisting of 15 types.

The factory manufactures all steel, light weight, fully welded integral coaches.

Up to the end of March 1969, 6,724 shells have been turned out and 4,750 coaches have been furnished. The factory produces diesel railcars, air-conditioned coaches and electrical multiple units in addition to conventional Broad and Metre Gauge Third Class, Second Class and First Class ceaches. The annual turn-over is approximately Rs. 15 crores. The total number of employees on rolls is 10,700.

The factory is also currently executing export orders for 45 M.G. bogies to Thailand and 100—1067 mm bogies to Taiwan.

JANPATH HOTELS LIMITED

New Delhi.

The company manages three hotels in Delhi viz., Hotel Janpath, Hotel Ranjit and Lodhi Hotel with a room capacity of 212, 208 and 225 respectively.

JAYANTI SHIPPING COMPANY LTD.

Regd. Office: Rehem Mansion No. 1, 42, Colaba Causeway, Bombay-1.

Mg. Agents: The Shipping Corporation of India Ltd., Steelcrete House, 4th floor, Dinshaw Wachs Road, Bombay-20 BR.

Agents: Throughout the world.

Jayanti Fleet

Tankers (in DWT): Adi Jayanti 33,099, Vikram Jayanti 57,588; Cargo Ships (in DWT): Ashoka Jayanti 10,030, Gandhi Jayanti 10,920, Krishna Jayanti 11,050, Laxmi Jayanti 10,060, Rama Jayanti 10,960; Bulk Carriers (in DWT): Bharata Jayanti 36,496, Gotama Jayanti 36,416, Akbar Jayanti 36,471, Chandragupta Jayanti 36,528, Devaraya Jayanti 36,491, Samudragupta Jayanti 36,464. Combined Oil/Ore Carriers (in DWT): Bhaskara Jayanti 21,594, Leelavati Jayanti 21,615, Chanakya Jayanti 21,594.

Total (DWT): 5,00,348 LT.

KOLAR GOLD MINING UNDERTAKINGS

Kolar Gold Fields, Oorgaum P.O., Mysore State.

Is now under the administrative control of the Department of Economic Affairs, Ministry of Finance, Government of India. The mines working at present are: Mysore/Champion Reef Amalgamated Mine and Nundydroog Mine.

No. of workmen as on 31-3-1969: 13,280.

The gold production during 1968-69 was 26,37,505 grammes worth Rs. 2,23,30,161 (Rounded off to Rs. 223.30 lakhs).

LUBRIZOL INDIA LIMITED

Delstar, 9A, Hughes Road, Bombay-26.

Lubrizol India Limited is a Government Co. set up in collaboration with Lubrizol Corporation of U.S.A., Government of India holding 51 per cent shares and the collaborators 49 per cent shares. A plant has been set up at Thana-Belapur Road near Bombay for the manufacture of chemical additives for petroleum products. Production commenced in November 1968 and the company has since been meeting the entire requirements of the oil companies for additives which were hitherto being imported in toto.

Sales during 1968-69 (5 months): Rs. 107 lakhs; Net Profit during 1968-69: Rs. 11 lakhs.

MACHINE-TOOL PROTOTYPE FACTORY, Amberrath

(Under the Ministry of Defence)

MAZAGON DOCK LIMITED

Mazagon, Bombay 10.

(Under the Ministry of Defence)

A ship-building, ship-repair and general engineering concern.

The company can build various types of ships—like frigates, passenger ships, passenger-cum-cargo ships, dredgers, tugs, barges, trawlers, etc.—up to 145 metres length, 24 m. breadth and 15,000 tons DWT. It has four building berths, three dry docks and an impounded wet dock.

Two anti-aircraft, anti-submarine Leander Class frigates for the Navy—INS Nilgiri & INS Himgiri—have been launched. Construction has started on a third frigate. The company has also built for the Navy a bucket dredger, two inshore minesweepers, two Avcat tankers (designed to carry aviation fuel) and several other ships.

Leader of the West Coast Consortium of shipbuilders, Mazagon Dock has delivered 12 fishing trawiers to the Union Government and various State Governments.

Mazagon Dock is fully equipped to carry out repairs to all kinds of ships. The company, which maintains a round-the-clock, seven-day-a-week repair service, can take up for repairs over 60 ships per month and earns about Rs. 140

lakhs every year in foreign exchange by carrying out repairs to foreign ships.

Mazagon Dock's general engineering section can undertake a variety of heavy engineering work such as manufacture of large pressure vessels, precision machining, radiograph quality welding, overhauling of steam, diesel and petrol engines etc. It is also capable of manufacturing port, dock and shipbuilding cranes. A 80-ton fixed lift crane and a 15-ton level luffing crane were recently manufactured by the company, for the first time in India, in collaboration with DEMAG of West Germany.

The company's production turn-over rose from Rs. 10.71 crores in 1968-69 to Rs. 13.10 crores in 1969-70.

MODERN BAKERIES (INDIA) LIMITED

Registered Office: Mahajan House, 1st Floor, E 1 & 2, N.D.S.E. Part II, Ring Road, New Delhi 49.

The company has six automatic bakeries at Ahmedabad, Bombay, Cochin, Delhi, Hyderabad and Madras. The capacity of each unit is 35,000 loaves of 400 gms. per day except that of Bombay where the rated capacity is 70,000 loves per day. All the units have gone into production. The company is setting up similar units at Bangalore, Calcutta and Kanpur.

THE MOGUL LINE LTD.

16, Bank Street, Bombay 1.

Pilgrim Booking Office: Nos. 4 & 5, Mahomed Haji Saboo Siddick Musafirkhana, Carnac Road, Bombay 1.

Operates Haj Pilgrim service between Bombay and Jeddah, regular cargo-cum-passenger service between Bombay and Red Sea ports and regular coastal service for transport of coal, salt, cement etc.

NAHAN FOUNDRY LTD.

(Nahan, Sirmur District, Himachal Pradesh).

Production consists of improved type of sugar cane crushers, bullock as well as power driven, mono-block pumps, electric motors from § H.P. to 15 H.P. of ISI, improved types of ploughs, cornsheller machines; harrows; and other agricultural implements. The foundry undertakes quality easting work for P. & T., D.G.S. & D., Public Health and Railways.

NATIONAL INSTRUMENTS LTD.

(1/1, Raja Subodh Mullick Road, Jadavpur, Calcutta 32).

(Under the Ministry of Industrial Development & Company Affairs.)

This company manufactures and repairs at its Instruments Plant at Jadavpur, Calcutta, precision instruments such as Survey Instruments, Drawing Office Equipment, Optical Instruments such as Microscopes & Binceulars, Vision Sighting Equipment of various types, Medical Instruments such as Ophthalmoscope & Sphygmomanometer, Measuring Instruments such as Pressure and Vacuum Gauges and a variety of other precision instruments.

The company's Ophthalmic Glass Plant at Durgapur when on full production will produce 300 tonnes of Ophthalmic glass blanks out of which 200 tonnes will be released as blanks in the market and 100 tonnes processed into finished lenses for eye care.

The company has provided training facilities under the

Apprenticeship Act.

The Instruments Plant at Jadavpur has taken up a modernisation and diversification production programme to produce a sophisticated range of products now being imported like one Second Theodolite, Automatic Level etc.

NEYVELI LIGNITE CORPORATION LTD.

(Ministry of Steel, Mines & Metals, Government of India). Neyveli 1, South Arcot Dist.

This is a Rs. 175-crore Project. The Integrated Project envisages the mining ultimately of above 6 million tonnes of lignite per annum, the present rate being 5 million tonnes per annum.

The lignite is utilised for (a) the generation of power in a 600 M.W. Thermal Power Station, (b) the production of Urea with a nitrogen content of 46 per cent in a Fertilizer Factory of a capacity of 1,52,000 tonnes of Urea per annum, (c) manufacture of carbonised briquettes from lignite in a Briquetting & Carbonisation Plant of a capacity of 3,27,000 tonnes per annum and (d) production of 6,000 tonnes of washed clay.

The Urea Plant at Neyveli is the biggest of its kind in the world and the first to gasify lignite to produce Urea.

The following tar products are also produced in the B & C Plant: Tar, Neutral Oil, Carbolic Acid (Phenol), Ortho Cresol, Meta-Para Cresols, Xylenols and Polyvalent Phenols.

OPTICAL GLASS

Central Glass and Ceramic Research Institute, Calcutta 32.

The pilot plant located at the Institute produces the major types of optical glass required in the country.

PYRITES AND CHEMICALS DEVELOPMENT CO., LTD.

Registered Office: Dr. Joseph House, Canal Road, Dehri-on-Sone, Dist. Shahabad, Bihar.

Branch Offices: (i) Mining Project, P.O. Amjhore, Dist. Shahabad, Bihar. (ii) Office of the Resident Representative, N.-5, N.D.S.E., Part-I, Ring Road, New Delhi-49. (iii) Office of the Assistant Purchase Officer, No. 9, Syed Amir Ali Avenue, Fourth Floor, Calcutta-17. (iv) Office of the Project Officer, Exploratory-cum-Production Mining Project, Saladipura, P.O. Khandela, Dist. Sikar, Rajasthan. (v) Exploratory Mining Project, Maldeota Phosphate Deposit, 98-C, Race Course Road, Dehra Dun (U.P.)

Objects: Raising, assembling and transporting of pyrites and phosphates ores in such areas in India and elsewhere as the Company may from time to time determine for the purpose of sale or use or for the manufacture of sulphur, sulphuric acid and any other bye products out of pyrites ore and for manufacture of phosphate and allied fertilizer minerals.

Activities: Investigation, Planning, Exploitation and mining programme of pyrites and rock phosphates.

Mining Programme: Pyrites: (i) The mine at Amjhore has already started production in 1968 and more than 46,300 tonnes have been despatched to Sindri for trial runs and commissioning of the first pyrite-based Sulphuric Acid Plant there. During this first phase, the mine will produce 400 tonnes/day and the production of 400 tonnes/day has been planned and phased to meet the requirement of another pyrite-based Sulphuric Acid Plant at Sindri which is expected to be commissioned in mid 1971.

(ii) Exploratory-cum-production mining at Saladipura has been undertaken which will block out nearly 3 million tonnes of pyrite ore and provide necessary data for drawing up feasibility report and detailed Project Report for a major fertilizer complex to be set up in Rajasthan. The scheme is expected to be completed by February, 1972.

Rock Phosphate: Exploratory mining work is being conducted at Maldeota in the district of Dehra Dun (U.P.). It will provide necessary data to find out economic viability to exploit this rock phosphate deposit.

RAJASTHAN ATOMIC POWER PROJECT

(See under " Research ")

SHIPPING CORPORATION OF INDIA LIMITED

Registered Office: "Steelcrete House", Dinshaw Wacha Road, Bombay-20 BR.

Branch Offices: CALCUTTA: Nilhat House, 11, R. N. Mukherjee Road, Calcutta-1.

MOMBASA: Renmar House, Kilindini Road, Mombasa. Chairman & Managing Director; C. P. Srivastava, IAS.

Number of vessels: Cargo vessels 49, passenger-cumcargo 4, bulk carriers 3, timber carrier 1, bulk coal carriers 3, tankers 6, Total 66.

Total G.R.T.: 6.32 lakhs, D.W.T. 9.47 lakhs.

Services: Passenger-cum-cargo services from India (1) East Africa (2) Malaysia & Singapore (3) Ceylon and (4) Calcutta-Madras to Andaman & Nicobar Islands.

Cargo Services: From India to U.S.A. (Atlantic & Pacific Coasts), Canada (Pacific Coast), U.K., Continent, Poland, U.S.S.R., U.A.R., East Africa, Australia, Far East, Japan, West Asia (Gulf and Red Sea).

Tanker Services on coastal and overseas trades, Colliers on Indian Coast.

TARAPUR ATOMIC POWER PROJECT

(See under " Research ")

WASHERIES

The Durgapur washery which is an integral part of the Durgapur Steel Plant, has an input capacity of 1·2 million tonnes of raw coal per annum. The three Hindustan Steel Ltd. washeries at Dugda, Bhojudih and Patherdih have input capacities of 2·40, 2·00 and 2·00 million tonnes respectively and the Kargali washery of the National Coal Development Corporation has an input capacity of 2·72 million tonnes per annum. Dugda II Washery with raw coal input capacity of 2·40 million tonnes has been completed.

The Durgapur Projects Washery with an input capacity of 1.20 million tonnes has been completed and gone into commission. Washeries at Kathara, Gidi (Karanpura) and Sawang with input capacities of 3.00, 2.84 and 0.75 million tonnes of raw coal per annum respectively are nearing completion.

STATE-OWNED OR STATE-AIDED

ANDHRA PRADESH THE ANDHRA PAPER MILLS LTD.

(Rajahmundry).

Head Office: Shreenivas House, Waudby Road, Bombay 1.

The present production capacity is 160 tonnes per day. The production of the Mills is mainly writing, printing and wrapping papers. Speciality—Super calendered, size pressed and rag content papers and liner boards etc.

GOVERNMENT CERAMIC FACTORY

(Gudur, Nellure Dist.)

The factory produces sanitaryware and L.T. Electrical Insulators. During the year 1968-69 the production was 4.23 lakhs kgs. valued at Rs. 4.43 lakhs.

HYDERABAD TANNERIES LTD.

(Hyderabad)

The factory does the tanning of cow and buff hides, sheep skins and goat skins. Export of tanned hides and skins is also done.

NIZAM SUGAR FACTORY LTD.

The Nizam Sugar Factory is the largest single sugar producing unit in the country.

PRAGA TOOLS LIMITED

6-6-8/32, Kavadiguda Road, Secunderahad 3.

The Company produces machine tools and allied accessories, precision tools, forgings for auto and diesel spares and rail-road components, defence items, etc.

REPUBLIC FORGE COMPANY LTD.

Maula Ali, Hyderabad-40.

The Company manufactures precision drop forgings for Railway Automobiles, Tractors, Industrial Engines and other engineering industries. It is fully equipped with die shop, heat treatment, shot blasting and other facilities.

SINGARENI COLLIERIES

Coal is mined in the State by the Singareni Collieries Co. Ltd. from the coal fields at Kothagudem, Yellandu, Rudrampur, Belampalli, Mandamari, Ramakrishnapur and Ramagundam.

Production of coal during 1967-68 was 40-95 lakh tonnes as against 41-78 lakh tonnes in 1966-67.

ASSAM

ASEB METER WORKS

Short Round Road, Shillong.

A Rs. 60 lakhs factory, an Assam State Electricity Board enterprise, manufactures single phase house service KWH metres and polyphase metres.

ASSAM CEMENTS LIMITED

Cherrapunjee, Assam.

The Company has set up its factory at Cherrapunjee for manufacture of Portland Cement with a capacity of 250 tonnes per day. Expansion of the factory which is expected to be completed by 1971 will increase the capacity to 850 tonnes per day.

ASSAM GAS COMPANY LTD.

Shillong (Assam).

Aims and Objects: Utilisation and distribution of natural gas available from the Oil and gas fields in Assam as feed stock for petrochemical industries and as industrial and domestic fuel. Distribution of liquified petroleum gas for domestic, commercial and industrial purposes.

Present Activity: Construction of the gas supply project at Duliajan in Upper Assam which includes completion of the construction of the extended portion of the I4" dia. Namrup-Naharkatiya pipeline upto Duliajan and installation of the gas compressor station at Duliajan and also the construction of the Housing Project in the Assam Gas Co. Colony at Duliajan.

For transmission of the natural gas available in the Moran oil gas fields and also from the oil and gas fields of ONGC in Upper Assam to Namrup, the feasibility of the construction of a pipeline of about 35 miles long is under examination.

IYOTI CHITRABAN

(Assam Government Film Studio)

Kahilipara, Gauhati.

The basic objective is to encourage private film producers to undertake production of indigenous films at the minimum cost. A substantial part of the project has been completed.

The State Government has constituted an Advisory Board to advise the Government in all matters on the management and proper maintenance of the Film Studio with the Chief Minister, as the Chairman.

The total expenditure involved in the execution of this project amounts to Rs. 15 lakhs approximately.

BIHAR

BIHAR STATE SUPERPHOSPHATE FACTORY

P.O. Sindri Institute, Dist. Dhanbad. (Bihar).

Installed capacity of plants: (i) 240 tons superphosphate per day; (ii) 25 tons of 100 per cent sulphuric acid per day.

At present the factory produces between 35,000 and 40,000 tons of superphosphate a year.

HIGH TENSION INSULATOR FACTORY

P. O. Namkum, Ranchi-10, Bihar.

This factory has been set up by the Government of Bihar with the technical collaboration of Czechoslovakia. The present installed capacity is 2,400 metric tonnes per annum with the varying range of production as transmission line insulators upto 220 KV, bushings and Pin & Post insulators upto 33 KV besides L.T. Pin, Shackles and Guy insulators.

GUJARAT

GUJARAT STATE FERTILIZERS COMPANY LTD.

P. O. Box No. 123, Baroda,

The details of production, expansion plans, etc., are: First phase already completed. Annual production capacity in metric tennes per year: Ammonia 150,000; Urea 103,000; Technical Grade Urea 3,300; Sulphuric Acid 156,000; Phosphoric Acid 54,500; Ammonium Sulphate 156,000; Diammonium Phosphate 113,000; Ammonium Sulphate Phosphate (20:20) 264,000; No. of persons employed 1,150. Total yearly potential sales Rs. 30 crores.

Second phase started (June 1967) — Ammonia 165,000 tons per year; Urea 264,000 tons per year; total Nitrogen and P₂O₅ 313,000 tons per year; (in terms of plant nutrient).

Yearly total investment including working capital, interest, letter of credit formalities, etc., for first and second phase together Rs. 63 crores.

Third Phase — Cyclo hexane and Caprolactum 16,500 tons per year. Total number of persons employed 1,600.

JAMMU & KASHMIR

COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH

DRUG RESEARCH LABORATORIES

Raj Bagh, Srinagar.

The present production and the sales effected are valued at Rs. five lakhs and Rs. six lakhs respectively.

DRUG RESEARCH LABORATORIES

(Factories & Farms) (CSIR)

Canal Road, Jammu, Tawi.

Belladonna concentrated extracts, Belladonna consumer goods, i.e., Belladonna plaster etc. Dissogenin, Menthol and Dementholised oil, Pyrethrum Oleoresin and cedarwood oil.

GOVERNMENT SILK WEAVING FACTORY

(Raj Bagh, Srinagar).

It is the largest powerloom factory for the production of pure silk fabrics in India. At present there are 126 looms and 9,000 spindles. The factory is equipped for dyeing and block printing.

The total production is 3.50 lakh metres per year.

GOVERNMENT WOOLLEN MILLS

(Srinagar, Kashmir).

The average monthly production on the basis of 1962-63 working is—cloth 2,31,000 yards and yarn 4,54,000 lbs.

KERALA

GOVERNMENT OIL FACTORY

(Kozhikode).

The factory now produces various vitamin products such as Seagold blended shark liver oil, Adamin liquid high potency Vitamin Oil, Adamin capsules, Stayfit liquid, Stayfit capsules, and Veterinary Vitamin Oil such as Univex and Trivax, etc. using up-to-date equipment and testing apparatus.

KERALA GOVERNMENT CERAMICS

Kundara, P.O. Kerala.

The Kerala Ceramics Ltd., Kundara consists of three working units.

Unit I, the New Porcelain Factory producing porcelain crockery, and low tension electrical insulators. Unit II, the old Factory is now being reorganised for the production of stoneware pipes and refractories and Unit III, China Clay Mines producing refined China Clay.

KERALA ELECTRICAL & ALLIED ENGINEERING COMPANY LIMITED

Mamala P.O., Cochin (Kerala).

This Company has three Manufacturing Divisions.

A. MAMALA WORKS

1. Transformer Division:—The unit is equipped to manufacture Transformers upto 1500 KVA, 33 KV with annual output of 1,20,000 KVA. Now the range of

manufacture is extended upto 3,000 KVA. Transformers of special nature, Rectifier, Furnace etc. are also manufactured as per customers' requirement.

2. Structural Division:—Design, fabrication and erection of all types of steel structures for industrial building, power houses etc. Vertical gates, radial gates, pressure gates, sluice gates including hoist mechanism and lifting gantries, lock gates and screw geared shutters, cranes structures etc., galvanised transmission line towers, M. S. Pipes and special storage tanks, etc.

B. KUNDARA DIVISION

1. Electric Motors 1.5 HP to 10 HP Screen Protected and totally enclosed fan cooled types; 2. Centrifugal pumps including special high discharge de-watering pumps; 3. Electrical wiring accessories viz. tumbler switches, fuse units, outouts etc.; 4. Bakelite mouldings; 5. C.I. pipes and specials and G.I. castings weighing upto 1.5 M.T.; 6. Pole line hardwares like stay rods, cross arms etc.

THE KERALA PREMO PIPE FACTORY LIMITED

Puthenthura (P.O.), Quillon District.

Registered Office: Puthenchantai, Trivandrum 1.

In this factory prestressed high and low pressure concrete pipes and R.C.C. pipes are manufactured for water supply, drainage and irrigation.

It also produces power transmission poles and mosaic tiles. The factory can design and manufacture special purposes reinforced concrete or prestressed concrete articles.

It can manufacture upto 25,000 metres of prestressed concrete pipes annually. Pipes can be designed and manufactured for all normal water supply and drainage requirements.

KERALA SOAPS AND OILS LTD.

(Soap Institute Division)
Calicut-11.

The institute manufactures several varieties of toilet soaps including the Kerala Sandalwood, Willingdon, Vep, Rose soaps etc. as also Wash-well and other varieties of bar soaps.

The capacity of the factory is about 450 tons per annum. But it is now being increased to 700 tons.

Turnover in 1968-69 was Rs. 14 lakhs.

PALLATHRA BRICKS & TILES LTD.

P.O. Kochuramapuram, Shertallay.

The object of the Company is to produce and distribute sand lime bricks, a new architectural brick of high strength and finish. The designed capacity of the factory is 44,000 bricks per working day of 16 hours.

TRACO CABLE COMPANY LTD.

Irimpanam, Ernakulam.

One of the main objects of the company was to carry on business as manufacturers and dealers in all kinds of wires and cables.

The present licensed capacity is 36 million core yards of VIR/PVC/Polythelene Wires & Cables and 1,500 M.T. of A.A.C./A.C.S.R. Cables.

The Company's present production lines include PVC Wires with both copper and aluminium conductors, PVC insulated armoured and unarmoured power cables for working voltages upto 1·1 kV and A.A.C. & A.C.S.R. Conductors.

The Company proposes to manufacture PVC insulated jumper wires, switch board wires and multicore telephone cables.

TRAVANCORE PLYWOOD INDUSTRIES LTD.

Punalur.

The installed capacity of the factory at present is 4.5 lakh sq. metres plywood panels including decorative sizes per annum.

Annual turnover is Rs. 20,00,000.

A modern commercial plywood unit with an installed capacity of 20 lakh sq. metres of plywood was expected to go into production in 1969-70.

TRAVANCORE TITANIUM PRODUCTS LTD.

Kochu Veli, Trivandrum-7 (Korala).

The factory is the only unit in India producing Titanium Dioxide pigments, an important intermediate for paint, rabber and many other consumer products. It has now a production capacity of 18 M. tons per day.

TRIVANDRUM RUBBER WORKS LTD.

(Chackai, Trivandrum 7).

The main products of the company are Rubber goods such as Cycle Tyres and Cycle Tubes, Hoses of all kinds, Latex goods, feams cushions and mattresses, Tubings, sheetings, moulded goods etc., Cycle Rims and 'Kerala' Cycles. The Company is now exporting Cycle Rims to East African and other African countries. The company employs 448 persons.

TRIVANDRUM SPINNING MILLS LTD.

Balaramapuram.

Equipped with modern superhigh draft machinery for 25,200 spindles and 800 spindles of doubling frames, this mill manufactures quality yarn of counts varying from 10s to 100s in hanks and cones.

MADHYA PRADESH

MADHYA PRADESH LAGHU UDYOG NIGAM LTD.

Shahnaz Manzil, Sultania Road, Bhopal.

Main objects are to promote the growth and development of Small Scale Industries in the State.

The Nigam has undertaken the following activities:-

- Procurement and distribution of scarce and controlled materials to the Small Scale Industries in the State at fair price through its raw material depots at Indore, Gwalior, Bhopal, Jabalpur, Bhilai & Raipur.
- (2) Running of seven production units manufacturing umbrella ribs & sticks, brushes, cycles and cycle parts, centrifugal electric pumps, finger jointed wooden products and iron and steel products, like barbed wire, nails and other products.
- (3) Two new production units for the manufacture of agricultural implements, one at Khandwa and the other at Bhilai. The factory at Khandwa has started production.
- (4) Sale of handloom and handicraft products, through 14 emporia and participation in exhibitions and export promotion. Inter-State sales of handloom and handicraft products of J. & K. and W. Bengal Stores.
- (5) Sales and publicity for the increased sales of products manufactured by the production units run by the Nigam and also to meet the demands of the State Government Departments Institutions.
- (6) Exports of handloom & handieraft products.

(7) Construction of industrial estates, rural work sheds and development of industrial areas.

THE NATIONAL NEWSPRINT AND PAPER MILLS LIMITED

(Nepanagar, Nimar Dist., Madhya Pradesh).

The factory produces newsprint. The yearly rated capacity of the first and the second Paper Machine is 30,000 tonnes and 37,500 tonnes respectively. The production during 1968-69 was 30,562 tonnes.

There were 1,586 workers as on March 31, 1969.

MAHARASHTRA

GOVERNMENT BACON FACTORY

National Park, Borivli, Bombay-92,

The Government of Maharashtra has established a bacon factory with a capacity to slaughter 100 pigs a day. The total capital investment on this factory including buildings, equipment and vehicles etc. is about Rs. 52-22 lakhs.

Main objects: To give remunerative markets to the farmers who raise pigs in the State. This also provides nutritious animal proteins at cheaper rates to the public.

The factory produces canned meat, bacon, ham and sausages. The finished products viz. bacon, ham and sausages are sent to Bombay markets.

MANGANESE ORE (INDIA) LTD.

3, Mount Road Extension, Nagpur.

The Manganese Ore India Ltd. operates the manganese mines in Nagpur, Bhandara and Balaghat districts. All mines except Dongri Buzurg, which were previously being worked by the C. P. Manganese Ore Co. Ltd. were transferred to this Company.

The output and sales of the usual grades of manganese ore during 1968-69 were 2,38,595 and 3,56,693 tonnes respectively, besides 83,378 and 63,979 tonnes respectively of lower grade ore. The total number of workers employed by the company at different mines is 12,500.

MYSORE

THE GOVERNMENT CENTRAL INDUSTRIAL WURKSHOP

(Mysore Road, Bangalore 26).

Annual outturn: Rs. 35.57 lakhs. No. of persons employed: 322.

The workshop is engaged in general engineering works such as manufacture of inter cooler unit, cold blender, bobbins, road rollers, copper alloy and aliding bearing plates, hand mixers. The manufacture of low bed trailer and dumper bodies is also undertaken.

GOVERNMENT ELECTRIC FACTORY

(Mysore Road, Bangalore-26).

Main products: Transformers in sizes upto 3,000 kvA and voltages upto 33 kv to an aggregate of 3,00,000 kvA per annum, scientific instruments, motor pumpsets and fans. Annual turnover Rs. 150 lakhs. No. of persons employed: 900.

GOVERNMENT SANDALWOOD OIL FACTORIES IN MYSORE

Factories at (1) Mysore, (2) Shimoga (Mysore State).

Production: 1968-69: Quantity 117,295 Kgs. of Sandalwood oil valued at Rs. 2,20,97,694. No. of persons employed 330.

GOVERNMENT SOAP FACTORY

Post Box No. 1031, Bangalore-12.

Annual cutturn: Rs. 2-43 crores. No. of persons employed: 302.

The factory produces 3,200 tonnes of soaps per year. It has now installed a latest Automatic Vacuum Toilet Soap Washing Soap processing plant imported from Italy. The factory produces world famous "Mysore Sandal Soap" and other varieties of soaps.

THE HUTTI GOLD MINES CO. LTD.

Hutti P.O. (Via Raichur-Deccan).

The current production is at the rate of 1,70,000 tonnes of ore treated per annum with a recovery of 1,150 kg. of gold.

Production at the expanded rate was scheduled to commence about mid 1970, when 3,10,000 tonnes of ore would be treated per annum for a recovery of about 1,930 kg. of gold.

THE MAHABOOB SHAHI KULBURGA MILLS CO.

Gulbarga (Mysore State).

The Mill runs 20,000 spindles and 528 looms with Processing Section. Under the modernisation scheme it is proposed to install about 9,000 spindles more.

THE MYSORE CHROME TANNING CO. LTD.

Mysore Road, Bangalore-26.

The company manufactures all kinds of chrome upper leathers, B.T. sole leathers, besides manufacturing leather goods such as ammunition boots for police and defence departments, air travel bags, document cases, suit cases, ladies hand bags, industrial leathers, washers for hydroelectric turbines, safety belts and straps for hot line workers etc.

THE MYSORE IRON AND STEEL LIMITED

(Bhadravati, Shimoga Dist., Mysore State).

The Mysore Iron and Steel Ltd. is an integrated Steel Plant producing pig iron, mild steel, alloy and special steels, ferro-silicon, cast iron, steel castings, spun pipes, cement etc. and has an annual capacity of 77,000 tonnes.

The Company exports its products like ferro-silicon, pig iron and steel to various countries like U.K., U.S.A., West Germany, Saudi Arabia, Japan, Malaysia, Singapore, Ceylon, Spain etc.

The Company employs 10,225 persons.

The expansion scheme for stepping up the production of pig iron from 80,000 tonnes to 2,00,000 tonnes is under way.

MYSORE GOVERNMENT SILK WEAVING FACTORY Mananthody Road, Mysore-4.

Annual outturn: Rs. 35 lakhs. Number of persons employed: 268.

The factory is engaged in the manufacture of high grade 100 per cent re-reeled pure silk fabrics such as Crepe-dechine, Georgette, Satins, Sarees, Kerchieves, Ties and other ladies wear.

New varieties such as Tom-tom, Fireplay, Navrang, Champion, Rainbow, Taffetta fabrics; Scarves, Raw Silk fabrics, Batic printed sarces, Roversable sarces etc., are also manufactured.

MYSORE IMPLEMENTS FACTORY

c (Hassan).

Annual outturn: Rs. 40 lakhs. No. of persons employed: 309.

The factory has been mechanised for mass production of agricultural, estate and horticultural implements and tools like mumties, pick axes, sledge hammers, shovels, crowbars, sheet metalware, etc. to meet the increasing demand from several Govt. departments for their several irrigation projects and drought relief works and private consumers. A network of agencies is functioning throughout the country.

MYSORE MINERALS LTD.

46, Fair Field Road, Bangalore 1.

This company deals with mining and marketing of the following minerals: Iron Ore, Manganese Ore, China Clay, Aluminous Clay, Chromite, Asbestos, and Soapstone.

The total sales by the company during the year 1968-69 amounted to Rs. 62.33 lakhs.

The company provides employment for over 1,500 people per day. It has earned foreign exchange amounting to Rs. 93.66 lakhs in 1968-69 from iron ore and chromite including iron ore moved on behalf of M.M.T.C.

MYSORE PORCELAINS LIMITED

P.B. No. 1, Science Institute Post, Bangalore 12.

The company manufactures H. T. & L. T. Electro-Porcelain Insulators and accompanying metal parts, It has facilities for the manufacture of 7,500 M. T. per annum of these items, and employs about 1,500 persons.

Apart from conventional varieties of insulators, the factory develops and supplies special apparatus percelains to the specifications of the customers, besides meeting the requirements of Solid Core Insulators needed for railway electrification schemes in Indis. Sales as of 31-3-1969: Rs. 190 lakhs.

NGEF LTD.

Byappanahalli, Bangalore-33.

Main products: (i) Transformers upto 40,000 kVA and voltages upto 132 kV to an aggregate of 10,00,000 kVA per annum, per single shift. (ii) Motors: Upto 1500 HP both in LT and HT upto 6.6 kV to an aggregate of 4,00,000 HP per annum, per single shift. (iii) Switchgear: Low oil content circuit breaker upto 11 kV. Air circuit breakers, HT and LT Switchboards, Drum type switches, Distribution boards, Load Break Switches, HRC Fuses etc. of the value of about Rs. 1.2 orores per annum, per single shift.

RADIO & ELECTRICALS MFG. CO. LTD.

Mysore Road, Bangalore-26.

The company manufactures radio receivers & allied components, plastic insulated wires & cables, electricity meters, water meters, wave-change switches, paper & electrolytic capacitors, loudspeakers, transistorised radio receivers, and community radio receivers. There is a Research & Development Wing to design a large variety of electronic test equipment mostly for company's own use. The company also produces single phase electricity meters, polyphase electricity meters both 3 phase 4 wire and 3 phase 3 wire, multijet inferential type watermeters, a new type of watermeter viz. 'TNR' and lightning arresters.

TUNGABHADRA STEEL PRODUCTS LTD.

Tungabhadra Dam P.O. (Bellary Dist., Mysore).

Production: Steel structures including gates, hoists and transmission towers 4,000 tons per annum; penstocks 3,000 tons; grey iron castings 500 tons; cranes worth Rs. 18 to 24 lakhs per annum.

A galvanising plant with a capacity of 3,000 tons per annum working in a single shift has been commissioned. The company has its own design branch, grey iron foundry, rubber seal section, X-ray and photographic section.

It has entered into a collaboration agreement with Messrs. Est. Neyrpic, Grenoble, France for the designing and fabrication of hydraulic gates.

ORISSA

CUTTACK IRON & STEEL PRODUCTS LTD.

Industrial Estate, Cuttack-3 (Orissa).

The company manufactures fabricated steel goods. It undertakes all types of fabrication work. Its products can be divided into three categories: (1) Heavy Goods (trusses, transmission towers, hand cranes etc.), (2) Semi-Heavy Goods (window grill, steel window, W.I. gate, collapsible gate, garage gate, electric cross-arms, wheel barrow, acraper, drums etc.), (3) Light Goods (novelty goods like table tray, flower stand, garden chair and other types of furniture and office equipment like file tray, file rack, etc.).

ORISSA BOARD MILLS LTD.

P.O. Jagatpur (Dist. Cuttack, Orissa). (Regd. Office: Meria Bazar, Cuttack-1).

This is a pilot project company of the Government of Orissa. The mills produce monolithic quality straw boards and mill boards from 16 oz. to 48 oz.

ROURKELA FABRICATIONS LTD.

Industrial Area, Rourkela-4.

The factory manufactures quality steel window, angle roof trusses, purios, all steel screw gear shutters, falling shutters and for any type of structurals heavy, medium and light.

Turn-over for 1968-69: Rs. 5-56 lakhs.

TAMIL NADU

MADRAS FERTILIZERS LIMITED

"Fagun Mansion", 19, Commander-in-Chief Road, Madras 8.

Objects: To manufacture and market Ammonia, Urea and Complex Fertilizers within installed plant capacity of 750 tonnes, 885 tonnes, and 1,100 tonnes per day respectively. The Fertilizer Plant is being constructed at Manali, Chingleput District, Madras and is expected to go into production in the first quarter of 1971.

WOOL PROCESSING CENTRE

Vinnamangalam, North Arcot District, Madras.

The Wool Processing Centre, of the Government of Tamil Nadu processes tannery wool/hairs, bristles to meet the requirements of drugget, carpet and felt manufacturers of India and abroad. The production capacity is 750 tonnes per year.

UTTAR PRADESH

GOVERNMENT CEMENT FACTORY

Churk, Mirzapur, U.P.

The plant's present rated capacity is 1,400 tonnes of cement per day. Production of cement during 1968-69 was 3,62,114 tonnes.

There are 1,859 persons working in the factory and 1,500 persons in the quarries.

GOVERNMENT PRECISION INSTRUMENTS FACTORY

Lucknow, P. Box 153, U.P.

The factory produces watermeters of 15 mm, 20 mm and 25 mm sizes, microscopes research, scholar and bullet comparion and pressure gauges of 2'/2", 4" and 6" dial sizes in various ranges and depth gauges.

THE INDIAN TURPENTINE & ROSIN CO. LTD.

P.O. Clutterbuckganj, Bareilly (U.P.)

From crude resin, the company manufactures turpentine and roein of international repute conforming to I.S.I. Certification marks. The gum of pine trees, the main raw material, is being obtained from the Kumson and Tehri forests of U.P.

WEST BENGAL

THE KALYANI SPINNING MILLS LTD.

67. Bentinck Street, Calcutta-1.

Works: Kalyani, Dt. Nadia; and Ashokenagar, Dt. 24-Parganas.

Range of Production: Cotton yarn from 20s to 120s carded and combed, singles and doubles, in hanks and cones—for handlooms, powerlooms and hosieries.

Installed capacity: 75,160 spindles. Production during 1968-69: 16,14,020 kgs. Persons employed: 2,000 (approximately).

THE DURGAPUR PROJECTS LTD.

Registered Office: 10, Middleton Row, Calcutta-16.

Factory: Coke Oven Plant, P.O. Durgapur-2, Burdwan.

Products: Coke, Benzene, Industrial Toluol, Motor Benzel, Light Solvent Naptha and Lux Mas.

Tar Products: Carbolic oil, Solvent oil, Naphthalene oil, Crude Naphthalene, Anthracene oil, Timber Pickling oil, Sodium Phenolate, Processed Tar, Road Tar (No. 3 & 4).

INDIANS OVERSEAS

THE number of Indians abroad (1969) is given below as per the available informations with our missions

Afghanistan 20,000; Aden 2,000; Algeria 132; Argentina 160; Australia 3,108; Austria 165; Bahrain 5,500; Barbados 512; Belgium 377; Bolivia 5; Botswana 400; Brazil 57; Bulgaria Nil; Burma 2,72,000; Burundi 175; Cambodia 80; Cameroun 20; Canada 20,000; Ceylon 12,34,126; China 20; Chile 63; Colombia 34; Camores Island 85; Congo 3,000; Cuba 32; Cyprus 8; Czechoslovakia Nil; Dahomey 2; Denmark 256; Ethiopia 4,520;

EMIGRATION LAWS

"Emigration" means the departure, by sea or by air, out of India, of Citizens of India, under an agreement to work for hire in any country beyond the limits of India, or if assisted to depart otherwise than by a relative with the intention of working for hire or engaging in agriculture.

Such emigration is governed by the Emigration Act, 1922 (7 of 1922) and the Rules made thereunder, as amended from time to time.

Emigration for the purpose of 'unskilled work' is prohibited, while emigration for the purpose of 'skilled work' is permissible on compliance with the prescribed formalities.

The functions under the Act are discharged by the Central Government through the Controller-General of Emigration and Jt. Secretary to the Government of India in the Ministry of External Affairs, New Delhi, with the assistance of the Protector of Emigrants at the Ports and airports from which emigration is lawful.

The emigration figures for 1967-68 (1st April 1967 to 31st March 1968) is given below:

South Africa and Portuguese East Africa (—); East Africa 286; Indonesia 1; Malaysia 56; Saudi Arabia 253; Burma 1; Ceylon 4; Fiji (—); Zambia 100; Malawi (—); S. Rhodesia (—); Surinam (—); Guyana 3; West Indies (—); U.S.A. 47; Canada 59; Kuwait 869; Nigeria 101; Dubai 209; Bahrain 377; Abu Dhabi 94; Qatar 99; Ghana 52; Muscat 292; Other countries 414.

More details of Indians in some of the countries for which information is available are given below:

AUSTRALIA

An Indian already domiciled in Australia has full citizenship rights, including the right to introduce a spouse and minor unmarried children. Indian business men, bona fide tourists, sportsmen and entertainers may visit Australia and stay for periods not exceeding 12 months, and Indian students may be admitted with temporary residence status for education and specialised training.

Indian citizens already admitted with temporary resident status (other than in a student or visitor capacity) but with the intention of indefinite stay will qualify to apply for resident status and citizenship after five years residence.

An application by an Indian who wishes to settle in Australia with his wife and children is considered on the basis of the applicants' suitability as settlers, ability to integrate rapidly, and having qualifications which are in fact positively useful to Australia. After five years' stay on temporary permits, they may apply for resident status and citizenship.

CANADA

Since September 1967 when the Canadian new Regulations relating to universal selection became operational no quota agreements have been in operation.

Applications from prospective immigrants to Canada from India should be addressed to The Canadian Immigration Attache, 7 Link Road, Jungpura Extension, P.O. Box 161, New Delhi-1.

Indian residents of Canada are largely comprised of labourers employed in lumbering and trucking. There are a few lumber mill owners, and some are working as clerks in various establishments. A good number can also be termed professionals, technicians and highly skilled workers. Since very few professional degrees obtained in India are recognised on the equivalent basis in Canada, these professionals are able to practice only if they have had training outside India prior to emigration to Canada. The majority of Indians are in British Columbia. A good many today go on to industrial centres like Montreal and Toronto. The Indian community is called the "East Indian Community".

Any person admitted to Canada as an immigrant might become a citizen of Canada after five years' continuous residence there.

There are no disabilities on Indians in the matter of owning property, engaging in trade or profession, entering Government service or residence in any locality.

Indians can remit to India any amount earned in Canada.

Figures of Indians arriving in Canada: 1960: 673; 1961: 744; 1962: 725; 1963: 846; 1964: 1,295; 1965: 2,241; 1966: 2,233; 1967: 2,700; 1968: 3,000.

CEYLON

There are about 11,87,059 persons of Indian origin in Ceylon. Out of this number, approximately 26,829 are Indian citizens, 1,34,236 are registered citizens of Ceylon and 10,29,994 are stateless persons. The large majority of these persons are employed in the tea and rubber estates in Ceylon. Merchants, petty shop keepers and employees in business establishments constitute the balance and are mainly concentrated in the urban areas.

About 1,30,778 Indian nationals had left Ceylon either voluntarily or because of non-renewal of their visas upto the end of April, 1967 as a result of Ceylonisation programme of the Government of Ceylon.

A non-national leaving Ceylon can repatriate Rs. 1.5 lakks in the case of those other than Indians and Rs. 75,000 for Indians.

ETHIOPIA

Emigration to Ethiopia is neither restricted nor entirely free. Each case is judged on its merits, and there is no quota. Foreigners who wish to start new industries or go into farming are given special encouragement.

Remittances from Ethiopia to India by Indians are restricted and regulated by rules according to which anybody who is for more than six years in Ethiopia can remit only family expenses for near relatives on the basis of affidavits from India. There is no restriction for grant of foreign exchange for importing goods.

Most of the Indians are business men from the Gujarat and Saurashtra regions of India. Almost all of them are engaged in trade specially in the import of textiles. Besides, there are over 700 Indian teachers who have been recruited by the Ethiopian Government to further the cause of education. Some Indians are engaged also as Advisers to various Ministries. There are also a few Indians working as International Civil Servants in the Economic Commission for Africa whose headquarters are at Addis Abaha.

MAURITIUS

People of Indian origin in Mauritius form about 68 per cent of the total population of 7,73,573 as on June 30, 1967. These people have been settled here for generations and are now known as "Indo-Mauritians". Between 35 to 40 per cent of the agricultural land in Mauritius is owned by these Indo-Mauritians. A large number of them are farm labourers in sugar plantation. The rest are engaged in commerce and trade or professions or Government service. Indo-Mauritians are coming into their own and on the whole their economic and social conditions compare favourably with people of Indian origin in other countries.

NEW ZEALAND

"Applications from Indians for permanent entry are each considered on their merits, taking into account the general principle of New Zealand's immigration policy which is to admit in reasonable numbers those who can make a worthwhile economic and cultural contribution and who appear to be readily assimilable into the community. There are approximately 7,000 Indians in New Zealand."

The greater part of the Indian community is concentrated in the main urban centres, where for the most part they are engaged in small businesses such as grocery stores, importing houses or restaurants. Others, however, are employed in industry and in clerical work and other professions.

Indians enjoy the right to vote in Parliamentary and Municipal elections and do not suffer from any economic, political, legal or other disability.

Remittances made by all New Zealand residents (including Indians) from New Zealand are subject to exchange control.

PHILIPPINES

Subject to compliance with prescribed requirements, Indian nationals are now admitted to the Philippines as immigrants under an annual quota not exceeding 50 for each calendar year.

THAILAND

The annual quota is 200 and the selection is made by the Government's Immigration Division in Bangkok. No discrimination against the Indian population prevails in Thailand. Remittances out of the country are controlled by the Bank of Thailand's rules and regulations.

U.S.A.

Until June 1968 the U.S.A. had fixed a quota of 100 plus some not used from quotas for other countries. After that date there is no numerical limit, except for an upper limit of 20,000 which applies to all other countries as well. During 1969, there were 32,062 persons of Indian origin in the U.S.A.

There are certain categories of aliens who are excludable under Section 212 of the Immigration and Nationality Act. These exclusions apply to both immigrants and non-immigrants, although there are exceptions and certain discretionary powers vested in the Attorney-General and the Secretary of State.

There are a variety of requirements which must be met before an immigration visa can be issued. No consideration can be given to third, sixth and non-preference applicants until they obtain certification from the U.S. Department of Labour. The application can be made at a duplomatic or consular office of the United States. These offices are located in New Delhi, Bombay, Calcutta and Madras within India. Indians can compete on the same basis as national of other countries in the world for non-preference numbers. During the past six months non-preference numbers have been issued at all U.S.A., posts in India.

An immigrant, regardless of race, colour or creed, admitted into the United States as a permanent resident alien is eligible for American citizenship, if he fulfils the residence and other requirements laid down in the Immigration and Nationality Act of 1952, as amended.

There are no restrictions on the remittance of American funds abroad.

Narayana Dov (Malayalam); Aage Ka Rasta by B. B. Pearla (Marathi): Kanch K. Tukr. by Prof. K. Jagjit Singh (Punjabi) and Bhoron Ka Pahar by Dr. Karan Rajshesh (Teiugu).

U. G. C. SCHOLARSHIPS (1969-70)

Scholarships for research work in Sciences and Humanities including Social Sciences: 600 research scholarships of the value of Rs. 250 · p. m. were allocated to 69 Universities and Institutions feeding I to be Universities to candidates who take up research work at doctorate level in Sciences and Humanities including Social Sciences. The selection for award of these scholarships, which are tenable for three years, is made by the Universities Institutions concerned.

Scholarships for Honours and Postgraduate Studies in Arabic and Persian: 18 candidates have been awarded scholarships of the value of Rs. 1,200% p. a. for Honours/Postgraduate Studies in Arabic Persian.

Scholarships for Postgraduata Studies to the students of North-Eastern Region of India: 22 candidates have been awarded scholarships of the value of Rs. 120/- p. m. for postgraduate studies at different universities and institutions of the country. Subject-wise details are: Political Science—5; History—3; Physics—3; Sociology—3; Chemistry—2; Economics—2; Education—2; English—1; Mathematics—1.

Senior Research Fellowships in Sciences and Humanities including Social Sciences: 64 candidates have been selected for Senior Research Fellowships of the value of Rs. 500/- p. m. for post-doctoral research work in Sciences and Humanities including Social Sciences in universities and institutions in the country. Each fellowship also carries an annual contingency grant of Rs. 1,000. The Senior Fellowships are tenable for two years with provision for extension to the 3rd year in special cases. Subject-wise details of awards made are: (1) Chemistry—

9; (2) Physics — 4; (3) Zoology — 4; (4) Mathematics 3; (6) Botany — 3; (6) Agriculture — 3; (7) Sanskrit — 3; (8) Hindi — 3; (9) Geography — 2; (10) History — 2; (11) Economics — 2; (12) Geo-Physics — 1; (13) Geology — 1; (14) Statistics — 1; (15) Anthropology, — 1; (16) Physiology — 1; (17) Urdu — 1; (18) Persian — 1; (19) Linguistics — 1; (20) Telugu — 1; (21) A. I. History & Culture — 1; (22) Islamic History & Culture — 1; (23) Archaeology — 1; (24) Pol. Science — 1; (25) Sociology — 1; (26) Philosophy — 1; (27) Fine Arts — 1.

Junior Research Fellowships in Sciences and Humanities including Social Sciences: 177 candidates have been selected for award of Junior Research Fellowships of the value of Rs. 300 p.m. for research work in Sciences and Humanities including Social Sciences. Each fellowship also carries an annual contingency grant of Rs. 1,000. These fellowships are tenable for a period for three years. Subject-wise details of awards are: (1) Chemistry — 30; (2) Physios — 19; (3) Botany — 16; (4) Geology — 11; (5) Mathematics — 10; (6) Agriculture — 9; (7) Sanskrit — 8; (8) Hindi — 7; (9) Geography — 6; (10) Bio-Chemistry — 6; (11) Zoology — 6; (12) Archaeology — 5; (13) Philosophy — 6; (14) Pol. Science — 4; (15) English — 3; (16) Physiology — 3; (17) Vet. Science — 3; (18) Anthropology — 2; (19) Microbiology — 2; (20) Economics — 2; (21) Urdu — 2; (22) Persian — 2; (23) Linguistics — 2; (24) Psychology — 2; (25) Statistics — 1; (26) History — 1; (27) Sociology — 1; (28) Fine Arts — 1; (29) Comparative Literature — 1; (30) Bongali — 1; (31) Arabic — 1; (32) Tamil — 1; (33) Maithili — 1; (34) Malayalam — 1; (35) Education — 1; (36) Anthropology — 1.

Research Fellowships in Engineering & Technology: 47 candidates have been selected for award of fellowships of the value of Rs. 400 p.m. for research work in Engineering and Technological subjects in universities and approved institutions. These fellowships carry a contingency grant of Rs. 1,000 p.s. and are tensile for a period of two years with provision for extension by one year in special cases. Subject-wise details are: (1) Civil Engg.—10; (2) Electric Engg.—10; (3) Mechanical Engg.—8; (4) Electronic & Tele-Communication—6; (5) Pharmacy—6; (6) Applied Physics—2; (7) Ae onautical Engg.—2; (8) Glass Technology—1; (9) Ceramic Technology—1; (10) Plastics & Polymer Technology—1.

Utilization of services of retired teachers: With a view to enabling the universities and colleges to avail of the services of outstanding retired teachers towards teaching and research work, the University Grants Commission selected 21 teachers for first award during 1969-70. The award carries an honorarium of Rs. 6,000 p.a. and an annual contingency grant of Rs. 1,000. The details of persons selected during 1969-70 (first award) are: Sansterit: K. G. Goswami (Calcutta University); G. C. Jhala (St. Xavier's College, Bombay); Prakrit: Dr. J. C. Jain (Ramnarain Ruis College, Bombay); Hindi: P. V. Chalapateswara Rao (Pachaiyappa's College, Madras); R. G. Kulkarni (Mysore University); Linglish: Prof. C. P. K. Tharagan (Kerala University); Malayalam: P. U. Ulahannan Mappila (St. Berchman's College, Changanachery); Draweng & Painting: V. K. Shukla (Banasthali Vidyapith, Rajasthan); History: Dr. A. C. Banerjee (Jadavpur University); P. Mukherjee (Utkal University); Political Science: Dr. S. R. Sharma (Jiwaji University); Law: Prof. Hafeezul Rehman (A. M. U.): V. V. Deshpande (B. H. U.); Physics: Dr. M. W. Chiplonkar (Poona University); Chemistry: Dr. W. V. Bhagwar (Holkar Science College, Indore): Dr. P. B. R. Murthy (Andhra University); Dr. P. C. Rakshit (R. K. Mission College, Narendrapur);

Bio-Chemistry: Dr. S. C. Roy (Calcutta University); Botany: Dr. I. M. Rao (Sri Venkateswara University); Geology: Dr. S. Deb (Jadavpur University); Electrical Engineering: Prof. S. K. Chatterjee (Indian Institute of Science, Bangalore).

Financial assistance to teachers in Universities and Colleges for research/learned work in Sciences and Humanities including Social Sciences: The University Grants Commission sanctioned a total grant of Rs. 6,15,900 to 616 teachers during 1969-70 to enable them to obtain books, chemicals, apparatus etc. needed by them in connection with their research work.

UNESCO Prize Competition for Books

Collection .- During the month of Jan. 1980 the number of Collection working was 75, and the workers employed in them were 3,76,408 The average cash earnings of the workers per week for the whole of India was Rs. 50, 22 and the number of hours was 47.

STATISTICS OF WORKMEN'S COMPENSATION ACT

An annual note on the working of the Act is published regularly in the Indian Labour Journal.

The latest available statistics on the total number of cases and total compensation paid in Rs, respectively during 1964 to 1966 are as follows: 1964: 1,18,356; 1,62,18,246; 1965: 1,64,401; 1,87,29,122; 1966: 91,221; 1,93,48,172.

The following is the accident rate per thousand workers and the average compensation paid in Rs. in the main industry groups respectively during 1966: Factories 11.92; 150; Plantations 5.07; 530; Mines 80.21; 130; Railways 21.06; 235; Docks and Ports 40.99; 283; Tramways 59.22; 94; Posts & Telegraphs 1.13; 545; Building & Construction 6.43; 1,055; Municipalities 0.09; 2,560; Miscellaneous 17.89; 366; Average 17.72; 212.

STATISTICS OF INDUSTRIAL DISPUTES

Statistics presented in this section relate to industrial disputes which have resulted in work-stoppages involving 10 or more workers and exclude sympathetic and political strikes and closures not connected with industrial disputes, i.e., shortage of raw materials, breakdown of machinery etc.

The time losses in million man-days due to industrial disputes were 4.9 in 1961, 6.1 in 1962, 3.3 in 1963, 7.7 in 1964, 6.5 in 1965, 13.8 in 1966, 17.1 in 1967, 17.24 in 1968 and 16.68 (provisional) in 1969. Out of 16.68 million man-days lost in 1969, 1.83 million were in Central under takings and 14.85 million in State undertakings

There were 2,815 industrial disputes during 1967 as compared with 2,556 during 1966.

As compared with 1966, there was an increase of 23.8 per cent in time-loss due to industrial disputes in 1967. The time-loss was over 20 lakh man-days in July and over 10 lakh man-days in the remaining months except January and April 1967. The lowest time-loss was in January 1967 which was 9-73 lakh man-days.

Out of 2,815 disputes reported during 1967, lockouts were declared in 382 cases involving 1.51 lakh workers which accounted for a time-loss of 6.58 million man-days.

Analysis of the statistics by industries shows that the manufacturing division accounted for 72·3 per cent of the total time-loss during the year 1967. Among other sectors, mining and quarrying accounted for 9·5 per cent, transport and communication for 4·9 per cent, activities not adequately described for 4·5 per cent, electricity, gas, water and sanitary services 4·4 per cent, agriculture, forestry, fishing, etc. 2·1 per cent, construction 1·3 per cent, services 0·8 per cent and commerce 0·2 per cent. In the manufacturing sector, the highest time-loss was recorded by the group 'textiles' (23·8 per cent). As compared to the preceding year, the time-loss increased in all but three major industry groups, viz., 'agriculture, forestry, fishing, etc.', 'construction' and 'services'.

Classifying the disputes by causes, 'wages and allowances' accounted for 1,100 (39.9%) disputes followed by 'others' and 'personnel' which accounted for 680 (24.6%) and 477 (17.3%) cases respectively. Disputes relating to 'wages and allowances' and 'bonus' contributed together 57.9 per cent of the total number of disputes for which the relevant information was available and accounted for 57.9 per cent of the total number of workers involved and 55.5 per cent of the total time-loss.

From the point of view of employees, 33·3 per cent were successful, 15·8 per cent were partially successful and 34·7 per cent were unsuccessful. In 16·2 per cent of the disputes work was resumed without any final decision having been reached.

According to their duration, 26.2 per cent of the disputes lasted for a day or less; 29.0 per cent for upto 5 days; 13.8 per cent for 6 to 10 days; 12.2 per cent for 11 to 20 days; 6.5 per cent for 21 to 30 days and 12.3 per cent for more than 30 days.

Of the 2,453 terminated disputes during 1967, 1,005 were terminated as a result of Government intervention, 717 by mutual settlement, 704 by voluntary resumption and 48 by other methods of settlements. In case of 73 disputes, the method of settlement was not known.

The following table sets out the number of disputes in some of the years since 1965, the number of workers involved in these disputes and the total time-lost in mandays:

Year			Number of disputes	Number of work people involved	Number of man-days lost
1965	9.1		1,835	9.91.158	64,69,992
1966		9.0	2,556	14,10,056	1,38,46,329
1967	9.4	4 10	2,815	14,90,346	1,71,47,951

Number of disputes resulting in work-stoppage, workers involved and man-days lost respectively for the year 1967 (State-wise): Andhra Pradesh (107; 90,639; 9,22,344); Assam (86; 63,388; 2,09,094); Bihar (130; 2,04,028; 12,32,918); Gujarat (124; 30,487; 3,08,952); Haryana (28; 6,386; 70,502); Jammu & Kashmir (10; 2,305; 51,593); Kerala (280; 1,42,871; 23,18,452); Madhya Pradesh (156; 57,493; 3,46,708); Madras* (241; 1,16,690;

10,91,131); Maharashtra (721; 3,15,735; 22,01,519); Mysore (103; 37,251; 2,54,476); Orissa (24; 19,181; 1,25,644); Punjab (32; 24,326; 2,70,965); Rajasthan (44; 9,117; 62,724); Uttar Pradesh (183; 91,350; 15,25,943); West Bongal (457; 2,43,686; 59,24,743); Andaman & Nicobar Islands (8; 848; 4,396); Delhi (57; 10,553; 1,18,976); Goa (15; 21,242; 70,737); Himachal Pradesh (N.A.; N.A.); Manipur (—; —; —); Pondicherry (4; 1,848; 34,824); Tripura (5; 922; 1,310); Total (2,815; 14,90,346; 1,71,47,951).

WORKING JOURNALISTS' ACT

(See under article on the Press)

CERTAIN STATISTICS ON THE WORKING OF THE EMPLOYEES' PROVIDENT FUNDS ACT

No. of industries covered: 123 (upto 30-6-1969).

No. of covered establishments (both exempted and unexempted): 44,768 (as on 30-6-1969).

No. of subscribers: 53.76 lakhs (as on 30-6-1969).

Amount of Provident Fund contributions as on 30-6-1969 (both exempted and unexempted establishments):

- (i) Provident Fund Contributions collected: Rs. 1,391.40 crores.
- (ii) Amount paid as loans, advances, in final settlement of claims, etc.: Rs. 491.06 crores.
- (iii) Amount invested in Government Securities: Rs. 917-83 crores.

Total contribution during 1968-69: Rs. 202-09 crores against Rs. 174-99 crores in 1967-68.

No. of unexempted establishments covered under the Act up to the end of June, 1969: 42,792; No. of subscribers in such establishments: Over 34,43,188; total accumulations of provident fund in such establishments: Rs. 630.58 orores; Amount of provident fund invested in such establishments: Rs. 461.83 crores.

Rate of interest at present on members' contributions: 5½ per cent (for 1969-70).

The provident fund contributions are at present invested 50 per cent in Central Government Securities and Small Savings and 50 per cent in State Govt. Securities and other Govt. Guaranteed Securities. The interest received on investments till 30-6-69 amounted to Rs. 84 84 crores.

The number of establishments covered on a voluntary basis rose from 1,265 to 1,282 upto 31-3-1969.

PLANTATION STATISTICS

The total No. of estates/plantations covered by the Act and average daily labour employed in various States/Union Territories during 1967.

Assam (674; 4,65,326); Bihar (13; 481); Kerala (402; 1,10,675); Mysore (652; 20,078†); Tamil Nadu (301; 72,056); Uttar Pradesh (12; 977); West Bengal (272; 1,61,996); Himachal Pradesh (16; 1,139); Tripura (45; 3,115); Andaman & Nicobar Islands (1; 155); Total 2,388; 8,35,098.

STATISTICS UNDER SHOPS AND COMMERCIAL ESTABLISHMENTS ACT

The number of shops and commercial establishments and the number of persons employed by States for 1966 respectively are given below:

Andhra Pradesh (1,35,234; 1,45,618); Assam (14,221; 20,505); Bihar (38,185; 33,060); Gujarat (1,78,593; 1,91,326); Haryana (58,726; 29,070); Jammu & Kashmir

LABOUR

(6,877; 7,207); Kerala (44,480; 79,324); Madhya Pradesh (92,004; 65,863); Tamil Nadu (1,87,164; 2,27,358); Maharashtra (3,14,706; 6,01,882); Mysore (1,14,842; 1,38,332); Orissa (7,407; 29,748); Punjab (1,33,224; 86,162); Rajasthan* (1,59,363; 86,024); Uttar Pradesh (2,26,337; 2,26,632); West Bengal (1,87,271; 3,35,132); Andaman & Nicobar Islands (407; 638); Delhi (1,09,312; 1,98,220); Himachal Pradesh (8,004; 4,056); Manipur (1,628; 4,050); Pondicherry (3,394; 8,304); Tripura (1,447; 2,427); Total (20,22,826; 25,20,938).

WAGES

Central Wage Boards were set up for eight industries—cotton, cement, jute, coffee plantations, tea plantations, rubber plantations, sugar, iron-ore, limestone and dolomite mining industries. All the eight Boards have made their reports.

The Central Wage Board for Heavy Chemicals and Fertilizers Industry set up by the Government in April 1965 has made recommendations for the grant of interim relief to the workers in the units covered by it. The recommendations which are effective from 1st November 1966 have been accepted by the Government.

The second Central Wage Board for the cotton textile industry in India has submitted its report to the Government of India on 31st December 1968. The majority report was accepted by the Government of India on 17th May 1969.

EKI X

The function of a Wage Board is to fix a wage structure on the principle of fair wages.

A steering group consisting of representatives of Government, employers and workers is engaged in drawing up a wage map of India both industry-wise and region-wise to serve as a guide for authorities who have to fix wages.

Average per capita annual earnings in Rs. in States of factory employees drawing less than Rs. 400 per month for the years 1965 and 1966 respectively are as follows: Andhra Pradesh (1,261; 1,457); Assam (1,861; 2,130); Bihar (1,967; 2,050); Gujarat (2,136; 2,340); Haryana (—; 1,712); Jammu & Kashmir (751; 978); Kerala (1,402; 1,700); Madras (1,897; 2,083); Madhya Pradesh (1,828; 2,118); Maharashtra (2,242; 2,477); Mysore (1,944; 1,840); Orissa (1,881; 2,001); Punjab (1,560; 1,636); Rajasthan (1,581; 1,368); Uttar Pradesh (1,700; 1,825); West Bengal (1,867; 2,024); Andaman & Nicobar Islands (1,439; 1,621); Delhi (2,193; 2,321); Himachal Pradesh (1,109; N.R.); Tripura (1,336; 1,271); Gos (—; 2,105); All-India Average (1,948; 2,118).

DEARNESS ALLOWANCE

The scale of the allowance varies not only from centre to centre and industry to industry, but also, except where these matters are adjudicated upon, from unit to unit in the same industry at the same centre.

Several Adjudicators have granted dearness allowance either at the Bombay Millowners' Association scale which was Rs. 189.05 in December 1969 or at a percentage, varying from 66% per cent to 85 per cent, of that scale. The rate of dearness allowance payable to Bombay City cotton mill workers itself was increased by a decision of the Labour Appellate Tribunal by 5 per cent when the Bombay Cost of Living Index Number is between 326 and

335; by 7½ per cent when it is between 336 and 350; and by 10 per cent when it is above 350. The enhanced rate was given retrospective effect from May 1953; the average dearness allowance for a month of 26 working days comes to Rs. 179.48 for 1968.

COST OF LIVING

On the basis of the results of the fresh family living surveys conducted during 1958-59, new series of consumer price index numbers for industrial workers are now being compiled for 46 out of 50 centres selected for the purpose by the Labour Bureau. It was decided by the Technical Advisory Committee to adopt the Calendar year 1960 as the base period for all these new series of index numbers.

^{*} Figures are for 1965.

Labour Bureau, Simla has published new series of Consumer Price Index Numbers for industrial workers in all the centres except Tamil Nadu: Factory Centre — Madras, Madurai and Coimbatore and Plantation Centre — Coonoor.

Since August 1968, the Labour Bureau started publishing the All India Average Consumer Price Index Numbers for Industrial Workers with the base 1960 = 100, simul-

taneously discontinuing the Interim Series with the base 1949 = 100.

The Labour Bureau is conducting fresh Family Living Surveys during 1969-70 among industrial workers at 60 different factory, mines and plantation centres in India. The results of these surveys would be utilised to construct new series of Consumer Price Index Numbers with a new base year 1969-70 or 1970 equal to 100.

The following tables show the Consumer Price Index Numbers for Working Class for some of the important centres worked out (with base 1960 = 100) from the year 1966, although actual introduction of the new series for various centres took place at later periods.

EMPLOYMENT AND TRAINING National Employment Service

The National Employment Service, which was initially set up with the limited objective of registration and placement of employment seekers now provides necessary base for man-power, planning, and development of human resources.

Employment Exchanges

The number of Employment Exchanges functioning at the end of August, 1969 was 412 which includes 15 Professional and Executive Employment Offices and 9 Special Employment Exchanges for Physically Handicapped. In addition 44 University Employment Information and Guidance Bureaux were also functioning.

At the end of August, 1969, there were 33,79,287 applicants on the live register of employment exchanges. The number of registrations effected by the employment exchanges during the one year period from September, 1968 to August, 1969 was 40,81,979. During the same period 7-18 lakh vacancies were notified to the employment exchanges and 4-33 lakh placements were effected as against 7-05 lakhs and 4-14 lakhs respectively during September, 1967 to August, 1968.

LABOUR 303

At the end of August, 1969, 4,21,347 women employment seekers were on the live register of employment exchanges. During the year September, 1968 to August, 1969, 48,048 women applicants were placed in jobs.

At the end of 1968, there were 56,700 unemployed ongineers of whom 10,000 were graduates and 46,700 diploma holders. India is expected to have 100,000 jobless engineers by the end of 1973-74.

Vocational Guidance & Employment Counselling

Employment Exchanges and University Employment Information and Guidance Bureaux are the main agencies of the National Emp. Service through which vocational guidance and employment counselling service are rendered. At present there are 180 employment exchanges and 44 University Employment Information and Guidance Bureaux where special vocational guidance and employment counselling facilities are made available to employment seekers, students and alumni.

Occupational Research & Analysis Programme

The Occupational Research and Analysis Programme of the National Emp. Service consists of various tasks of identifying, cataloguing and coding of occupations, in the form of National Classification of Occupations. In addition, the Director General of Employment and Training also publishes different types of occupational information literature such as, Hand-books on Training facilities, Guides to career on individual and group of occupations etc. This literature is useful for students, employment seekors, parents, career masters and teacher counsellors.

Employment of Handicapped

Special Employment Offices for the Physically handicapped are at present functioning at Bombay, Delhi, Madras, Hyderabad, Calcutta, Kanpur, Bangalore, Ahmedabad and Chandigarh.

TRAINING OF CRAFTSMEN

At the end of the Third Five Year Plan the number of Institutes/Centres functioning under the Craftsmen Training Scheme was 357 and the total training places were 1,13,622. During the year 1966-67, 31,322 additional seats were sanctioned and during 1967-68 the number of additional seats sanctioned was 7,338. Thus during the Annual Plans 1966-69 the total number of additional seats sanctioned was 38,660. The total number of training places available on 30th September, 1969 was 1,54,802 in 367 institutes.

Training of Craft Instructors

The scheme for the training of Craft Instructors has been designed to improve the efficiency of the Instructors both in the public and private institutions with a view to meeting the increasing demands of the country. The Government of India in the Department of Labour and Employment have set up 7 Central Training Institutes for Instructors, one of which meant exclusively for women is functioning in New Delhi while the other 6 are located at Calcutta, Bombay, Kanpur, Madras, Hyderabad and Ludhiana. The total training places at these Institutes is 1,198. Training is imparted in 19 engineering and 4 non-engineering trades and the duration of training is one year. These Institutes provide instruction in the theoretical aspects of the various trades and also impart practical instruction in the latest techniques of workshop practice.

Apprenticeship Act, 1961

Statistics: 195 industries and 50 trades have been covered under this Act upto the end of the year 1969. More industries and trades will be brought under the purview of this Act, as and when necessary.

About 37,000 registered apprentices were undergoing apprenticeship training in various establishments, both in the public and private sectors, in July, 1969. This number is proposed to be increased to 75,000 by the end of the 4th Plan period to meet the need of skilled workers for all types of industries and trades specific to each type of industry.

The Government of India have entered into an agreement with the UNDP (Special Fund) Project, in accordance with which, for 5 years from September, 1968, assistance will be rendered by the Special Fund in the implementation of the Apprentices Act, 1961, by way of preparation of teaching aids/materials, technical units/equipment, and fellowships for national counterparts of ILO Experts.

The Special Fund allocation is U.S. \$ 1,102,100 and the Govts', counterpart contribution in kind, is estimated at U.S. \$ 6,063,270. The executing agency for the Project is the U.O.

Four Regional Directorates of Apprenticeship have been set up earlier in 1968, at Kanpur, Calcutta, Bombay and Madras, for the implementation in the Central sphere, of the Act. Each State Govt. has its own organisation and State Apprenticeship Adviser for implementation of the Act in the State Sector.

Training-Cum-Orientation Course

Under the scheme, special instructions in business management are given to the selected trainees in the I.T Is., under the Craftsmen Training Scheme. In view of the transfer of the Craftsmen Training Scheme to the State Sector with effect from let April, 1969, all the State Governments have been requested to introduce this Course in the Industrial Training Institutes on a pilot basis.

New Institutes:—(1) Advanced Training Institute, Madras: Set up with assistance from the United Nations Development Programme (Special Fund) for the training of highly skilled (Master Craftsmen) with a scating capacity of 162.

- (2) Staff Training and Research Institute, Calcutta; Set up with collaboration of the Federal Republic of Germany, for the purpose of (a) providing training to Officers and Staff and (b) Conducting research in training techniques. The most important work of this institute is research in training techniques.
- (3) Foremen Training Institute, Bangalore: Set up with collaboration of the Federal Republic of Germany with a scating capacity of 200 to start with, for training of Foremen (Meister).

EMPLOYMENT IN FOREIGN COMPANIES

The position in regard to employment of Indians and non-Indians on salaries of Rs. 2,000 and above in foreign-owned/controlled concerns on the 1st of January each year was as follows:—

Year			Indians	Foreigners*	Total
1965			4,585	2,590	7,175
1966			5,198	2,355	7,553
1967	4.4	2.4	6,151	2,080	8,231
1968	4.4	4.1	7,046	1,751	8,797 9,346
1969	. 4.9	= 5	7,802	1,544	\$,040

Salary-group Rs. 2,001 to Rs. 3,000: The number of Indians increased from 4,410 on Jan. 1, 1968 to 4,662 on Jan. 1, 1969 and that of non-Indians fell from 196 to 173.

Salary-group Rs. 3,001 to Rs. 5,000: The number of Indians increased from 2,161 on Jan. 1, 1968 to 2,537 on Jan. 1, 1969 and that of non-Indians declined from 528 to 425.

[·] Excluding short-term foreign technicians.

EMPLOYEES' STATE INSURANCE CORPORATION

Headquarters Office:—ESIC Building, Kotla Road, New Delhi.

Regional Offices: See under Deptt. of Social Welfare in 'Govt. of India Personnel'.

The Employees' State Insurance Act applies to all non-seasonal factories using power wherein 20 or more persons work for wages. All employees employed on a remuneration not exceeding Rs. 500 per month, are covered by this Act.

The scheme at present provides for medical care for the insured persons and in most of the areas for their families also. It also provides for sickness, maternity, disablement, dependents and funeral benefit in cash.

The scheme covered an additional number of about 57,900 employees and about 74,800 family (insured person) units during 1968-69. A sum of Rs. 15,50,49,922 was disbursed by way of cash benefit during 1968-69.

The Employees' State Insurance Scheme covers about 37,76,500 insured persons working in 313 centres (as on March 31, 1969).

The total number of beneficiaries entitled to medical benefit is estimated at about 1,40,69,900 including the members of families of workers (as on March 31, 1969). Upto October, 1969, 3.77 million insured persons were covered under the scheme. The total number of beneficiaries including insured persons was over 14.6 million.

The scheme is in force in all the States except Jammu & Kashmir.

Hospitals/Annexes/Dispensaries:—The Corporation has so far constructed and put into use 31 full-fledged Employees' State Insurance Hospitals with 5,239 beds, 20 Employees' State Insurance Annexes with 476 beds and 123 State Insurance Dispensaries. Besides this the E.S.I.

Corporation has reserved 3,698 beds in State Govt. and other hospitals. Out of these 1,609 are general and maternity beds and the balance 2,089 T.B. beds.

So far the Corporation has sanctioned Rs. 36.84 crores for capital project all over the country.

Employers' Special Contribution to the Corporation: Rs. 18,42,65,198; Employees' Contribution Rs. 13,96,81,277.

Budget Estimates for 1967-68: Receipts: Rs. 28,65,86,500; Payments: Rs. 26,63,32,500; Surplus: Rs. 2,54,000.

Amounts (Rs.) distributed under some heads for 1968-69 are as shown in next page.

ACCIDENTS

The Indian Factories Act requires the manager to report all accidents which cause death or boddly injury whereby the person injured is prevented from returning to his work in the factory during the 48 hours next after the occurrence of the accident.

It is the duty of the Inspector of Factories to make an investigation as soon as possible into the causes of and the responsibility for a fatal or serious accident, and to take steps for the prosecution of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act.

The Department of Mines has been strengthened to facilitate more frequent inspection of mines. As an emergency measure, the Coal Mines (Temporary) Regulations, 1955 have been promulgated for the prevention of apprehended danger and for the speedy remedy of the conditions likely to cause danger. The entire codes of coal and non-coal mines regulations are being revised to provide for more comprehensive measures for safety in mines.

Amounts of benefits in Rs. distributed under certain heads in 1968-69

WORKERS' EDUCATION SCHEME

A semi-autonomous body called the Central Board for Workers' Education consisting of the representatives of Government, employers, workers and educational institutions has been set up for carrying on workers' education. The Board is invested with full authority for the framing and execution of the programmes in cooperation with trade unions, educational institutions, etc. The Board gives grants-in-aid to unions and other institutions for undertaking programmes of workers' education.

The Board has so far opened 30 Regional and 49 Sub-Regional Workers' Education ('entres in different parts of the country. Of the 49 Sub-Regional Centres, six have since been converted into full-fledged Centres.

The object of the Scheme is to create over a period of time, despite lack of general education, a well-informed, constructive and responsible minded industrial labour force capable of organizing and running trade unions on sound lines without leaning heavily on outsiders and without lending themselves to exploitation by extraneous interests.

During Jan. 1969, 71 new unit level classes were started under different regional centres all over India, in addition to 2,938 classes which were in existence by the end of provious month. The number of workers already trained and those undergoing training at the end of Jan. 1969 were 7, 13,248 and 39,876 respectively. The over-all number of workers trained under the Scheme at the end of Jan. 1969 stood at 8,33,589 including worker-teachers, those trained under the short-term training programmes and 10,059 workers trained by grantees.

COAL MINES LABOUR WELFARE FUND

Object: To finance the measures for promoting the welfare of labour employed in the coal mining industry. The Fund is administered by the Central Govt. on the advice of an Advisory Committee consisting of Government Officers and equal number of members representing colliery owners and workers employed in the Coal Mining Industry with at least one woman.

The main source of income to the Fund is a cess levied on all coal and coke despatched from collieries by rail and road. The cess is being levied at the rate of 49.21 paise per metric tonne. The income of the Fund which was Rs. 354 lakhs during 1965-86 was expected to be Rs. 400 lakhs during 1966-67.

MICA MINES LABOUR WELFARE FUND

The Mica Mines Labour Welfare Fund Act, 1946, which was designed to constitute a similar fund for the benefit of mica mine workers, provides for the levy of an advalorem duty not exceeding 64 per cent on all mica experted from India. The present rate is however 2½ per cent advalorem. The collections are allocated for expenditure of veltare measures among the various mica mining areas (viz. Bihar. Andhra Pradesh and Rajusthan) in proportion to their average production. The present rate of allocation for Bihar is 47.3 per cent. The annual recurring expenditure on welfare measures already introduced in Bihar is to the tune of Rs. 28 lakhs and the annual meome of the Fund is about Rs. 30 lakhs. The accumulated balance to the credit of Bihar is about Rs. 175 lakhs.

[•] Includes 268 killed in Dhori disaster. † Provisional.

MINIMUM WAGES

Minimum wages for agricultural workers have been fixed in all the States and 3 Union Territories (viz., Delhi, Himachal Pradesh and Tripura) and also by the Central Govt. in certain agricultural farms/research institutes, military farms and depots and archaeological gardens. In two States, i.e. Maharashtra and Tamil Nadu, the minimum wages have been fixed for a part of the State. In the remaining States, the rates fixed are applicable in the whole of the State.

Consumer Price Index numbers for agricultural Labour on base 1960-61 (July-June) = 100 from Sept. 1964 onwards are being published by the Labour Bureau, Ministry of Labour, Employment and Rehabilitation, Govt. of India for 15 States, or group of States together with all India figures, regularly every month in the Indian Labour Journal.

National Commission on Labour

The Government of India appointed in December 1966 the National Commission on Labour under the chairman-ship of Shri P. B. Gajendragadkar, former Chief Justice of India, to review, among other matters, the existing legislative and other provisions intended to protect the interests of labour, to assess their working and to advise, inter-alia, how far these provisions serve to implement, in the field of labour, the Directive Principles of State Policy embodied in the Constitution. The Commission's report was submitted to Government on August 28, 1969.

Code of Discipline

The Code of Discipline lays down certain do's and don'to both for managements and unions with a view to ensuring better discipline in industry. The Code applies to both the public and the private sectors.

More details were given in the 1968 Directory.

During the period January-September, 1969, the Central Implementation and Evaluation Division received 395 complaints of alleged breaches of the Code of Discipline and of the Industrial Truce Resolution in the Central sphere. Of these, 118 did not require any specific action as they had already been reported to other organisations and were referred to the Division only for information or pertained to cases which were subjudice or did not involve any union. Of the remaining 277 cases, 12 were not substantiated on enquiry; in 35 the parties were brought together and mutual settlements reached; in 59 the infringements were either got rectified or the parties were advised to avoid them in future; the remaining 171 cases have been taken up with the parties concerned for rectification or were under investigation.

Voluntary Arbitration

Settlement of disputes by voluntary arbitration is advocated both by the Code of Discipline and the Industrial Truce Resolution. During January-September 1969 employers and workers agreed to settle their disputes through voluntary arbitration in 48 out of 723 cases in the Central sphere in which conciliation had failed. In order to ensure that employers and workers take greater recourse to this voluntary approach, a National Arbitration Promotion Board was set up in July 1967 under the chairmanship of the Additional Secretary in the Department of Labour and Employment. The Board has, besides the Chairman, representatives of Govt., the central organisations of employers and workers and the public sector undertakings.

Evaluation Studies

Besides looking after the implementation of the Code of Discipline and the Industrial Truce Resolution, the Central Implementation and Evaluation Division in the Union Ministry of Labour, Employment and Rehabilitation has been regularly conducting evaluation studies into the industrial relations and implementation of labour laws, etc., in both public and private sector undertakings.

The case studies in the following undertakings were completed during 1969:—(i) Fertiliser Corporation of India Ltd., Trombay Unit; (ii) Surgical Instruments Ltd., Madras; (iii) Bharat Earth Movers Ltd., Bangalore; (iv) Hindustan Machine Tools, Kalamassery; (v) Tata Iron and Steel Company Ltd., Jamshedpur and (vi) Bararee and Jealgora Colliery, Dhanbad.

JOINT MANAGEMENT COUNCILS

As of 30th September 1969, Joint Management Councils were functioning in 87 establishments 33 in the Public Sector and 54 in the Private Sector. These include manufacturing, mining, plantations and banking industries. The National Commission on Labour has recommended the following:—

"When the system of Union recognition becomes an accepted practice, managements and unions will be willing to extend cooperation in matters they consider to be of mutual advantage and set up a Joint Management Council. In the meanwhile, whenever the management and the recognised trade union in a unit so desire, they can by agreement enhance the powers and scope of the works committee to ensure a greater degree of consultation/cooperation. The functions of the two in this latter situation can as well be amalgamated."

TRIPARTITE LABOUR MACHINERY

The Tripartite Labour Machinery at the Centre consists of (a) Indian Labour Conference, (b) Standing Labour Committee and (c) Industrial and other Committees. There is also the Labour Ministers' Conference, which though not tripartite in character, is closely associated with the tripartite labour machinery.

The Indian Labour Conference and the Standing Labour Committee advise the Government of India on all labour matters referred to it.

The Industrial Committees have been set up to consider the problems peculiar to individual industries and make suitable recommendations. The Tripartite Committee on Conventions considers questions relating to the implementation of I.L.O. Conventions and Recommendations.

LABOUR ADMINISTRATION

Apart from the main Secretariat of the Ministry of Labour it has several attached and subordinate offices. The activities of some of these have been described in the relevant sections, such as Miners' Welfare Fund, and notes on some others are briefly given below.

Chief Labour Commissioner

In the Ministry of Labour, Employment and Rehabilitation, the Chief Labour Commissioner is responsible for prevention and settlement of industrial disputes, enforcement of labour laws, promotion of labour welfare and maintenance of healthy relations in the undertakings falling in the Central sphere and verification of membership of trade unions. The Indian Institute of Labour Studies has also been set up under him for imparting specialised training to the officers of the industrial relations machinery at the Centre and in the States. There are four Deputy (hief Labour Commissioners, one Welfare Adviser, one Deputy Director, one Administrative Officer and eleven Regional Labour Commissioners working under him besides the

faculty staff in the above institute which consists of one Director, two Deputy Directors and four Assistant Directors.

DIRECTORATE GENERAL OF FACTORY ADVICE SERVICE AND LABOUR INSTITUTES

The Directorate-General, Factory Advice Service and Labour Institutes is concerned with the safety, health and welfare of workers in factories, research in occupational diseases and industrial Hygiene, Productivity, Techniques, staff training, industrial physiology and industrial psychology. The Directorate General has under it the Central Labour Institute at Bombay and Regional Labour Institutes at Kanpur, Calcutta and Madras. Each Regional Institute is under a Regional Director. The Directorate General is also the administering authority for the Indian Dock Labourers Act, 1934, the Indian Dock Labourers Regulations 1948 and the Dock Workers (Safety, Health and Welfare) Scheme, 1961.

EMPLOYMENT FOR HANDICAPPED

Special Employment offices for the physically handicapped are at present functioning at Bombay, Delhi, Madras, Hyderabad, Calcutta, Kanpur, Bangalore, Ahmedabad and Jullundur.

VOCATIONAL REHABILITATION CENTRES FOR PHYSICALLY HANDICAPPED

Two Vocational Rehabilitation Centres for the Physically Handicapped one each at Bombay and Hyderabad have been set up with the assistance of Social and Rehabilitation services, Department of Health, Education and Welfare of U.S.A., for the vocational evaluation and adjustment of Physically Handicapped persons.

INDIA AND THE LLO.

India joined this organisation at the very start and since 1922 has been one of the ten countries of chief industrial importance and as such has been allotted a permanent seat on the Governing Body of the Organization, India also contributes liberally towards the finances of the Organisation. For 1969 India's contribution amounts to U.S. \$7,37,173 which is 2.77 per cent of the total contribution of all member States, as against United States' \$66,53,184 for 1968 which is 25 per cent of the total contribution of all member States. India's share in the appointments of the office is, however, somewhat inadequate.

India has been the venue of two Asian Regional Conferences, the first in 1947 and the fourth in 1957,

India has been receiving technical assistance from the I.L.O. in the spheres of manpower, vocational training, Rural Employment Promotion, Productivity, and so on and experts from India have been recruited by the I.L.O. for assignments in other underdeveloped countries in such subjects as Cooperation, Cottage Industries and Employment Information.

Out of 130 Conventions adopted by the International Labour Conference, India has so far ratified 30 Conventions. She has in addition incorporated into her national legislation the essential features of many other Conventions.

BONUS

The Rajya Sabha passed on February 26, 1969 the Payment of Bonus (Amendment) Bill, 1969, which seeks to replace an ordinance issued on January 10, 1969 in regard to the parent Act of 1965. The Bill has been passed to carry out the Governments' intention that the available surplus under section V of the Act should be so computed that the amount of tax rebate accruing to the employers on account of bonus paid or payable under the Act, become a part of the available surplus of the succeeding year instead of the same going entirely to the employer.

INDUSTRIAL PRODUCTION 1969*

INDUSTRIAL MACHINERY

Sugar Mill Machinery: No. of units 16; Production in Rs. lakhs 1,200 (1,159); Cement Mill Machinery: No. of units 10; Production in Rs. lakhs 1,000 (817.58); Boiler (Industrial Power): No. of units 13; Production in Rs. lakhs 2,200 (1,980.50); Conveyors & Wagon Tiplers: No. of units 18; Production in Rs. lakhs 600 (591.64); Drilling Machinery: No. of units 10; Production in Rs. lakhs 160 (136.79); Reduction Gear: No. of units 13 (14); Production in Rs. lakhs 370 (264.94); Gas Cylinders (L. P.): No. of units 6 (4); Production in Rs. lakhs 390 (292-32); Printing Machinery: No. of units 5; Production in Rs. lakhs 24 (10.27); Chemical & Pharmaceutical Machinery: No. of units 46; Production in Rs. lakhs 1,300 (1,100); Paper & Pulp Machinery: No. of units 12 (13); Production in Rs. lakhs 360 (271); Mining Machinery: No. of units 9; Production in Rs. lakhs 1,250 (299); Steel Plant Equipment: No. of units 2; 700† (1,020††); Metallurgical Machinery: No. of units 10; Production in Rs. lakhs 175 (135); Construction Machinery: No. of units 17; Production in Rs. lakhs 90 (104.58); Rayon Machinery: No. of units 3 (1); Production in Rs. lakhs 85 (58.48); Bread Plant & Bread making Machinery: No. of units 1; Production in Rs. lakhs: Nil (9.62); Tea

Processing Machinery: No. of units 6; Production in Rs. lakhs 135 (178); Weighing Machinery: No. of units 4; Production in Rs. lakhs 160 (165); Modern Rice Mills: No. of units 3 (1); Production in Rs. lakhs 25 (10.28); Pesticide Equipment, Agricultural Sprayers and dusters: No. of units 3; Production in Rs. lakhs 220 (219); Dairy Machinery: No. of units 3; Production in Rs. lakha 122 (93); Asbestos Cement Production Plants: No. of units 1; Production in Rs. lakhs 50 (47); Industrial Filteration Equipment including centrifuges: No. of units 5; Production in Rs. lakhs 128 (74); Industrial Screens: No. of units 6 (5); Production in Rs. lakhs 87 (40); Electroplating Equipment: No. of units 2; Production in Rs. lakhs 43 (33); Feed Millplants: No. of units 1; Production in Rs. lakhs 37 (62); Book Processing Equipment including Bottling Machinery: No. of units 7 (6); Production in Rs. lakhs 23 (11); Rubber Machinery: No. of units 2; Production in Rs. lakhs 24 (17); Coil Winding & Impregnating & Coating Plants : No. of units 1 ; Production in Rs. lakhs 23 (21); Oil & Gas Firing Equipment: No. of units 5; Production in Rs. lakhs 23 (16); Industrial Drycleaning & Laundry Machinery : No. of units 1 ; Production in Rs. lakhs 57 (40); Ceramics Machinery: No. of units 1; Production in Rs. lakhs 8 (8); Paint & Varnish Machinery: No. of units 4; Production in Rs. lakha 11.

• Note: Against Production, the figures within brackets indicate production for 1968. Regarding the No. of units, it is generally the same for 1968 and 1969. Any difference is indicated by the figures in brackets which relate to the year 1968. Source: 1969-70 Report of the Ministry of Industrial Davelopment, Internal Trade and Company affairs, Govt. of India.

† This is only for steel plant equipment. Production in Rs. iakhs.

TOOLS AND ABRASIVES

Machine Tools: No. of units 72 (70); Production in Rs. lakhs 1,954 (1.721.56); Machine Tools Accessories; No. of units 14; Production in Rs. lakhs 97 (82-34); Wood Working Machines: No. of units 4; Production in Rs. lakhs 10.80 (5.92); Portable Tools: No. of units 7; Production in Rs. lakhs 159.68 (125.93); Other Metal Forming Machineries: No. of units 5 (4); Production in Rs. lakhs 70.90 (47.92); Plastic Working Machines; No. of units 3; Production in Rs. lakhs 124.20 (87.03); Furnances: No. of units 14; Production in Rs. lakhs 335.75 (307.32); Gas Welding & Cutting Equipment: No. of units 3 (2); Production in Rs. lakhs 75.28 (81.60); Electric Welding: No. of units 2; Production in Rs. lakhs 67.64 (56.95); Other (Rerolling Plant etc.): No. of units 4; Production in Rs. lakhs 52.20 (42.33); Grinding Wheels: No. of units 4; Production in Kgs. 41,54,576 (37,30,276); Coated Abrasives: No. of units 3; Production in reams 1,46,065 (1,47,057); Steel Files: No. of units 6; Production in '000 Nos. 13,004 (12,220.8); Twist Drills: No. of units 7 (6); Production in '000 Nos. 10,378 (8,462.9); Reamers: No. of units 14 (10); Production in Nos. 2,07,564 (2,03,262); Threading Tools: No. of units 10 (9); Production in Nos. 18,23,168 (21,87,213); Milling Cutters: No. of units 16 (13); Production in Nos. 2,84,500 (2,54,498); Bandsaw Blades (Wood): No. of units 5; Production in RM 7,38,576 (7,56,185); Bandsaw Blades (Metal): No. of units 4; Production in RM 10,94,584 (8,79,125); Hacksaw Blades: No. of units 5; Production in '000 Nos. 29,837-2 (30,790.7); Tungstan Carbide (s): No. of units 5; Production in Kgs. 1,08,928 (60,932); Lathe Tools (Tool Bits): No. of units 10 (8); Production in Nos. 8, 34,928 (7,38,469); Diamond Drill Bits: No. of units 5 (4); Production in Nos. 14,005 (15,262); Tungstan Carbide Tipped Tools: No. of units 7; Production in Nos. 5,22,400 (5,61,323); Broaches: No. of units 1; Production in Nos. 2,765 (1,576); Measuring Tapes: No. of units 2; Production in Nos. 17,74,164 (10,76,508); Industrial Knives: No. of units 5 (3); Production in Nos. 1,53,324 (89,837); Forged Hand Tools: No. of units 9 (8); Production in Rs. lakhs 426,36 (312.68); Micrometers: No. of units 1; Production in Nos. 8,772 (10,097); Hand Saws: No. of units 2; Production in Nos. 1,11,140 (1,30,664).

AUTOMOBILE AND ANCILLARIES

Automobiles:

(a) Commercial Vehicles: No. of units 6; Production in Nos. 40,000 (35,947); (b) Jeeps: No. of units 1; Production in Nos. 9,000 (7, 790); (c) Care: No. of units 3; Production in Nos. 36,000 (35,799).

Motor Cycles & Scooters, etc :

(a) Motor Cycles: No. of units 3; Production in Nos. 35,000 (31,164); (b) Three Wheelers: No. of units 3; Production in Nos. 5,250 (4,727); Scooters: No. of units 3; Production in Nos. 52,250 (39,609); (d) Mopeds: No. of units 4; Production in Nos. 10,000 (9,104).

Fuel Injection Equipment:

(a) Nozzles: No. of units 3; Production in Nos. 11,00,000 (10,48,690); Nozzle Holders: No. of units 3; Production in Nos. 6,60,000 (5,44,317); Elements: No. of units 4; Production in Nos. 12,00,000 (11,40,699); Delivery Valves: No. of units 3; Production in Nos. 12,00,000 (10,11,288); Single Cylinder Pumps: No. of units 3; Production in Nos. 4,00,000 (3,27,599); Multi-Cylinder Pumps: No. of units 1; Production in Nos. 55,000 (49,076); (b) Filter (Oil, Air, Fuel): No. of units 5; Production in Nos. 2,20,000 (2,13,737); Filter Inserts: No. of units 4; Production in Nos. 10,00,000 (9,41,121); (c) Thin Walled

Bearing: No. of units 3; Production in Nos. 75,00,000 (71,45,689); (d) Radiators: No. of units 6; Production in Nos. 95,000 (86,386); (e) Dynamos; No. of units 4; Production in Nos. 1,20,000 (1,14,997); (f) Starter Motors; No. of units 4: Pr duction in Nos. 1,15,000 (1,02,385); (g) Electric Horns: No. of units 6; Production in Nos. 2,25,000 (2,15,895); (h) Dash Board Instruments: No. of units 2; Production in Rs. lakhs 165 (157.72); (i) Gaskets: No. of units 3: Production in No. 5,25,00,000 (5,15,35,880) (j) Wheels & Rims: No. of units 2; Production in Nos. 6,00,000 (5,84,322); (k) Engine Valves: No. of units 4; Production in Nos. 40,00,000 (37,25,128); (l) Oil Seals; No. of units 7; Production in Nos. 60,00,000 (56,71,313); (m) Piston Rings: No. of units 3; Production in Nos. 1,40,00,000 (1,33,88,522); (n) Pistons: No. of units 4: Production in Nos. 18,00,000 (16,71,426); (o) Cylinder Linere: No. of units 3; Production in Nos. 2,50,000 (2,42,885); (p) Shock Absorbers: No. of units 6; Production in Nos. 10,00,000 (8,95,076); (q) Clutch Facings: No. of units 3; Production in M. Tons 140,000 (127,058); (r) Brake Linings: No. of units 5; Production in M. Tona 1800.000 (1740.514); (6) Clutch Assembly: No. of units 1; Production in Nos. 1,40,000 (1,28,067); (t) Spark Plugs: No. of units 2; Production in Nos. 20,00,000 (18,25,609); (u) Tie Rod Ends: No. of units 2; Production in Nos. 5.00,000 (4,74,358); (v) Taxi Meters: No. of units 1; Production in Nos. 1,500 (1,108); (w) Propeller Shafts: No. of units 1; Production in Nos. 75,000 (72,566); (x) Fly Wheel Ring Gears: No. of units 1; Production in Nos. 65,000 (59,013); (y) Carburettors: No. of units 3; Production in Nos. 40,000 (39,645); (z) Wiper Motors: No. of units 2; Production in Nos. 1,00,000 (95,416); Wiper Arms & Blades: No. of units 1; Production in Nos. 4,50,000 (4,43,479).

LIGHT ELECTRICAL ENGINEERING INDUSTRIES

G. L. S. Lamps: No. of units 10 (8); Production in Million Nos. 94 (84.51); Fluorescent Tubes: No. of units 7 (6); Production in Million Nos. 9.50 (7.69); Miniature Lamps: No. of units 6 (5); Production in Million Nos. 36 (27.44); Riectric Fans: No. of units 16 (15); Production in Nos. 15,00,000 (14,66,339); Storage Batteries: No. of units 6; Production in Nos. 10,40,000 (8,70,472); Dry Batteries: No. of units 6 (4); Production in Million cells 460 (408.54); Domestic Refrigerators: No. of units 6 (5); Production in Nos. 50,000 (49,897); Room Air Conditioners: No. of units 7; Production in Nos. 13,000 (12,933); Electrical Wiring Accessories: No. of units 4; Production in Nos. 62,00,000 (64,10,847); Brass Lamp Holders: No. of units 4; Production in Nos. 6,90,000 (7,00,396); Industries Air Conditioners Refri. Equipment : No. of units 18; Production in Rs. lakhs 560 (574); Industrial Cooling Tower: No. of units 3; Production in Rs. lakhs 157 (162).

HEAVY ELECTRICAL INDUSTRIES

Electric Motors. No. of units 20 (19); Production in Million H.P. 2 (1.91); Transformers: No. of units 21; Production in Million KVA, 5 (4.84); Motor Starters: No. of units 11 (12); Production in Nos. 4,30,000 (3,52,920); Elec. Steel Sheets: No. of units 1; Production in M. Tonnes 28,000 (28,112).

Cables & Wires: VIR & PVC Cables: No. of units 25 (26); Production in KM 3,90,000 (3,68,434); ACSR & AAC; No. of units 30 (27); Production in M. Tonnes 70,000 (64,860).

Winding Wires: (a) Enamelled Wires: No. of units 25 (24); Production in M. Tonnes 4,200 (8,394); (b) Paper Cotton Covered Wires and Strips: Production in M. Tonnes 10,000 (2,800).

(a) Paper Insulated Power Cables: No. of units 7; Production in KM 2,300 (2,358); (b) PVC Power Cables: No. of units 10; Production in KM 14,200 (11,677); Bare Copper: No. of units 4; Production in M Tonnos 1,700 (1,007).

HEAVY ENGINEERING INDUSTRIES

Steel Castings: No. of units 41 (42); Production in MT 43,100 (47,202); M.T. Castings: No. of units 14; Production in MT 12,700 (11,100); S. G: Castings: No. of units 13 (12); Production in MT 1,460 (892); C. I. Castings (incl. Alloy Irm): No. of units 95 (127); Production in MT 1,58,000* (1,75,700*).

C. I. (Spun Pipes): (a) C. I. Spun Pipes: No. of units 8; Production in M.T. 1,20,000 (1,33,078); (b) Vertically Cast: No. of units 10 (12); Production in MT 10,000 (2,316); C.I./Steel Shorts and Grits: No. of units 3 (2); Production in MT 2,600 (1,400 est.).
